''We shall hold a mass rally in Belgrade Wednesday and there will be protest rallies all over Serbia until the elections are held,'' Draskovic said at a news conference.

In an interview published Sunday by the Zagreb Vjesnik newspaper, Draskovic predicted that his extreme Serbian nationalist party would triumph in any free,democratic elections.

Despite growing support for Serbian nationalist groups and a hemorrhaging of the Communists' own support, Serbian Communist Party President Bogdan Trifunovic said Monday the party was maintaining its position on holding elections.

''Only with a new constitution will there be conditions for parliamentary democracy. When the new constitution is passed, we shall immediately hold elections,'' Trifunovic told a meeting of the party's Central Committee.

During the televised session, the Central Committee approved a proposal for merging the party with the Serbian Socialist Alliance, which is touted as a popular mass organization, but is led by the Communists and regarded as a puppet group.

Trifunovic said the plan would create a ''modern leftist party of Serbia, which would gather progressive and young people, peasants, workers and intelligentsia.''

The Communists plan to convene a congress in mid-July at which the final decision on the merger is to made.

Trifunovic said Serbian President Slobodan Milosevic ''is being proposed'' for the chairmanship of what would be known as the Socialist Party of Serbia,because of ''all what he has done for Serbia and because of support Milosevic enjoys among the people.

Milosevic, 49, has won enormous personal popularity in the past three years with appeals to Serbian nationalism. He has emerged as the undisputed leader of eastern Yugoslavia, which is mainly populated with Serbs, the nation's majority ethnic group.

The party is apparently hoping that its appeal to non-communists in multi-party elections would be enhanced by Milosevic's leadership and the change in its name.

The Socialist Alliance convened a conference after the central committee meeting at which it also gave its approval to the merger proposal, although several members objected to the way it had been introduced.

They complained that the rank and file had not been consulted by the

leadership, and one delegate suggested that there should be a choice between Milosevic and other candidates for the presidency of the new party.

FAIRHOPE, AL (JUNE 11) UPI - Federal agents took 60 illegal Chinese aliens into custody in south Alabama Monday and announced the arrest of the alleged ringleader of a smuggling operation that planned to bring 35,000 more into the United States.

Immigration and Naturalization Service District Director Thomas Fisher and U.S. Customs Agent Gary Small said the 60 aliens were apprehended at the Fairhope airport near Mobile as they arrived by plane from Panama.

Small said the alleged smugglers, who were also arrested at the airport, planned to bring in 35,000 Chinese nationals from both Panama and Bolivia into Mobile, Atlanta, New York, Los Angeles, Miami, Detroit and other cities.

The ring is believed to be one of the largest alien smuggling operations ever cracked, Small said. Charging the aliens $10,000 each for passage to the United States, the alleged smugglers had expected to reap more than $200 million in profit, he said.

''Besides crushing a major operation, we were successful in arresting the main smuggler and his middleman,'' Small said.

Alfonso Mock-Castillo, the alleged ringleader of the operation, and his associate, Roseana Butcher, were charged with smuggling in illegal aliens and conspiracy. Both charges carry up to five years in prison.

Mock was described as a Panamanian of Chinese extraction who runs a restaurant and trading company in Panama. Butcher allegedly collected payments from the aliens' families.

#90162u2221 06/11/1990 ~United Press International
MONROVIA, LIBERIA (JUNE 11) UPI - Rebel leaders were late for peace talks Monday aimed at ending almost six months of war against the Liberian government, and the talks were likely to be postponed until Tuesday, the government said.

Representatives of the Liberian government and the Liberian Council of Churches, which is to mediate the talks, arrived in Freetown, Sierra Leone on Monday. But rebel representatives, led by their Washington spokesman, Tom Woiwoiyu, had not arrived in the Leonian capital by late afternoon, government spokesmen and reports in Monrovia said.

The talks will probably be postponed until Tuesday, said a spokesman for the Liberian Information Ministry.

Fighting between government and rebel troops appeared to have died down over the weekend and was no more than sporadic, said church officials who keep in touch with missionaries across the country.

''Everyone is hoping that there is some way out of this,'' said the Rev. Richard Striker, secretary-general of an interchurch group calling itself Christians United for Peace.

Both Liberian President Samuel Doe and rebel leader Charles Taylor continued to fight a war of words, however.

In an television interview with CNN, Doe called Taylor ''a criminal.''

''I cannot talk to a criminal,'' Doe said. ''If Charles Taylor thinks that he wants to become the president of this country, the best thing to do is to come here and organize his political party ... for (the) 1991 general election, instead of sending 14-year, 12-year-old children on the battlefront to die.''

Doe said he sent a delegation to the talks in Freetown ''to see what can be arranged in order to put a stop to the killing in our country.''

The Liberian Ministry of Information said Doe also offered to lead a convoy of journalists Tuesday to Robertsfield International Airport to prove that Taylor's men had not captured it.

Taylor claimed last week to have captured the airport, 35 miles from Monrovia.

Taylor, meanwhile, in an interview with the French newspaper Le Figaro, said he would give Doe only a few days to leave the country, insisting

that he would discuss a cease-fire only to prevent a bloodbath.

''But it is out of the question that we discuss other subjects,'' Taylor said. ''My objectives are fixed, and they will not change. Samuel Doe must leave, the vice president must leave, and Gen. Henry Dubar (the army chief of staff) must leave. ... I accept the principle of a negotiation (only) to prevent a bloodbath.''

Doe also repeated his appeal for help from the United States in his interview with CNN.

In Washington, President Bush's press secretary, Marlin Fitzwater, said the United States is ''facilitating'' the Freetown talks by providing the U.S. Embassy as a meeting site. He added, ''We are not, however, mediating (the talks) in any way.''

State Department spokeswoman Margaret Tutwiler Monday said, ''The United States has always called for a political settlement in order to avoid further bloodshed and we hope these talks will lead to that end.''

She said three chartered flights evacuating people from Liberia to neighboring Ivory Coast Sunday carried 257 U.S. citizens and 112 immediate family members. She said 70 U.S. officials and 1,590 American citizens remain in Liberia.

''We are urging everyone to leave as soon as possible,'' Fitzwater said.

Four men each from the Liberian government and rebel camps were scheduled to attend the talks in Freetown.

The government side is represented by Sen. Tambakai Jangaba, the president pro-tempore of the Senate, Information Minister Emmanuel Bowier, Justice Minister Jenkins Scott, and acting deputy Foreign Minister Elbert Dunn.

The Liberian Council of Churches, which was to mediate the discussions, sent its president, the Rev. J.K. Levee Moulton, Archbishop Michael Francis of the Roman Catholic Church, Bishop Ronald Diggs of the Lutheran Church and the former secretary-general of the All-African Council of Churches, Canon Burgess Carr.

Apart from Woiwoiyu, the composition of the rebel delegation was not known.

An uneasy calm fell over the Liberian capital Monday, although citizens discovered eight mutilated bodies in a house in the town, the latest victims of a wave of banditry that has hit Monrovia over the past three weeks.

#90162u2261 06/11/1990 ~United Press International

MOSCOW (JUNE 11) UPI - The foreign ministers of the Soviet Union and West Germany met in the Byelorussian city of Brest Monday to discuss the status of a united Germany, but reported no major progress on the main issue of NATO membership.

Soviet Foreign Minister Eduard Shevardnadze and his West German counterpart Hans-Dietrich Genscher said after more than six hours of discussions they were confident of future progress toward unity, but there was no breakthrough on the NATO question.

The two decided Monday to meet again before June 22, when the foreign ministers of East and West Germany and the four World War II victors were to meet for the next round of the so-called two-plus-four talks.

On the eve of the trip to Brest, Genscher offered the Soviet Union economic and financial cooperation to help Soviet President Mikhail Gorbachev's reforms as an incentive to an agreement on allowing a reuniting Germany to be a member of NATO.

The choice of Brest, on the border with Poland, for the negotiations was laden with symbolism - personal and historic.

Shevardnadze's brother was killed near Brest on the first day of the last war with Germany, when Adolf Hitler's army invaded on June 22, 1941.

After their talks Genscher and Shevardnadze visited the grave. Shevardnadze's brother became one of the first casualties in the Soviet Union's most costly confict, one that saw 8 million Soviet soldiers killed.

The war ended with the Red Army driving back all the way to Berlin and remaining in the eastern part of Germany, which they eventually helped set up as a Communist state now about to disappear in the coming reunification. Berlin, which was also divided, is in the eastern zone, now called the German Democratic Republic.

In March 1918, also at Brest - which was then called Brest-Litovsk - the Soviet Union concluded a treaty with Imperial Germany pulling out of World War I, saving the infant Communist state by giving away one-third of its

territory.

Then as now, the Soviet Union was looking for breathing space to put its internal affairs in order.

Gorbachev, however, says his new political thinking is based on establishing a common European home with security for everyone, a united Germany and the Soviet Union included.

He has called for establishing a ''common European home'' with security for everyone of which a united Germany as well as the Soviet Union will be a part.

Monday's meeting came soon after the Washington summit of Gorbachev and President Bush in Washington and also follows key sessions of the NATO alliance in Turnberry, Scotland, and the Warsaw Pact in Moscow.

''This (timing) is not accidental,'' the official Tass news agency said. ''The foreign aspects of the German unity are in the center of world politics.

''The solution of this question will determine the nature and pace of the European process and the building of a European home,'' Tass said. ''It is quite clear that hasty decisions or the choice of only one variant are absolutely inadmissible.''

PORTLAND, OR (JUNE 11) UPI - The cruise ship that ran aground and spilled oil into the waters off Massachusetts has had serious problems before, including a five-alarm fire while undergoing renovation at Portland last December.

That blaze also triggered a federal Immigration and Naturalization Service investigation that led to the departure of nine foreign workers illegally in the United States.

The smoky Dec. 6, 1989, fire occurred as the vessel began a three-week renovation project at the Portland Ship Repair Yard. The blaze, later traced to sparks from a welder's torch, caused almost $2 million damage and injured two people.

About 125 firefighters, two-thirds of the city's on-duty force, battled the flames and contained the blaze in about two hours.

''It's a hard-luck ship,'' Port of Portland spokesman Dick Montgomery said Monday of the crippled 617-foot cruise liner that ran aground Sunday on rocks off Woods Hole, Mass.

-30- 1147

#90162u2316 06/11/1990 ~United Press International

WASHINGTON (JUNE 11) UPI - The United States and Mexico agreed Monday to begin work on a free-trade accord, ignoring for the moment a contentious border-crossing issue that could complicate negotiations and draw fire from organized labor.

In a joint statement issued by the White House, President Bush and Mexican President Carlos Salinas de Gortari set the stage for formal negotiations that could begin after the completion of multilateral trade talks in December.

Under a process driven by political expedience, U.S. and Mexican negotiators will have until December to do the initial spadework on key elements of a trade pact with one notable exception: the free flow of workers across the border.

Organized labor has expressed concern about Mexican migrant workers flooding the market for American jobs along the border. Labor and endangered American industries also fear a flight of production from the United States to Mexico, where labor is cheaper and safety and evironmental standards less stringent.

In deference to those sensitivities, White House press secretary Marlin Fitzwater said the freedom-of-movement issue would be ''put aside in these preliminary phases'' and be tackled later in the formal negotiations.

''The jobs issue is a difficult one,'' he said, ''and part of the reason that that's not in here is because of the complexity of that task. But it's one that both sides are aware of, will take into consideration.''

Because formal negotiations would require congressional approval, limiting the talks with Mexico to ''consultations and preparatory work,'' at least for this year, avoids election-year political complications and time pressures.

Sen. Lloyd Bentsen, D-Texas, chairman of the Senate Finance Committee that will have to authorize any formal negotiations, predicted the talks ''will be difficult and they'll take some time'' because of ''the difference in

wages between our two countries.''

The prospective U.S.-Mexico trade agreement, which has stirred controversy on both sides, would be modeled after an 18-month-old U.S.-Canada accord that over 10 years will remove most barriers to trade and investment.

That agreement required almost four years of tough negotiations. And although a deal with less-developed Mexico is viewed as far more difficult Fitzwater voiced hope it could be done ''in considerably less time'' in as little as one to three years.

The ultimate goal, he said, would be a North American trade zone comprising the United States, Canada and Mexico, which prompted Bush to inform Canadian Prime Minister Brian Mulroney Sunday night of his talks with Salinas.

Seeking ''a powerful engine for economic development,'' the joint statement said Bush and Salinas ''share a commitment to forge a vigorous partnership for sustained economic growth and opportunity'' through trade and investment.

Like the U.S.-Canada accord, the eventual pact with Mexico would target tariffs and other import barriers for elimination or reduction and establish copyright, patent and trademark protections, dispute settlement procedures and means to increase the two-way flow of goods, services and investment.

U.S.-Mexican trade reached about $52 billion last year. Salinas, who decided to push hard for the trade agreement only last month, sees expanded markets and foreign investment as critical to his drive to reform the Mexican economy.

Fighting nationalist fears of Yanqui imperialism and economic exploitation Salinas has fought to modernize that economy by stripping away layers of state control, protectionist policies and political corruption.

Bush and Salinas directed their subordinates to ''move in a timely manner'' toward formal trade negotiations and report back ''as soon as practicable, but in any event before their next meeting,'' set for Mexico City in December.

CHARLESTON, SC (JUNE 11) UPI - An evacuation plane landed in Charleston Monday carrying 349 Americans, including a man who left behind his Liberian wife and eight children.

Walter Barron, 68, of Los Angeles, heeded pleas form U.S. officials and fled the strife-torn West African Nation Sunday. He said his family had scattered in the jungle and does not know how to contact them. "But I feel they are safe because they are in the upcountry, the bush," said Barron, a tall man with thin, graying hair and a beard.

Last week when the United States urged all Americans to leave Liberia because of a civil war that has raged there for the past five months, Barron was in Monrovia, the capital.

Ahmed M. Saide, 23, who was attending high school in Liberia, described Monrovia as "deadly quiet. ... You can't even go in the street. You can't get a cab to go anywhere. You can't get food to eat."

On Sunday the U.S. government chartered an American Trans Air L-1011 to carry evacuees from the Ivory Coast to Charleston. The evacuees were shuttled out of Monrovia to the Ivory Coast on smaller planes. From the Ivory Coast, the evacuation plane flew to Spain, then to Gander, Newfoundland and finally on to Charleston.

Upon arrival at the Charleston Air Force Base terminal, each of the 175 children aboard the plane was given a teddy bear. The Salvation Army said the bears were given to make the 13-hour flight seem worthwhile, but not all of the children were impressed. "I'd rather have a Teenage Mutant Turtle," said an 8-year-old boy.

Most evacuees said although they did not see fighting between government troops and rebels, they were glad to be back in the United States. John Connolly, a missionary from Madison, Ga., escaped with his wife and child, but the family could not bring any of their possessions with them.

"The United States has been warning us for weeks to go ahead and leave, and now is our last chance before the rebels come into Monrovia," Connolly said. "If (Liberian) President (Samuel K.) Doe doesn't step down, things are going to deteriorate."

At least one evacuee, Jolemelle Gibson-Doe, said she was more worried about government troops than about the rebels approaching Monrovia. Gibson-Doe left her daughter behind in Liberia.

"She is 24 but she's a young miss, and if the soldiers are on a rampage they could catch her and rape her," Gibson-Doe said. "We're hoping the rebels come soon."

#90162u2330 06/11/1990 ~United Press International

WASHINGTON (JUNE 11) UPI - Lawmakers wasted no time Monday in reopening a

campaign for a constitutional amendment to ban flag desecration, but leaders of the effort said it will fail without help from citizens - especially veterans.

The Supreme Court, in a 5-4 ruling Monday, struck down the anti-flag burning law Congress passed last year and within minutes Senate Republican leader Robert Dole of Kansas declared, ''Now we need to move to a constitutional amendment.''

Dole said he hoped to bring an amendment giving Congress and the states the power to prohibit flag desecration to the Senate floor by Thursday - Flag Day. An identical measure is set to go before the House Judiciary Committee June 19 and could reach the House floor by the end of the month.

A constitutional amendment must be approved by two-thirds votes in both the House and Senate, then go to the state legislatures for ratification. At least three-fourths of the states - 38 - must approve any change in the Constitution.

The high court last year struck down a Texas law against flag burning, prompting Congress to pass the Flag Protection Act of 1989. In ruling that law unconstitutional Monday, the court said it also violated the right of free speech guarnateed by the First Amendment.

Dole predicted supporters could garner the necessary two-thirds majority in the Senate, but a House sponsor of the amendment, Rep. Sonny Montgomery D-Miss., said, ''It's not going to be easy to get a two-thirds vote in the House.''

''We're going to have to hear from the people of this country who want to stop this flag burning and desecration of the flag,'' Montgomery said, adding, ''The veterans organizations are going to have to go to work. If they don't I'm not sure we can get a two-thirds vote.''

House Republican leader Robert Michel of Illinois predicted a rush of members to embrace a proposal that already has 171 sponsors, but conceded getting the required two-thirds votes is ''not an easy task to perform.''

An amendment to bar desecration of the flag, he said, is politically attractive ''because who wants to be against the flag, mother and apple pie?''

But opponents of the amendment cautioned against what Sen. Patrick Leahy, D-Vt., called ''the fast food school of constitutional amendments.''

Senate Democratic leader George Mitchell of Maine stressed his strong opposition, saying the Bill of Rights was the ''most concise, the most effective and the most powerful statement of civil liberties devised by

man.''

Mitchell said it would be a ''grievous error'' to change the First Amendment's guarantee of free speech in ''haste and the heat of controversy.''

Rep. Don Edwards, D-Calif., chairman of the Constitution subcommittee of the House Judiciary Committee, said, ''The Bill of Rights is what this country is all about. It has never been amended in 200 years. All over the world democracy is breaking out and the United States, which is supposed to be the model of democracy ... is talking about weakening the Bill of Rights.''

Assistant House Republican leader Newt Gingrich of Georgia conceded the amendment path will be difficult.

''I think candidly it will be a difficult vote. I do not believe that there is as of today an automatic victory. ... Part of it depends frankly on the energy and enthusiasm of various veterans organizations,'' said Gingrich, who said the question does not need to be a partisan issue.

But some members suggested the issue could permeate this fall's congressional campaigns.

''If you vote against it and you go home, you're going to hear from a lot of people,'' Dole said. ''It would make a good 30-second (television) spot.''

''Undoubtedly some politicians will try to exploit this decision for election year mischief,'' said Sen. Howard Metzenbaum, D-Ohio.

''Dissenters who burn the flag and cynical politicians who wrap themselves in the flag are both objectionable,'' said Metzenbaum. ''But we don't need a law against them. We can just ignore them.''

Miles Epling, national commander of the American Legion, called on Congress to act quickly on a constitutional amendment to protect the flag.

''Congress has the power to permit the American people to vote on this issue in the ratification process. It's time to let the people be heard,'' he said.

#90162u2339 06/11/1990 ~United Press International

NEW YORK (JUNE 11) UPI - The dollar mostly declined in lackadaisical New York trading Monday with most of the dealing taking its cue from brisk movement earlier in Tokyo.

"Everybody seems to be waiting for something to happen," said trader Thomas Palladino of Amsterdam-Rotterdam Bank. "There is no trend, there is no feeling," said Graham Beale, chief dealer at the Hongkong & Shanghai Banking Corp. "Everybody I speak to tells me the same thing - we don't know what to do."

But Chicago-based technical analyst Jim Chorek of MMS International said he was convinced the dollar was correcting from its rally of last week, in

which it tested the 1.70 mark level. He looked for another surge.

In late New York trading, the dollar was changing hands at 1.6925 West German marks, down from 1.6975 late Friday, and at 154.75 Japanese yen, ahead from 153.48.

Currency traders noted the lack of any significant new information on German monetary union and U.S. interest rate policy - two areas of overriding concern to the becalmed global foreign exchange market.

The New York market mostly played out the upward moves by West Germany's mark and by the dollar seen earlier in Tokyo, dealers said. Both currencies posted significant gains against the yen.

Selling the yen for the mark continued in New York, Palladino said. Beale saidJapanese banks were still buying dollars - either responding to Japanese trade data or covering portfolio shortages of the unit.

Chart-watcher Chorek said the dollar since last June had made what he called a five-wave pattern downward. It now appears to be executing a three-part upward swing heading for a target of 1.78 marks, he said.

His predictions were based only on technical patterns - but Chorek said the dollar's tendency to rally in summer improved the odds.

Other dollar rates: 1.4410 Swiss francs, down from 1.4490; 5.6960 French francs, off from 5.714; and 1,243 Italian lire, off from 1,248. The British pound moved up to $1.6860 from $1.6845.

In Europe, caution about U.S. economic indicators due out this week weakened the dollar in quiet trading, dealers said.

The dollar edged lower in Frankfurt to 1.6925 deutsche marks against 1.6990 at Friday's close and eased in Zurich to 1.4395 Swiss francs from 1.4505.

A Zurich trader said the dollar weakened against the Swiss franc on reports the Swiss National Bank would continue a tight monetary policy. In London, the pound moved up slightly to $1.6860 from $1.6830.

The dollar retreated in Paris, Brussels and Milan, to, respectively, 5.6975 French francs compared with 5.7030, 34.75 Belgian francs against 34.8525 and 1,243 Italian lire against last week's 1,245.20.

Earlier in Tokyo, the dollar climbed on fears of political instability in the Soviet Union and expectations of stable U.S. interest rates, closing at 154.10 yen vs. Friday's 152.65 yen.

Dealers sought the dollar as a safe haven in response to continuing unrest in Soviet domestic affairs as well as to the strengthening conviction that the Federal Reserve will not lower U.S. interest rates soon.

Gold rose in Zurich to $355 an ounce, compared with $354 an ounce at the end of trading on Friday, and was up in London at $355 an ounce against $354.50.

Republic National Bank in New York closed cash gold at $355.75 an ounce, up from $355.25 Friday. The New York Commodity Exchange settled gold at $356.40 an ounce, up from $355.70.

Silver was lower in Zurich at $5.00 an ounce against $5.05 and fell in London to $5.01 an ounce compared with $5.03.

Republic closed cash silver at $5.02 an ounce, down from $5.025. Comex spot silver ended at $5.012 an ounce, vs. $5.007.

EGLIN AIR FORCE BASE, FLA (JUNE 11) UPI - An Air Force armaments lab is working with a long-life capacitor that could revolutionize the battery industry and make electric cars a reality, the program manager said Monday.

Duane Finello, an electronics engineer, said that unlike commercial batteries that can be recharged only a limited number of times, the ultra-capacitor can be recharged indefinitely and keeps each charge much longer.

''You can power it up anytime you want, and it will always work at the moment you need it, at the same strength,'' Finello said.

Finello said the lab is working with two variations of the ultra-capacitor. A liquid type is in the advanced stages of research while a dry type is in the exploratory stage of development.

''We believe that the dry capacitor has the greatest potential for consumer use due to its simplicity of design and rechargeability,'' said Finello, who thinks it could be on the market in five years.

''It'll take a while before the price comes down,'' said Finello, who said it would compete with nickel cadmium batteries in such devices as electric shavers and cordless tools.

Batteries now on the market work through a chemical reaction, like acid on zinc or lead plates. When the action is complete, the carbon zinc batteries are useless and lead acid batteries must be recharged.

With the ultra-capacitor, through the use of a special coating of Titanium ions are trapped in a series of grooves. An insulator made of polymer electrolyte taps the energy produced by the ions.

Finello said he did not know how long the charge in the ultra-capacitor would last, but said there was no reason for ions to escape. Tests were also being conducted to determine the shelf-life of the capacitor.

''Compared to the nickel cadmium battery, which is limited to 100 charges, the ultra-capacitor has an important advantage. It has no limit to the number of times it can be charged,'' Finello said.

Finello said the number of times nickle cadmium batteries can be recharged has kept the electric vehicle from becoming a reality. He said they have to be replaced each year.

''I would lengthen much greater the rechargeable cycle,'' Finello said. He said it would extend the life of the charge by a factor of 10.

The capacitors were developed for weapons systems.

''What we were looking for was a dependable energy source for a category of weapons known as hard-target penetrators. We wanted something that would be small, survive the penetration and be able to supply the fuze with the power to initiate the post-impact explosion,'' Finello said.

The liquid capacitor was developed by Pinnacle Research Institute, Cupertino, Calif. It was later enhanced through an in-house effort at the

Air Force Armament Laboratory.

WASHINGTON (JUNE 11) UPI - The Federal Reserve Board said Monday it granted permission to Citicorp, the nation's largest banking concern, to conduct business on the Tokyo International Financial Futures Exchange.

The Fed said Citicorp, which is headquartered in New York and has total assets of $230.6 billion, will engage in the activity through a subsidiary Citicorp Futures Corp., also of New York.

The futures activity on the Tokyo market will include executing and clearing Euroyen, Eurodollar and Yen/Dollar futures contracts, as well as providing futures advisory services, the Fed said.

In another order, the Fed also granted Citicorp permission to act as the agent in the private placement of all types of securities through another subsidiary, Citicorp Securities Markets Inc.

WASHINGTON (JUNE 11) UPI - The World Bank Monday announced a $62.5 million loan to help Uruguay increase its electricity output.

The project to modernize the South American country's energy sector includes building a gas turbine facility to produce electricity in the capital of Montevideo, and improvements in the distribution network in the area, the multilateral organization said.

Total cost of the project is $239.8 million. The Uruguayan Administration Nacional de Usinas y Transmisiones Electricas, which is in charge of the program, will provide $126.1 million, and the U.S. Export and Import Bank another $51.2 million to help finance the plan, the World Bank said.

#90162u2417 06/11/1990 ~United Press International

(JUNE 11) UPI - The stern quarter of the burning tanker Mega Borg is now under water, increasing the danger that the ship and its 38-Million gallons of oil will sink into the Gulf of Mexico. Coast Guard Chief Todd Nelson says the tanker- which is 57 miles southeast of Galveston, Texas- is in NO immediate danger of sinking. But the release of burning oil from the ship has increased. Firefighters earlier planned to spray chemical foam on the ship, but that was delayed when a new spurt of burning oil gushed from the tanker's pump house.

Government prosecutor Dan Webb says today's sentencing of John Poindexter for Iran-Contra crimes is ''fair and proper.'' U-S District Judge Harold Greene sentenced Poindexter to six months in prison for masterminding the effort to cover up White House involvement in the scandal. The former national security adviser was convicted April 7th on five felony counts, including conspiring to deceive Congress. Poindexter's chief lawyer says he will appeal the sentence.

The balance of world power is shifting. Secretary of State Cheney today told a congressional committee that 23 foreign countries are known or believed to be making chemical weapons. They include Iran, Iraq and Libya. The Pentagon chief says Iraq is already producing missiles capable of reaching Israel.

Florida Governor Bob Martinez is claiming credit for sparking a crackdown against the rap group 2 Live Crew. Two members of the band were arrested yesterday and charged with violating state obscenity laws during a club performance. Martinez says he initiated the obscenity probe four months ago.

Police in Columbus, Ohio, have NOT filed charges against a 71-year-old woman who shot and killed one of two intruders during the weekend. Peggy Miller says she NEVER answers the door at night anymore without packing a pistol. On Saturday night, she used it when two men tried to force their way into her home.

GALVESTON, TX (JUNE 11) UPI - Two fireboats began an all-out effort Monday to extinguish a raging fire on the tanker Mega Borg in the Gulf of Mexico, but a new stream of flaming oil burst from the vessel and seas began washing over the stern.

Coast Guard Chief Todd Nelson said the tanker, carrying 38 million gallons of light crude, was not in imminent danger of going under, but the latest setbacks increased the chances of sinking and causing a major oil spill. The vessel has been burning since early Saturday 57 miles southeast of Galveston. "We're not talking about any immediate danger of sinking," Nelson said, but added, "We are going to have an increased release of oil."

When new flames appeared at midday, Smit America, the private salvage and firefighting firm, maneuvered a third fireboat - one of six on site - to the port side of the Norwegian tanker and quickly "knocked back" the fire.

Nelson speculated that weight shifting aboard the Mega Borg pulled the stern deeper into the gulf. Water probably was displacing oil in the vessel, he explained, and the water is heavier than oil. The stern deck "is awash," Nelson said. "How much water is on there, I don't know. It changes with each passing second."

The tanker has 16 cargo compartments, and at least one is spilling oil, Nelson said. An estimated 100,000 gallons had spilled by Monday afternoon. The crews must extinguish the fire, then plug an apparent leak in at least one of the storage compartments to keep the 853-foot-long vessel afloat and prevent a spill of the ship's cargo and possibly threaten the environmentally fragile Texas coast.

Its 38 million gallons of crude oil is more than three times the amount spilled in Alaska's Prince William Sound on March 24, 1989, by the Exxon Valdez in the worst oil spill in U.S. waters. But the Alaska spill involved heavy crude; any light crude spilled by Mega Borg was likely to disperse and evaporate relatively quickly.

Two fireboats were on each side of the stern, and one was ready to shoot foam with a long-distance cannon onto the flames while the others fed water and more foam from a shorter distance. That foaming was delayed until the burning oil could be controlled.

The firefighting effort began at 12:10 p.m., according to the Coast Guard in Galveston, then was halted. Once foaming can begin, the Coast Guard said, the fire was expected to be controlled within one hour. At 12:45 p.m. all six fireboats had started pouring water on the fire, but had not started to use foam, even though had been snuffed out, Nelson said.

"We're not going to start until it's safe," Nelson said, noting that the operation may not begin before Tuesday. "That contractor isn't going to send his people in there until all the equipment is working. ... There's just no way that anyone wants anyone to be endangered just for the sake of fighting this fire." Nelson said Smit America has enough foam, 100 tons, to spray for two hours.

After the foam was to be applied, the boats were to move in closer, spraying more foam and also spraying water to protect firefighting crews boarding and approaching the fire across the deck to pump more foam into the superstructure and into the below-decks engine and pump rooms.

An explosion in the engine room at 1 a.m. Saturday started the fire in the tanker, which has since been riding at anchor 57 miles southeast of Galveston. Two crewmen died, two were presumed dead and 17 suffered non-serious injuries in the initial explosion. There have been no injuries since.

Five explosions on Sunday signaled that a leak had begun. Salvage experts said the cargo was flowing into the inferno of the engine room, igniting and pouring - still aflame - over the stern into the water. Burning oil stretched 1,500 feet downwind behind the ship.

Lt. Cmdr. Frank Whipple said only three feet of freeboard was showing from the waterline to the deck at the stern early Monday and the ship was listing slightly to port.

Whipple said the salvage contractor put people aboard Monday morning to measure the amount of oil in the cargo compartments to try and determine which compartment was leaking.

The Coast Guard, using three oil skimmers, began to clean up an estimated 100,000 gallons of spilled crude oil that has drifted west, toward the Texas coast. The spill was described as "a heavy coating" three miles long and 250 feet wide, surrounded by a light sheen ten miles long and 600 feet wide.

On Sunday night a private company, Oops Inc. of New Orleans, dumped 4,000 gallons of chemical dispersants on the floating oil, but it was not known Monday morning whether the dispersants were having an impact.

The firefighting effort had been delayed for some two days while equipment particularly the long-distance firefighting cannon, was gathered on the site.

WASHINGTON (JUNE 11) UPI - A group of supporters waving American flags and shouting, ''We love you, John,'' greeted John Poindexter Monday as he left U.S. District Court facing six months in jail for his role in the Iran-Contra scandal.

Poindexter, accompanied by his wife and lawyer, strode through a mob of reporters, photographers and television cameras without comment to thank the nearly 100 demonstrators at the courthouse steps.

He stood for a few moments at the top of the steps behind a large American flag, smiled and shook hands with some in the crowd who chanted ''Full pardon now!''

''Thanks for coming out,'' Poindexter told them before he walked to the driveway and into a mini-van where he joined other family members.

The demonstrators, mostly from a coalition of conservative organizations,

stood outside the courthouse for more than an hour, carrying banners which read, ''God Bless Admiral Poindexter,'' and chanted, ''Hey, hey, ho, ho, let the admiral go!''

Supporters said they were angered when they heard Poindexter, who was convicted on five felony counts for trying to cover up the White House role in the Iran-Contra scandal, was sentenced to six months in prison. He is the only Iran-Contra defendant given a jail term.

''Admiral Poindexter was made the fall guy,'' said Richard Tendler, a spokesman for the Council For Inter-American Security. ''Even Oliver North didn't go to jail so I guess someone has to take the blame.''

Members of the group called said they are hoping they can put pressure on President Bush for a pardon.

''I think Bush should pardoned both Poindexter and North because they were simply taking orders from their superiors,'' said Retired Air Force Gen. Ben Partin said,

WASHINGTON (JUNE 11) UPI - The two top U.S. and Canadian agriculture officials called for freer agricultural trade worldwide Monday, but there was disagreement over Canada's proposal to continue to allow quotas on some farm imports.

Both nations have been outspoken advocates for dismantling trade barriers and eliminating export subsidies worldwide, despite holding somewhat different positions at world trade reform talks.

At the conclusion of a meeting in Calgary, Canada, Canadian Agriculture Minister Donald Mazankowski and U.S. Agriculture Secretary Clayton Yeutter reaffirmed their support for elimination of export subsidies, "progressive reductions" in trade-distorting farm subsidies and improved access to foreign markets. "Yeutter and I agreed on th need for significant progress in agricultural negotiations" at the trade talks, Mazankowski said in a statement.

Agriculture is the thorniest issue facing negotiators because of deep disagreement between the United States and the European Community. The Community says a reduction in overall government support is the most practical goal but the United States is seeking elimination of all trade-distorting subsidies and barriers.

Negotiators are under instructions to try to draft a framework for agreement in time for a meeting of trade ministers in late July. The July meeting is regarded as crucial to ensuring a successful conclusion to the talks.

Although Yuetter and Mazankowski stressed areas of agreement in their joint statement, Yeutter used a luncheon speech to criticize Canada for suggesting a revision to a world trade rule that spells out when nations can restrict farm imports.

The United States wants to eliminate the rule, known as Article 11-2C. Canada's proposal would more clearly define when import quotas could be

used in conjunction with domestic supply management programs.

In prepared remarks, Yeutter said Article 11 could be a "huge loophole" in trade reform and said "the United States cannot support" Canada's proposal." "The thesis of the proposal, that quantitative import controls can be consistent with greater trade liberalization, is a mistake," he said.

Also in his speech, Yeutter said U.S. regulations to implement an agreement for the two nations to harmonize their meat and poultry inspection rules "should be issued shortly." Harmonization would be in effect for one year as an experiment in letting the products move freely across the border. The plan was announced in February.

#90162u2534 06/11/1990 ~United Press International

MOSCOW (JUNE 11) UPI - The leaders of the three Baltic republics planned a joint meeting Tuesday with President Mikhail Gorbachev to discuss their independence drives, a Latvian spokesman said Monday.

The announcement of the planned meeting came as Lithuanian Prime Minister Kazimiera Prunskiene was in Moscow waiting to discuss the Kremlin's economic blockade of her republic with Soviet Prime Minister Nikolai Ryzhkov.

Ryzhkov was busy late into the night Monday with a Communist Party Central Committee meeting and other business, so it was likely the meeting with Prunskiene would be held Tuesday, a representative of the Lithuanian mission in Moscow said.

Algis Cekuolis, spokesman for the Lithuanian mission, said Ryzhkov told Prunskiene by telephone last week that a May 31 Lithuanian government offer to suspend laws implementing the republic's independence declaration was ''more or less an acceptable basis for talks.''

Previously, the Soviet leadership had demanded that Lithuania rescind or suspend the actual March 11 declaration of independence, a demand the Vilnius government has steadfastly refused to meet.

''The very fact that they are willing to talk on the basis of not revoking the March 11 declaration is movement (by Moscow),'' Cekuolis said.

Latvian government spokesman Pauls Raudseps said by telephone from Riga that Latvian President Anatoljs Gorbunovs, Lithuanian President Vytautas Landsbergis and Estonian President Arnold Ruutel had scheduled a joint meeting with Gorbachev to discuss their republics' independence drives.

The three Baltic presidents met Monday in the Lithuanian town of Panevezys to discuss strategy, Lithuanian government spokesman Edward Tuskenis said. Details of their talks were not released.

Raudseps said the three presidents would go to Moscow Tuesday to attend a meeting of Gorbachev's Federation Council, which groups the leaders of the 15 Soviet republics.

The three Baltic presidents have refused to attend previous Federation Council meetings on the grounds that, after declaring independence, their regions were not part of the Soviet Union.

Cekuolis said Landsbergis's willingness to attend Tuesday's meeting was a compromise on his part.

Cekuolis said Prunskiene and Algirdas Brazauskas, deputy prime minister of the republic and head of its independent Communist Party, were originally to meet with Ryzhkov Monday evening, but the Soviet prime minister was delayed in a meeting of the Communist Party Central Committee.

The mission said there were no plans for Prunskiene and Brazauskas to meet Gorbachev, who cut off oil, most natural gas and other supplies to Lithuania in an effort to force the republic to rescind or suspend its March 11 declaration of independence.

Prunskiene met with Gorbachev May 17 to offer a compromise under which the republic would suspend all acts implementing independence but not the declaration itself during negotiations on secession.

Gorbachev rejected last month's offer, saying it did not go far enough and that no negotiations were possible while the March 11 declaration remained in force.

The Prunskiene-Ryzhkov meeting was to focus on the economic situation in the republic, where the cutoff of energy supplies has closed many businesses and caused serious economic problems.

''The aim of the visit is to discuss a number of problems, mainly of an economic character, that have arisen in the relationships between Lithuania and the Soviet Union,'' Brazauskas told the Soviet news agency Tass.

Brazauskas said the Lithuanian leaders brought a response from the republic's government to Gorbachev's demand, once again offering to suspend all actions resulting from the declaration of independence but not the proclamation itself.

NEW YORK (JUNE 11) UPI - Bernard Shaw will return as co-anchor of CNN's primetime newscast, ''Primenews,'' the network announced Monday.

Shaw, CNN's principal Washington anchor who co-anchors ''The World Today'' with Catherine Crier, now will do ''Primenews'' in tandem with Atlanta-based Lou Waters.

''We decided we really wanted a Washington presence at the anchor desk for 'Primenews,''' CNN President Burt Reinhardt said. ''Since Bernie's journalistic talents and reputation are second to none in this industry, it's perfect to move him back to 'Primenews.'''

Shaw and Waters in the past have co-anchored much of CNN's election and national convention coverage together. Shaw will continue to anchor much of CNN's summit, election, convention and other special event coverage.

#90162u2618 06/11/1990 ~United Press International

LOS ANGELES (JUNE 11) UPI - Christian Brando, the son of actor Marlon Brando, may seek to strike a plea bargain with prosecutors to settle charges that he shot and killed his pregnant half-sister's boyfriend, his lawyer said Monday.

While no plea bargain negotiations have begun in the case, a defendant entering such a deal typically would either plead no contest to the charges or admit guilt to lesser charges.

Word of the potential for a plea bargain came on the same day that criminal defense lawyer Robert L. Shapiro announced that he has been hired by the defendant's father, actor Marlon Brando, to replace civil rights lawyer William Kunstler as defense counsel.

After a brief court appearance by Christian Brando, 32, Shapiro said it was ''a little premature'' to hold plea bargain talks with prosecutors, but added, ''We're leaving everything open. We're not eliminating any possibilities.''

He said the defense was conducting its own investigation of the case, in part so that ''we will have all the facts,'' if plea bargain discussions begin.

Shapiro said the defense investigation already has included a partial reconstruction of the crime scene by ''the country's most respected criminalist.'' He declined to identify the specialist.

And a second autopsy commissioned by the defense supports Christian Brando's contention that the shooting was an accident, Shapiro said.

The New York-based Kunstler, a longtime friend of Marlon Brando's, is not experienced in murder cases and lost a bid on May 22 to have bail set for Christian Brando.

Shapiro said Marlon Brando decided to hire him to represent his son because he wanted a seasoned criminal defense lawyer whose practice is based in Southern California.

''I really think Kunstler was called in just for the initial stages of the case because of his relationship with Marlon,'' Shapiro said. He said Kunstler, who was not available for comment, will continue to act as ''an adviser'' in the case.

Christian Brando appeared in court Monday to schedule a preliminary hearing, but the judge postponed the scheduling until June 25 to give Shapiro more time to investigate the case.

The younger Brando is charged with shooting to death Dag Drollet, 26, the boyfriend of Cheyenne Brando in her father's 12-room estate in the Santa Monica Mountains May 16.

Police said the shooting occurred after Christian Brando accused Drollet of beating his half-sister. Prosecutors said Drollet was shot in the back of the head while watching television.

Christian Brando has admitted to police shooting Drollet, but said it was

an accident that occurred while he and Drollet were wrestling for the weapon, a .45-caliber handgun.

Along with murder, Christian Brando, who remained in custody without bail, is charged with illegally possessing a machine gun and a silencer. He has pleaded innocent to all the charges.

If convicted of first-degree murder, he could be sentenced to 25 years to life in state prison. Prosecutors are not seeking the death penalty.

#90162u2619 06/11/1990 ~United Press International

NEW YORK (JUNE 11) UPI - Thousands of serious and curious shoppers browsed over the office equipment of Drexel Burnham Lambert Inc. Monday, hunting for bargains among the remains of the fallen Wall Street powerhouse.

Drexel's trading rooms, conference rooms and hallways, once bustling but now covered with grime and broken glass, were open to the public for a preview of the bankrupt investment firm's wares, scheduled to be sold at auction Wednesday.

''It's kind of eerie,'' said Max Kantzer, who was helping his father shop for office furniture. ''It's like going aboard a sunken ship.''

Drexel is selling everything from paintings to paper shredders and copiers to complete kitchens at the auction, which will be held at the Jacob Javits Center.

Most shoppers at the preview crowded Drexel's ninth floor, where traders once dealt daily in millions of dollars in equities. The open room is filled with hundreds of computer terminals - many still in boxes and never even opened.

Others shopped for conference tables and chairs on the 39th floor. There the windows afford a stunning view of New York harbor, lower Manhattan and ironically, the U.S. Bankruptcy Court building, where Drexel filed for bankruptcy protection Feb. 13.

Although most visitors to 60 Broad Street came looking for equipment and supplies, some admitted they had come to see Drexel itself.

''It was the great demise of a great money-maker,'' said Patrick DeWinter, an art history professor from Italy. ''You can see all the trappings of affluence here.''

Henry Kantzer, an international transportation consultant, said he was struck by how much Drexel must have spent on overhead.

''I'm going to ask my broker where his office is,'' Kantzer said. ''If it's anything like this, I think I'm paying for it.''

Even the tiniest details gave a glimpse to what life once was like at Drexel. A terminal screen in the trading room displayed a poker game, complete with a computerized image of a woman lounging in an evening gown.

Lying on one table was a discarded market forecast summary dated Feb. 13 - the day Drexel defaulted on more than $100 million in loans and filed for protection from its creditors.

Most of Drexel's furniture and equipment is to be sold in lots, leaving few bargains for individual buyers, said John J. Perez, who had hoped to outfit his architectural office.

''People who resell furniture will make a killing in here,'' he said. ''There's no way you can compete with them.''

His partner, Fran Martini, added that Drexel's conservative furniture wasn't to her liking anyhow.

''It's kind of dated,'' she said, looking at a rosewood and chrome table. ''It's not what we were looking for.''

-30- 2953

#90162u2649 06/11/1990 ~United Press International

(JUNE 11) UPI - The situation is getting worse aboard an oil tanker that's burning out of control in the Gulf of Mexico off the Texas coast. Efforts to spray chemical foam on the blaze were delayed today when a new stream of flaming oil burst from the ship. The stern deck is now under water, increasing chances the ship might sink along with its 38-Million-gallon cargo of oil. A Coast Guard spokesman speculates that weight shifting aboard the Mega Borg pulled the stern deeper into the water.

Reaction on Capitol Hill was quick following today's ruling by the Supreme Court striking down an anti-flag burning law passed by Congress last year. Within minutes of the court's 5O-P leader Robert Dole said- quote- ''Now we need to move to a constitutional amendment.'' Dole says he hopes to bring an amendment barring flag desecration to the Senate floor by Thursday- Flag Day. If it's approved, it would mark the first-ever limit to the First Amendment free speech guarantee.

John Poindexter is going to jail. U-S District Judge Harold Greene today sentenced President Reagan's one-time national security adviser to six months behind bars on five felony counts stemming from Poindexter's

Iran-Contra involvement. Poindexter was convicted April 7th of conspiring to deceive Congress and obstructing congressional investigations. His attorneys say they'll appeal.

The maximum sentence was handed down today in New York City for Joseph Fama... the alleged triggerman convicted of murdering a black teen-ager during a mob attack last year in Brooklyn. Fama was sentenced to 32 years and eight months to life in prison for his role in the crime that inflamed racial tensions in city. Under state law, Fama is NOT eligible for parole until he serves 32 years and eight months. Earlier today, the accused ringleader in the mob attack was sentenced to up to 16 years in prison.

-30- 2053

#90162u2654 06/11/1990 ~United Press International

LONDON (JUNE 12) UPI - The Soviet Union has not fulfilled promises that it will protect the rights of its 1.8 million Jews, and the West should not normalize relations with Moscow until adequate guarantees are installed, Jewish activists said Monday.

Four political groups campaigning on behalf of Soviet Jews warned in a document titled ''1991 Watch'' that there is official indifference in the Soviet Union about the plight of the nation's Jews, with little action being taken against the rising tide of anti-Semitism.

The document was released to coincide with the opening in Copenhagen, Denmark, of a human rights conference attended by the 35 nations of the Conference for Secruity and Cooperation in Europe.

Next year's conference is scheduled to be held in Moscow. Britain alone has said it will not attend unless laws are introduced in the Soviet Union granting freedom of emigration, expression, speech and to monitor human rights, and to ensure an end to any religious, political and ethnic persecution.

Jewish activists said Britain still could not attend because little progress had been made in the Soviet Union, despite a pledge by President Mikhail Gorbachev in the United Nations in December 1988 that he would usher in laws to fully protect human rights.

''We welcome the progress that is taking place, but to date emigration legislation has not been introduced,'' said Paul Summerfield, of the Student and Academic Campaign for Soviet Jewry. ''By law, it has not happened.''

As examples, the report listed the cases of 23 Soviet Jews it said had been denied basic freedoms for saying they want to emgrate. It said about 5,000 Jewish families were probably labeled as ''refuseniks'' and denied

the opportunity to leave the Soviet Union, mostly on a tenuous basis of being a security risk.

Elliot Lister, the campaign coordinator for a British-based activist group called ''Refusenik,'' said Gorbachev's June 3 threat to curb Jewish emigration because of opposition from Arab nations about their arrival in Israel showed Moscow's disrespect for human rights.

''The policy and personal whim of leaders cannot be allowed to have primacy over the inalienable rights of individuals,'' he said.

''Western leaders once again must make it clear to the Soviet Union that they will not tolerate such blatant disregard for human rights,'' Lister said. ''Soviet Jews are being denied the most basic right of personal protection from the most vicious anti-Semitism amd discrimination.''

Some 37,000 of the Soviet Union's 1.8 million Jews left for Israel this year, and activists are demanding the doors be totally opened so more can flee from the mounting power of anti-Semitic groups.

''It seems that no one, official or even non-official, has taken any steps to prevent the growth of these groups,'' Summerfield said. ''There is obviously a lot of concern (among Soviet Jews) about whether they will allowed to leave.''

#90162u2665 06/11/1990 ~United Press International

WASHINGTON (JUNE 11) UPI - President Bush, making a series of legal announcements, said Monday he will nominate Ranndall R. Rader to be a member of the U.S. Court of Appeals for the Federal Circuit.

Rader, 41, would succeed Judge Jean Galloway Bissell. Since 1988, he has served on the U.S. Claims Court. Earlier, he worked as chief counsel and staff director of the Senate Judiciary subcommittee on patents, copyrights and trademarks.

In addition, Bush said he would nominate:

-William M. Skretny, 45 of Buffalo, N.Y., lawyer, to be U.S. district judge for the Western District of New York. He would succeed Judge John T. Curtin.

-Fred L. Foreman 42, to be U.S. attorney for the Northern District of Illinois. He would succeed Anton R. Valukas.

All three nominations must be approved by the Senante.

#90162u2679 06/11/1990 ~United Press International
ST. JOHN'S, NEWFOUNDLAND (JUNE 11) UPI - The future of a constitutional amendment aimed at keeping Quebec in Canada will be decided by a vote in the provincial legislature of Newfoundland, the province's leader announced Monday.

Premier Clyde Wells, the lone holdout among Canada's provincial chiefs in a weeklong debate on the so-called Meech Lake accord, said legislators would decide Newfoundland's stance rather than a public referendum as he suggested earlier.

But even though Newfoundland holds deep, historic hostilities for neighboring Quebec, Wells said lawmakers would not necessarily kill the deal that would give the French-speaking province special status in Canada.

''Even though you (legislators) may disagree strongly with the accord, you may feel so moved by the argument that Canada would be adversely affected by the failure to approve the accord that you would be moved to agree with it,'' Wells said. ''Or as somebody said, 'Hold your nose and vote for it.'''

Wells, whose Liberal Party holds 30 out of the legislature's 52 seats, agreed early Sunday after a week of marathon, closed-door meetings in Ottawa to ask for either a legislative vote or a referendum to decide the fate of the amendment.

The Meech Lake accord would recognize Quebec as a ''distinct society'' in Canada and empower it to promote and preserve its French language and culture. The province, home to 6.2 million French-speaking people, has threatened to seceding if the amendment is not approved.

The premiers of Manitoba and New Brunswick, the two other provinces that had opposed the accord until the Ottawa meetings, said they would ensure it would be approved in their legislatures before the June 23 deadline.

Opinion polls indicate the majority of Newfoundlanders oppose the accord.

Newfoundland chose to hold a legislative vote after a request for an extension of the June 23 ratification deadline for the amendment was rejected by other provincial governments, Wells said.

Wells called the free vote ''the next best solution to holding a referendum but not an acceptable substitute for a proper referendum.'' A free vote means members do not have to vote along party lines.

Tom Rideout, leader of the Progressive Conservative Party, applauded the

decision to hold the legislative vote.

''The decision that we make here in this House of Assembly will affect the future of Canada, perhaps the very survival of Canada as a nation as we know it,'' Rideout said.

The Atlantic coast province comprises the island of Newfoundland and the mainland region of Labrador, representing 4.1 percent of Canada's land mass. The province is home to some 570,000 people.

Frank McKenna, premier of New Brunswick, said Monday he will recall his legislature on Wednesday to ratify the accord. McKenna's Liberal government holds all 58 seats in the legislature.

McKenna, after Wells' announcement, said he was ''very optimistic that Newfoundlanders would vote for Canada.''

Late Monday afternoon, there was no word on when Manitoba's Premier Gary Filmon would begin the process in that province to ratify the accord.

In Ottawa, Prime Minister Brian Mulroney told Parliament he expects the amendment will be ratified within a matter of days.

''Once the three remaining legislatures pass the Meech Lake accord, Quebec will formally rejoin our constitutional family, and Canada will be able to face its future united and strong,'' Mulroney said.

#90162u2685 06/11/1990 ~United Press International
(JUNE 11) UPI - A historic meeting today at the White House. East German Prime Minister Lothar de Maiziere was greeted in the Rose Garden by President Bush, and the two men talked during a working lunch. They discussed Germany's role in NATO, and Bush said the U-S and East German positions are ''pretty close'' on the issue of German membership in NATO after unification. de Maiziere is the first East German leader invited to the White House.

A previously UNknown World War Two S-S bunker was found last week by East German border troops digging in East Berlin's Postdamer Platz, a former crossing point of the Berlin Wall. The troops discovered the bunker while working to restore the site prior to a charity concert. Inside, they found rifles and ammunition, as well as murals glorifying the Nazis. The bunker is 50 yards from the site where Hitler spent his last days before committing suicide in April 1945.

A Pittsburgh-area man won his battle with the Internal Revenue Service... but lost the war. Frank Rickel waged a five-year-legal fight with the

I-R-S over an age discrimination settlement the government wanted to tax to the tune of 60-thousand dollars. Rickel fought all the way to the 3rd U-S Circuit Court of Appeals in Philadelphia, which ruled in his favor. Trouble is, Rickel's legal costs came the grand total of 88-thousand dollars.

#90162u2691 06/11/1990 ~United Press International

MOSCOW (JUNE 11) UPI - Russian lawmakers rejected Boris Yeltsin's closest allies Monday in elections to the republic's standing legislature, threatening to stall the populist leader's drive for autonomy and radical market reforms.

Yeltsin, who had been riding a wave of popularity after his election as president two weeks ago, glowered as the results were announced and stormed out at the session's close.

Legislators at the new Congress of People's Deputies turned down almost all the radical candidates for the Supreme Soviet, a smaller standing body made up of 252 of the legislature's 1,060 members.

''The right-wing half of our Congress made it in,'' said Viktor Dmitriev, a leader of the Democratic Russia bloc that forms the backbone of Yeltsin's support.

''(Yeltsin's) relations with the (Russian) Supreme Soviet will be very difficult and complicated,'' said Dmitriev, who was among those rejected Tuesday. ''Many of Yeltsin's suggestions will be blocked.''

The bicameral Supreme Soviet - one house represents territories and the other ethnic groups - is chosen by the Congress, which was directly elected by the people.

The results represented the collapse of a coalition agreement between Democratic Russia and the conservative Russian Communists bloc, under which each side was to support the other's candidates to Parliament. Despite a last-minute joint appeal by the groups' leadership, members of both groups broke ranks.

Six of the seven members of Democratic Russia's coordinating council went down to defeat, including Moscow economist Oleg Rumyantsev, a top strategist.

After the first round of voting last Friday, 50 seats were left unfilled when nominees failed to get an absolute majority of votes, forcing a second round Monday that filled all but 13 seats.

The Supreme Soviet will be the Russian republic's main lawmaking body. The Congress is convened to elect the republic's leadership and Supreme Soviet and to discuss changes to the Constitution.

Monday's session also featured a new chapter in the scandal over a Yeltsin television interview broadcast Saturday. After the interview was bumped from a scheduled Friday showing, Yeltsin complained of a campaign against him that deputies accused Soviet President Mikhail Gorbachev of orchestrating.

Evgeny Primakov, a member of Gorbachev's advisory council, read lawmakers a statement from the Soviet President that called the accusations ''an invention.''

''I ask the Congress of People's of Deputies to investigate who organized this provocative escapade and with what aim,'' Gorbachev's statement said. ''I also hope that those who committed attacks against me will make public apologies.''

#90162u2724 06/11/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - American Telephone and Telegraph Co. Monday said it has been awarded a $90 million contract to provide the Treasury Department with a private telecommunications system.

The Treasury Digital Telecommunications Switching system will offer integrated voice and data transmission capabilities to all Treasury locations in the Washington area, including offices of the Internal Revenue Service, Customs Service and Secret Service.

AT&T said it is working with three subcontractors: the Chesapeake and Potomac Telephone Co. will have a major role in providing operations, administrative and maintenance support; Institutional Communications Corp. will provide a fiber optic distribution system; and Cincinnati Bell Information Systems will provide services such as inventory management and directory.

AT&T's telecommunications system initially will service 26,000 lines, although it could grow to 44,000 lines and a value of more than $100 million over the life of the eight-year contract, the company said.

#90162u2728 06/11/1990 ~United Press International

WASHINGTON (JUNE 11) UPI - Particles from Earth's radiation belts are periodically garbling the computer memory of the Hubble Space Telescope's guidance system, further slowing the observatory's start-up, officials

said Monday.

But computer programming changes should correct the problem and compensate for a small wobble in the $1.5 billion telescope that occurs whenever the instrument sails into or out of sunlight, officials said.

''It's kind of a frustration to have to work around (the problems),'' said deputy program manager Jean Olivier during a telephone briefing for reporters from the Goddard Space Flight Center in Greenbelt, Md.

The space shuttle Discovery placed the telescope into orbit 381 miles above Earth on April 25 for a long-awaited 15-year mission of exploring the universe in greater detail than ever before.

Engineers with the National Aeronautics and Space Administration have battled one problem after another in the early stages of an eight-month process of carefully calibrating and adjusting the complicated observatory's instruments and optical system.

Most of the problems have been resolved but work to focus the telescope's near-perfect optical system and to fine-tune the observatory's guidance system has fallen about three weeks behind schedule.

One of the remaining problems occurs when the 12-ton telescope passes through the South Atlantic Anomaly, a zone over the South Atlantic Ocean off the coast of Brazil in which the so-called Van Allen radiation belts dip close to Earth.

''The spacecraft passes through that periodically,'' Olivier said. ''When it passes through there is a pretty high radiation environment. The fine guidance electronics do become contaminated.''

Even though NASA engineers were aware of the anomaly and took steps to shield the telescope from its effects, the precautions apparently were insufficient, Olivier said. ''Apparently we evaluated it wrong,'' he said.

When it flies through the South Atlantic Anomaly, the telescope is bombarded by radiation from the Van Allen belts, made up of charged particles from the sun that are trapped by Earth's magnetic field.

Such radiation can cause problems with the instrument's computer system, garbling data used by the guidance system to keep the observatory precisely pointed.

Engineers now are turning the telescope's guidance computer off, then back on again after passage through the radiation zone.

To correct the problem once and for all, engineers are devising computer

programming changes that will allow the guidance system to be constantly updated by another computer that is immune to the interference. That way, even if interference occurs, bad data will not be in the system long enough to cause stability problems.

The telescope's stability is crucial to successful astronomical observations. But every time the telescope passes from Earth's shadow into sunlight, or vice versa, the observatory begins wobbling slightly.

Olivier said engineers have determined that metal poles in the telescope's energy-collecting solar panels flex as much as 10 inches during this transition because of temperature-induced expansion and contraction. That, in turn, causes the spacecraft to wobble slightly.

The vibration has delayed getting the telescope fully focused because work is interrupted periodically until the vibration, which lasts as long as 20 minutes, stops, he said.

''This solar array dynamics is beggining to rear its head as a limiting factor,'' Olivier said. ''We probably would have been further along ... if this added requirement ... had not been with us.''

To correct the problem, engineers are writing a new computer program that will cause the telescope to move in a fashion that precisely cancels out the motion induced by the solar panels.

But it will take about two months to complete the work, Olivier said, adding that ''we'll be hampered until this is corrected,'' he said.

#90162u2729 06/11/1990 ~United Press International

SAN FRANCISCO (JUNE 11) UPI - Bechtel Group Inc. said Monday it has won a $100 million contract to help modify a launch pad at Cape Canaveral Air Force Station so it can be used to send Titan IV rockets into space.

Under the three-year contract, Bechtel National Inc. will provide engineering, procurement and construction services to Bethesda, Md.-based Martin Marietta Corp., the prime contractor to the Air Force.

Bechtel's work will help create a second launching complex at Cape Canaveral for the Titan IV, the newest and biggest rocket in the Air Force's space program.

Bechtel previously worked with Martin Marietta to modify the electrical systems at the facility's first Titan IV launch pad.

First launched last June, the Titan IV is used only for defense payloads.

In addition to Cape Canaveral in Florida, the rocket can be launched from Vandenberg Air Force Base in California, although no West Coast launches have yet taken place. All launches are classified and shrouded in secrecy.

Martin Marietta has a $7.3 billion contract to build and launch a total of 41 Titan IVs for the Air Force through 1995, with an option for eight more.

Martin Marietta currently uses a launch pad at Cape Canaveral for commercial launches of the rocket's predecessor, the Titan III, and will not begin modifications for the Titan IV until after the final commercial launch, planned for June 21.

Bechtel's work will include demolishing existing facilities at the site, designing and building a mobile service tower and an umbilical tower for use on the pad and construction of a number of other launch structures.

Bechtel and Martin Marietta worked together in the early 1980s to build the ''Slick Six'' space launching complex at Vandenberg Air Force Base for the Air Force space shuttle.

#90162u2754 06/11/1990 ~United Press International

LOS ANGELES (JUNE 11) UPI - The state health department, as part of its anti-tobacco campaign, unveiled a series of television and radio spots, billboard ads and even rap videos Monday aimed at discouraging young blacks from smoking.

Dr. Kenneth Kizer, director of the state Department of Health Services, charged cigarette companies have been aggressively pursuing the young black market, portraying smoking as ''glamourous'' and ''cool.''

''There is no doubt that smoking rates are higher among minorities than among whites,'' he said, adding that more than 40 percent of black males smoke, compared with less than 30 percent of white males.

''This didn't happen by accident. It's the result of many years of carefully directed advertisements and other efforts to increase tobacco use among minorities,'' he said.

Kizer said the state has also developed ad campaigns directed at other ethnic groups, including Hispanics and Asians.

The effort is part of the $28.6-million California Tobacco Education Campaign, an unprecedented counter-attack on the cigarette industry's push to gain new customers among minorities, women and teenagers.

Research has shown the lung cancer death rate is higher in blacks than in any other racial group in the United States, and more than half of all blacks' deaths are caused by smoking-related ailments. Overall, officials estimate cigarette smoking costs the state $7.1 billion each year in health care and lost productivity.

The state's anti-smoking campaign is being financed by the California Tobacco Tax Inititiative, a measure approved by voters in 1988 that raised the cigarette tax by 25 cents per pack.

The 60- and 90-second rap video spots, scheduled to air on MTV and other programs that draw large black audiences, were performed by Los Angeles rapper Deezer D.

The spots, directed by choregrapher-producer Debbie Allen, feature clips of dancers squinting through a smoky haze amid images of funeral processions.

''We used to pick it, now they want us to smoke it.Jokin','' Deezer D says in the song.

Another elevision spot, titled ''Delivery Room,'' shows the effects of smoking during pregancy. With a lullaby playing in the background, three healthy babies are shown cradled in their parents' arms. An announcer reads the babies' names and weights.

But the final shot is of a frail, premature infant in a hospital incubator.

''Travis Matthew Davis, 2 pounds, 2 ounces, and two packs a day,'' the announcer says.

Two 60-second radio spots featuring a hacking, wheezing rapper and other characters try to get the message across with humor.

The campaign was produced by Muse Cordero Chen Inc. a Los Angeles advertising agency.

Detractors in the tobacco industry have said that aiming the campaign only at blacks is racist.

But Jo Muse, the black president of the ad agency, denied the allegation.

''It's not (racist),'' he said. ''It's very difficult for me to imagine anyone taking the tobacco lobby seriously regarding their reaction to that particular commercial. It's not only relevent but it's also is entertaining and hits a point ... that smoking is just not cool.''

#90162u2797 06/11/1990 ~United Press International

EDINBURGH, SCOTLAND (JUNE 11) UPI - Attorney General Dick Thornburgh met with Scotland's senior law officer Monday to assess the criminal investigation into the bombing of a Pan Am jetliner that claimed 270 lives.

''The meeting was held to discuss progress in the criminal investigation and also the continuing cooperation between the U.S. prosecuting and investigating agencies and their Scottish counterparts,'' said Lord Fraser of Carmyllie, the lord advocate of Scotland.

A statement released by the Justice Department in Washington said, ''Lord Fraser and Attorney General Thornburgh agreed that while the investigation had made significant progress, evidence needed for a successful prosecution is not yet in hand.''

Fraser and Thornburgh were briefed by George Esson, chief constable of Dumfries and Galloway, who is in charge of the investigation.

Pan Am Flight 103 was destroyed by a terrorist bomb packed in a radio-cassette player Dec. 21, 1988. All 259 people aboard were killed, plus 11 residents of the Scottish town of Lockerbie.

The flight was en route from Frankfurt, West Germany, to New York after a stop in London.

No charges have been filed in the case.

After the meeting Thornburgh left for Sweden for a similar meeting with officials there. Later this week he will oversee a summit in Washington at which all of the international agenices involved in the Pan Am investigation will be represented.

It will be the sixth such conference held since the bombing.

Two meetings have been in Lockerbie, where the plane fell in a blaze of aviation fuel, with the others in Washington, London and Meckenheim, West Germany.

Scottish and American officials declined comment on the forthcoming summit or progress into the investigation.

#90162u2852 06/11/1990 ~United Press International

NEWTON, IOWA (JUNE 11) UPI - Maytag Corp. said Monday it filed a registration statement with the Securities and Exchange Commission to authorize it to increase the amount of debt securities it issues.

The registration would cover a total of $250 million in debt securities and warrants. The registration is in addition to $47.5 million which remains from a previous registration. Company spokesman Jim Powell said when the current registration becomes effective, Maytag will be authorized to issue a total of $297.5 million in debt securities and warrants.

The company has recently restructured some of its finances. In May, Maytag issued $200 million in 12-year notes. Powell said those notes were issued to convert shorter term notes to medium term issues.

Powell said the registration statement would allow the company to further restructure in the future if needed, but that officers currently had no specific plans to use the registration.

''It's more of a continued authorization,'' Powell said. ''If we want to go into additional restructuring of our finances, this authorization will exist.

The Maytag Corp., based in Newton, Iowa, consists of nine companies with primary emphasis in home appliances and vending machines.

#90162u2856 06/11/1990 ~United Press International

(JUNE 11) UPI - There's apparently some movement on Moscow's part toward resolving the impasse with the Baltic republics. A Latvian spokesman says the presidents of Estonia, Lithuania and Latvia will meet with Soviet President Gorbachev in Moscow tomorrow to discuss their independence push. Soviet officials earlier demanded Lithuania withdraw its declaration of independence, but the Latvian spokesman says they now appear willing to talk without such a withdrawal.

The National Park Service says an ailing Japanese mountain climber died last night near the summit of Alaska's Mount McKinley, despite efforts to rescue him. Officials say Hiroaki Ito... part of a seven-man Japanese team... came down with altitude sickness during the climb. His companions decided to press ahead to the summit... but by the time they returned, Ito was in bad shape. The climbers radioed for help, but it did NOT arrive in time.

Less educated women are more likely to oppose abortion. That's according to a new Princeton University study conducted by a P-h-D candidate in sociology. Jennifer Strickler found that among those with a high-school diploma or less, women are more likely than men to oppose abortion... while just the opposite is true of the more educated. Previous studies had suggested occupation was the single most important factor in shaping abortion views.

A pictorial history of the 20th century is the aim of an international joint venture announced today in New York. The pictorial history will be produced by A-B-C News, the Soviet national broadcast company Gostelradio, and N-K-H-Japan Broadcast Corporation. They'll form a company tentatively titled ''The Twentieth Century,'' to be headquartered in New York City, and will jointly use each other's libraries and production facilities.

#90162u2897 06/11/1990 ~United Press International

SAN JOSE, Calif. (JUNE 12) UPI - After a slight dip in April, the key measure of the health of the semiconductor industry surged strongly in May the Semiconductor Industry Association reported Monday.

The chip industry's closely watched book-to-bill ratio, which compares incoming orders with outgoing shipments, rose to a robust 1.14 in May from 1.09 in April and a 21-month high of 1.15 in March, the SIA said.

A ratio of 1.14 means that for every $100 of semiconductors shipped to the the U.S. market, manufacturers received $114 in new orders. The ratio is calculated using a rolling three-month average, and a ratio of 1.0 or more is considered healthy.

For the three-month period ending in May, average bookings, or orders, were $1.38 billion, while average billings, or shipments, were $1.21 billion, the SIA said.

#90162u2899 06/11/1990 ~United Press International

WASHINGTON (JUNE 11) UPI - Chock Full O' Nuts Corp., the coffee maker, is locked in a landlord-tenant battle with the Riese Bros. Organization, which has refused to pay rent, the president of the coffee company said Monday.

Riese Bros., of New York, which leases about 10 sites from Chock Full O' Nuts, including office buildings and restaurants, has complained that the company is not making needed repairs on the properties, and has refused to pay rent, despite the fact that Chock Full O' Nuts sent out default notices last February.

The Supreme Court of the State of New York on May 25 granted a preliminary injunction ordering Riese to pay all past due amounts within 30 days and to keep future rent payment current, a report Chock Full O' Nuts filed with the Securities and Exchange Commission showed.

Howard Leitner, president of Chock Full O' Nuts, said his company, also

based in New York, has yet to receive payment.

''It's absolute nonsense,'' Leitner says of the case. He refused to disclose exactly how much money Riese Bros. owed his company, but said the amount was substantial.

Leitner says the leases were net leases, which require the lessee to make any needed repairs.

Chock Full O' Nuts' attorney, Martin Klein of Dreyer and Traub in New York agreed.

''This is typical Riese tactics - stall and sue - and the court has finally seen through their tactics and ordered them to pay the rent,'' Klein said.''Either they will pay or forfeit the spaces.''

#90162u2926 06/11/1990 ~United Press International

TORONTO (JUNE 12) UPI - Communication workers in the United States and Canada agreed to a formal alliance to coordinate collective bargaining and organizing actions, it was announced Monday.

Morton Bahr, head of the 700,000-member Communications Workers of America, and Fred Pomeroy, president of the Communications and Electrical Workers of Canada, representing 40,000 workers, said the agreement covers collective bargaining, organizing, mobilization and political action.

''To our knowledge, this is the first formal agreement of its kind between major U.S. and Canadian labor unions,'' Bahr told a press conference. ''And we expect it to set a new precedent for international labor cooperation.''

Pomeroy said the alliance was a logical step for telecommunication workers in the two countries.

''We've worked well in the past, but this alliance will solidify our ability to work together to achieve our members' goals,'' said Pomeroy.

They said the alliance would strengthen the unions' ability to deal with what they said is the increasing domination of the communication, electrical and publishing industries by multinational companies.

#90162u2990 06/11/1990 ~United Press International

(JUNE 11) UPI - Oil tanker blaze rages off Texas... six months jail time for Iran-Contra figure John Poindexter... Lawmakers call for anti-flag

burning amendment. U-P-I has it all, next:

An all-out effort to extinguish a fire aboard an oil tanker in the Gulf of Mexico was delayed today, and the Coast Guard says the spraying of chemical foam might NOT start until tomorrow.

Fireboats were ready to begin the foam operation but had to back off when a new stream of flaming oil burst from the ship, anchored 57 miles southeast of Galveston, Texas.

The stern of the Norwegian tanker Mega Borg is now under water, increasing the chances it might sink and cause a massive oil spill. The tanker is carrying 38-Million gallons of oil.

The ship has been burning since an explosion Saturday that killed two crew members and left two others missing.

In Massachusetts, the Coast Guard is investigating why a cruise ship that ran aground near Cape Cod was one mile off course. The Bermuda Star ran aground yesterday in heavy fog near the Cape Cod Canal. Fuel oil has leaked from it, but officials say the total is less than 10-thousand gallons.

-30- 1311

#90162u2998 06/11/1990 ~United Press International

(JUNE 11) UPI - The push for a constitutional amendment banning flag desecration picked up steam today when the Supreme Court struck down a law that was supposed to eliminate the need for such an amendment.

The high court ruled 5flag burning law passed by Congress last year is NOT consistent with the First Amendment guarantee of freedom of speech.

Shortly after that ruling, Senate G-O-P leader Robert Dole said- quote- ''Now we need to move to a constitutional amendment.''

The push for an amendment began last year after the Supreme Court ruled that flag burning was allowed as a form of protest. The Flag Protection Act was passed instead, and now backers of the constitutional approach say they'll push that effort.

But NOT everyone feels the same way. Senate Democratic leader George Mitchell says it would be a ''grievous error'' to change the First Amendment's free speech guarantee- quoting now- in ''haste and the heat of controversy.''

A federal judge in Washington, D-C, today sentenced John Poindexter to six months in jail for his role in the Iran-Contra scandal.

U-S District Judge Harold Greene says Poindexter was ''the decision-making head of the Iran-Contra operation'' in the White House. He said Poindexter Oliver North and others in the Reagan White House tried to ''nullify'' a decision by Congress to cut off aid to the Nicaraguan Contra rebels.

The former national security adviser was convicted April 7th of five felony counts, including conspiracy to deceive Congress. He was given a six-month sentence on each count, but they are to run concurrently.

Chief prosecutor Dan Webb said he thinks today's sentence is ''fair and proper.'' Poindexter's lawyer said he'll appeal the sentence.

Poindexter is the first Iran-Contra figure to ger jail time.

-30- 1979

#90162u3018 06/11/1990 ~United Press International

(JUNE 11) UPI - The shuttle Columbia is to be rolled back to its hangar tomorrow to fix a hydrogen fuel leak that has delayed the spaceplane's astronomy mission until mid-August at the earliest.

To make room for Columbia, a single rocket booster was rolled from NASA's assembly building to a launch pad today.

The shuttle was originally scheduled for launch last month, but was grounded by a fuel leak that could NOT be fixed on the launch pad. Another shuttle, the Atlantis, is to be hauled to launch pad 39-B on Saturday for blast-off July 13th on a secret military mission.

Nearby at the Cape Canaveral Air Force Station, a Delta rocket was cleared for a pre-dawn liftoff tomorrow carrying an 80-Million-dollar Indian communications satellite.

The satellite was originally set for launch one year ago, but it was damaged in a launch pad mishap. Once it's in orbit, it will provide communications data for India.

In New York City today, two young men convicted in last summer's Bensonhurst racial killing received maximum prison terms.

Accused triggerman Joseph Fama was sentenced to 32 years to life and Keith Mondello will have to serve anywhere from six years to 16 years behind bars.

New York Supreme Court Justice Thaddeus Owens read the sentences to an emotional courtroom.

His words were greeted by applause by the family of the black teen-ager murdered last summer and anger and obscenities by the families of the defendants.

19-year-old Fama was convicted May 17th of second-degree murder in the fatal shooting of the 16-year-old Yusuf Hawkins in the mostly white Bensonhurst neighborhood.

Officials say that under state law, Fama will NOT be eligible for parole until he serves the 32 years eight months.

Prosecutor Edward Boyar says the harsh sentences send a signal to the city.

Boyar says people now know that- quote- ''racial crimes will NOT be tolerated.'' Fama's attorney says he will appeal.

-30- 2129

#90162u3048 06/11/1990 ~United Press International

(JUNE 11) UPI - Washington, D-C, Mayor Marion Barry is ducking rumors that he may NOT run for another term.

Barry's sixth day in court on drug and perjury charges was overshadowed by a Washington report that Barry will abandon his bid for re-election. The paper quoted sources as saying Barry would make the announcement tonight during an appearance on a local T-V public affairs program.

Barry left the courthouse denying any plea bargain is in the works and did NOT appear on the program. The show's producers say Barry was NEVER scheduled to appear.

Some of Barry's own allies... including political activist Jesse Jackson... have urged him to drop out of the race to facilitate a plea agreement.

The mayor is being tried on 14 drug and perjury counts and could face 26 years in prison and steep fines.

Asked about his political plans, Barry said: ''There will be a press conference when I have something to say - next week, next month.''

East German Prime Minister Lothar de Maiziere today ventured where NO other East German leader has gone for 40 years... the White House.

De Maiziere and President Bush met to discuss German unification.

Specifically, those talks dealt with how best to counter Soviet resistance toa united Germany within the NATO alliance.

After the meeting, White House news secretary Marlin Fitzwater said de Maiziere responded positively to U-S proposals for allaying Soviet concerns.

Fitzwater acknowledged that the German-NATO question is slow-going, but says progress is being made.

That same issue was being discussed on the other side of the world today.

Soviet Foreign Minister Eduard Shevardnadze and his German counterpart, Hans Dietrich Genshcer met in the Soviet city of Brest.

The two men say they are closer on issues regarding German unification but made NO progress on the thorny NATO issue.

#90162u3054 06/11/1990 ~United Press International

LOS ANGELES (JUNE 11) UPI - The Air Force on Monday lifted its suspension of doing new business with Hughes Aircraft's missile unit.

The 2,100-employee Missile Systems Group, located in Canoga Park, had been prohibited since May 9 from bidding on programs or receiving any new government contracts.

At that time, the Air Force Debarment and Suspension Review Board announced Hughes was being reviewed for proposed debarment. Had the Air Force decided to debar Hughes, it would had prevented the company from participating in new government contracts for three years.

The government's review - which triggered an automatic suspension - stemmed from Hughes' guilty plea in March to criminal charges of possessing two government documents with Pentagon budget planning projections for five years. The company's possession of the budget planning documents in the mid-1980s violated federal law.

Hughes agreed to pay $3.6 million in penalties as part of its plea.

The administrative settlement announced Monday means the Air Force will not debar Hughes from bidding on or receiving government contracts - an action which would would have been ''very unlikely'' and ''very rare,'' Richard Dore, Hughes' spokesman, said.

''There was a fairly substantial fine paid and the company in general has showed it can rectify the situation,'' Dore said.

Dore said the month-long suspension has not had a major impact on Hughes.

During that time, Hughes lost the ability to bid on a single, ''fairly minor'' proposal with a total value of less than $2 million, Dore said.

Under terms of an administrative settlement signed by Daniel S. Rak, Air Force deputy assistant secretary for acquisition, Hughes agreed to continue its companywide ethics training program, issue new procedures and conduct specific training directed to marketing activities. Hughes also will improve its security organization and policies, it said in a prepared release.

''We'll be implementing new procedures in marketing and security,'' Dore said.

#90162u3055 06/11/1990 ~United Press International

(JUNE 11) UPI - The world's balance of power is shifting. That's what Defense Secretary Cheney told the American-Israel Public Affairs Committee in Washington today.

Cheney says that 23 countries now are known or believed to be making chemical weapons. Those countries include Iran, Iraq, Libya, Syria and North Korea.

The Pentagon also estimates that 15 countries will be able to produce missiles within the next decade... and that Iraq already has a missile capable of reaching Israel.

Cheney says weapons proliferation is one reason he supports the controversial Strategic Defense Initiative.

He says the envisioned high-tech anti-missile system- quote- ''offers the best hope'' for defense against Third World missile threats.

ELMENDORF AIR FORCE BASE, ALASKA (JUNE 11) UPI - Two Soviet military jet fighters landed in North America for the first time Monday and one Soviet pilot said the event filled him with ''a sense of joy.''

''This is clearly another step in closer relations with the Soviet people '' said Lt. Gen. Thomas McInerney, commander of military forces in Alaska calling the Soviet visit ''a historic event.''

Two Soviet Su-27 jet fighters and a gigantic Soviet An-225 transport plane landed at Elmendorf Air Force Base at the edge of Anchorage accompanied by eight Air Force F-15 jet fighters.

Monday was the first time the Su-27, the most advanced Soviet fighter, had landed in North America, McInerney said of the plane publicly unveiled for the first time in Europe last year and capable of unique maneuvers.

''This is their best fighter. It's a very impressive airplane,'' McInerney said. ''It's equivalent to our F-15.''

The An-225 made its North American debut last August, stopping in Alaska en route to an air show in Canada with two MiG fighters making their first American visit. Monday was the second visit for the An-225, the world's largest aircraft and the only one of its kind.

The three planes, carrying 74 Soviet dignitaries, aircraft workers, flight crew and media, landed for a three-hour refueling stop, but Air Force officials transformed the event into a VIP affair.

The Soviets flew on to Seattle late Monday for a visit to Boeing on the way to a weekend air show in Oklahoma City.

Air Force F-15s, more accustomed to intercepting Soviet military planes on training missions around the periphery of Alaska, met the Soviets at the border, about 100 miles west of Nome, Alaska, said Capt. Monica Aloisio.

Two F-15s escorting the An-225 to Elmendorf were dwarfed by the huge Soviet plane. The American fighters looked tiny and insignificant flying alongside the six-engine monster that had waiting Air Force officials gaping.

''It'll look like the sky is getting dark, like an eclipse, when it comes in,'' McInerney quipped.

''I never thought I'd see anything to make a C-5 look small,'' Aloisio said. The C-5 is the largest U.S. Air Force plane.

Three F-15s accompanied each Su-27, nicknamed ''Flanker'' by NATO. From a distance, the Soviet and American planes resembled each other. Up close, the sleek, sky-blue Soviet fighters with a bent nose section and a red star on the tail offered a picture of a distinctly different plane, never before seen in North America.

As the F-15 Eagles brought in the Su-27s, the Soviet jets zoomed low over the runway, then swooped straight up in a sudden surprise maneuver that may have been a preview of the aerobatic show they came to perform.

Su-27 pilot Victor Pugachev said he felt a ''sense of joy'' when he crossed into U.S. airspace in the company of the F-15 fighters.

''It was a pleasure, over the Alaska wilds, to see other planes we consider friends,'' the Soviet pilot said. ''We have flown together in the sky today. The only thing left is to exchange aircraft.''

One of the American F-15 pilots, Capt. Steve Stoddard, who said he has intercepted Soviet military planes several times before, said at first he felt a little awkward escorting the Soviets into American airspace but then ''it felt like a very significant event.''

''In these days of perestroika, this doesn't seem awkward to us,'' said McInerney, refering to Soviet President Gorbachev's policy of restructuring or change.

#90162u3142 06/11/1990 ~United Press International

(JUNE 11) UPI - Coast Guard officials say a burning super-tanker 57 miles southeast of Galveston, Texas, is in NO immediate danger of sinking. But they do predict it will spill more oil into the Gulf of Mexico. An estimated 100-thousand gallons of oil have leaked from the stricken vessel.

Texas state officials say they're NOT prepared for the Mega Borg to lose its 38-Million-gallon cargo of crude. They say a recentf state oil spill response drill dealt with a 20-thousand-gallon spill... which- in the words of one official- ''is NOTHING compared to this.''

Oil from a cruise liner that ran aground yesterday off Cape Cod has washed up onto the beaches of two islands off the Massachusetts coast. The clean-up begins tomorrow. Estimates of the amount of fuel oil that leaked from the ship range from as little as 75-hundred gallons to as much as 50-thousand gallons.

Lawmakers wasted little time today in reopening the campaign for a constitutional amendment to ban flag desecration. The moves follow a Supreme Court decision striking down an anti-flag burning law passed last year.

John Poindexter's lawyer says he'll appeal the six-month prison sentence given his client today by a federal judge in Washington. The former national security adviser is the first person to receive jail time for his part in the Iran-Contra scandal.

The first young men convicted in the Bensonhurst racial killing received the maximum prison terms today. A New York state Supreme Court judge sentenced accused triggerman Joseph Fama to 32 years to life and Keith Mondello to five and one-third to 16 years for their part in the slaying of Yusuf Hawkins.

#90162u3144 06/11/1990 ~United Press International

LOS ANGELES (JUNE 11) UPI - A second lawsuit has been filed over the death of Loyola Marymount University basketball star Hank Gathers - this time by lawyers representing Gathers' estate and his son, court documents showed Monday.

The wrongful death lawsuit, filed in Superior Court by Martin Krimsky, a Philadelphia lawyer who is administrator of Gathers' estate, likely will be combined with an earlier $32.5 million lawsuit filed by Gathers' mother two brothers and aunt. Krimsky's suit was filed on behalf of Gathers' estate and his son, Aaron Crump, 7, of Philadelphia.

Like the first lawsuit, the latest complaint alleges Gathers' death was caused by negligence by Loyola officials and doctors who conspired to conceal medical information from Gathers to induce him to continue playing basketball.

The suit, filed Friday, seeks unspecified damages and asks that the estate be paid $1 million - the amount Gathers would have been paid - under a Lloyd's of London policy should he suffer a medical condition that prevented him from playing competitive basketball. Death benefits were excluded under the policy.

Gathers, 23, collapsed March 4 while playing a game at Loyola Marymount and was pronounced dead about two hours later at a hospital. Cause of death was listed as cardiomyopathy, a heart disorder.

The lawsuit alleges Gathers negligently was allowed to return to competitive basketball after a heart disorder was detected following an earlier collapse during play. It also alleges Gathers' medicine to correct the disorder was reduced to ineffective dosages at the urging of the team's coach, Paul Westhead.

Westhead has denied participating in the medical decisions concerning Gathers and the university has stated it expects to ''be fully vindicated'' of the allegations.

Named as defendants in the lawsuit are the university, Westhead, athletic director Brian Quinn, trainer Robert ''Chip'' Schaefer, and Dr. Daniel Hyslop, a Loyola Marymount doctor.

Others named are Dr. Vernon Hattori, Gathers' cardiologist, Dr. Charles Swerdlow, Loyola team physicians Benjamin Schaeffer, Clarence Shields and Ralph Gambardella, Dr. Michael Mellman and his practice, Mellman & Moe Inc., Apex Cardiology Consultants and the Kerlan-Jobe Orthopaedic Clinic.

Two other lawyers involved in filing the lawsuit are Los Angeles attorney Kenneth Wolf and Philadelphia lawyer Adrian Moody.

Attorneys for the plaintiffs in both lawsuits said they are involved in negotiations with the university and other defendants to try to settle the matter before it goes to trial.

#90162u3237 06/11/1990 ~United Press International

(JUNE 11) UPI - The Coast Guard says attempts to spray foam on an oil tanker burning in the Gulf of Mexico off Galveston, Texas, have been delayed until first light tomorrow. Flaming oil has made deck temperatures too hot, and officials say firefighters will spend tonight spraying water on the vessel to cool things down. Once the spraying begins, crews will board the ship to continue the operation. The tanker Mega Borg has been burning since an explosion Saturday killed two crew members and left two others missing.

The United States and Mexico agreed today to begin work on a free-trade accord. President Bush and Mexican President Carlos Salinas de Gortari issued a joint statement in Washington, setting the stage for formal negotiations that could begin later this year. Until then, negotiators will do initial work on the pact. But they'll sidestep the issue of free flow of workers across the border- an issue that has labor leaders in the United States worried.

The start of peace talks to end the nearly six-month-old civil war in the West African nation of Liberia apparently will be postponed until tomorrow. The talks were to begin today in the capital of neighboring Sierra Leone, but Liberian government officials say the rebel leaders had NOT arrived by this afternoon. Officials of the Liberian Council of Churches... which is mediating the talks... say fighting between government and rebel troops appears to have died down during the weekend.

Lawmakers in the Soviet republic of Russia today signaled their reluctance to accept the radical reforms proposed republic President Boris Yeltsin. They turned down almost all of his legislative candidates. The vote represents the collapse of a coalition agreement between Democratic Russia and the conservative Russian Communist bloc. Yeltsin allies say Soviet President Gorbachev engineered the defeat.

#90162u3262 06/11/1990 ~United Press International

(JUNE 11) UPI - NASA engineers are working to adjust the orbiting Hubble Space Telescope, but the eight-month process has fallen about three weeks behind schedule. One of the remaining problems is a radiation belt high

above Earth that garbles the telescope's computer memory whenever the telescope passes through it. Engineers are working on computer programming changes to correct the problem. The telescope was put into orbit by the shuttle Discovery on April 25th.

Federal agents say they've cracked what may be the largest alien smuggling operation ever. Authorities arrested 60 illegal Chinese immigrants at an airport in Fairhope, Alabama, today. Among those nabbed was the alleged ringleader of the operation that agents say planned to sneak 35-thousand more Chinese nationals into the country. Authorities say the ringleader charged between 10-thousand and 35-thousand dollars for passage to the United States.

California officials today UNveiled a sweeping advertising campaign aimed at discouraging young blacks from smoking. Director of the state's Department of Health Services, Dr. Kenneth Kizer, says the camapign is to counter cigarette company ads he charges are aimed more and more at the young black market. The campaign includes television and radio spots, billboards, and even rap videos.

LOS ANGELES (JUNE 12) BUSINESS WIRE - Syncor International Corp. (NASDAQ:SCOR) announced Tuesday it has entered into an exclusive distribution agreement in the United States with IMP Inc. of Houston for SPECTamine (Iofetamine HCl I-123 injection), a radiopharmaceutical brain imaging agent.

This exclusive distribution agreement will become effective when the sale of Medi+Physics by Hoffmann-La Roche to Amersham is concluded.

SPECTamine crosses the blood-brain barrier and allows physicians to perform diagnostic imaging of stroke patients. Stroke is the third leading cause of death in North America and afflicts more than 400,000 persons each year in the United States.

Gene McGrevin, Syncor's president and chief executive officer commented: ''SPECTamine is essentially a second-generation radiopharmaceutical used in conjunction with the advanced SPECT cameras to improve diagnostic imaging of stroke victims.

''Syncor was successful in securing exclusivity on this product for two reasons. First, our nationwide network of pharmacy service centers provides immediate access to all major U.S. markets for IMP. Second, Syncor's unique marketing and distribution capabilities give both IMP and SPECTamine users extensive local, technical and service support in each of Syncor's 84 locations.

Syncor operates a nationwide network of 84 nuclear pharmacy service centers and 18 home-care pharmacies. They prepare and deliver patient-specific intravenous drugs and solutions for use in diagnostic imaging, and a complete range of products for hospitals, clinics, physicians' offices, nursing facilities, and home-based patients. Syncor is the only national pharmacy of its kind that provides this combination of diagnostic and therapy services to the hospital and alternate site markets.

LOS ANGELES (JUNE 12) BUSINESS WIRE - Roger Hughes, chairman of the board of Hughes Markets, announced at a shareholders meeting last Thursday, that the 38-year-old, privately held company reached the billion dollar sales mark.

Recently ranked as Los Angeles' seventh largest privately held company by the Los Angeles Business Journal, Hughes has sustained an average annual growth rate of 17 percent for the past 10 years.

Hughes plans to open five new stores next year, as well as remodel four existing stores. The company projects that it will increase the number of stores by 10 percent each year and continue to use internal cash flow to finance all future store expansion. On Wednesday, June 13, Hughes opens its 48th store in Murrieta, Rancho California.

Following the shareholders meeting, Hughes' board of directors elected three senior vice presidents: Al Brennan, Harland Polk and Mike Solem. In addition, 11 new vice presidents were named: John Grover, John King, Joe Melissa, Dave McMahon, Norb Parsoneault, Rich Ramonette, Bob Roode, Lew Santoro, Roger Schroeder, Mike Schultz and Dave Wolff.

Hughes Markets is the largest privately held supermarket chain in Southern California with 48 stores throughout Los Angeles, Orange, Riverside, Ventura and San Bernardino counties.

SAN DIEGO (JUNE 12) BUSINESS WIRE - Bank of America State Bank Tuesday announced that it has arranged a $4 million loan to a nonprofit corporation in Vista, California.

The corporation, Cascadians Inc., is made up of residents of the Vista Cascade Mobile Home Park in northern San Diego County. The fixed-rate term loan will enable the residents of the 143-space park to purchase the property where they live and stabilize their housing costs. Currently, the 250 residents rent the space for their mobile homes from a private owner.

"Many mobile home residents are elderly people living on low-to-moderate fixed incomes," says Mike Mantle, president of Bank of America State Bank. "Financing programs such as this help residents keep their housing costs under control."

The Vista Cascade Mobile Home Park financing is the first community development project for Bank of America State Bank, which opened for business in April 1990.

Headquartered in Concord, California, Bank of America State Bank is a subsidiary of BankAmerica Corporation. BankAmerica formed the state-chartered bank to focus on specialized community development lending and investment activities that further economic neighborhood revitalization and production of housing for low- and moderate-income households.

"Bank of America has long been an innovative leader in financing mobile homes and mobile home park conversions to resident ownership," says Mantle. "Now, through Bank of America State Bank, we're able to expand these activities and offer more individually tailored loans." This is the first financing package arranged by BofA State Bank.

MOUNTAIN VIEW, CA (JUNE 12) BUSINESS WIRE - Sun Microsystems Tuesday announced that Mentor Graphics, the leading supplier of electronic design automation systems, has agreed to purchase $300 million worth of SPARC computers over the next three years.

The systems, with Mentor Graphics software, will be sold to customers throughout the world. Mentor Graphics announced earlier this year that its entire line of software would be made available on Sun workstations, including its EDA, CASE, technical publications and mechanical design products.

''We have been very selective in choosing a workstation partner who shares our commitment to delivering the broadest and most advanced EDA solutions to customers,'' said Tom Bruggere, chairman and chief executive officer of Mentor Graphics. ''By adding strong support for Sun's growing line of SPARC-based workstations, Mentor Graphics products now run on 80 percent of the UNIX-based workstations being sold today.''

As part of the agreement, Mentor Graphics' Sun-based products will utilize

the OPEN LOOK graphical user interface in the future. OPEN LOOK, designed by Sun and AT&T, is an intuitive interface that is part of Sun's standard window system.

''SPARC-based systems have become the hardware platform of choice for EDA applications, with 95 percent of EDA vendors offering products for SPARC '' said Scott McNealy, Sun's president and chief executive officer. ''Mentor Graphics' endorsement of our SPARC/UNIX/OPEN LOOK solution makes this the de facto standard for EDA.''

Before the agreement with Sun, Mentor Graphics sold its software exclusively on systems from Hewlett-Packard/Apollo. While Mentor Graphics will continue to resell H-P/Apollo hardware, SPARC systems are expected to account for a sizeable percentage of its hardware offering.

Sun also announced that it will purchase $2.2 million of Mentor Graphics software for SPARC systems, which will be added to Sun's internal EDA environment. Initially, Sun will use these tools in the development of complex integrated circuits for future workstations.

Mentor Graphics IC design products, obtained through the acquisition last January of Silicon Compiler Systems -- now the company's Silicon Design Division -- are currently available on Sun systems. The remainder of the products will be available in early 1991.

Mentor Graphics Corp., of Beaverton, Ore., is the leader in worldwide EDA sales, with revenues of $443 million over the last 12 months. In addition to its corporate offices, Mentor Graphics has sales and support offices in 51 locations worldwide.

Sun Microsystems Inc., headquartered in Mountain View, is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

#90163b0068 06/12/1990 ~Business Wire

OVERLAND PARK, KS (JUNE 12) BUSINESS WIRE - Puritan-Bennett announced Tuesday that it expects earnings for the quarter ending June 30 to be below most current estimates.

''A 30 cents to 35 cents per share range appears to be more likely than the 38 cents to 42 cents per share range currently prevalent,'' Chairman and President Burton A. Dole Jr., said.

''We have been seeing signs of capital expenditure caution on the part of U.S. hospitals that has led to slower than expected orders for our model 7200 ventilator. This caution appears to be related to the debate between the Administration and the Congress concerning Medicare's methods of reimbursing for hospital capital expenditures.

''Some government officials want to continue reimbursing hospitals on a 'capital pass-through' basis; others want to reimburse capital expenditures through the Diagnosis Related Group (DRG) method that now applies to hospital operating costs.

''We believe this caution will diminish as the capital reimbursement issue is resolved and the pent-up demand for equipment is released; but this process could last another three to six months. We have no evidence of U.S. hospital ventilator market saturation or 7200 share erosion,'' Dole said.

''Our other major business segments remain quite strong. For the first five months, Aero Systems orders are up 35 percent and orders for the Puritan Group, which includes our home care and medical gas businesses, are up 18 percent over the same period last year.

''Our home care business in the United States has rebounded nicely from last year and continues its international growth. International 7200 orders are also essentially on target. For these reasons and because we are taking steps to lower our rate of spending, we expect that earnings will improve as the year progresses,'' the chairman said.

''In the meantime, we continue to invest in our important continuous arterial blood gas monitoring research and development project. Human feasibility studies utilizing prototypes of this system continue to progress well, and the overall project is on schedule, '' the chairman concluded.

Puritan-Bennett is a world leader in products related to respiration. These products are used in multiple health care settings and on aircraft.

SUNNYVALE, CA (JUNE 12) BUSINESS WIRE - MIPS Computer Systems Inc. (NASDAQ:MIPS) Tuesday announced an OEM, assembly license and technology transfer agreement with Daewoo Telecom Co. Ltd. (DTC) of Seoul, Korea.

DTC is a subsidiary of the Daewoo Group, one of Korea's top four firms, with annual revenues of $23 billion in 1899 from a diverse group of businesses such as shipbuilding, heavy construction, automotive, consumer electronics, computers and communications, and finance.

DTC achieved revenues of $403 million in 1989.

Under terms of the OEM portion of the agreement, DTC will resell MIPS' entire product line Korea under its own brand name. DTC's largest customers for workstations and servers include the Korean government, businesses, universities and research institutes.

Under the agreement, DTC will also assemble selected MIPS workstations and servers in Korea for delivery to their customers.

''By assembling locally and combining our software with MIPS hardware, we believe we will be able to offer the highest price/performance systems in the Korean market, while providing the finest customer satisfaction with our extensive field operations in Korea,'' said Dr. Sahng Kyoo Park, general manager of the systems business at DTC.

He noted DTC will be porting its existing software solutions for the automotive, industrial, military and telecommunications markets onto the MIPS platform.

The technology transfer portion of the agreement allows Daewoo Telecom to license the source code for RISC/os, MIPS' implementation of the Unix operating system, and MIPS' compilers.

According to Chun Myung Kim, executive director of DTC's research and development center, ''MIPS' software provides us with an industry-standard base from which we could design and implement our own family of low-cost workstations, servers and other products for export.

''By adhering to the MIPS software standard, we will offer customers complete binary compatibility with the wealth of applications software that already runs on other MIPS-based systems.

''This is critical to our success, as it allows us to bring products to market with complete solutions faster than we could with any other technology.''

William D. Jobe, executive vice president of MIPS field operations, added: ''This partnership allows us to greatly expand not only into the Korean market, but through Daewoo's expertise and resources, in other worldwide markets as well.

''Daewoo has the proven marketing, economic and manufacturing experience to compete successfully around the world.''

Kwang Se Lee, managing director of MIPS Korea said he sees the Daewoo agreement ''as a natural development of MIPS' business strategy in Korea. Korean customers will welcome the support provided by Daewoo for the products supplied by MIPS.''

MIPS Korea offers sales, marketing and engineering support for a variety of Korean VARs and OEMs. It recently moved to its new headquarters located at Duckchun Building 2F, 61-6 Nonhyun-dong, Kangnam-Ku, Seoul 135-010.

MIPS Computer Systems Inc. is a leading supplier of technology based on RISC, including computer systems, optimizing compilers and technology products.

The company markets a line of high-performance computer systems based on RISC, from desktop workstations to deskside and data center servers. MIPS sells its systems through OEMs, VARs and system integrators worldwide.

BEVERLY HILLS, CA (JUNE 12) BUSINESS WIRE - French airlines UTA and Air France have selected Litton's unique new laser gyro inertial navigation system, called FLAGSHIP, for their future fleets of four-engine, transoceanic Airbus A340 aircraft.

The airlines are scheduled to take delivery of the aircraft beginning in October 1992. Each jetliner will be equipped with three Litton Aero Products division navigation systems and associated equipment. Including options, as many as 18 A340s may be purchased by each of the two airlines. Sabena World Airlines of Belgium selected the Litton FLAGSHIP system last year for the A340s it has ordered.

The Litton system, designated LTN-101, is unique in the application of newly developed laser gyros that eliminate all mechanical operation and provide the instruments with a sensitivity that permits the size of the gyros to be reduced. Advances in software technology add to the functional flexibility and reliability of the system. Overall, the Litton FLAGSHIP system is 60 percent smaller than comparable equipment, resulting in lighter weight and lower power consumption.

Litton's Aero Products division, located in Moorpark, is a full-line navigation systems supplier to commercial airlines, government and general aviation customers worldwide.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems to U.S. and world markets.

#90163b0079 06/12/1990 ~Business Wire

COLUMBUS, OH (JUNE 12) BUSINESS WIRE - With its buyers aggressively combing the globe in search of deals on quality brand name merchandise close outs, Consolidated Stores is out to shake the notion that it has become just another discount store -- and is diligently working to restore its identity as the country's leading close-out retailer.

Rapid growth from virtually nothing to more than 330 stores in the late 1980s created tendencies within management to treat the company more as a discount store to achieve operating efficiencies, Kelley said. But from a merchandising standpoint, this was a mistake, he added.

Although he wouldn't speculate on subsequent quarter sales and earnings, Kelley said comparative store sales for stores open more than 24 months were up 10.6 percent in April and 10.5 percent in May, and that he felt that the current favorable trend will continue for the balance of the year.

Kelley said Consolidated will continue releasing sales results on a monthly basis -- a practice it began this month -- since the company now has a significant number of stores that have been open for two years.

Re-elected today to one-year terms as directors of Consolidated Stores were Kelley, Charles H. Shenk, president; William B. Snow, executive vice president and chief financial officer; Harold Frank, retired chairman of Bradlees Department Stores; Rodney L. Goldstein, general partner of Frontenac Co.; and Richard L. Shenk, owner of the Richard L. Shenk Development Co.

Elected to a one year term for the first time as directors were David M. Selcer, partner with Baker & Hostetler; David T. Kollat, president and founder of 22 Inc.; Nathan Morton, president and chief executive officer of Soft Warehouse retail stores; and John L. Sisk, retired president and chief executive officer of Herman's World of Sporting Goods.

Selcer, an attorney, has been with the Columbus office of Baker & Hostetler since 1968, and specializes in employee relations and business law.

Kollat, who in 1987 founded Columbus-based 22 Inc. -- a company specializing in research and consulting for retailers and consumer goods manufacturers -- was previously executive vice president for The Limited

Inc., where he directed marketing and strategic planning. At the same time, he served as president of Victoria's Secret Mail Order, and directed that company's five-fold expansion into the most profitable operating division of The Limited Inc.

Morton joined Dallas-based Soft Warehouse in June of last year after working at Atlanta-based Home Depot as senior vice president of operations for nearly six years. Under his leadership, Home Depot grew from a $420 million regional company with 21 stores in four states to a $2 billion national company with 100 stores in 11 states. His retailing career covers more than 25 years.

Sisk, of Penta Gorda, Fla., retired in 1988 from Herman's World of Sporting Goods -- a $420 million chain of 125 stores -- after serving as president and chief executive officer for seven years. His 38-year retailing background includes positions with Sears Roebuck & Co., as national sales manager, and W.R. Grace & Co., as executive vice president of its nine-chain retail division.

Since joining Consolidated, Kelley has been working to strengthen the 333-store chain's unique marketing niche as the leading close-out retail specialty chain in the country. The company operates special retail stores under the name ''Odd Lots'' and ''Big Lots'' which sell close-out merchandise at substantial discounts from original prices in 13 midwestern and southeastern states. Close-outs are first quality products which may include manufacturers' overruns, discontinued items, package, color and model changes, and inventories purchased through bankruptcy courts.

CLEVELAND (JUNE 12) BUSINESS WIRE - The board of directors of Forest City Enterprises Inc. (AMEX:FCEA and FCEB) voted Tuesday to increase the semi-annual dividends on Class A and Class B common stock.

The dividend on Class A common stock will be 23 cents per share, an increase of 2 cents per share from last year, and the dividend on Class B common stock is 20 cents per share, an increase of 2 cents per share. Dividends on Class A and Class B common stock are payable on Aug. 1, 1990, to shareholders of record at the close of business on July 16, 1990.

The annual indicated dividend rate on Class A common stock is 46 cents per share, and 40 cents on Class B common stock, reflecting a 6 cents preferential dividend on the Class A common stock. While the preferential dividend on the Class A common stock was not mandatory since Jan. 31, 1988

the board has determined to continue the differential at this time.

It is the policy of the company to consider dividends at the board of directors meetings in June and December, and if dividends are declared, they are payable on Aug. 1 and Feb. 1 of the following year from the surplus of the fiscal year ending Jan. 31, immediately preceding the Feb. 1 payment.

The second semi-annual dividend will be considered at the board of directors meeting in December 1990.

At the company's annual meeting today, Albert B. Ratner, president of Forest City, reported that a study begun 12 months ago on a possible restructuring of the company to enhance shareholder value is being completed. Ratner said that he is confident that by year's end the company will have concluded as to whether a restructuring will help achieve this goal. Ratner also said that the current value accounting report to shareholders in the company's annual report is a result of this restructuring study.

Re-elected as directors representing Class A Common Stockholders at today's annual meeting were: Max Ratner and J. Maurice Struchen. Because of the death of William Serne, Forest City's board of directors will consider appointing another director for Class A Stockholders at a future meeting.

Re-elected as directors representing Class B Common Stockholders were: Albert B. Ratner, Nathan Shafran, Samuel H. Miller, Charles A. Ratner, Harry O. Schloss Jr., James A. Ratner, Jerry V. Jarrett, Ronald A. Ratner and Scott S. Cowen.

Subsequently, at today's board of directors meeting, Nathan Shafran resigned as a director representing Class B Common Stockholders. The board then appointed Shafran to fill the seat on the board representing Class A Stockholders vacated by the death of Serne.

RIVERSIDE, CALIF. (JUNE 12) BUSINESS WIRE - The directors of Fleetwood Enterprises Inc. (NYSE:FLE), the nation's leading producer of recreational vehicles and manufactured housing, Tuesday announced an increase in the company's regular quarterly cash dividend to 21 cents per share of common stock, up nearly 11 percent from the previous rate of 19 cents per share.

The increased dividend declared Tuesday is payable August 8, 1990, to shareholders of record July 6.

''This action by the board of directors marks the eighth consecutive year that the company has increased the dividend. The decision to raise the dividend results from last year's solid earnings, the company's underlying financial strength and favorable expectations regarding the company's long-term prospects,'' commented Fleetwood's Chairman of the Board John C. Crean in announcing the dividend increase.

Fleetwood operates 20 recreational-vehicle and 26 manufactured- housing plants in 17 states and Canada.

#90163b0089 06/12/1990 ~Business Wire

FREMONT, CA (JUNE 12) BUSINESS WIRE - The GRiD 1810, the first notebook-sized laptop computer with a removable hard disk drive, was introduced Tuesday by GRiD Systems Corp., a subsidiary of Tandy Corp.

The new laptop, a full featured, six-pound unit, will enable users to easily exchange data between laptops, and between laptop and desktop computers, by simply exchanging hard disk drives. The new feature also will enhance data distribution, improve information security and be easier to service.

The new computer will be demonstrated at New York PC EXPO, June 19-21.

Along with the Model 1810, GRiD Tuesday also introduced a Desktop Receiver developed by Tandy. The receiver enables a user to insert the removable hard drive directly into a GRiD or Tandy desktop computer where the disk operates like any standard, internal storage device. The receiver later will be adapted for use in any standard MS-DOS computer.

GRiD president Alan Lefkof said, ''The 1810 is ideal for the professional on the move. It is very small and light, without compromising the size of the screen.

''Additionally, there are a rapidly growing number of business people who use a laptop as well as a desktop. The removable drive provides easy desktop/laptop integration. The GRiD 1810, along with the Desktop Receiver, will ensure that large companies and government agencies, GRiD's

two major target markets, achieve maximum productivity from their technology investments.''

Steve Hess, executive vice president of research at Creative Strategies, a Santa Clara, Calif., market research firm, said the laptop ''offers single users an alternative to a docking system or data transfer software such as LapLink. It also offers users the ability to reconfigure the system for individual clients or multiple applications while traveling. All the user has to do is exchange a cartridge.

''The GRiD 1810 also will be important in enterprise-wide systems where there can be an inventory of laptops while the cartridges, or drives, are owned by individuals. This generates savings by allowing for a smaller inventory of laptops. Also, corporations can periodically issue data updates in a cost-effective manner using the removable hard disks.''

Among the many customers who have already placed orders for the laptop is Sales Partner Systems Inc., Daytona Beach, Fla., a vertical software firm targeting food service manufacturers and distributors. SPS has purchased about 150 GRiD 1810's and plans to order about 300 more this year.

SPS president Larry Frank said, ''With its sharp, large display and full-size keyboard, this is the best notebook computer we've seen. Food service reps need a rugged, lightweight laptop like this because they typically use their laptops 8 to 10 hours a day as they go from account to account.''

The 1810's features includes a 10-inch diagonal EGA display, with 1:1 aspect ratio, that provides more graphics capability than the small CGA display standard on most notebook computers. With the GRiD, users can take advantage of popular graphical user interface software.

The GRiD 1810 has a full-size, 81-key keyboard with large, standard typewriter size keys that are more convenient to use than the smaller keys found on other notebook-sized laptop computers.

Additional features include rugged, durable caseworks, advanced communications capabilities and power management. To further ensure data security, GRiD's exclusive password protection system has been incorporated into the computer's ROM BIOS.

Bruce Walter, GRiD's senior vice president of sales and marketing, explained that ''the 1810 is ideal for the many people who don't need a laptop every day.

''For example, a major newspaper currently is interested in providing each reporter with a removable hard drive. When they go out to cover a story, they can select an 1810 from a pool, slide in their drive and they are

ready to go.''

He added that the 1810-desktop receiver combination ''brings serviceability to a new level. Today the entire computer -- hard drive and all -- must be sent in when a repair is required. Here, only the computer is shipped. The user remains productive by keeping the hard drive and simply slipping it into another laptop or desktop computer.''

The GRiD 1810 has a 2400 bps MNP modem that uses data compression to increase standard 2400 bps modem speed to 4800 bps. It also incorporates error detection/correction features essential to emerging applications such as cellular telephone communications.

With GRiD's standby power management features, the 1810's removable NiCad battery delivers more than two hours of battery life with normal use. The system battery adds only 11 ounces to the 1810's weight.

A standby mode turns off all power except to system RAM. This feature allows users who temporarily stop using the computer to return to the exact spot where they left off in their application. The feature also extends battery life.

A bridge battery maintains a standby mode so that the battery can be replaced without turning off the unit.

The GRiD 1810, which has a 10MHz V-20 microprocessor, is ideally suited for word processing, electronic mail, communications and other field automation applications.

The GRiD 1810 comes standard with 1MB of RAM, EGA display, MS-DOS 3.3 and LapLink software in ROM, 20MB removable hard disk drive, 81-key standard typewriter size keyboard, one parallel port, one serial port and a battery. Users can select either a backlit or reflective EGA, high-contrast, 10-inch diagonal LCD display.

LOS ANGELES (JUNE 12) BUSINESS WIRE - Home Savings of America, the nation's largest savings and loan institution and principal subsidiary of H.F. Ahmanson & Co. (NYSE:AHM), announced Tuesday that its deposits increased by a record $808 million during the month of May -- the largest one-month gain in the company's history.

The record monthly increase follows Home Savings' record deposit increase

last year of $3.6 billion, the largest one-year gain in the company's history. Deposits at May 31, 1990, totaled $34.75 billion, the largest deposit base of any U.S. savings institution.

Richard H. Deihl, chairman and chief executive officer, said, ''Despite the ongoing scrutiny and negative news coverage of the thrift industry, Home Savings continues to experience record increases in its deposits.

''This demonstrates not only consumer confidence in our institution -- one of the few large thrifts not to change its name to a bank -- but also increased demand by depositors for safety and soundness in their financial institution.''

Deihl added that of the $808 million increase, $707 million was new money to the Association, which represents the largest monthly inflow of deposits in the company's history. The remainder of the increase was interest credited to accounts.

So far this year, deposits have increased $1.6 billion through the month of May, compared to a $1.4 billion increase during the first five months of 1989. In May of 1989, deposits increased $261 million, with new money accounting for $172 million of the increase. Deposit increases were recorded during May in each of the nine states where Home Savings of America has savings branches.

In California, total deposits increased $434 million in May and have increased $709 million since the first of this year.

All of the deposit growth continued to be in retail accounts which are deposits of individual consumers. The company does not utilize brokered deposits.

Home Savings of America, with more than $46 billion in assets and $34 billion in deposits, serves more than 2.5 million customers from 358 savings branches in nine states and 102 mortgage lending offices in 18 states. Its parent company reported first quarter 1990 earnings of $61.8 million, a 58 percent increase over its first quarter 1989 earnings.

#90163b0096 06/12/1990 ~Business Wire

NEW YORK (JUNE 12) BUSINESS WIRE - A new era in personal communications began Tuesday with the official unveiling of the world's first paging system that uses a wristwatch as the receiver.

During a four-city satellite conference, AT&E company officials successfully demonstrated the first coast-to-coast message transmission using its Personal Communications System (PCS) and SEIKO RECEPTOR MessageWatch receiver.

At the conference, Charles Skibo, president and chief operating officer of San Francisco-based AT&E Corp. (ASE:ATW), announced that the company has successfully completed the second and final field test phase for the RECEPTOR (TM) PCS in Portland, Ore.

AT&E will now begin marketing the low-cost, easy-to-use service to consumers in that city.

The RECEPTOR PCS allows messages to be initiated by telephone and broadcast over FM radio subcarriers to SEIKO (R) RECEPTOR (TM) MessageWatch (TM) receivers supplied by Hattori Seiko Co. Ltd.

AT&E's patented RECEPTOR technology integrates a unique miniaturized radio receiver into the MessageWatch and an antenna into its wristband. As a result, the MessageWatch can receive messages initiated from standard telephones and broadcast over the RECEPTOR PCS network. The MessageWatch receives, displays and stores a variety of messages, including ''CALL HOME '' ''CALL OFFICE,'' call any telephone number designated by the caller or a predetermined coded message. Messages may also be coded as urgent.

Prior to proceeding with product development, AT&E conducted extensive independent research, including detailed market analyses, focus-group studies and surveys among users and non-users of existing paging systems. Based on the research findings, the company concluded that a large untapped business and consumer market exists for a convenient, low-cost personal communications product such as the SEIKO (R) RECEPTOR (TM) MessageWatch (TM) receiver and RECEPTOR (TM) Personal Messaging Service.

AT&E'S STRATEGIC ALLIANCES

AT&E is developing a network of seven RECEPTOR regional operating companies that will be responsible for introducing the SEIKO (R) RECEPTOR (TM) MessageWatch (TM) receiver and RECEPTOR PCS on a local and regional basis. These companies will initially serve 52 target markets in the United States.

#90163b0099 06/12/1990 ~Business Wire

REDONDO BEACH, CALIF. (JUNE 12) BUSINESS WIRE - It survived its trip across the asteroid belt -- the first spacecraft to attempt such a journey.

It endured the intense radiation of Jupiter on the first fly-by of the giant planet.

About the only thing to stop this hardy little emissary of mankind has been the ''klingons'' in ''Star Trek V'' who used it for target practice -- but that was only in the movies.

In real life, the TRW-built Pioneer 10 spacecraft Wednesday is celebrating its seventh anniversary of passing Neptune's orbit, a feat that made it the first man-made object to leave the solar system. (Pluto, usually considered the most distant planet, is inside Neptune's orbit for another 12 years.)

On its lonely journey in deep space, the 570-pound spacecraft is now exploring a region not likely to be revisited in our lifetime. Pioneer 10 has made it possible for scientists to ''view'' a span stretching 5 billion miles from the sun, or 50 times the distance between the Earth and the sun. It is providing scientists with clues on how the sun's atmosphere really works.

Launched in 1972, the spacecraft's design life was 21 months. Today, almost two decades later and almost 4.7 billion miles (about 49 astronomical units) from the sun, Pioneer 10 continues to beam home data on uncharted territory.

Its signal has only 8 watts of power, the equivalent of a nightlight. The spacecraft is so far away that this radio signal, even though it is traveling at the speed of light, takes close to 7 hours to make the trip from the spacecraft to the Earth. At such a great distance, Pioneer 10's radio signals are getting fainter.

Pioneer 10 consumes less electrical power than a standard 100-watt lamp. This year for the first time the radioisotope thermoelectric generators' power production was down. To compensate, every day NASA turns off some of the 11 science instruments aboard Pioneer 10 -- but not permanently.

As the spacecraft leaves the known planets farther and farther behind, scientists continue to look for evidence of a 10th planet, solar wind changes, and very long wavelength gravity waves which would confirm Einstein's Theory of Relativity. They also are examining the data for signs of the heliopause, the boundary between the sun's atmosphere and interstellar gas.

Each year enough science data comes from Pioneer 10 to fill more than a

million pages. In addition, there are the volumes of data from its sister ship, the TRW-built Pioneer 11, which became the fourth man-made object to leave the solar system on Feb. 23. Traveling in the opposite direction from Pioneer 10 and more than 2.8 billion miles (29.9 astronomical units) from the sun, Pioneer 11 recently showed that a majority of the ''solar cosmic rays'' in the heliosphere, or sun's atmosphere, actually originate in interstellar gas.

Both Pioneers carry a plaque bearing symbols that should be understood by any intelligent life that might find them. The message tells would-be readers who we are and where we come from. Pioneer 10 will not fly by any celestial bodies for more than 30,000 years. After that, the odds of an instellar encounter are one every million years.

#90163b0111 06/12/1990 ~Business Wire
CATALINA ISLAND, CALIF. (JUNE 12) BUSINESS WIRE - Construction on what is believed to be the West Coast's first desalination plant to convert seawater to drinking water has begun on Catalina Island, according to James W. Oates, president of The Whitehawk Partnership, builder of the plant and developer of Hamilton Cove.

''The partnership between Hamilton Cove and Southern California Edison is unique,'' said Oates of the business relationship between the entities that will build the desalination plant and administer and deliver the water.

''This will not only by the first desal plant that will turn seawater into potable water, but it's the first time the private and public sectors have come together to produce, in partnership, a project of this type.''

Hamilton Cove Associates is the private gated residential resort on Catalina Island. Southern California Edison is the public utility which supplies water to the island.

After two years of intense negotiations between Hamilton Cove and Edison, the public utility filed a petition with the California Public Utilities Commission (PUC). PUC approval was obtained and construction was begun immediately. The anticipated completion date is December 1990.

The $3 million plant, built by Hamilton Cove, is jointly engineered by David A. Boyle Engineers of Santa Ana and Southern California Edison. The public utility will own and operate the plant at Pebbly Beach on the island. When fully operational, the plant is expected to augment the island's water supply by 145 acre feet, or 48 million gallons of drinkable water a year.

This increase translates into almost one-third of this island's annual water consumption. About one-half of the water generated from the plant will be allocated for use by Hamilton Cove.

The process continuously forces seawater, from wells near the shore of the San Pedro Channel, under pressure along one side of a minutely porous membrane. Freshwater gradually works its way through the membrane and collects on the other side, leaving salt and other impurities in solution.

#90163b0121 06/12/1990 ~Business Wire

REDONDO BEACH, CA (JUNE 12) BUSINESS WIRE - TRW Space & Technology Group Tuesday announced that it has formed a team to compete for a space-based telescope for NASA's next Great Observatory, the Space Infrared Telescope Facility.

Team members are Ball Aerospace of Boulder, Colo., and Eastman Kodak Co.'s Federal Systems Division in Rochester, N.Y. TRW will be prime contractor.

The Space Infrared Telescope Facility (SIRTF), now scheduled for launch in 1999, is being managed by NASA's Jet Propulsion Laboratory in Pasadena. Its telescope will view invisible infrared energy that does not penetrate Earth's atmosphere. SIRTF is part of NASA's Great Observatory Program intended to provide observations across the elctromagnetic spectrum.

Infrared observations will complement observations by Hubble Space Telescope, which operates in the ultraviolet and visible part of the spectrum, Gamma-Ray Observatory (GRO) in the gamma-ray regime and the

Advanced X-Ray Astrophysics Facility (AXAF) in the X-ray region. SIRTF will be the most sophisticated infrared facility ever flown.

''Along with the other Great Observatories, SIRTF will enable many scientists to conduct fundamental research in astrophysics. It will stimulate careers in mathematics and science and could lead to fundamental breakthroughs in our understanding of the origin and fate of the universe '' said R. Gordon Williams, vice president and general manager of TRW Federal Systems Division.

''Each of the Great Observatories offers different technological challenges,'' Williams said. ''For SIRTF we have formed a team that provides proven expertise in dealing with the challenges unique to infrared technology, including the requirement for cyrogenic cooling for a five-year operational lifetime. We are looking forward to being part of an endeavor that will push back the frontiers of knowledge.''

For Ball Aerospace Systems Group, SIRTF represents an evolutionary sequel to previous successful long-lived superfluid helium-cooled systems such as the Infrared Astronomical Satellite (IRAS), launched in 1983, and the Cosmic Background Explorer (COBE) satellite, now operating successfully in orbit. Under a team agreement with TRW, Ball is currently building the aspect camera for NASA's Advanced X-ray Astrophysics Facility.

Eastman Kodak has been an integrator of space-qualified optical systems since the 1950s. Major projects have included the 2.4-meter backup primary mirror for the Hubble Space Telescope and five camera systems for the Apollo Lunar Orbiter program. Kodak is currently teamed with TRW to produce the telescope for NASA's AXAF.

TRW Space & Technology Group is an operating unit of Cleveland-based TRW Inc. The group has built more than 175 communications, defense and scientific spacecraft; developed over 200 advanced space instruments; and integrated some 550 experiments into their host spacecraft. Over 90 percent of the spacecraft TRW has built over the past 20 years have exceeded original design life.

Such longevity has provided over $4 billion in extra service to government customers and a bonus of information to the scientific community.

ANAHEIM, CA (JUNE 12) BUSINESS WIRE - Comarco Inc. (NASDAQ:CMRO) has received a $5.7-million increase to its Command, Control, Communications

and Interoperability Testing support contract with the Army's Electronic Proving Ground at Fort Huachuca, Ariz.

This contract's value is now $40 million. Comarco currently employs more than 100 engineers and computer scientists supporting testing of sophisticated C3 systems at Fort Huachuca.

Comarco has also received an extension to its software-services contract in support of the U.S. Army Logistics Center at Fort Lee, Va. The Army has now exercised $9.9 million in options, increasing the contract's value to $45 million.

The Navy exercised an $8.7-million option on Comarco's engineering-services contract with the Naval Weapons Support Center in Crane, Ind. This option is the first of two which may be exercised under this contract.

Don M. Bailey, president, stated: ''These contract actions are proof of our customers' satisfaction with Comarco's performance. We anticipate further extensions and new-contract awards that will continue to build Comarco's reputation and business backlog.''

Comarco provides engineering and computer-based services and products to the government, commercial and industrial markets.

SEATTLE (JUNE 12) BUSINESS WIRE - Nordstrom Inc. and Nordstrom Credit Inc. have each filed separate shelf registrtion statements with the Securities and Exchange Commission to offer from time to time up to $150,000,000 of debt securities of each company to be used for general corporate purposes, including the repayment of outstanding debt.

The debt securities may be offered from time to time through underwriters and agents, including Goldman, Sachs & Co. and The First Boston Corp.

Nordstrom is a specialty retailer selling a wide selection of apparel, shoes and accessories for women, men and children primarily in Washington, Oregon, California, Virginia, Alaska and Utah. Nordstrom Credit Inc. is a wholly owned subsidiary of Nordstrom whose primary business is the financing of Nordstrom's customer accounts receivable.

Registration Statements relating to these securities have been filed with the Securities and Exchange Commission but have not yet become effective.

These securities may not be sold nor may offers to buy be accepted prior to the time the registration statements become effective.

This announcement shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such State. A copy of the prospectus may be obtained from each company by contacting the corporate Secretary at 1501 Fifth Avenue, Seattle, Wash., after the offering commences.

OAKLAND, CA (JUNE 12) BUSINESS WIRE - Seven weeks after receiving a $17 per share cash offer to acquire Sprouse-Reitz Stores Inc. of Portland, Ore. (NASDAQ:STRS) the company still has not responded to the offer.

''Robert A. Sprouse II needs to explain why it is in the best interest of all shareholders not to enter into discussions with us,'' said Robert H. Bisno, chairman of TransAction Financial Corp.

The board of directors of Sprouse-Reitz issued a press release on June 4 announcing that ''it had instructed its independent Special Committee, in consultation with the Company's investment bankers and representatives of the Sprouse family, to initiate discussions with several parties that have indicated an interest in acquiring all or a portion of the Company.''

''The Sprouse-Reitz shareholders want to know why the company is refusing to act with a $24 million cash offer -- the only offer -- on the table!''

Bisno noted that his offer was presented to the board of directors of Sprouse-Reitz on April 23 by TransAction Financial Corp., First San Francisco Holdings Ltd., and certain other investors. TransAction Financial Corp. owns in excess of $500 million in commercial, office and residential developments in urban, West Coast communities.

VANCOUVER, BC (JUNE 12) BUSINESS WIRE - David Patterson, president of Steelhawk Resources Ltd., announced the company has entered into a Private

Placement Agreement for 300,000 units at a price of 60 cents per unit with a European investor.

Each unit will consist of one common share and one share purchase warrant with an exercise price of 70 cents to be exercised no later than 12 months from the date of the Agreement. Funds are to be utilized for the continued development of the company's interest in the Nucell Nuclear Battery.

The next phase of research will explore the development of the engineering prototype, an economic, practical device that will form the focus of product development.

The device demonstrating the underlying physics is operating at Nucell's laboratory in Portland, Ore. The Nucell battery technology works in theory, by converting the energy of radioactive decay into direct electrical current without first converting it into thermal energy.

Nucell Inc. is owned as to 49 percent by Steelhawk Resources Ltd. and as to 51 percent Peripheral Systems Inc. (NASDAQ:PSIX), an Oregon corporation. Steelhawk's shares are quoted on the Canadian Over-The-Counter Automated Trading System (COATS) under the symbol STLH.

SAN FRANCISCO (JUNE 12) BUSINESS WIRE - American Building Maintenance Industries Inc. (NYSE:ABM) Tuesday reported second quarter net income and revenues for the three months ended April 30.

Net income for the second quarter increased 14 percent to $2,227,000, compared to $1,962,000 for the like period last year. Earnings per share for the quarter were 56 cents, compared to the 51 cents per share for the like quarter of the prior year. Revenues increased five percent to $164,477,000, compared to $156,382,000 for the like period last year.

Net income, before an extraordinary gain, for the six months ended April 30 was $3,862,000, an increase of 13 percent as compared with $3,412,000 for the six-month period in 1989. Earnings per share for the six-month period were 98 cents, compared to 89 cents for the like period of the prior year. Revenues for the first half of fiscal 1990 increased seven percent to $328,851,000 against $308,440,000 in 1989.

As a result of an insurance settlement for damage caused by the earthquake of Oct. 17, 1989 to the company's headquarters in San Francisco, an extraordinary gain of $1,387,000, net of income taxes, was recorded in the first quarter fiscal 1990. The extraordinary gain amounted to 35 cents per share.

ABM employs over 35,000 and is one of America's leading facility service contractors, providing elevator, engineering, janitorial, lighting, mechanical, parking, pest control, security and janitorial supply services to hundreds of communities in the United States and Canada.

SAN ANTONIO (JUNE 12) BUSINESS WIRE - Significant financial strengthening and the projection of an operating profit beginning in the current quarter were announced Tuesday by U.S. Long Distance Corp. (VcSE:USL.).

USLD President Parris H. Holmes Jr. said the company has raised $2.5 million in an equity financing, which closed Tuesday. Some $1.7 million in cash were raised through a private offering of Series A 10 percent cumulative convertible preferred stock, and the company also agreed to exchange Series A preferred stock for $800,000 in debentures owned by several of its debentureholders.

Additionally, Holmes said USLD is projecting profitability for the remainder of the year.

''For the quarter ending June 30, 1990, management anticipates revenues of $5 million and net income in excess of $100,000,'' he said.
''This revenue will represent a 20 percent increase from the quarter ended March 31, 1990, and a doubling of business from the same period a year ago.''

''With this financing completed, USLD has net worth in excess of $2.6 million. Now that the company is profitable, our financial condition will continue to improve,'' Holmes said.

Further, Holmes said, ''with the completion of this equity offering, USLD now meets the listing standards of the National Association of Securities Dealers 'over the counter' network and anticipates a NASDAQ listing by early July. This listing will greatly benefit our shareholders, providing them a stronger market in which to trade the common stock of USLD.''

For the $2.5 million, USLD will issue five million Series A preferred shares, convertible into five million shares of common stock for a four-year period. The company may redeem the preferred stock at any time after May 31, 1991, at $1 per share. The preferred stock has a 10 percent yield, payable through quarterly dividends.

USLD now has 24.8 million common share equivalents outstanding and an additional 5.9 million shares represented by warrants and options.

USLD's primary business is providing long distance telephone service to the hospitality and payphone industries. The company also provides billing and collection services to interexchange carriers. USLD currently provides over 2.5 million minutes a month of long distance service to its hotel, payphone and hospital customers and processes nearly two million records per month through its collection subsidiary.

PALO ALTO, CALIF (JUNE 12) BUSINESS WIRE - Cornish & Carey Residential Inc., Tuesday announced that Howard Friedman, F. Bryant McOmber Jr. and John Mozart had been elected members of the board of directors at the May shareholders meeting.

It was also announced that McOmber was appointed secretary of the corporation.

Friedman, 55, is president of Woodmont Realty Advisors, Belmont, a subsidiary of the Woodmont Cos., where he is a vice president. Before joining Woodmont, Friedman was executive vice president and general manager of the Oakland Invaders professional football team, and prior to that was a director and vice president of Koracorp Industries in San Francisco. Friedman received a bachelor's of science degree in marketing from New York University.

McOmber Jr., 44, Cornish & Carey Residential's vice president and general counsel, joined the company in 1988. He was previously involved in business litigation practice in Palo Alto. McOmber, who is also a real estate broker, received a J.D. from the College of Law of the University of Utah and a bachelor's of arts from Brigham Young University.

Mozart, 47, is president of Mozart Development Co., Palo Alto. Mozart received a bachelor's of science in business and marketing from San Jose State University.

Cornish & Carey Residential, founded in 1935, is the largest independent residential real estate firm in Northern California. The company has over 780 agents in 26 offices in Monterey, San Benito, San Mateo, Santa Clara and Santa Cruz counties. Corporate offices are located in Palo Alto.

SAN JOSE, CALIF (JUNE 12) BUSINESS WIRE - TeleVideo Systems Inc. (OTC:TELV) has reported financial results for its second fiscal quarter ended April 29, 1990.

Net sales for the quarter were $11.9 million, compard to $11.5 million for the like quarter in fiscal 1989. A net loss of $3.9 million, or 9 cents per share, was incurred, based on 44.1 million shares outstanding. This compares to a net loss of $5.4 million, or 12 cents per share, based on 46.5 million shares, for the corresponding quarter in fiscal 1989.

For the six months ended April 29, TeleVideo reported net sales of $23.3 million and a net loss of $8.1 million, or 18 cents per share, compared to net sales of $26.1 million and a net loss of $14.1 million, or 30 cents per share, for the corresponding period in fiscal 1989.

TeleVideo indicated that the above results for fiscal 1989 have been restated to reflect the disposition of Delta Data Corp., which was written off in TeleVideo's consolidated financial statements for the fiscal year ended Oct. 31, 1989.

''Although operational losses continued in the second quarter, they were about 44 percent less than a year ago,'' said Dr. K. Philip Hwang, chairman and chief executive officer.

''This improvement is due primarily to the benefits derived from the cost-cutting measures first implemented in fiscal 1989, such as reductions in operating expenses and consolidation of operations. Those cost-cutting measures are continuing.''

Hwang went on to state that in order to increase sales and reduce costs of sales, the company will continue its aggressive marketing plan, including expanding in the European market. He also referred to the firm's recently announced two joint ventures to supply computers in the USSR and the engagement of Robert Wilson as a management consultant.

TeleVideo Systems Inc. is a leading supplier of industry-standard, high-performance personal computer and networking products, video display terminals and computer enhancement products.

TeleVideo is a publicly held corporation and is traded in the over-the-counter market.

#90163b0249 06/12/1990 ~Business Wire
SUNNYVALE, CA (JUNE 11) BUSINESS WIRE - Lockheed Missiles & Space Co. Tuesday outlined actions that have reduced emissions of ozone-depleting chemicals over the past three years -- actions that will eliminate those emissions totally by the year 2000.

The company countered allegations by the Greenpeace organization which claimed that ''Lockheed has remained an industry laggard, failing to halt its use of ozone-destroying chemicals.''

Katherine Strehl, government relations manager for LMSC, stated:

''The statistics speak for themselves: In the last two years, we have reduced emissions of Freon 113 (a chlorofluorocarbon, or CFC) by 39 percent and reduced emissions of TCA (1,1,1 trichloroethane) by 43 percent.

''Our policy is fully consistent with the goals of the Montreal Protocol of 1987 which would lead to 50 percent reduction of such emissions by 1993 80 percent of 1997, and 100 percent by the year 2000.

''We initially used CFCs because they are non-flammable, inert and safer to handle than the combustible solvents, which are both toxic and flammable and were widely used by industry. We now recognize CFC's potential ozone depleting side effects and have taken steps to curb those emissions.''

Strehl said Lockheed's actions to reduce emissions include:

-- Installation of refrigerant recycling systems which since late 1989 have reduced the use of Freon by more than 21,000 pounds.

-- A major capital investment to replace the fire-suppressant Halon with another inert gas that doesn't deplete the ozone.

-- Incorporation of numerous emission control systems and devices to recycle or safely dispose of chemicals.

-- A thorough program to train and update employees in the use and handling of chemicals.

-- A strong internal management program that continuously monitors equipment and programs.

Furthermore, Strehl added, Lockheed is investigating alternatives, including water-based processes and applications and will implement their use when they are proven to produce the precision cleaning required for

optical, thermal and other areas on spacecraft.

''Lockheed's requirements,'' she added, ''are often more stringent technically and operationally than those of other valley firms because ours frequently involve spacecraft that must function for years without repair or replacement of parts. There's a vast difference between space applications and ground applications.''

''Lockheed is not substituting toxic chemicals for ozone-destroying ones '' Strehl said. ''For example, since 1987 we've all but eliminated the toxic chlorinated solvent called methylene chloride.''

Lockheed works closely with its governmental customers to find alternatives to test and qualify a product that uses a new cleaning process. That takes time, she said; however, Lockheed is making concerted efforts as a company and through industry associations.

#90163b0257 06/12/1990 ~Business Wire

TEMPE, ARIZ (JUNE 12) BUSINESS WIRE - Amtech Systems Inc. (NASDAQ:ASYS) announced results for the quarter ended March 31, 1990.

Sales increased 39 percent to $6,048,000 ($1,142,000 semiconductor equipment and $4,906,000 temporary technical personnel) from $4,346,000 ($1,118,000 semiconductor equipment and $3,228,000 temporary technical personnel) for the comparable quarter of the prior year. Net income decreased to $40,000 (2 cents per share) from $166,000 (10 cents per share) for the prior year quarter.

For the six months ended March 31, 1990, the company posted net income of $233,000 (12 cents per share) compared to $399,000 (25 cents per share) for the prior year six month period. The 1989 results included an extraordinary item of $102,000 (7 cents per share).

J.S. Whang, president, commented on the company's second quarter results, ''We are beginning to feel the effect of the industry slow-down on our semiconductor equipment shipments. We anticipate that this cyclical downturn will continue to adversely affect results for the semiconductor equipment segment for the remainder of the fiscal year. However, we are expecting business to improve during 1991.

Whang continued, ''The March quarter is historically the weakest quarter of the year for the temporary technical personnel business due to seasonal

payroll tax affects. Therefore, with both business segments showing weak profitability our overall results were down substantially from the prior year.''

In regard to the pending acquisition of Tystar, Whang sad, ''The industry downturn has also affected Tystar's business and, as a result, the pace of our negotiations has slowed somewhat. While we are actively working with the Tystar principals, there are still a number of factors to be resolved before a transaction can be closed.''

Amtech Systems Inc. manufactures the ATMOSCAN, an automated, environmentally controlled process system which improves the yields of semiconductor manufacturers.

In addition, through its wholly owned subsidiaries, RTS Inc. Echelon Service Co. and Martec Services, Amtech provides technical temporary employment services to major aerospace, defense, computer and high technology companies throughout the Southwest, Baltimore/ Washington D.C. and Southern California areas.

#90163b0262 06/12/1990 ~Business Wire

SAN JOSE, CALIF (JUNE 12) BUSINESS WIRE - A Texas-based graphics software developer affiliated with Control Data Corp. Tuesday sought an injunction to halt the sale of three popular Harvard Graphics software products.

Computer Support Corp. (CSC) of Dallas has filed suit in the U.S. District Court, Northern District of California, alleging copyright infringement by Software Publishing Corp. (SPC) of Mountain View, Calif. Software Publishing is the developer of Harvard Graphics.

The suit alleges that hundreds of clip-art images contained in Computer Support products were copied without permission by SPC.

An injunction would halt sales of the current Harvard Graphics program, along with the Harvard Graphics Military Symbols and Business Symbols Accessory Paks.

CSC also has requested damages, profits from Harvard Graphics sales, attorneys' fees and court costs.

The action is a counterclaim against an SPC suit filed on April 13

alleging that CSC's software programs and clip-art are not protected by U.S. copyright laws.

''The SPC position attacks the entire principle of copyright by claiming that our images and software are not protected from unauthorized use,'' said CSC President Fred Schoeller. ''They claim our libraries of more than 15,000 Arts & Letters and Diagraph clip-art images cannot be copyrighted and that they can use and re-sell our images at will without permission or license agreements.

''We find both claims ludicrous and reprehensible,'' Schoeller said. ''A software developer should have the same copyright protection as a writer, photographer, composer, or artist in creating and selling any original work.

''Previous rulings already have extended copyright protection to computer software programs and CSC is convinced the court will uphold our position.''

Schoeller said SPC approached his firm in April 1989 to negotiate a license to use CSC clip-art in Harvard Graphics products. Negotiations ended after SPC filed suit.

''We view SPC's lawsuit as a dangerous ploy to excuse themselves of any wrongdoing,'' Schoeller said. ''If SPC's actions are upheld, it could set a precedent that might be used to weaken the copyright laws software developers depend upon to protect their intellectual property.''

At issue is the unauthorized copying of hundreds of computer clip-art images that CSC commissioned professional artists to create, including renderings of complex objects into highly stylized images.

An advanced business presentation tool sold in 47 countries, Arts & Letters recently won Publish Magazine's 1989 Readers Choice Award for the best clip-art for the IBM PC. A version compatible with Windows 3.0 will be released this month, offering sophisticated drawing options, automatic charting, and the largest available supply of electronic clip-art.

Computer Support Corp., an IBM Business Partner with headquarters in Dallas, is a developer of computer graphics products for personal computers. Products currently available from CSC include Picture Perfect, Diagraph, PC-Emcee, On-Command, Arts & Letters Graphics Composer, Arts & Letters Graphics Editor, and Decipher.

Software Publishing Corp. is a publicly held firm traded under they symbol SPCO.

SANTA ANA, CALIF (JUNE 12) BUSINESS WIRE - A system designed to destroy organic-chemical contaminants in groundwater by oxidizing them with ultraviolet light has been sold to Xerox Corp. by Ultrox International, a subsidiary of ON-SITE Toxic Control Inc. (OTC), Santa Ana.

Developed by Ultrox, the new technology embodied in the system is called ultraviolet light/oxidation. It will be used to augument an air stripper to cleanse volatile organic compounds, or solvents, from groundwater at the Xerox Joseph C. Wilson Center for Technology in Webster, N.Y. The Wilson Center is the main Xerox research, engineering and manufacturing facility worlwide.

Under its contract with Xerox, valued at more than $400,000, Ultrox will build, install and service the new water-treatment system.

The Ultrox system was selected following tests conducted by Xerox to determine how best to destroy the contaminants without creating any emissions or other byproducts. The Ultrox process uses a combination of hydrogen peroxide, ozone and ultraviolet light.

According to a report on the technology published by the U.S. Environmental Protection Agency, toxic organics are photo-oxidized in the treatment, leaving carbon dioxide, water and harmless salts as the only byproducts.

The EPA report on UV/Oxidation technology ia available from Ultrox or the EPA. ON-SITE Toxic Control is traded over-the-counter. For more information, contact Ultrox International, 2435 South Anne St., Santa Ana, CA 92704. Phone: 714/545-5557, FAX: 714/557-5396.

#90163b0618 06/12/1990 ~Business Wire

SANTA ANA, CALIF. (JUNE 12) BUSINESS WIRE - Anthony R. Moiso, president and chief executive officer of Rancho Mission Viejo's Santa Margarita Co., has been elected a director of The First American Financial Corp., parent of one of the nation's-largest title insurance companies.

Santa Margarita is responsible for all the ranching, farming, development, leasing activity and financial-management efforts on the historic Rancho Mission Viejo in South Orange County.

Moiso, 50, founded the Santa Margarita Co. in 1983, the company is currently developing the 5000-acre Rancho Santa Margarita planned community. The town, which opened in May 1986, is situated on the 40,000-acre Rancho Mission Viejo, Orange County's second-largest privately owned land holding.

The new First American Financial director joined the Mission Viejo Company in 1965 and eventually became the firm's executive vice president until its sale in 1972 to the Philip Morris Co. Subsequently, in 1974, Moiso was named president of Rancho Mission Viejo.

Moiso is a seventh-generation Californian and is the great-grandson of Richard O'Neill, who with a partner purchased the huge Rancho Santa Margarita y las Flores in 1882. This extensive land holding spanned 359 square miles and stretched from Aliso Creek in Orange County to Oceanside in San Diego County. Today, the original ranch is known as Rancho Mission Viejo.

Moiso graduated from Stanford University in 1961 with a bachelor of science degree in history and political science. Active in many Orange County community organizations, he lives in Laguna Beach with his wife Melinda. The Moisos have four daughters; Katrina, Christy, Anne Marie and Frandy.

First American Financial operates its title insurance business through first American Title Insurance Co., based in Santa Ana. The firm offers title services through a network of more than 5,500 offices or agents in all 50 states. It also provides title services abroad in the Bahamas, Guam, Mexico, Puerto Rico, the Virgin Islands and the United Kingdom.

#90163b0619 06/12/1990 ~Business Wire

LOS ANGELES (JUNE 12) BUSINESS WIRE - YES Clothing Co. (NASDAQ:YSCO) Tuesday reported record sales and earnings for the fourth quarter and fiscal year ended March 31.

For the fourth quarter ended March 31, net earnings rose 123.4 percent to $1.1 million, or 29 cents per share, from $0.5 million,

or 16 cents per share, for the like period last year. Net sales increased 14.8 percent to $11.2 million from $9.7 million for the like quarter last year. Average shares outstanding were 3.8 million in this quarter compared with 3.2 million in last year's comparable quarter.

For the fiscal year ended March 31, net earnings increased 121 percent to $2.9 million, or 86 cents per share, from $1.3 million, or 42 cents per share, last year. Sales increased 41.2 percent to $40.3 million compared with $28.5 million a year ago. Average shares outstanding for the year were 3.4 million vs. 3.2 million last year.

George Randall, chairman of the board, stated: ''We are extremely pleased with the fourth quarter and year end results, which reflect an increasing acceptance of the YES Clothing label in the marketplace. We ended the year with inventories far below last year's level, resulting in a significant improvement in gross margins.''

Randall also noted that in recent months there has been a shift in buyers' preferences to shorter lead times due to a less stable retail environment. This development, coupled with the company's transition into a wider variety of fabrications including twill, denim, cotton jersey and shirting has resulted in relatively flat first quarter revenues thus far.

Randall continued: ''We are encouraged by the acceptance of these new fabrics at retail, the introduction of our menswear and childrenswear lines and the move by buyers to more domestically produced garments with European styling. As these trends continue, we feel comfortable with our estimated 25 percent sales growth for fiscal 1991.''

YES Clothing Co. designs, contract manufactures and distributes women's apparel to department and specialty stores in the United States and Canada. Recently the company launched childrenswear and menswear lines.

SEATTLE (JUNE 11) BUSINESS WIRE - Horizon Air, the largest regional airline in the Northwest, announced Tuesday it is offering new, lower air fares of $39, $59, or $79 each way based on round trip purchase for travel between most of its U.S. cities June 30th through July 11th.

Horizon's Fourth of July Holiday fares represent savings of up to 70 percent compared to regular unrestricted one way fares and up to 45 percent compared to the lowest super saver rates. They are available for travel to and from all Horizon Air cities except Salt Lake City and Sun Valley, and Vancouver and Victoria, British Columbia. Horizon's sister company, Alaska Airlines, will also offer these fares over Northwest routes it shares with Horizon, including Boise-Seattle, Seattle-Spokane, and Portland to Seattle and Spokane.

Tickets must be purchased roundtrip and are non-refundable. Other restrictions similar to those that commonly accompany non-refundable type fares apply to these new fares; however, unlike other deeply discounted fares which often require that reservations be made two weeks in advance, this special holiday discount may be arranged up to the date of departure if seating is still available.

To qualify for this fare a person can depart as early as June 30th but cannot return earlier than July 4th. Persons leaving after July 3rd can return no later earlier than July 8th. Travel must start no later than July 7th and all travel must be completed by July 11th.

Horizon Air serves 34 cities throughout five Northwest states and British Columbia. Horizon and Alaska Airlines are wholly owned subsidiaries of Alaska Air Group Inc.

#90163b0625 06/12/1990 ~Business Wire

TORRANCE, CA (JUNE 11) BUSINESS WIRE - Epson America Inc. Tuesday expanded its line of 24-pin letter-quality dot matrix printers by announcing the new LQ-860 with built-in color capabilities.

The LQ-860 is an 80-column, 24-pin printer that offers outstanding print output in seven brilliant colors, print speeds of 300/98 characters per second in SuperDraft and letter-quality elite modes and Epson's SmartPark paper-handling feature in a compact case design.

''Color printing of this quality has not been available in the 24-pin, mid-range dot matrix market until now,'' said Peter Bergman, director of Epson's Printer Business Unit. ''The LQ-860 will surely set a new standard for color printing in an 80-column format.''

The LQ-860 is targeted at end-users in small- to medium-sized businesses who are looking for affordable, color output from a dot matrix printer. Typical applications include entry-level desktop publishing, business presentations and word processing.

In addition to its color printing capabilities, the LQ-860 is equipped with Epson's SmartPark paper-handling feature. The SmartPark capability allows users to print single-sheet paper or envelopes without first removing the continuous-feed paper. A built-in short tear-off bar -- along with auto-feed, micro-line adjustment and top-of-form memory -- permits the user to easily print a variety of multipart forms such as checks and invoices.

Other standard features found on the LQ-860 include bidirectional printing in text and graphics modes; Epson Draft, Epson LQ Roman and Epson LQ Sans Serif resident and proportional fonts; 360 by 360 dots-per-inch graphics resolution; advanced SelecType front control panel; 0K or 6K switch-selectable buffer and Epson's one-year limited warranty.

The LQ-860 is available from Epson Authorized Resellers nationwide for the manufacturer's suggested retail price of $949, as well as a complete selection of optional printer accessories. Warranty and out-of-warranty repair service is available from Epson Customer Care Centers nationwide.

Epson America is a leading manufacturer and marketer of microcomputer printers and personal computers serving the North American marketplace.

#90163b0627 06/12/1990 ~Business Wire

TORRANCE, CALIF. (JUNE 12) BUSINESS WIRE - After establishing new standards for dot matrix printing in the personal computer market, Epson America Inc. is challenging existing line-impact dot matrix models for dominance in the data processing environment.

Epson has introduced the DFX-8000, a 9-pin, wide carriage, serial-impact dot matrix printer that establishes new standards for speed and cost-effectiveness in data processing applications. The DFX-8000 offers a top print speed of 1,066 characters per second -- the equivalent of 275 lines per minute -- in SuperDraft mode.

Other features, such as Epson FX and IBM Proprinter XL compatibility, advanced paper handling capabilities and dual paper paths, satisfy the demand for printing devices that can keep pace with today's powerful computer systems.

''With an increasing number of data processing systems now using a combination of micros, minis and mainframes, there is a greater demand for speed and more affordability in printing solutions,'' said Peter Bergman, director of Epson's Printer Business Unit.

''As the leading manufacturer and marketer of dot matrix printers, we have shown that we can deliver high-performance processing products at a substantially lower cost than comparable line printers.''

Optional coax and twinax protocol converters that produce IBM 3270, Systems/3X and AS/400 emulation are also available. When combined with the speed and performance of the DFX-8000, they provide affordable, premium name-brand printing alternatives to users in data processing and PC LAN environments.

The DFX-8000 works with virtually all personal computers and peripherals through its standard parallel and RS-232C serial ports.

Epson America is a leading manufacturer and marketer of microcomputer printers and personal computers serving the North American marketplace.

#90163b0635 06/12/1990 ~Business Wire

CUPERTINO, CA (JUNE 12) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) Tuesday announced that PCS Technologies Inc., a new Tandem Alliance member has just installed a Tandem-based online picking system, Pic Pak, at Target Stores' distribution center near Los Angeles.

The Pic Pak application has the ability to track retail product shipments throughout large retail distribution centers. Details that are tracked include unit identification numbers, unit description, store number, quantity, which operator picked the products, and how many products are remaining to be picked. Pic Pak makes picking applications paperless.

The PCS Technologies Pic Pak system installed at Target Stores is based on Tandem's NonStop SQL software and runs on Tandem NonStop computer systems. This application allows faster turnaround time, a higher percentage of correct orders, and the elimination of manual sorting.

Target expects to be able to process more volume through their centers in less space with the Pic Pak system than with their current pick and pack process.

Target also expects to see more accurate shipments to its stores with the use of the PCS Technologies Pic Pak product because it greatly simplifies the picking and packing process. In addition, Target will be able to more easily adjust orders in the event that a vendor has incorrectly packed their cartons.

As a new member of the Tandem Alliance program, PCS Technologies offers Tandem customers a broad range of products supporting automated material handling and manufacturing. The Tandem Alliance program encourages the development of application software for Tandem computer systems.

PCS Technologies was founded in 1985 to support automated control applications in the areas of converting/packing, chemical process and material handling. As technology advanced, PCS Technologies grew into larger systems with an emphasis on total system integration.

PCS Technologies is located in Cincinnati. It manufactures and markets warehouse management systems and paperless picking systems. The phone number is 513/489-1191.

Tandem manufactures and markets computer systems and networks for online transaction processing, large database applications, and the UNIX system marketplace. Company headquarters are located in Cupertino, 408/725-6000.

SANTA ANA, CALIF. (JUNE 12) BUSINESS WIRE - Tokos Medical Corp. (Delaware) (NASD:TKOS) announced Tuesday that it has entered into a definitive agreement with Physiologic Diagnostic Service Inc. (''PDS'') of Atlanta, to acquire all of the outstanding shares of PDS in exchange for approximately 2.7 million shares of Tokos common stock.

The acquisition will be accounted for as a pooling-of-interests. Upon completion of the transaction, PDS will be a wholly-owned subsidiary of Tokos. Tokos expects to complete the transaction within 60 days.

PDS, a privately-held corporation, provides home uterine activity monitoring and perinatal nursing services for pregnant women at high risk of preterm labor along with other specialized services for pediatrics.

Tokos is the leading provider of specialized home health care services to the obstetric and gynecologic market. Tokos pioneered the development and commercialization of home uterine activity monitoring, perinatal nursing and other specialized home care services for women.

#90163b0640 06/12/1990 ~Business Wire

ELMSFORD, NY (JUNE 12) BUSINESS WIRE - V Band Corp. (NASDAQ/NML:VBAN), announced Tuesday the introduction of ''ViAX DN,'' a new generation digital trading and dealing communications system built on a fully digital platform.

The new system, which will be featured at the Securities Industry Association (SIA) Conference and Exhibit in New York, provides users with the enhanced functionality of a digital telephone system plus network cost savings, backroom size reduction, data integration and network management capability.

The system is fully compatible with analog, as well as digital line terminations.

Dr. Charles D. Seligson, V Band Executive Vice President said, ''The ViAX DN design extends the traditional V Band distributed architecture to a digital platform. Further, the design maintains the high degree of reliability that has been the trademark of V Band trading and dealing telecommunications and data systems since the introduction of the first V Band ''VK'' Series ten years ago.

''With ViAX DN, V Band users worldwide will be able to take advantage of

the voice and data integration and other features of digital network services.''

V Band Corp. designs and manufactures high density, electronic key telephone systems used by the world's financial industries in the trading and dealing of stocks, bonds, commodities and currencies, and by airlines, utilities, railroads, emergency services and the military in communications control centers.

HOUSTON (JUNE 11) BUSINESS WIRE - Proler International Corp. (NYSE:PS) Tuesday reported consolidated net sales for the first quarter ended April 30, 1990, of $23,823,095, compared with sales of $27,696,570 for the first quarter ended April 30, 1989.

Consolidated net earnings were $451,554, or 10 cents per share, compared with $3,401,583, or 72 cents per share, for the first quarter last year. Proler's share of pretax earnings from joint operations for the first quarter was $2,206,825, compared with $3,517,311 for the year-earlier quarter.

Share and per share figures for the year-earlier period have been restated to reflect the three-for-one split of common stock on July 17, 1989.

Commenting on the results, Herman Proler, chairman of the board, said, ''The lower earnings in the first quarter of fiscal 1991 compared with the year-earlier quarter were primarily attributable to lower sales prices received for the company's principal products in both domestic and international markets.

Proler International Corp. is an environmental company primarily involved with recovering, recycling and processesing ferrous and non-ferrous metals for shipment to domestic and foreign users. Through 18 processing plants operated either directly or through joint ventures, Proler is a leading provider of high quality raw materials to industrial users. The company's non-ferrous operations produce reusable premium quality non-ferrous scrap, including copper, brass, aluminum, stainless steel and nickel alloy.

Premium grade steel scrap from its state of the art detinning operations is sold to the steel and foundry industries and tin is sold for use in many different industrial applications. Proler also distributes new prime and used line pipe and off-spec pipe for a wide range of industrial and commercial uses.

SAN DIEGO (JUNE 12) BUSINESS WIRE - Genta Inc. has completed an agreement with Johns Hopkins University giving the company exclusive worldwide license to develop antisense therapeutics using technology discovered at the university.

According to Thomas H. Adams, Ph.D., Genta's chief executive officer, the company will pay Johns Hopkins a licensing fee and future royalties on products using the technology. The agreement encompasses 10 patents and applications covering composition of matter and methods of use related to MATAGEN oligonucleotides.

Genta also retains first rights of negotiation for future inventions made by Johns Hopkins' Drs. Paul Ts'o and Paul Miller that are related to antisense oligonucleotides.

''This is a tremendous research foundation for Genta's drug development efforts,'' Adams said. ''The company now has the rights to the most studied antisense compound to date, plus the support of the leading university program in the field.''

Antisense technology was discovered by Ts'o and Miller at Johns Hopkins. The two have invested more than 20 years of research into the field.

''They are the fathers of antisense technology and have written the book about the practical requirements to develop a drug based upon antisense principles,'' Adams said.

Antisense drugs will be short strands of modified, synthetic DNA that can specifically recognize and control the genetic cause of many viral and cancer diseases. More than 80 percent of all human diseases are caused by foreign (viral) or aberrant (cancerous) gene expression.

Adams said antisense drugs should satisfy a large clinical need worth at least $20 billion over the next 10-15 years.

Genta Inc. is a San Diego-based biopharmaceutical company formed in 1989 to discover and develop new pharmaceutical products using antisense technology.

AKRON, OH (JUNE 11) BUISNESS WIRE - American Business Computers Corp. (NASDAQ:ABCC) has been awarded another Soft Drink Dispensing Patent (No. 4938396).

This additional Patent covers a method for improving brix consistency.

''There are hundreds of thousands of conventional syrup pumps in operation today that can utilize this invention,'' Joe Shannon, CEO, affirmed. ''ABC has developed a method to substantially increase the accuracy of the ratio of soft drink syrup to carbonated water (brix). This will improve the consistency and the taste of each post-mixed soft drink served. Everyone wins; the customer gets a better tasting, quality drink and the operator gets better efficiency and more profit.''

''ABCC is committed to using technology to improve performance and decrease costs. I am excited because this new Patent provides an inexpensive method for improving quality and profits, and because each new Patent that ABCC earns, paves the way for future break throughs.''

American Business Computers Corp. develops and markets state-of-the-art products for the foodservice industry, which increase the efficiency, control, and profitability of food and beverage operations.

#90163b0649 06/12/1990 ~Business Wire
CAMBRIDGE, MA (JUNE 12) BUSINESS WIRE - Lotus Development Corp. Tueday announced Lotus 1-2-3 for UNIX System V, a version of its best-selling 1-2-3 spreadsheet for users of personal computers running UNIX System V Release 3.2.

Lotus 1-2-3 for UNIX System V provides 1-2-3 functionality to the millions of UNIX System V users in the federal government and in commercial markets such as finance, manufacturing, accounting, transportation, healthcare and point-of-sale.

''1-2-3 for UNIX System V reaffirms Lotus' broad-based UNIX strategy, and is a critical component of our strategy to deliver a suite of superior spreadsheets across multiple platforms. This product also strengthens our commitment to the government and small business markets,'' said Frank Moss vice president of the Lotus Consulting Services Group and acting vice

president of the Networked Applications and Systems Division. ''Users in all branches of the government and areas of small business no longer have to choose between running UNIX on their personal computers and running 1-2-3. They can have both with one powerful package.'' A Broad-based UNIX Strategy

Lotus 1-2-3 for UNIX System V will be certified for the following four industry standard versions of the UNIX System V Release 3.2 operating system: AT&T UNIX System V/386, Santa Cruz Operations UNIX System V/386 and XENIX System V/386, and Interactive UNIX System V.

''We chose these initial versions of UNIX System V for a number of important reasons, including their combined installed base and mature distribution channels,'' said David Rome, Lotus director of UNIX Products. ''Our UNIX strategy is designed to appeal to the largest number of UNIX users, and we will investigate and eventually support other versions of the operating system as our users request it. In addition to supporting UNIX System V, Lotus also offers a version of 1-2-3 for Sun workstation users.''

Industry analysts predict that there are presently more than 400,000 installations of UNIX System V and XENIX System V on 386 personal computers. Businesses that currently employ UNIX-based systems include: video stores, restaurants, whole-sale distribution outlets, public services, transporation departments, accounting firms and dental offices. UNIX- and XENIX-based multi-user systems present a highly cost-effective way to share software, and are therefore particularly attractive to small businesses. Advanced Spreadsheet Technologies Optimized for UNIX Users

Lotus 1-2-3 for UNIX System V provides the advanced spreadsheet capabilities available to personal computer users of Lotus 1-2-3 Release 3 including data analysis improvements, three-dimensional modeling capabilities, relational database functionality, improved graphics and file reservation features. Three-dimensional spreadsheets are particularly useful for visualizing the interaction between spreadsheet data from multiple company divisions or government agencies.

Like 1-2-3 Release 3, the UNIX product will also make use of external data access capabilities provided through Lotus' DataLens technology. With DataLens, users can access external databases directly from within the 1-2-3 spreadsheet.

Lotus 1-2-3 for UNIX System V combines the core spreadsheet capabilities with the inherent features and benefits of UNIX to provide cross-platform file and data sharing, multi-tasking, superior network performance and support for multiple users. The product can run standalone on the desktop as well as in a multi-user configuration, where multiple terminals can be attached to a personal computer without compromising performance.

Lotus 1-2-3 for UNIX System V is functionally compatible with Lotus 1-2-3 Release 3, and is completely file, macro and keystroke compatible with earlier versions of 1-2-3. The product supports the standard .WK3 file format shared by Lotus spreadsheets, enabling a high degree of cross-platform compatibility. System Requirements

Lotus 1-2-3 for UNIX System V requires a Compaq, IBM or compatible 386 personal computer, 4 megabytes of RAM, 5 megabytes of free disk space and one of the following operating systems: AT&T UNIX System V/386 Release 3.2; SCO UNIX System V/386 Release 3.2.0; SCO XENIX System V/836 Release 2.3; or Interactive UNIX System V Release 3.2.0 (formerly known as ''386/IX''). Price, Availability and Support

Lotus 1-2-3 for UNIX System V will be available in four editions: Single-user, Multi-user, Additional-user and Documentation.

The Single-user Edition is priced at $695. The Multi-user Edition, $1295, is designed for installation on a 386 PC server, and provides an efficient way for up to ten attached terminal users to share software. The Additional-user Edition, $495, contains one set of documentation and licenses for four additional users in a multi-user configuration. The Documentation Edition, $60, provides a complete user documentation set.

These editions give Lotus 1-2-3 for UNIX System V users the flexibility to deploy the product in the most cost-effective way. For example, a configuration of 18 users would require the purchase of one Multi-user and two Additional-user Editions, for a total cost of $2285, or a per user cost of about $127.

Registered Lotus 1-2-3 for UNIX System V users will receive 90 days of free premium telephone support. Users can also elect to purchase one year of Lotus Prompt premium support for $99 per user. Prompt includes premium telephone support, and Lotus 1-2-3 for UNIX System V Tech Notes, a periodic publication addressing technical issues and questions.

Lotus 1-2-3 for UNIX System V is currently in beta testing. Versions of the product for SCO UNIX and XENIX will be available by the end of June 1990. Versions of the product for AT&T and Interactive UNIX will be available in the third quarter of 1990.

At first customer ship, Lotus will also provide an International English version of the product for distribution in English-speaking overseas markets. French, German and Italian versions will be available in the fourth quarter of 1990.

The product will be distributed through selected Lotus Authorized Resellers. These currently include Electro Rep, Ingram Micro D, MicroAge,

Softmart, SoftSel Worldwide, Software Spectrum and Univar. Lotus 1-2-3 for UNIX System V will also be available through Government Technology Services Inc. (GTSI), a major government reseller.

Lotus Development Corp. is the leading developer of applications software for personal computers and information services delivered on CD-ROM, and a worldwide supplier of applications software for workstation, minicomputer and mainframe computing environments.

Lotus, 1-2-3, DataLens and Lotus Prompt are registered trademarks of Lotus Development Corp. XENIX is a registered trademark of Microsoft Corp. IBM is a registered trademark of International Business Machines Corp. Compaq is a registered trademark of Compaq Computer Corp.

UNIX is a registered trademark of American Telephone and Telegraph Co.

STAMFORD, CT (JUNE 12) BUSINESS WIRE - CUC International Inc. (NYSE:CU) Tuesday told investors at a breakfast meeting in Connecticut that it will begin testing a new home-related product by late summer.

This newest membership-based consumer service offered by CUC will provide discounts and information for home maintenance and improvements. It is expected that the new service will be formally rolled out in 1991.

Walter A. Forbes, chairman and chief executive officer of CUC International, said, ''While this new service will have no real effect on our financial results this year, we are encouraged by the size of the $100 billion home improvement market, and we believe there is a need for a quality program where consumers can save time and money.''

Forbes added, ''It's our strategy to continue to add new products, to build on our expertise, to be the best in our marketplace and to maintain a strong financial base. This proven strategy encourages management's confidence in the company's favorable outlook for the future.''

CUC International is a leading membership services company, presently providing more than 14 million consumers with access to a variety of services including home shopping, travel, insurance, auto, dining, checking account enhancements, and extended warranties.

BURLINGTON, MA (JUNE 12) BUSINESS WIRE - Xylogics Inc. (NASDAQ:XLGX) Tuesday announced Bernard (Denny) Olmsted has joined the company as senior vice president, sales and marketing.

In this new position, Olmsted is responsible for worldwide sales and marketing activities for Xylogics' computer peripheral and communications products. He reports directly to Xylogics President and Chief Executive Officer Bruce J. Bergman.

Olmsted brings to Xylogics more than 23 years of high tech sales and marketing expertise, including nearly 15 years of increasing sales and marketing management responsibility at IBM. He joins the company from ECRM, Tewksbury, where he was vice president of worldwide sales and service.

Earlier positions include vice president and general manager of U.S. sales at Codex Corp., Canton; vice president, marketing/customer service at Computer Consoles, Waltham; national sales director at Data General Corp., Westboro; and director, european sales and marketing at Data General Europe, based in Paris.

Olmsted received a bachelor's degree in history from Yale University. He lives in Wellesley, with his wife, Barbara and two daughters.

Headquartered in Burlington, Xylogics Inc. is a leading supplier of intelligent high-performance peripheral controllers and data communications products based on industry standards.

#90163b0658 06/12/1990 ~Business Wire

LOS ANGELES (JUNE 12) BUSINESS WIRE - Virco Manufacturing Corp. (ASE:VIR) sustained a net loss of $1,464,000 on sales of $32,985,000 in its first fiscal quarter, the three months ended April 30, 1990, the company reported Tuesday.

In the like period a year ago Virco sustained a net loss of $594,000 on sales of $33,951,000.

The net loss for the current, 1990 first quarter reflects a reserve of $600,000 ($380,000 net of taxes) to provide for possible costs of a product-recall program initiated by Virco in April of this year, the company pointed out.

In contrast, last year's first-quarter results, although including a $199,000 loss from discontinued operations, benefited by $557,000 derived from the cumulative effect of a change in accounting methods, established in conformity with the Tax Reform Act of 1986.

Robert A. Virtue, chairman and chief executive officer, said the company initiated the product-recall program after discovering a potential design problem in a high-volume line of stacking chairs. The design problem may significantly increase the risk that the chairs may collapse in time.

These chairs were sold primarily for commercial and retail seating. Based on information currently available, the company believes the $600,000 reserve is adequate to cover costs of the recall. A total of about 585,000 of the recall chairs were sold between June 1989 and May 1990.

Acceptance of Virco's other standard product lines continues to be excellent, the company said. Current incoming orders are particularly strong, with year-to-date orders approaching a near-record $47 million, it reported.

As disclosed earlier, Virco is proceeding with plans to divest itself of assets of its juvenile furniture division, which has not met the company's profitability standards, Virtue said. Costs of the divestment have been taken as a charge against last year's earnings.

BETHESDA, MD (JUNE 12) BUSINESS WIRE - Survival Technology Inc. (NASDAQ: SURV) announced Tuesday that Robert Herzstein has been elected chairman of the company's board of directors.

Herzstein succeeds Dr. Stanley J. Sarnoff, the company's late founder, chairman and chief executive officer. Herzstein will not be involved in the day-to-day operations of the company.

Herzstein, age 59, is a partner in the Washington office of Shearman & Sterling, a prominent New York law firm. He has served as a director of the company since its organization on 1969, except for the period in 1980 and 1981 during which he was Under Secretary of Commerce for International Trade.

Herzstein last week qualified as the personal representative of Dr. Sarnoff's estate, which holds over two-thirds of the company's outstanding stock, and is a director of the Stanley J. Sarnoff Endowment for Cardiovascular Science Inc., a charitable organization to which Dr. Sarnoff left substanitally all of his shares.

James H. Miller, the company's president and chief executive officer, commented that ''Bob Herzstein has been a guiding force at Survival Technology since its inception. In the time since I have joined the company, I have come to value Bob's counsel highly. I look forward to continuing to work with him.''

Survival Technology Inc. provides medical devices, pharmaceutical delivery systems and monitoring services for the treatment of emergency medical problems.

BRUSSELS, BELGIUM (JUNE 12) BUSINESS WIRE - GE has signed three contracts worth a total of $246.5 million for the sale of power plant equipment and related products and services, the company announced Tuesday at the American Society of Mechanical Engineers' (ASME) trade show on gas turbine technology and equipment in Brussels, Belgium.

The largest of the three contracts is for the sale of four STAG 107F combined-cycle units at a price of more than $200 million to the Korea Electric Power Co. for a 927-megawatt power plant to be built on the Inchon Bay island of Ildo.

Each of the combined-cycle units will consist of a GE MS7001F gas turbine-generator, a heat recovery steam generator, and a steam turbine-generator. The MS7001F, which recently exceeded its design rating of 150 megawatts during testing, is the world's most powerful gas turbine for 60-hertz power generation. GE announced in February that it had been invited to bid on this project.

GE also signed a $35.5 million contract to supply four MS6001B gas turbines, each rated at 38.3 megawatts, to the Indiana Municipal Power Agency for peaking use at two east-central Indiana locations.

The third contract signed by GE is for the supply and installation of a combined-cycle unit consisting of a GE MS6001B gas turbine and a steam turbine to the Trigen Energy Corp. for a 54-megawatt power plant to be built in Uniondale, N.Y. The price of that contract is approximately $11 million.

All gas turbines for these projects will be built at GE's facility in

Greenville, S.C. All steam turbines and generators for these projects, with the exception of Trigen, will be manufactured at GE's Schnectady, N.Y. plant. The steam turbine for Trigen will be built at GE's Fitchburg, Mass., facility and the generator at GE Canada's Peterboro, Ont., location.

The ASME International Gas Turbine and Aeroengine Congress and Exposition, known as the ASME TURBO EXPO, is sponsored annually by the International Gas Turbine Institute. This year's event, the 35th, will feature 394 technical papers on gas turbine technology as well as exhibitions by the world's leading gas turbine suppliers.

GE is a diversified technology, manufacturing and services company, with 1989 revenues of 54.6 billion. GE Industrial & Power Systems is the world's leading manufacturer and supplier of power generation systems and services, including steam turbines, gas turbines, STAG combined-cycle systems, cogeneration power equipment, and a variety of uprate, upgrade and power plant maintenance programs. Through a subsidiary component, GE Environmental Services Inc., GE provides flue gas desulfurization and other air purification systems.

BASKING RIDGE, NJ (JUNE 12) BUSINESS WIRE - Hooper Holmes Inc. (AMEX:HH), the healthcare and health information services company headquartered in Basking Ridge, and Talent Tree Corp. headquartered in Houston and a unit of Hestair, PLC, reached final agreement on Hooper Holmes' acquiring selected assets of Talent Tree Health Care Services Inc., of Westboro, Mass., effective June 1, for approximately $3 million in cash.

Hooper Holmes expects Talent Tree Health Care Services, with offices throughout Massachusetts, to generate $14 to $15 million in annualized healthcare revenues.

Jim McNamee, president and chief executive officer of Hooper Holmes Inc. stated ''Talent Tree has been a leader in the Massachusetts healthcare community for the past several years. HHI continues to select certain geographical areas of the country that exhibit potential for long term growth and Talent Tree's presence in the New England area compliments such a strategy.''

McNamee continued, ''This acquisition will bring HHI's expected 1990 revenue to approximately $100 million versus just over $77 million for 1989 and it will contribute to both the company's goal of enhanced operating margins in the near to long term and its continued expansion

into the direct home healthcare, infusion therapy, and health information markets.

''Additionally, we announced record operating results for the first quarter of this year and we anticipate continued strong performance for the current quarter and for 1990 overall.''

#90163b0670 06/12/1990 ~Business Wire

CHICAGO (JUNE 12) BUSINESS WIRE - United Airlines (NYSE:UAL) passed a historic milestone this weekend, offering a company high of 1,945 daily flights.

The new schedule, effective as of last Friday, represents an increase of more than 7 percent over the 1,810 flights United offered last June. It is the most comprehensive schedule in the carrier's 64-year history.

''United is in the midst of a major, ongoing expansion in both our domestic U.S. and international networks,'' said Stephen M. Wolf, chairman and president. ''In fact, in the second half of 1990, United will be growing at a faster rate than any of the other top five carriers in this country.

''We will add more departures this August versus last August than any other U.S. carrier. In addition, our systemwide available seat miles in the third and fourth quarters will be a very substantial 14 percent each quarter ahead of 1989 levels.

''Internationally, United has grown 34 percent in the last year, adding 59 weekly round-trip flights to Mexico, Europe and Asia,'' Wolf added. The carrier also established minihubs at Seoul and Taipei to capture a larger share of intra-Asian traffic. Last fall United surpassed both Japan Airlines and Northwest Airlines to become the number one carrier in the trans-Pacific market.

United launched new international service Friday linking Honolulu with Seoul. The flights in this market are being operated four times a week in June and daily beginning July 1 in DC-10-30 equipment.

Among cities in the United States receiving significant additional service are Chicago, San Francisco and Los Angeles.

At Chicago's O'Hare International Airport, the carrier's principal domestic hub, United is increasing frequency from 384 flights last June to

408 flights as of Friday and 418 by August. United operates to 100 cities non-stop from Chicago.

At San Francisco, daily departures climbed from 137 last June to 168.

Among the new flights is a second daily round-trip flight between San Francisco and Maui. United operates to 42 cities non-stop from its San Francisco hub.

The airline also introduced hourly service between San Francisco and Seattle Friday, offering 15 flights southbound and 14 flights northbound.

At Los Angeles, daily departures increased from 82 last June to 102 as of Friday.

On the West Coast, United recently pioneered shuttle service every half hour between San Francisco International Airport and Los Angeles International Airport.

By August, the carrier will have added 25 flights in the corridor between the Bay Area and the Los Angeles Basin in the last year.

Also, United has inaugurated round-trip daily service between Portland, Oregon and Washington's Dulles International Airport.

BALA CYNWYD, PA (JUNE 12) BUSINESS WIRE - Global Entertainment Ltd. (OTC) announced Tuesday that it has completed the acquisition of Corsa Ltd. through a tax-free, stock-for-stock exchange, making Corsa a subsidiary of Global Entertainment.

In connection with Global Entertainment's acquisition of Corsa, the stockholders of Corsa exchanged 300 shares of Corsa's issued and outstanding common stock for 3,166,666 shares of Global Entertainment's restricted common stock, par value $.001 per share.

Corsa's stockholders also exchanged 57 shares of Corsa's 8-percent Non-Cumulative Preferred stock, $5,000 par value per share, for 380,000 shares of Global Entertainment's restricted common stock, par value $.001

per share. The transaction will increase the number of Global Entertainment's common stock outstanding to 10,600,202 shares.

Corsa, located in Bala Cynwyd, is a consumer direct-response marketing company with a full-service video production facility and in-house advertising capabilities. Corsa markets products directly to consumers and produces its own television commercials and direct-marketing programs.

These programs include exclusive products and services that are marketed through television, print media, direct-mail, 800 and 900 telephone line systems, and retail distribution.

Global Entertainment is a multimedia, entertainment, and consumer marketing company that licenses entertainment, sports and consumer properties through its wholly owned subsidiary, International Artists Inc.

Robert D. Kohn, chairman of Global Entertainment, commented, ''The acquisition of Corsa adds depth to Global Entertainment's corporate structure. By combining their licensing, marketing and advertising capabilities, Global Entertainment's subsidiaries will be able to market a consumer product or licensed entertainment property from concept through production and ultimate sale to the consumer.''

DAYTON, OH (JUNE 12) BUSINESS WIRE - Super Food Services Inc. (NYSE:SFS) one of the country's largest multi-division food wholesalers, Tuesday announced record sales and earnings for the 12 and 36 weeks ended May 5, 1990.

In a quarterly report to shareholders, this major food distributor reported net income increased 5 percent to $3,382,908 in the 12 weeks ended May 5, 1990, from $3,234,382 in fiscal 1989; and earnings per common share increased to 32 cents from 30 cents last year. Total revenues rose 5 percent during this period to $409,880,300 compared to $391,426,640 for the same period last year.

In the first 36 weeks of fiscal 1990, net income increased 5.3 percent to $10,744,247 from $10,138,969 in fiscal 1989; and earnings per common share increased to $1.00 from 93 cents in fiscal 1989. Total revenues during this 36-week period rose 5.3 percent to $1,225,267,575 from $1,163,862,536 in 1989.

On May 24, 1990, the board of directors declared a quarterly dividend of 8

cents per share on the common shares payable Sept. 15, 1990 to shareholders of record Aug. 21, 1990.

Super Foods, which is headquartered in Dayton, wholesales a complete line of food and non-food products to over 800 supermarkets in Ohio, Kentucky, Indiana, Michigan and Florida. Super Foods' stock is listed on the New York Stock Exchange.

CONCORD, MA (JUNE 12) BUSINESS WIRE - GenRad Inc. Tuesday announced that Future Electronics, an international electronic components distributor, headquartered in Montreal, has signed a five year renewable lease for space in GenRad's facility in Bolton, Mass.

Future Electronics warehouse distribution, and administrative operations now located in Westborough, Mass., will relocate to the 105,000 sq. ft. Great Road, Bolton site during the second half, 1990. GenRad will continue to occupy the balance of the 256,000 sq. ft. facility.

The space leased by Future Electronics was classified as excess manufacturing capacity last year when GenRad consolidated its production operations from two plants, less than 12 miles apart, to its headquarters facility in Concord. Neither company disclosed the terms of the five year lease. GenRad's lease of space in its Bolton facility is the latest in a series of actions taken to lessen the burden of the company's fixed assets.

Last month, GenRad announced that it subleased 46,000 sq. feet of excess manufacturing space at its former facility in Phoenix, Ariz.

Charles E. Peters Jr., GenRad's senior vice president and chief financial officer, said, ''this lease agreement with Future Electronics is another positive step toward substantially reducing our overhead cost structure.''

Efforts are being pursued to sublet additional excess space at

GenRad facilities in Milpitas, Calif., and Phoenix, Ariz.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment, to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process quality management.

The company's stock is traded on the New York Stock Exchange; its trading

symbol is GEN.

#90163b0687 06/12/1990 ~Business Wire

NEW YORK (JUNE 12) BUSINESS WIRE - In a history-making announcement to the carpet industry, executives of 3M Scotchgard brand products and Amoco Fabrics and Fibers Co. revealed Monday the introduction of a unique soil and stain protection system, Scotchgard XD Carpet Protector.

The new 3M product gives selected PermaColor warranted carpets made from Amoco fibers a resistance to soil and stains that is expected to perform as much as three times longer than contract carpet treated with a topical finish.

This is the first time in the history of the carpet industry that a manufacturer of a carpet protection product or a fiber producer has been able to make such a claim.

In a joint interview, 3M Protective Chemical Products Division Vice President, Gil Foster, and Amoco Fabrics and Fibers Co. President, Bill Harper underscored the product's precedent-setting achievement. Foster stated, ''This is truly a revolutionary step forward in carpet protection, a quantum leap made possible by many years of 3M and Amoco research, development and testing.

Scotchgard XD Carpet Protector was developed as a result of years of intensive research. It is a unique, thermally stable product that can survive the demanding environment of fiber extrusion where it is welded into the fiber itself. It is incorporated into the fiber under a special 3M agreement in conformance with specific quality performance standards. At this time, Scotchgard XD Carpet Protector is available exclusively to Amoco as part of selected PermaColor warranted carpets.

#90163b0689 06/12/1990 ~Business Wire

NORWOOD, MA (JUNE 12) BUSINESS WIRE - Telco Systems Inc. (OTC National Market: TELC) announced Tuesday that sales for the third quarter of fiscal 1990 increased 26 percent to $23,283,000, compared with $18,458,000 for the same period last year.

Net income for the quarter increased to $2,219,000, or 24 cents per share, compared with $966,000, or 11 cents per share a year ago. The company's financial condition remained strong with increased cash and short-term investments at quarter end amounting to $20,300,000.

For the nine-month period, sales increased 21 percent to $65,552,000, compared with $53,996,000 last year. Net income for nine months amounted to $4,867,000, or 53 cents per share, compared with $1,696,000, or 20 cents per share last year. Average common shares and equivalents for the quarter and nine months amounted to 9,298,000 shares and 9,189,000 shares, respectively, compared with 8,940,000 shares and 8,570,000 shares last year.

Paul Lazay, president and chief executive officer, said third quarter results continued in line with expectations. Gains in sales and earnings were achieved in both fiber optic transmission equipment and T1 network access products, the company's two business areas. The increased earnings reflected higher revenue levels and an improved product mix which more than offset increased research and development costs.

In the Network Access Products Division, third quarter sales increased 72 percent over year-ago levels due to continued strong demand for the company's DCB-24 and ROUTE-24 network access multiplexers. In the Fiber Optic Transmission Equipment Division, sales were ahead of last year with excellent progress in expanding our position in the growing telephone company local loop market.

Lazay said shipments of T1 network access multiplexers to interexchange carriers remained at a high level. In addition, initial shipments began under a multi-year agreement with BellSouth Services for Telco's intelligent ROUTE-24 multiplexer for customer premise applications.

Shipments also began to a variety of other new customers, including an original equipment manufacturer (OEM) and several independent distributors. During the quarter, product development programs continued at increased levels for enhanced versions of the ROUTE-24 an related products for identified customer needs. Looking toward the future, plans were finalized to occupy an expanded facility in Fremont, Calif.

The new leased facility, to be occupied in Sept., 1990, will house the headquarters and other activities of the Network Access Products Division and will provide needed room for expansion and enable more efficient support of customer needs.

In the Fiber Optic Transmission Equipment Division, shipments of the company's FOX-2 and T-HUB product lines for telephone company local loop needs continued to increase sharply, enhancing sales of Telco's 828 multiplexers and M560 high-speed fiber optic terminals.

Telco's recently introduced FOX-2XTra (extended temperature, range and alarm) fiber distribution system is expected to further increase our position in this market segment. The new system, which is undergoing evaluation at two Bell Operating Companies, extends the operational performance of the FOX-2 and greatly reduces the cost of extending fiber-based service to residential and rural business customers.

During the quarter, product development expenditures for new fiber optic transmission systems were further increaed, including accelerated programs for definition and design of planned SONET-compatible systems. These planned new products, together with our present product base, will provide Telco with a strong comptetitive position in the growing local loop market.

Lazay said the market outlook for the two telecommunications areas is serves remains good and offers an excellent opportunity for Telco Systems to continue growth in sales and earnings.

Telco Systems Inc., based in Norwood, Mass. designs and manufactures high-speed digital fiber optic transmission terminals, digital multiplexing equipment for telephone and other applications, and network access multiplexers for the customer premise T1 market.

#90163b0696 06/12/1990 ~Business Wire

CHATTANOOGA, TN (JUNE 12) BUSINESS WIRE - Provident Life and Accident Insurance Co. (NASDAQ:PACCB) announced Tuesday that its President and Chief Executive Officer, Winston W. Walker, will testify about the administration of the federal Medicare program before the Senate Permanent Subcommitee on Investigations.

The subcommittee is investigating the entire problem of the administration of Medicare payments under the Medicare Secondary Payment Program, in order to discover why Medicare continues to pay claims it should not pay.

''Over a year ago, Provident asked Congress for the opportunity to testify if hearings were held on this issue,'' said Walker, ''because the government's administration of the program lies at the heart of the current legal controversy between Provident and the U.S. Government agency which administers the Medicare program.

''I welcome this opportunity to tell our side of the story to an objective observer who is committed to a comprehensive review of this matter. The Senate Subcommittee has spoken with others in the insurance industry and

with doctors and hospitals, and they are now calling expert witnesses who can help them get to the bottom of the very complex problem of Medicare administration.''

Group Department Vice President Ronald L. Homans has already testified privately on behalf of Provident before the staff of the subcommittee on May 23.

Provident's involvement in this matter stems from charges made last year by lawyer Luis Bustamante, a Miami bounty-hunter, that Provident and other insurers have attempted to defraud the government on payments to the ''working aged,'' employed persons over 65 who are covered under both Medicare and private health plans.

''We vigorously deny theses allegations, as we have from the beginning,'' said Walker. ''We believe the payment problems stem from a failure on the part of Medicare to adhere to the 1982 law prohibiting them from paying primary claims to the working aged.

''When the Medicare administrators finally issued rules in 1989, these rules exceeded the authority granted by Congress. The Health Insurance Association of America (HIAA) filed suit in Washington this past Friday, June 8, 1990, to seek clarification of those rules.

MARLBORO, MA (JUNE 12) BUSINESS WIRE - Stratus Computer Inc., a leading supplier of fault-tolerant systems for critical online business applications, Tuesday announced that it will support the Open Software Foundation's new Distributed Computing Environment (DCE) software.

Stratus also announced Tuesday that Dr. Michael Strong, formerly the director of market planning for UNIX International, an independent organization responsible for directing the evolution of the UNIX System V computer operating system software, has joined Stratus as its director of UNIX marketing.

DCE is an emerging industry standard software technology -- recently endorsed by International Business Machines Corp., Digital Equipment Corp. Hewlett-Packard Co., Microsoft Corp., and other prominent computer vendors -- that provides a set of services to develop, use, and maintain distributed applications shared by multiple vendors' computer equipment across networks.

Stratus will integrate the DCE software with FTX, its AT&T UNIX System V-compatible operating system, and VOS, its proprietary operating system. Both operating systems run across Stratus' line of fault-tolerant XA2000 Continuous Processing Systems. XA2000 Systems are used to run a wide variety of critical online business applications.

The Open Software Foundation (OSF) is a non-profit organization dedicated to developing and delivering software based on standards for the information processing industry. Stratus is a member of both the OSF and UNIX International. DCE and Stratus' Role in Networks

Stratus systems run critical business applications, typically providing data services in networked environments while interfacing with multiple vendors' mainframes, minicomputers, personal computers, workstations, terminals, and special input/output devices (automatic teller machines, credit card authorization terminals, bar code readers, programmable logic controllers, etc.).

Stratus' XA2000 Continuous Processing Systems are used by corporations -- such as AT&T, U.S. regional and European telephone companies, VISA, American Express, Citicorp International, Johnson Wax, General Motors, Gillette and the American and International (London) stock exchanges -- to run their most critical online business applications.

Examples include point-of-sale credit card authorization, online material tracking and inventory control, online stock trading systems, and emergency 911 telephone services.

Stratus fault-tolerant XA2000 Systems range from the low-end Model 30 minicomputer (starting at $37,000) to the mainframe-class Model 2860 multiprocessor systems (starting at $9.1 million).

Stratus' FTX operating system is based on UNIX System V, Release 3.2 and will migrate to UNIX System V, Release 4 in 1991.

Based in Marlboro, Stratus Computer Inc. supplies the XA2000 family of continuously available computer systems for online transaction processing and communications control. The company offers the most technologically advanced architecture for online, distributed and networked applications and has set a new standard for computer reliability.

One of the fastest-growing companies in the industry. Stratus reported revenues of $341.3 million for fiscal year 1989, up 29 percent form $265.3 million in 1988.

Stratus, the Stratus logo and VOS are registered trademarks, and XA and FTX are trademarks of Stratus Computer Inc. IBM is a registered trademark of International Business Machines. UNIX is a registered trademark of

AT&T. OSF is a trademark of the Open Software Foundation.

#90163b0702 06/12/1990 ~Business Wire

COLUMBUS, OH (JUNE 12) BUSINESS WIRE - Max & Erma's Restaurants Inc. (NASDAQ:MAXE) announced that as expected pre-tax earnings for the second quarter of 1990 declined 28 percent to $262,000 from $364,000 in the second quarter of 1990.

Year-to-date pre-tax earnings dropped 11 percent to $648,000 for 1990 from $726,000 for the first half of 1989.

For the second quarter of 1990, the company reported fully-taxed earnings of $166,000 or 5 cents per share on total revenues of $6,890,000 as compared to $217,000 or 8 cents per share on total revenues of $5,703,000 for the second quarter of 1989. Year-to-date the company recorded fully-taxed earnings of $421,000 or 12 cents per share as compared to $424,000 or 15 cents per share for 1989.

Revenues for the first half of the year rose 21 percent to $15,634,000 from $12,903,000 for the first half of 1989.

Net income for the second quarter of 1990 remained at $166,000 or 5 cents per share, while the $111,000 (4 cents per share) tax benefit of a net operating loss carryforward pushed 1989 second quarter net income up to $328,000 or 12 cents per share.

For the year-to-date period net income also remained at $421,000 or 12 cents for 1990 while the benefit of the loss carryforward in 1989 increased net income by $218,000 (8 cents per share) to $642,000 or 23 cents per share.

Todd Barnum, president, chief executive officer and chairman of the board said he believes the results for the quarter do not accurately reflect the progress Max & Erma's has made this year. He indicated that Max & Erma's is in a period of transition, going from little or no growth to a period of high growth.

He noted that so far this year, the company has increased the number of restaurants it operates by 25 percent and revenues by 21 percent, with two more restaurants set to open before year end. He said he is very encouraged by the improving profitability of the new restaurants but that increased corporate overhead, to support our growth, has thus far offset additional profits generated by new restaurants.

Max & Erma's Restaurants Inc. operates 15 restaurants in Columbus and Dayton, Ohio; Indianapolis; Detroit; Pittsburgh; and Lexington, Ky., and franchises on restaurant in Canton, Ohio. Two new restaurants are under construction in Pittsburgh and Detroit. Additional units are planned for Indianapolis and Cleveland.

#90163b0707 06/12/1990 ~Business Wire

CASPER, WY (JUNE 12) BUSINESS WIRE - Union Pacific Resources Co. (UPRC) (NYSE:UNP) of Fort Worth, Texas, joined other major gas producers Tuesday in urging the Wyoming Natural Gas Pipeline Authority to take action on a pipeline to California that will further stimulate exploration and production and improve the Wyoming economy.

UPRC, the oil, gas and minerals subsidiary of Union Pacific Corp. of Bethlehem, Pa., also announced a major gas discovery adjacent to the Dripping Rock Field in Sweetwater County, near Baggs, Wyo. In addition,

UPRC announced preliminary results from ventures designed to develop coal-bed methane gas in the Green River Basin in southwestern Wyoming.

The Celsius-State 16-1 well tested 1 million cubic feet (MMCF) a day with 340 pounds of casing pressure. It is expected to produce 5 to 8 MMCF per day after it is stimulated in the near future. It was drilled to a depth of 12,797 feet and is perforated from 12,250 feet to 12,269 feet in the Almond Formation. UPRC operates the well and owns a 70 percent working interest before payout, and over 52 percent after payout.

The well is five miles southeast of the Mulligan Draw Unit Well No. 1 (MDU No. 1) announced in February by Celsius Energy Co., and one mile east of the original Dripping Rock Unit. Producing only six months out of the year, the original two wells in the Dripping Rock Field have produced a cumulative total of 8 billion cubic feet (BCF) of gas since the field was established in 1984.

Lindahl also revealed UPRC has contracts with several independent oil and gas firms totaling 50,000 acres of the Union Pacific Land Grant in the Green River Basin to explore for coal-bed methane gas.

The Department of Energy recently estimated the coal-bed methane potential of the Green River Basin to be up to 30 trillion cubic feet--comparable to the huge San Juan Basin in New Mexico and Colorado. ''Preliminary results from three wells drilled in our venture with Triton Oil & Gas are very encouraging,'' Lindahl said.

''Our company has worked hard to develop markets for Wyoming gas in California. With our partners, last year we initiated a 100 well program to develop reserves in southwestern Wyoming. That program is well under way and should be completed this year. We expect to participate in another 30 wells in the Moxa Arch starting in 1991.

CHICAGO (JUNE 12) BUSINESS WIRE - Andersen Consulting Managing Partner George Shaheen has named Doug Ryckman, 39, worldwide managing partner of Andersen's health care practice.

According to Shaheen, Ryckman will lead a health care practice that is expanding its client reach and helping clients capitalize on advances in health care technology.

Shaheen said that one of Ryckman's priorities will be developing a

strategy in which the health care practice focuses on both providers and buyers of medical services.

The health care practice will continue to stress the cost-effective application of technology as the solution to the challenge of managing cost and quality.

Ryckman cited Andersen Consulting's ''Hospital of the Future'' project as an example of Andersen's commitment to advancing the state of the art in health care technology. Hospital of the Future, located in Dallas Infomart, demonstrates the use of advanced technologies in hospitals.

Using equipment supplied by more than 40 companies, Hospital of the Future applies technologies such as voice recognition, image processing and computer-embedded smart cards to such functions as bedside care and patient registrations. The permanent center will be a laboratory for applying open systems architectures and other advancements.

As director, Ryckman will coordinate initiatives such as Hospital of the Future, be responsible for the practice's strategic direction and ensure skill development in health care consulting, among other responsibilities.

Ryckman will rely on 16 years of health care experience. He joined Andersen Consulting in 1976 after working as an administrator at the University of Michigan's University Hospital. He became a partner in 1984 and in 1987 became head of Andersen's health care practice for the Southeast United States. Since 1989 he has been managing partner of the Tampa office, directing Andersen's consulting practice in health care and other industries for north and central Florida. His experience in health care includes the development of custom clinical, financial and decision support systems. He is currently based in the Tampa office.

The Andersen Consulting health care practice consists of more than 100 partners and 500 staff consultants in 25 worldwide offices. The practice serves more than 1,100 health care clients worldwide, including 600 hospitals and 500 nursing homes ranging from private, community and religious-affiliated organizations to investor-owned and government hospitals.

Andersen Consulting has helped organizations apply technology competitively since 1954, when it installed the first computer application for commercial use. The firm helps clients use technology in all phases of their management activities - strategic, industry, operations and financial.

Andersen Consulting's worldwide client base has access to more than 18,000 highly trained professionals serving clients through 157 offices in 45 countries. Andersen Consulting is a business unit of the Arthur Andersen

Worldwide Organization.

HOUSTON (JUNE 12) BUSINESS WIRE - At the annual meeting, held Tuesday, stockholders re-elected to the board of directors Herman Proler, chairman of the board and chief executive officer of Proler International (NYSE:PS) and Benjamin F. Bailar, dean and professor, Jessee H. Jones School of Administration, Rice University.

In comments made at the meeting, Proler stated: ''Fiscal 1990 was one of the more dynamic years in the company's history. During fiscal 1990, Proler was able to take advantage of opportunities that position the company for continued growth in the future.''

Robert Mueller, president and chief operating officer of Proler, said: ''Overall, we are pleased with our operational achievements during the past year. We believe Proler made significant progress as a leading environmental company for the 1990s.''

The board of directors also declared a cash dividend in the amount of 13 cents per share payable on July 16, 1990, to stockholders of record on June 29, 1990.

Proler International Corp. is an environmental company primarily involved with recovering, recycling and processesing ferrous and non-ferrous metals for shipment to domestic and foreign users. Through 18 processing plants operated either directly or through joint ventures, Proler is a leading provider of high quality raw materials to industrial users.

The company's non-ferrous operations produce reusable premium quality non-ferrous scrap, including copper, brass, aluminum, stainless steel and nickel alloy.

Premium grade steel scrap from its state of the art detinning operations is sold to the steel and foundry industries and tin is sold for use in many different industrial applications. Proler also distributes new prime and used line pipe and off-spec pipe for a wide range of industrial and commercial uses.

SUNNYVALE, CA (JUNE 11) BUSINESS WIRE - Novell Inc., developer of NetWare systems software products, Tuesday introduced and demonstrated a new line of products built on the NetWare 386 Communication Services platform, providing LAN-to-host connectivity and extended network management capabilities through the NetWare 386 network operating system.

At a product preview in Sunnyvale, Novell introduced NetWare 386 Services for SAA communications software supporting IBM's Systems Applications Architecture and providing connectivity between NetWare networks and IBM minicomputers and mainframes, including the System/370 and AS/400 product lines.

Novell's NetWare 386 Services for SAA v1.0, a systems software module which includes the NetWare 386 operating system kernel, is a communications server for business-wide information sharing.

The server provides comprehensive IBM connectivity, full adherence to all applicable SAA standards and complete access to a variety of IBM host applications such as OfficeVision, NetView and DB2.

Four complementary products were also introduced: two new graphics-based 3270 terminal emulation software products for Microsoft Windows 3.0-based workstations and the Macintosh computer; an updated version of the DOS-based 3270 terminal emulation client software; and a comprehensive network management product for centralized communication control and integrated support for IBM's NetView enterprise management system.

Novell introduced client-based software products that link desktop computers with IBM host systems: NetWare 3270 LAN Workstation for Windows and NetWare 3270 LAN Workstation for Macintosh, as well as an updated version of its NetWare 3270 LAN Workstation for DOS, v2.0.

These products allow DOS, Windows 3.0 or Macintosh clients to access corporate mainframe resources and wide-area networks through their native network transport protocols. DOS and Microsoft Windows 3.0 clients use IPX/SPX; Macintosh clients use AppleTalk. DOS client software is compatible with existing NetWare SNA Gateway products.

All Novell communications products announced today will be available in Fall 1990.

Novell Inc., is the leading independent provider of open, high-performance

network operating system software products. The company's NetWare network operating system has become a standard for personal computer-based local area networks.

SUNNYVALE, CA (JUNE 12) BUSINESS WIRE - Novell Inc., developer of NetWare systems software products, Tuesday announced key third-party support for NetWare 386 Communication Services, a fully integrated strategic software platform providing support for LAN-to-host, LAN-to-LAN and remote access-to- LAN connectivity on Novell's NetWare 386 network operating system.

At a preview in Sunnyvale, Calif., Novell introduced six new products built on the NetWare 386 Communication Services platform. Five industry partners were present at the announcement: Compaq Computer Corp., Digital Communications Associates Inc. (DCA), Indisy Software, Inc., Phaser Systems, Inc., and SynOptics Communications, Inc. Additional companies announcing products based on the NetWare 386 Communication Services platform, or expressing support for Novell's communications strategy, include NetFRAME Corp., Netlink Inc., Proteon Inc., and Wall Data Inc.

''NetWare 386 Communication Services is the result of input from MIS managers throughout the world,'' said Darrell Miller, Novell executive vice president of marketing and services. ''They described what they need most from a communications platform -- investment preservation; flexibility and freedom of choice at the desktop; complete network management capabilities; and a comprehensive applications development environment. The NetWare 386 operating system and the new Communication Services platform deliver on all counts.

''The open NetWare 386 programming environment is designed to encourage third-party applications, and Novell is pleased to have the support of some of the networking industry's most important players at today's announcement,'' Miller added. ''We anticipate that the utility of NetWare 386 Communication Services will attract many more industry partners into the NetWare 386 network computing environment.''

NetWare 386 Communication Services-compatible products announced today from third parties include MacIRMA workstation terminal emulation software from DCA; OfficeWare 386 workgroup services from Indisy; LAN-to-SNA connectivity products from Netlink; and the NetWare SNA Router from Phaser

Systems.

Anticipated NetWare 386 Communication Services-compatible products from other industry vendors include additional terminal emulation software, electronic mail applications, hardware connectivity products, server technologies, LAN and WAN routers and network management solutions.

To facilitate product development on the NetWare 386 Communication Services platform, Novell introduced the NetWare 386 Communication Services Developers' Kit, the newest in a series of Novell application software development tools. The programming interface is based on the AT&T UNIX System V Streams environment, creating an open and familiar application development platform.

The NetWare 386 Communication Services Developers' Kit includes a set of NLMs that function as a communications engine, all component APIs, source code samples and comprehensive programming documentation. It lists for $1995 and will be available in Fall 1990.

Novell Inc., is the leading independent provider of open, high-performance network operating system software products. The company's NetWare network operating system has become a standard for personal computer-based local area networks.

NORWOOD, MA (JUNE 12) BUSINESS WIRE - Phoenix Technologies Ltd. (NASDAQ:PTEC) announced Tuesday that it has completed its new management organization with the additions of Robert Langer as chief financial officer, Jack Kay as vice president of worldwide sales, and Brian Eisenberg as general manager of European operations.

''These executives bring valuable industry experience to Phoenix. They will help our in-place management group position the company for renewed growth and profitability,'' said Ron Fisher, president and chief executive officer.

Robert Langer joins Phoenix after founding DM Management Co,, a $25 million direct marketing firm, as its chief financial officer from 1987 to the present. Previous to starting DM, Langer was vice president of finance and treasurer for Lotus Development Corp., where revenues increased five-fold during his tenure from 1984 to 1987. Before Lotus, he was vice president of finance and administration for the Vesti Corp. From 1980 to 1983, he served as vice president and treasurer for Conductron

Corp.

Jack Kay was vice president of sales and marketing at Banyan Systems from 1987 to 1990, when the size of the company increased three-fold. Prior to Banyan, he was vice president of eastern operations for Convergent Technologies, and from 1974 to 1980, held key managerial positions in sales and marketing at Digital Equipment Corp.

Brian Eisenberg comes to Phoenix after 22 years in the computer business to assume the role of general manager of European operations, reporting to Jack Kay. Prior to joining Phoenix, Eisenberg was vice president of sales and marketing for HCR in Canada and, before that, vice president of sales and marketing for Interactive Systems Corp.

Phoenix Technologies Ltd. designs, develops and markets systems software products for personal computers, laser printers and workstations. Its products allow OEMs to offer their customers computers and printers that are compatible with industry standards. More than 300 of the major personal computer and peripherals manufacturers rely on Phoenix for its system-level software and hardware compatibility expertise.

#90163b0736 06/12/1990 ~Business Wire

FORT LAUDERDALE, FL (JUNE 12) BUSINESS WIRE - American Franchise Group Inc. (NASDAQ:BUCS) reported a loss of $2,619,647 on revenues of $9,859,430 for the fiscal year ended Feb. 28, as compared to a profit of $352,315 on revenues of $9,378,438 for the prior fiscal year.

Major factors contributing to the loss were non-recurring legal and professional fees of $600,000, write off of bad debts of $683,000 and $1,303,000 additional administrative expenses associated with the company's Print Shack subsidiary.

A significant portion of the $1.3 million administrative expense is attributable to costs incurred in mounting a national franchise sales campaign which was largely unsuccessful.

Taking into consideration the non-recurring expenses absorbed in fiscal 1990, the cost savings associated with a redirection of the Print Shack subsidiary and the recently completed consolidation of all operations into the company's Fort Lauderdale headquarters, the company believes that it

will return to profitability in fiscal 1991 and expects to report a profit for the first quarter ended May 31.

CINCINNATI (JUNE 12) BUSINESS WIRE - Gary N. Kocher, chairman and chief executive officer of PNC's Central Bancorporation, Tuesday announced that Bruce E. Robbins has been named president of The Central Bancorporation Inc. (NASDAQ: CBAN) and vice chairman and a director of The Central Trust Co.

Robbins is currently PNC's executive vice president for credit policy. In his new position, two of the primary responsibilities reporting to Robbins will be credit policy administration and corporate banking at Central Trust and throughout the Central Bancorporation.

Kocher said: ''Bruce will join with Clay Stinnett, executive vice president, and me in setting the overall policy and direction at Central.''

In addition, Kocher announced that Daniel Z. Graves, senior vice president and manager, coporate banking and leasing, will retire effective June 15,

1990. Kocher said: ''Dan has been an integral member of Central's management team and has handled a variety of assignments. He has served our organization commendably and loyally for 37 years. We wish him well in his retirement.''

Graves will be succeeded by David M. Payne, who has been elected senior vice president of The Central Bancorporation and executive vice president of Central Trust.

Payne, currently senior vice president for commercial banking at PNC's Pittsburgh National Bank, will have responsibility for corporate banking at Central Trust and the Central Bancorporation.

Kocher, who is also a PNC vice chairman and a member of PNC's management committee, continued: ''We wanted to add depth and additional expertise to our management ranks and are very excited that we could do so from within PNC. Bruce and Dave are very familiar with Central and share our operating philosophy.

''At PNC, we have very successfully drawn on internal talent in the past '' Kocher commented. ''This has included bringing people to the holding company and transferring managers between affiliate banks. This is a tremendous benefit of being part of a larger organization.''

Robbins and Payne will assume their new positions effective July 1. In addition, the board of directors of The Central Bancorporation elected Kocher to the position of chairman.

Robbins joined PNC's Pittsburgh National Bank in 1973 and was elected vice president in the commercial banking division in 1979 and vice president and manager of the multinational division's Pittsburgh/Ohio group in 1981. He was elected senior vice president of the multinational division in 1985 and executive vice president of Pittsburgh National in June 1989. Robbins was elected executive vice president of PNC in October 1989.

Payne joined Pittsburgh National Bank in 1971 and was elected vice president in 1978. In 1981, he became manager of the U.S. Group and in 1982 was named manager of the regional banking group. He was elected senior vice president of commercial banking in 1985.

PNC Financial Corp., headquartered in Pittsburgh, is the nation's 14th largest bank holding company with assets of $46.6 billion. PNC was formed in 1983 with the consolidation of Pittsburgh National Corp., Pittsburgh, and Provident National Corp., Philadelphia.

Its principal banking affiliates include: Bank of Delaware Corp. of Wilmington, Del.; The Central Bancorporation Inc., Cincinnati, (includes banks in Ohio and Kentucky); Citizens Fidelity Corp., Louisville, Kent.

(includes banks in Kentucky and Indiana); The First Bank and Trust Co., Mechanicsburg, Pa.; The Hershey Bank, Hershey, Pa.; Marine Bank, Erie, Pa.; Northeastern Bank of Pennsylvania, Scranton, Pa.; Pittsburgh National Bank, Pittsburgh; Provident National Bank, Philadelphia; PNC National Bank Wilmington, Del.; and PNC National Bank of New Jersey, Cherry Hill, N.J.

PNC currently operates 529 community banking offices in Pennsylvania, Kentucky, Indiana, Ohio, Delaware and New Jersey. It also conducts business through additional offices in 15 states and seven foreign countries.

#90163b0762 06/12/1990 ~Business Wire

NEW YORK (JUNE 12) BUSINESS WIRE - S&P CreditWire 6/12/90 -- S&P's rating on Lionel Corp.'s $59 million of subordinated debt is lowered to triple-'C'-plus from single-'B'-plus and removed from CreditWatch where it was placed on February 20.

The implied senior rating is single-'B'.

While the threat to credit quality from a possible hostile takeover by Robert I. Toussie L.P. appears to have dissipated, their has been an ongoing deterioration in the company's operating and financial position.

This, along with diminishing prospects for a significant recovery, are reflected in the downgrade. Sales growth at Lionel's 92 retail toy supermarkets has been negative since 1989. Moreover, gross margins have declined by about 200 basis points over the last two years, largely reflecting a change in the sales mix, and pretax fixed charge coverage is barely 1 times.

The company's aggressive expansion program, combined with the soft operating performance, has strained cash flow protection. Lionel makes heavy use of lease financing, and lease adjusted debt, represents 75 pc of capital, compared with 64 pc in 1987.

While cash balances and bank lines may be sufficient to fund near-term requirements, S&P believes that Lionel's credit quality may continue to be strained if it does not achieve a significant strengthening of its overall competitive position in toy retailing. This could also jeopardize the company's ability to utilize both trade and bank financing for its working capital needs, S&P said. ---CreditWire

CLEVELAND (JUNE 12) BUSINESS WIRE - Forest City Enterprises Inc. (AMEX:FCEA and FCEB) Vice Chairman Samuel H. Miller Tuesday announced that gross revenues for the first quarter ended April 30, 1990, were $81,974,000 compared to $75,996,000 in the same period last year, an increase of 8 percent.

Cash flow from operations increased 11 percent to $9,950,000, or $1.11 per share for the first quarter, compared to $8,993,000, or $1.13 cents per share for the first quarter of the prior year. The reduction in cash flow per share has been effected by the increase in shares outstanding due to the conversion of debentures.

Net loss from operations was ($1,030,000), or (12 cents) per share, compared to a loss of ($1,200,000), or (15 cents) per share for the first quarter of the prior year.

In addition, a gain on the disposition of properties of $149,000 was recorded, compared to a gain of $1,498,000 for the first quarter of the prior year.

#90163b0766 06/12/1990 ~Business Wire

NEW YORK (JUNE 12) BUSINESS WIRE - The following is a summary of a presentation Tuesday at the New York Society of Security Analysts by B.A. Bridgewater Jr., chairman of the board, president and chief executive officer of Brown Group Inc.

At a meeting of the New York Society of Security Analysts Monday, B.A. Bridgewater Jr., chairman of the board, president, and chief executive officer of Brown Group Inc., told the analysts that the company expects its focus on core footwear and fabric operations to result in improved results for 1990.

Bridgewater stated, ''Brown Group now has a very strong core of related businesses, our cash flow is strong, we have well-known footwear brands and a leading position in retail distribution.''

Naturalizer is the leading brand of women's footwear and the company's recently-introduced NaturalSport brand has been an exciting success.

The company also has strong positions with its Life Stride, Connie, DeLiso and Buster Brown brands. During the 1980s Brown Group built its retailing position, and now owns or is affiliated with more than 1,800 footwear specialty stores, including the very successful Naturalizer and Famous Footwear chains. Retailing operations also include over 600 leased shoe departments in department stores and about 300 Cloth World

fabric stores.

Brown Group is one of the largest importers of women's footwear. Through its Brown Group International and Pagoda divisions, the company imports about 55 million pairs of women's shoes annually. Its footwear manufacturing operations lead the industry with efficient quick-response capabilities, producing 23 million pairs annually.

Bridgewater told the analysts that the company has initiated programs to strengthen operations and further reduce overhead costs by $3 - $4 million by year-end. In May, the company announced plans to close a number of unprofitable shoe stores and withdraw from some leased shoe department businesses.

The costs associated with these changes were offset in the first quarter by a one-time cash payment of $13.1 million. This payment was the result of a revised license agreement with Nippon Shoe Co., extending their rights to the use of the Regal name and brand outside of the United States.

He concluded his remarks by saying that the company's recently-reported 21 percent increase in earnings per share for the first quarter of 1990 reflects the progress the company has made in focusing on its core businesses. He aded that the company expects to continue to report solid earnings gains for the balance of the year.

#90163b0784 06/12/1990 ~Business Wire

ATLANTA (JUNE 12) BUSINESS WIRE - AT&T (NYSE:T) Tuesday announced a $31,000 grant to Child Care Solutions to help provide training and resources to family child care providers in the DeKalb and Gwinnett county areas.

The grant is among the first to be awarded by AT&T's Family Care Development Fund, a three-year, national grantmaking initiative in conjunction with the Communications Workers of America and the International Brotherhood of Electrical Workers.

Child Care Solutions is a resource and referral agency affiliated with Save the Children. The grant will enable Child Care Solutions to provide for a Family Day Care Resource Room that will offer multiple activities for family day care providers. (Family day care providers care for three to six children in a residential setting.)

''Quality day care is a top priority with AT&T because it is of great concern to our employees. We want our employees to be able to come to work and not worry about the quality of care their children are getting.

''It is also appropriate that Child Care Solutions is among the first to receive an AT&T grant because their focus is on the residential day care. Thousands of parents prefer residential care; however, residential day care providers don't always get the support they need in order to manage their programs,'' said Esther Silver-Parker, district manager, AT&T public relations.

Child Care Solutions goals include enhancing the quality of family day care through training and education and establishing a lending library of educational toys, equipment and books.

The Family Care Development Fund is among several initiatives launched by AT&T in January 1990 to help its 265,000 U.S. employees balance the demands of their work and personal lives. The $10 million fund will support projects that help increase the supply and improve the quality of child and elder care services available to AT&T employees in the

communities where they live and work.

The fund began accepting proposals for community child care projects in January 1990, and will accept proposals for both child and elder care projects in 1991 and 1992.

The first grants awarded by the Family Care Development Fund support seven projects in six states and total $200,000. The projects include child care center expansions, after-school programs and quality improvement efforts to support residential child care.

The work of the Family Care Development Fund complements the AT&T Foundation's $2.25 million, three-year initiative to address the needs of today's family. The AT&T Foundation Family Strengthening Grants provide support to children and their families including health care, counseling and skills training.

#90163b0792 06/12/1990 ~Business Wire

TROY, MICH. (JUNE 12) BUSINESS WIRE - Handleman Company (NYSE:HDL) Tuesday announced net sales for the year ended April 28, 1990 were $716.6 million, compared with $646.7 million for the fiscal year ended April 29, 1989, an increase of $69.9 million or 11 percent.

Prerecorded video sales were $287.4 million in 1990 vs $212.4 million last year, an increase of $75.0 million. Music sales of $366.4 million were down $7.7 million, or 2 percent, from a year ago; book division sales this year increased 18 percent to $50.3 million; and home computer software sales of $12.5 million were down $5.1 million from last year.

After providing an accounts receivable collection reserve of $4.9 million pre-tax ($3.0 million after-tax or $.09 per share) related to the bankruptcy of a major customer (Ames Department Stores), net income for fiscal year 1990 was $36.8 million, or $1.13 per share, compared with $41.4 million, or $1.28 per share, last year. Gross margin as a percentage of net sales for fiscal 1990 was 26.5 percent vs. 27.0 percent last year. The decline in the gross margin percentage was the result of an increase in the proportion of prerecorded video sales to total net sales, and a decrease in the overall prerecorded video gross margin percentage. The decrease in video margins results from an increase in the proportion of lower gross margin top-hit product to total prerecorded video sales. Selling, general and administrative expenses for fiscal 1990 were $129.8 million, or 18.1 percent of net sales, compared with $106.9

million, or 16.5 percent of net sales for fiscal 1989. The increase in selling, general and administrative expenses was primarily attributable to significant increases in labor and freight expenses resulting from higher customer shipments and heavier returns of product from customers than in fiscal 1989.

For the fourth quarter this year, net sales were $159.7 million, compared with $151.4 million for the like quarter last year, an increase of $8.3 million or 5 percent. Net income for the fourth quarter was $2.6 million or $.08 per share (after the provision of $4.9 million or $.09 per share related to a customer's bankruptcy), compared with $10.8 million, or $.33 per share last year. Sales and earnings during the quarter were negatively impacted by significantly higher product returns than a year ago, and by restricted shipments to the majority of the company's customers because of customers' concerns regarding the general retail sales environment and the customers' storewide inventory levels.

As a result of higher than expected customer returns during the fourth quarter, labor and freight costs increased significantly. Fourth- quarter gross margins were impacted by the inclusion of a greater proportion of prerecorded video sales, which carry lower gross margins than the company's overall average, compared to the sales mix for the fourth quarter of last year.

The company is optimistic as it enters a new fiscal year. Music new releases scheduled for the company's first quarter include recordings by Madonna, New Kids on the Block, Alabama, Milli Vanilli and Paula Abdul. Video releases include Disney's "The Little Mermaid" and a music video by New Kids on the Block. Books related to New Kids on the Block are also scheduled for release during the company's first quarter. Increased sales by manufacturers of compact disc players leads the company to believe that the sale of compact discs will continue to grow. The Electronic Industries Association (EIA) recently estimated CD player sales for calendar years 1990 and 1991 at 8.2 million units and 9.4 million units, respectively.

If these sales estimates are achieved, the installed base of CD players will double over the next two years. The EIA also recently reported that for the first calendar quarter of 1990, sales of videocassette recorders (VCR's) are 15.9 percent ahead of sales for the same period last year. A larger installed base of VCR's serves to expand consumer demand of for-sale video product. In addition, prices of for-sale video product are continuing to decline, making it more affordable for consumers to buy prerecorded videocassettes. All common share and per share data have been adjusted for the 3- for-2 stock split distributed Aug. 10, 1989.

Handleman Company is the largest rack jobber of home entertainment products to mass merchandisers in North America. Products include

prerecorded music, prerecorded video, books and home computer software.

WASHINGTON (JUNE 12) BUSINESS WIRE - Nynex Computer Services Company, a world leader in voice-video-data information flow and management, Tuesday announced the provision of turnkey service and support for video communication systems worldwide.

The Nynex VIP (Video Information Performance) Maintenance program is a systems management approach to providing custom systems performance and operations support for a customer's video communications equipment, network and facilities.

The first one-stop service of its kind to be implemented in the industry, the Nynex VIP-Maintenance package is already optimizing the use of video communications and data networks for major financial and criminal justice organizations.

"The most important aspect of the Nynex VIP-Maintenance Program is our ability to quickly service a complex video communications system with multiple vendor technology through one point-of-contact - globally. We know how to quickly respond to the needs of the customer first," noted Max Basch, Nynex's director in charge of the service and support program.

"When we received a call at 4 p.m. from one of our financial clients to troubleshoot a problem for a system needed for an overseas video conference meeting the following morning, we were there to repair the system - before the company was even open for business; and we did it for a system installed internationally. That is added value!"

The VIP-Maintenance program is divided into three tiers for optimal service results. A customer calls the Nynex Customer Service Center (CSC) which performs basic troubleshooting; collects client information and sends it to the appropriate servicing group in a timely manner.

The VIP package second tier service provides specific equipment service and maintenance, including on-the-spot repair for software related "bugs," hardware and firmware repair.

The advanced third tier is Nynex's specialized network maintenance for domestic and international video communications network service, a complete solution to global systems.

"Being a complete systems management company means that we do not concentrate on equipment only. We consider the customer's needs including all of the system components such as systems performance, operations support, network and equipment, and we are able to bring this service package to any company, and for any vendor's hardware or integrated video communications system," said Jim Skoglund, vice president, Nynex Computer Services.

#90163b0796 06/12/1990 ~Business Wire

CHICAGO (JUNE 12) BUSINESS WIRE - Kemper Financial Services Inc. (KFS) said Tuesday that it endorses the eight recommendations announced Tuesday by the New York Stock Exchange Panel on Market Volatility and Investor Confidence, but that the recommendations are not far reaching enough or strong enough to ameliorate the problem of market volatility.

"We think that these recommendations would have a salutary effect on investor confidence, and would reduce the frequency and magnitude of excessive volatility, provided they are adopted by the appropriate entities and implemented by our industry," said Kemper Chief Investment Officer and Senior Executive Vice President Stephen B. Timbers. "Recently, investors in this country have all too often endured episodes of excessive market volatility," he said.

Timbers said, however, that the recommendations in the report, and particularly the analysis, do not fully represent Kemper's position. "Obviously, we were but one of 19 members of the Panel, and we did not expect the Panel to adopt our views completely.

The Panel was comprised of a wide range of participants from the business community and the investment industry, who brought very different opinions and experiences together.

Even though the specific Recommendations of the Report were endorsed by the vast majority of the Panel members - including Kemper - we were nonetheless troubled by the fact that some panel members refused to accept the need for any substantial changes."

Timbers said that he believed opposition to change was largely based on academic ideological grounds, such as the argument that markets are efficient and abhor any strictures, or for parochial business reasons - for example, fears that the Recommendations might cost a firm or exchange some trading business in the near term.

"Even though these views did not prevail, they served to dilute certain aspects of the Recommendations and many of the conclusions in the Report," he said.

"In spite of the progress that this Report represents, we remain concerned that trading practices such as index arbitrage, and the high leverage in the structure of the markets will continue to exist largely unchanged, until another market debacle as we experienced in 1987 and 1989 renews the call to action," Timbers continued.

"We recognize that volatility is a characteristic of equity markets and that liquidity entails some cost and risk, but there is nothing of value in the bouts of excessive volatility we have witnessed."

CLEVELAND (JUNE 12) BUSINESS WIRE - Synthetic Blood & Medical Technologies Inc. (SBMT) a public company (OTC), has reached an agreement in principal to acquire Systek Inc., of Cleveland, in an exchange for stock of SBMT.

At the closing of the acquisition in 45 - 60 days, Bancapital Corp. (''BC''), a merchant banking concern, on a best efforts basis will arrange a minimum of $300,000 capital infusion for use in SBMT operations.

John E. Orin Jr., president of BC will become chairman and chief executive of SBMT. Dr. Albert P. Kretz will continue as president of SBMT and Dale Choksi will be president of the Systek division of SBMT.

SBMT is a development stage company which designed and intends to market ambulatory drug infusion pump systems and develop implantable glucose sensors and a synthetic oxygen carrier (artificial blood). The company's first pump, the Mini U-100 insulin infusion system has an approval of its 510(k) application from the FDA.

Systek Inc. and its subsidiary Systek Controls, founded in 1987 and based in Brookpark, Ohio, specializes in the assembly and manufacture of IBM compatible computers, add-on peripherals, custom electronic temperature control panels, circuit boards, and process power controllers for medical, aerospace and other related industries. Systek's 1989 sales were $1.16 million and first quarter 1990 sales were $360,000.

Dr. Kretz, president of SBMT, stated, ''In addition to the benefit of economies of scale, Systek adds considerable strength to SBMT by bringing technical and manufacturing facilities.''

     #90163b0856 06/12/1990 ~Business Wire
NEW YORK (JUNE 12) BUSINESS WIRE - American Express Company announced Tuesday that it has filed a registration statement with the Securities and Exchange Commission relating to a domestic and international public offering of approximately 27 million common shares.

Based on the current market value of the stock, the offering would raise approximately $825 million.

As part of the offering, Nippon Life Insurance Company has agreed to purchase American Express Common Shares for $300 million at a price per share of $30.96 or the public offering price, whichever is lower. The closing of the sale is subject to the completion of the merger of Shearson Lehman Hutton with American Express, completion of the public offering of Common Shares, certain regulatory approvals and other customary conditions of closing.

In connection with the sale of the shares, Nippon Life and American Express have also agreed to revise certain agreements between them to reflect the elimination of public holdings of Shearson Common Stock after the merger and to preserve Nippon Life's current equity interest in Shearson.

The funds raised through the offering will be used to repay $500 million of American Express's short-term indebtedness incurred to fund a portion of the Company's March 1990 purchase of $750 million of Shearson's Convertible Exchange Preferred Stock and for general corporate purposes.

Lehman Brothers, a division of Shearson Lehman Hutton Inc., will be the lead manager for the offering. Co-managers will include Bear Stearns, Goldman Sachs, Kidder Peabody, Lazard Freres, Morgan Stanley and Salomon Brothers.

As of March 1990, American Express owned approximately 60 percent of the outstanding voting shares of Shearson Lehman Hutton. It is expected that the merger of Shearson will be completed in the third quarter of this year.

American Express Company, a diversified travel, financial and information services company founded in 1850, is a world leader in charge cards, Travelers Cheques and travel related activities. It is also a leader in financial planning, securities brokerage, asset management, investment banking, information processing and communications services.

AVON, MA (JUNE 12) BUSINESS WIRE - Westerbeke Corp. (NASDAQ:WTBK) announced Tuesday the results of its operations for the second fiscal quarter ended April 28, 1990.

Net sales for the quarter ended April 28, 1990, were $4,510,500 compared to $3,783,100 for the quarter ended April 29, 1989, an increase of 19 percent. The company reported a net profit of $76,200, or $.04 per share for the quarter ended April 28, 1990, compared to a net loss of $(11,900) or $(.01) per share, for the quarter ended April 29, 1989.

For the first six months on fiscal 1990, the company reported net sales of $8,368,000 compared to $7,000,600 for the first six months of fiscal year 1989, an increase of 20 percent. The company reported net income of $88,700, or $.04 per share, for the first six months of fiscal 1990 compared to a net loss of $(271,500) or $(.13) share, for the first six months of fiscal 1989.

Westerbeke Corp. designs, manufactures and markets marine engine and air conditioning products intended principally for recreational marine applications.

SARASOTA, FL (JUNE 12) BUSINESS WIRE - Elcotel Inc. (NASDAQ/NMS:ECTL), manufacturer of public communications products, Tuesday announced unaudited results of operations for the fourth fiscal quarter and fiscal year ended March 31, 1990. The company also announced that subsequent events have required that it restate unaudited results of operations for the second fiscal quarter ended September 30, 1989 and the third fiscal quarter ended December 31, 1989.

A loss from operations, all continuing, for the fourth fiscal quarter ended March 31, 1990, was $353,000, or 6 cents per share, on sales of $2,771,000, as compared to earnings from continuing operations of $273,000 or 5 cents per share, on sales of $3,691,000, for the fiscal quarter ended March 31, 1989; net earnings, after deducting a discontinued operations loss, were $59,000, or 1 cent per share, for the fiscal quarter ended March 31, 1989.

A loss from operations, all continuing, for the fiscal year ended March 31 1990, was $998,000, or 18 cents per share, on sales of $9,775,000, as compared to earnings from continuing operations of $1,734,000, or 32 cents per share, on sales of $17,659,000 for the preceding fiscal year; the net loss, after deducting a discontinued operations loss, was $717,000, or 13

cents per share, for the preceding fiscal year.

The restated, unaudited, loss from operations, all continuing, for the second quarter ended September 30, 1989, was $416,000, or 8 cents per share, on restated sales of $1,840,000. The restated, unaudited, loss from operations, all continuing, for the third quarter ended December 31, 1989, was $335,000, or 6 cents per share, on restated sales of $1,714,000.

A spokesman for the company explained that the restatements of sales, and the resulting operating losses, for the second and third fiscal quarters, were the result of changes in circumstances from the time of shipment of product, requiring the reversal of certain revenues previously recognized in these quarters. Certain products sold to distributors in the second and third quarters were found to require design enhancements in order to facilitate their sale, require changes to meet regulatory requirements, or were sold to distributors which were subsequently terminated. Further, the company sold products to various pay telephone operators for resale to certain limited partnerships.

Because of delays in those limited partnerships obtaining the financing necessary to purchase those products, the limited partnerships did not purchase those products from the operators.

GROUP LED BY GENERAL ELECTRIC FINANCIAL SERVICES INC OWNS 624,339 SHARES (3.70%) OF STAR TECHNOLOGIES INC (TICKER: STRRC) OF STERLING, VA.

ANNOUNCEMENT:

On May 31, 1990, General Electric Capital Corporation purchased 48,000 shares of series B senior preferred stock and 32,000 shares of series C senior preferred stock of Star Technologies Inc. for an aggregate purchase price of $8,000,000.

Such shares are convertible into 8 million shares, representing 26.3 percent of the common shares on a fully diluted basis.

The shares of preferred stock were purchased as a part of a recapitalization of Star Technologies Inc. pursuant to a preferred stock purchase agreement, dated May 31, 1990, among GEPT, General Electric Capital Corp. and State Farm Mutual Automobile Insurance Co.

Under the purchase agreement, GEPT acquired 18,000 shares of series B senior preferred stock and 12,000 shares of series C senior preferred stock, and State Farm acquired 22,500 shares of series B senior preferred stock and 15,000 shares of series c senior preferred stock.

GEPT and State Farm acquired their shares in exchange for outstanding notes of Star Technologies held by them.

The purpose of the recapitalization was to improve Star's financial position and to meet minimum capital and surplus requirement imposed by the National Association of Securities Dealers Inc. on companies with stock traded on NASDAQ.

Pursuant to the certificate of designation setting forth the rights and privileges of the preferred stock, the holders of the preferred stock have the exclusive right to elect two directors of the company.

Pursuant to the terms of the purchase agreement, Star Technologies will not consummate any transaction of merger, reorganization or a consolidation if such transaction adversely affect the shares of preferred stock without the consent of the holders.

WASHINGTON (JUNE 12) COMTEX - The 10-Q report filed at the NASD shows Spectrum Labs Inc. earned $63,525, or $0.01 per share, on revenues of $741,893 for the quarter ended March 31, 1990.

This compares with net income of $48,876, or $0.01 per share, on revenues of $731,461 for the same period in 1989.

-30- 444

#90163c0035 06/12/1990 ~Comtex

WASHINGTON (JUNE 12) COMTEX - The 8-K report filed at the SEC shows Nastech Pharmaceutical Co. Inc. engaged Robbins, Greene, Horowitz, Rochlin Lester & Levitan as its principal accountants effective April 26, 1990, replacing Hoffman Riach Fine CPA Group.

The former accountant's report on Nastech's financial statements for for the fiscal year ended June 30, 1989 did not contain an adverse opinion or disclaimer of opinion and was not qualified as to uncertainty, audit scope or accounting principles.

However, the report included an explanatory paragraph that the company was in the development stage as of June 30, 1989 and, as such, has not yet commenced regular operations. In addition, it was indicated that the company has suffered recurring losses and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern.

#90163c0046 06/12/1990 ~Comtex

WASHINGTON (JUNE 12) COMTEX - A top Bush administration official said

today it would be a mistake to lump all East European nations together as they attempt to make the transition to market economies.

"There are tremendous differences in East European nations," said Dr. Michael Boskin, chairman of the Council of Economic Advisors. "GDR (East Germany) and Czechoslovakia start with a higher standard of living but Czechoslovakia has not moved away from central planning. "Poland and Yugoslavia have comprehensive reform plans but Yugoslavia has decentralized planning without privatizing."

Boskin's remarks were made before a blue ribbon market advisory panel of top financial industry executives assembled by the Securities and Exchange Commission to assist and promote economic development in Eastern Europe, with special emphasis on fostering the growth of securities and other financial markets in nations with emerging market economies.

Boskin says the transformation toward a market economy will require a start from scratch. "It's a tabula rosa," he said. "New tax rules, new legal institutions and new political institutions are developing. These countries are asking people who manage enterprises to make decisions for the first time. They will have to develop programs of price decontrol and get to the framework of competition."

SEC Chairman Richard C. Breeden said these nations need concrete and practical assistance. "They are looking to us not only for advice but for help to give specific training for their people," Breeden said upon opening the panel's first meeting. "As these nations reorganize they will need training for people to regulate markets. "For decades there had been no need, so developing institutions will require people trained who understand the issues."

A Polish official said Poland needs a privitization law in order to move toward a market economy.

"The problem in Poland is that we have to build a whole capital market through privitization at one go," said Polish foreign ministry official Dr. Wieslaw Rozlucki, PhD. "We don't have a legal structure to which we should move to privitization. A privitization law will give our agency power to transform state-owned enterprises to corporations."

Rozlucki added that by autumn he hoped Poland would have a new set of securities laws in place to start its own version of the SEC and ultimately establish a stock exchange.

Boskin believes Eastern Europe will present new opportunities for U.S. investors. "The U.S. government position is where it makes reasonable good sense, businesses should invest in Eastern Europe," he said. East Europeans have a historical antipathy to some other investors like Japan

and West Germany. They want Americans."

STAMFORD, CT (JUNE 13) COMTEX - Barnett Bank of South Florida N.A. has threatened to foreclose on its security interest in several properties owned by financially ailing IPM Inc., the Ft. Lauderdale, Fla.-based provider of sewer-maintenance services.

In a June 6 telephone conversation, a bank representative notified IPM that the bank was not willing to accept its offer of equity in exchange for a writedown of the bank's claims, and that the bank planned to foreclose on its equity interest in IPM's plant and property in Ft. Lauderdale, Bartow and Jacksonville.

The bank's claims against IPM currently total more than $2.7 million, according to a Securities and Exchange Commission filing.

IPM was recently forced by other creditors to sell its McCullough Rehab Contractors subsidiary for an undisclosed sum.

This 8-k Filing was submitted to the Securities and Exchange Commission on JUNE 12, 1990.

STAMFORD, CT (JUNE 13) COMTEX - Kysor Industrial Corp. has agreed with the U.S. Environmental Protection Agency to design a cleanup for hazardous-waste contamination at its Cadilac, Mich., property, but has yet to agree on a specific plan.

Kysor expects the design work at the site to take about 20 months to complete, according to a Securities and Exchange Commission filing.

During that time, Kysor will continue to negotiate with the EPA on the cleanup work itself.

If an agreement is not reached, the company expects the EPA to order it to build and undertake the action.

This 8-k Filing was submitted to the Securities and Exchange Commission on JUNE 12, 1990

GROUP LED BY CORPORATE PARTNERS L P OF NEW YORK, NY OWNS 10,440,000 SHARES (13.80%) OF FIRST BANK SYSTEM INC (TICKER: FBS) OF MINNEAPOLIS, MN.

ANNOUNCEMENT:

According to a May 30 stock purchase agreement, Corporate Partners will buy 8,875,023 shares, Offshore Partners will purchase 636,339 shares, and the State Board will buy 928,638 shares.

Each party will also acquire ten periodic stock purchase rights (PSPRs), and one risk event warrant.

Total consideration to be paid amounts to $142,060,746.

The State Board has an additional agreement to buy 2.16 million shares, ten PSPRs and one risk event warrant for $29,509,017.

The PSPRs allow Corporate Partners to buy shares of preferred stock in the event that First Bank System Inc. fails to pay dividends during a twelve-month period.

The risk event warrants allow Corporate Partners to buy common shares at $1.25 each (or preferred or depositary shares in certain cases) if certain change in control events occur or if the common stock is valued at less than $13.88 a share ten years after the date of the purchase agreement.

As long as Corporate Partners own at least a 5 percent stake until Dec. 31, 2002, they may designate a non-voting observer to First Bank System's board plus one director.

The agreement also gives Corporate Partners the right to have their shares registered.

PURPOSE:

Stock purchase agreement for investment.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 1

ANNOUNCEMENT:

On June 9, 1990, Wearnes Technology (Hong Kong) Ltd. signed a letter with Chase Manhattan Bank, N.A. under which Chase offered a credit facility of U.S. $35,000,000, to be reloaned to Qume Acquisition Partnership pursuant to the third amended commitment letter.

The general partners of Qume Acquisition are Wearnes (Hong Kong) and Qume Management LP, holding interest of 50.1 and 49.9 percent, respectively.

Interests in Qume Acquisition Partnership will not be transferable without the unanimous consent of the two partners.

Wearnes (Hong Kong) will acquire the right to take action on behalf of Qume Acquisition Partnership should it default on the loan.

Qume Acquisition Partnership will nominate seven persons to serve as directors of New Qume and, upon consummation of the merger, four persons will be nominated by Wearnes (Hong Kong) and three persons will be nominated by Qume Management.

Stockholders of New Qume will vote their shares of New Qume in favor of the nominees recommended by Qume Acquisition Partnership, pursuant to the stockholders agreement.

On June 10, 1990, pursuant to the merger agreement, the special committee of Qume's (TICKER: QUME) board waived the right until June 25, 1990 to terminate the merger agreement and abandon the merger due to New Qume's failure to obtain financing documentation or enter into alternative financing on the 21st day after the merger agreement; and an escrow agreement was entered into by and among Bank of America, NT & SA, Wearnes Technology (Pte.) Ltd., New Qume and Qume Corp., and $1,000,000 was delivered to Qume Corp. to be deposited in escrow to secure the performance obligations of New Qume.

FAIRBANKS, ALASKA (JUNE 12) - A small plane crashed and burst into flames at Fairbanks International Airport, killing both people aboard, a Federal Aviation Administration (FAA) spokesman said.

The Taylorcraft two-seater crashed Monday when its engine stalled moments after takeoff, FAA spokesman Paul Steucke said.

The cause of the crash was not immeidately known, Mr. Steucke said.

KUWAIT (JUNE 12) - The Kuwaiti cabinet of Premier Saad al-Abdullah as-Sabah Tuesday resigned following earlier parliamentary elections expected to see loyalists sweep the controversial polls.

The Kuwaiti News Agency Kuna said the country's ruler, Sheikh Jaber al-Ahmad as-Sabah, accepted the cabinet's resignation and asked it to continue work until the formation of a new one.

Final election results for the four-year transitional parliament were not known yet, but loyalists are widely believed to have snatched a majority of 50 seats during last Sunday's election. The emir is to appoint another 25 deputies to the 75-seat assembly.

Kuwaiti dailies Tuesday described the polls as ''almost surpriseless''. About 65,000 Kuwaitis were eligible for voting and 384 candidates competed in 25 constituencies.

According to the constitution, the new cabinet has to be formed within a month after elections. The new assembly is expected to hold its opening session in mid-July.

It is to review the country's previous parliamentary experience, which led to the assembly's dissolvement in 1986 on the grounds it destabilised the country, and formulate a new constitution. Recommendations would be presented to the emir.

Former parliament presidemt Ahmad Saadun and a group of 32 ex-deputies had called for boycotting the Sunday polls, which they said would lead to a toothless assembly. They described this alleged democratic process as unconstitutional.

The new house will have the right to propose and discuss bills as well as the budget. But it will have to pass them on to the cabinet since deputies have no power to vote them into law.

CAPRINO VARESE (JUNE 12) - Six more young West Germans were sentenced here Tuesday in a continuing crackdown by Italian authorities against football hooliganism during the World Cup.

The six were each given a 10-month suspended prison sentence and ordered to leave the country by Wednesday. They were taken handcuffed back to police cells prior to expulsion.

Two West Germans had been sentenced to one-year jail terms by an Italian court in Brescia Monday for vandalism, committing bodily harm and resisting arrest.

Another 43 had been ordered out of the country Monday after violence in central Milan.

BEIJING (JUNE 12) - China is hoping to jump-start negotiations with Taiwan by reviving its proposal for direct talks between the Communist Party and the Kuomintang (KMT).

In a major policy speech, Communist Party General Secretary Jiang Zemin said China wants talks "on a reciprocal basis" between the two parties, which both claim to be the legitimate ruler of all China.

"This stand proceeds from the existing status and roles of the two parties and bypasses the issues that the Taiwan side finds inconvenient," he said Monday.

Mr. Jiang rejected an earlier offer by Taiwan President Lee Teng-hui for "government-to-government" negotiations, saying it was impossible for one country to have two governments.

But he said the fact that Taipei is ready to hold talks with Beijing is a big step forward, 40 years after Chiang Kai-shek and his nationalist troops retreated to Taiwan as Mao Zedong's communists took power on the mainland.

"It's better than 'no contact, no compromise and no negotiations,'" Mr. Jiang said, alluding to Taiwan's past "three no's" policy towards Beijing.

Monday's statement came ahead of a planned visit here next month by Huang Hsin-chieh, chairman of Taiwan's opposition Democratic Progressive Party (DPP),
at the invitation of President Yang Shangkun.

In his speech, Mr. Jiang indicated that Beijing wants to use Mr. Huang's visit as a stepping stone towards reunification talks.

"We also attached importance to the role of other parties, social groups and individuals from all walks of life in realizing the great cause of reunification," he said.

China first proposed open party-to-party talks with Taiwan in September 1988 to clear "accumulated rancour" and work towards reunification.

The move followed historic steps by Taiwan to tolerate fast-growing indirect trade and to allow its people to visit the mainland via intermediate points, mostly Hong Kong.

EINDHOVEN, Netherlands (JUNE 12) - Dutch electronics giant Philips and Italian computer and office equipment concern Olivetti have broken off talks on cooperation in the information systems field, it was announced here Tuesday.

A joint statement from the two companies issued by Philips at its headquarters in Eindhoven in the southern Netherlands said that the exploratory talks had been broken off.

"The discussions have revealed that, at this point in time, no substantial benefit is to be gained by either company from co-operating in the business area under scrutiny," the statement added.

#90163d1260 06/12/1990 ~French/German News Agency

PARIS (JUNE 12) - France is planning to spend some 190 billion francs (33.3 billion dollars) on some 3,500 kilometers (2,200 miles) of new and renovated track for its high-speed rail system, it was announced here Tuesday.

Transport Minister Michel Delebarre said that the project, which has yet to be considered by the various regional authorities, envisaged investment at the rate of 12 billion francs (2.1 billion dollars) a year from 1995 over 20 years, or 15 billion francs a year over 15 years.

Mr. Delebarre said that if the entire project were realised it would "overturn ideas about travelling time as much as changes in air transport or the road system have done in the past 30 years."

The programme unveiled Tuesday for new lines for the 300 kilometer (185 miles) an hour trains will be in addition to the 5,700 kilometer (3,500 mile) network due to be in operation by 1995.

An eastern network linked to the West German high-speed system is to be given priority, along with a Mediterranean network into Italy and Spain and a transalpine service between Lyons and Turin.

The system is already branching out with the forthcoming opening of the cross-Channel tunnel and links to Brussels, Amsterdam, Cologne and Frankfurt.

The document released Tuesday stressed that the project was not a concrete plan, and that it depended on several factors, including the views of the regions through which the trains will run and the development of high-speed networks in neighbouring countries.

Mr. Delebarre had said previously that one major problem was the fact that

"everyone wants to have a station in their town, but nobody wants the tracks."

There are already protests in several parts of France over existing plans to expand the network on the grounds that it is spoiling the countryside.

On the international front, Britain, which has no high-speed network, has yet to decide whether it will have a high-speed rail link to carry continental European passengers on the last stage of their journey from the English coast to London.

#90163d1470 06/12/1990 ~French/German News Agency

LONDON (JUNE 12) - British Prime Minister Margaret Thatcher on Tuesday ruled out in principle any government aid for a high-speed rail link between London and the new cross-Channel tunnel.

Public funding for such a project, which would cut journey time between Folkestone and the British capital by 20 minutes, would be a "colossal subsidy," Mrs. Thatcher told parliament.

"We don't believe we should subsidise international rail services," she added, noting that airline services were not subsidised.

Mrs. Thatcher's remarks came on the day that the French Government unveiled a 20-year development plan for its high-speed rail network involving a total investment of some 190 billion francs (33.3 billion dollars) and the construction or renovation of some 3,500 kilometers (2,170 miles) of track.

The British cabinet is due to give an official response Thursday to a request for a subsidy of 350 million pounds (590 million dollars) from the consortium building the new line, involving British Rail and private concerns Trafalgar House and BICC.

KINSHASA (JUNE 12) - A month-long strike by government doctors in Zaire has caused more than 50 deaths in the capital, the pro-government paper Elima reported Tuesday.

It said there were 31 deaths at a major hospital and 20 at a private clinic. Burials at one of the chief cemeteries had gone up 25 percent in the same period, it added.

Zaire's hospitals have for years offered only minimal emergency services because of lack of equipment, medicine and qualified staff. The Mama Yemo hospital, the biggest here, has for several months been without even a single usable operating theatre.

The doctors are striking in protest at such conditions, and also want more money.

Government health spending has been estimated by foreign experts based here at less than 15 U.S. cents annually per person for the population of 30 million.

#90163d1530 06/12/1990 ~French/German News Agency

MOSCOW (JUNE 12) - The Soviet Defence Ministry is to hand over three tonnes of gold, 564 tonnes of silver and 300 kilograms (660 pounds) of platinum to the treasury, the Pravitelstvenny Vestnik newspaper reported Tuesday.

The precious metals are used in the construction of weaponry, but cutbacks in the armed forces and conversion of part of the armament industries to civilian use have reduced the amount of bullion needed, according to the government newspaper.

Giving an example of the use of precious metals in the defence industry, the paper said that construction of a MIG-23 jet fighter required 512 grams of gold, 69 grams of platinum and 17 kilograms of silver.

The defence ministry has handed over all its precious metal reserves to the treasury, the paper said.

The Soviet Union's external debt has recently risen dramatically, and foreign experts believe Moscow has increased its sales of precious metals abroad.

HASTINGS, ENGLAND (JUNE 12) - One of England's most famous castles, complete with moat and crenellated walls, is up for sale with a price tag of 17 million pounds (28 million dollars).

Built in the 15th century near the site of the Battle of Hastings in 1066, where William the Conqueror won the throne of England, Herstmonceux has changed hands several times since.

More recently, it belonged to the Royal Observatory, Greenwich, from 1946 to 1988, housing telescopes and providing a stylish residence for the Astronomer Royal.

When the observatory moved to Cambridge, Herstmonceux and its 200 acres was bought by property firm James Developments.

Plans to turn the castle into a leisure complex did not get off the ground. Now the company hopes to transform the stately pile into the "Gleneagles (the famous Scottish golf course) of the South of England", according to spokesman Ian Tegg. An investor is sought who can share the cost of converting Herstmonceux into a 150 bedroom hotel, with French partner Meridien.

James Developments will have nearly doubled its money in two years if Herstmonceux is sold for the asking price. The company paid 8.1 million pounds (13 million dollars) in 1988.

NEW YORK (JUNE 12) - Leaders of 25 nations will join other statesmen, intellectuals and writers at an international conference on hate and its political and social consequences to be held in Oslo from August 26 to 29, it was announced here Tuesday.

The Nobel Peace Committee and the Elie Wiesel Foundation said they organized the meeting, under the heading, "The Anatomy of Hate -- Resolving Conflict Through Dialogue and Democracy," to find peaceful solutions to ethnic, religious and racial conflicts around the globe.

Personalities invited to the conference include Presidents Francois Mitterrand of France and Vaclav Havel of Hungary, former president of Costa Rica and Nobel Peace Prize winner Oscar Arias Sanchez, writers Mario Vargas Llosa of Peru and Nobel Prize lauriet Wole Soyinka of Nigeria, and former U.S. secretary of state Henry Kissinger.

"Hatred is a plague sweeping our planet," said Mr. Wiesel, Jewish-American author and Nobel Peace Prize winner, on making the announcement.

"We hope, by the conclusion of our meeting in Oslo, to approve a declaration that will set forth guidelines for peaceful resolutions of conflicts of hate," added Mr. Wiesel.

PARIS (JUNE 12) - French Economy Minister Pierre Beregovoy on Tuesday gave the green light for the acquisition of paper manufacturer La Chapelle Darblay by Finnish group Kymmene.

Kymmene has promised to maintain La Chapelle Darblay's 1,170 jobs and to make sufficient investment to ensure the company's competitiveness, the ministry said.

This essentially means the installation in the coming years of a new machine to make magazine paper for some two billion francs (350.8 million dollars), the ministry said.

The Finnish group has also undertaken to maintain the privileged relations between La Chapelle Darblay, a major supplier of paper for French newspapers,
and the French press.

Initially, Kymmene was to have purchased La Chapelle Darblay jointly with the Swedish Stora group for 1.3 billion francs (230 million dollars) under an agreement struck in April.

La Chapelle currently belongs to Francois Pinault of France.

Stora pulled out of the deal after acquiring West German papermaker Feldmuehle Nobel at the end of April, which gave it control of a magazine papermaking concern in France.

If Stora had gone ahead with La Chapelle deal it would have controlled France's two leading magazine paper makers and could have run into problems with European free competition rules, the ministry said.

LAGOS (JUNE 12) - Nigeria's biggest electrical goods market, shut down by the Lagos state government last May 30 after irate traders burnt down some official buildings and vehicles, will reopen Wednesday, an official source said here Tuesday.

The reopening followed appeals by highly-placed officials and individuals in the country on behalf of the traders, the source added.

The traders have also met a pre-condition for the reopening of the market set by the state military governor, Colonel Raji Rasaki, who demanded that damaged government property be repaired.

Some traders of the Alaba international market, protesting against the shooting to death of one of their colleagues by police, had set ablaze a nearby local court, police stations and some cars.

A policeman chasing a motorist accused of carrying illegal goods to the market had accidentally killed the trader.

More than 40 persons were arrested in connection with the arson, said the Lagos state head of the police, Alhaji Ahmed Daura, who described the market as the "worst criminal den in Lagos".

He said his office had received reports of several cases of stolen property being recovered from the market, situated along the Lagos-Cotonou (Benin) road.

PARIS (JUNE 12) - Norwegian shipowners Kloster Kruise on Tuesday signed an order for two cruise ships from French shipyard Chantiers de l'Atlantique, the GEC-Alsthom group said here.

The value of the order was not given, but French bank Societe Generale said it was organising credit of some 2.2 billion francs (385.9 million dollars) to help fund the purchase.

Shipping industry sources said this credit represented more than three-quarters of the value of the order.

The 1,200-passenger cruise ships are to be delivered at the end of 1992 and in mid-1993 and are to operate in the Caribbean.

The contract was signed in Oslo.

#90163d2120 06/12/1990 ~French/German News Agency

BEIRUT (JUNE 12) - Christian Maronite Patriarch Nasrallah Sfair Tuesday ended a visit to Moslem West Beirut where he met President Elias Hrawi in defiance of objections by Christian army commander Michel Aoun.

The sources said Sfair, accompanied by Vatican Ambassador Pablo Puente, held talks with Hrawi, a Christian, as well as Prime Minister Selim Hoss and House Speaker Hussein Husseini, both Moslems.

Sfair's visit, the first since Hrawi was elected president last November, consolidated Christian backing around the president and represented a blow to the authority of General Aoun, who controls part of the Christian enclave in central Lebanon.

Aoun has refused to recognise Hrawi, and has charged that the parliamentarians who elected elected him were puppets of Syria.

Safair's visit came after two leading Christian politicians decided to join Hrawi's cabinet. They are George Saadeh, president of the Phalange Party, and deputy Michel Sasine.

''We hope that peace and security would prevail again in Lebanon,'' Sfair told reporters after the talks with the President Hrawi.

#90163d2180 06/12/1990 ~French/German News Agency

THE HAGUE (JUNE 12) - Irish Prime Minister Charles Haughey said here on

Tuesday that "the time has not come yet" for his country to lift economic sanctions against South Africa.

Mr. Haughey, making a brief stop here to prepare the June 25-26 European Economic Community (EEC) summit in Dublin, added that there were differing opinions among European leaders on anti-apartheid sanctions.

European leaders must "unify" their stance on the issue, he said, confirming that the question of whether sanctions should be lifted will be at the centre of the Dublin summit discussions on South Africa.

Mr. Haughey said he was "certainly" in favour, nevertheless, of sending a message of encouragement to reform-minded South African President Frederik de Klerk.

Dutch Foreign Minister Hans van den Broek Tuesday repeated his opposition to any lifting of the sanctions, which he added was "not on the agenda." Mr. Van den Broek said, however, he was encouraged by developments in South Africa since Mr. de Klerk became president.

LUXEMBOURG (JUNE 12) - The European Court of Justice told the Irish Republic on Tuesday it must lift its restrictions on citizens who shop across the border in Ulster, where Britain's lower taxes and excise duty make goods much cheaper.

But the victory for Irish shoppers was short-lived, as the Dublin government warned it would maintain the restrictions until it was reassured that it would not suffer a financial haemorrhage.

Seeking to stem a revenue loss that it estimated at 300 million pounds (450 million dollars) a year, the government declared in 1987 that all Irish citizens had to spend 48 hours out of the country if they wanted to benefit from EEC tax allowances.

At present, cross-border travellers are allowed to bring back goods with a total value (including tax) of 390 European Currency Units (ECUs) (471 dollars) before they become liable to duties in their home country.

The European Economic Community's top court on Tuesday ruled that the time restrictions violated a 1985 Community directive.

In response, Irish Finance Minister Albert Reynolds said Ireland "accepts" the ruling, according to a communique issued by the Irish mission in Brussels.

But, he added, the 48-hour rule "will be maintained in operation for the time being, pending detailed consideration of the judgement and its full implications, and pending the outcome of consultations with the EEC Commission."

#90163d2460 06/12/1990 ~French/German News Agency

LONDON (JUNE 12) - A united Germany will be a "staunch" member of the North Atlantic Treaty Organization (NATO) as the alliance takes on a more political role, British Prime Minister Margaret Thatcher said here Tuesday.

Speaking in the House of Commons, Mrs. Thatcher noted that West Germany was already a NATO member and was on the verge of becoming one country with East Germany under West German constitutional provisions.

"It follows that the whole of Germany will continue to be a staunch member of NATO," Mrs. Thatcher said.

She also appeared to reject a proposal made earlier Tuesday by Soviet President Mikhail Gorbachev that a united Germany would effectively belong to both NATO and the Warsaw Pact as the two blocks took on a more political character.

"I doubt very much whether one country can be a member of two defense pacts," Mrs. Thatcher said.

But she did call for a strengthening of the 35-nation Conference on Security and Cooperation in Europe (CSCE) "as a means to involve the Soviet Union fully in discussion of Europe's future."

"I am confident that a solution satisfactory to everyone and which enhances the security of Europe can be found," Mrs. Thatcher said.

NATO "is going to take on a more political role" and foreign ministers of the CSCE should meet twice a year to anchor the East-West dialogue within that framework, Mrs. Thatcher said.

Referring to her talks last week in Moscow with Mr. Gorbachev and Soviet Defense Minister Marshal Dmitri Yazov, Mrs. Thatcher said she had voiced Britain's "determination to maintain a secure defense, including nuclear weapons."

#90163d2590 06/12/1990 ~French/German News Agency

HARARE (JUNE 12) - Delegations representing both the Mozambique government and the country's rebel guerrilla movement arrived Tuesday in the Malawian capital of Blantyre for the first direct peace talks in 15 years, according to a report.

Two members of the politburo of the ruling Frelimo Party, Transport Minister Armando Guebuza and Forerign Minister Pascoal Mocumbi, arrived along with high-ranking delegations, reported the Mozambique news agency Aim - the only agency authorised to cover the event.

Also arriving was Afonso Dhlakama, leader of Resistencia Nacial de Mocambique, known by its acronym, Renamo.

War broke out between the two groups in 1975, almost immediately after independence from Portugal that year, resulting in the deaths of an estimated 500,000 Mozambicans, due to fighting, starvation or other privations.

The violence has also spilled into neighbouring countries. Police in Zimbabwe reported Tuesday that five children and two women were hacked to

death by Renamo guerrillas in a village in northeastern Zimbabwe close to the Mozambique border last week.

Since April last year, Kenyan President Daniel arap Moi and Zimbabwe's President Robert Mugabe have been pushing the two sides towards the negotiating table, and Tuesday's arrivals in Malawi followed months of tortuous indirect meetings.

It came as a surprise Monday when Mozambican President Joaquim Chissano announced talks were to start in Blantyre Tuesday, because Renamo had earlier rejected Malawi as a venue, while agreeing to face-to-face negotiations.

There was no indication Tuesday when talks would actually begin. Aim is the only news agency reporting directly on the affair in Malawi, whose president,

Hastings Kamuzu Banda, only rarely permits foreign journalists into his country.

The firmly state-controlled Malawi news agency did not report on the arrivals and none of the parties involved as issued a statement.

#90163d2630 06/12/1990 ~French/German News Agency
Bonn (JUNE 12) - The chairman of the U.S. Federal Reserve Board, Alan Greenspan, called on western industrialised countries here Tuesday to support the market economies being created in Eastern European countries and to open their markets to them.

Greenspan, addressing 1,200 guests at the annual meeting of West Germany's Confederation of Industry (Bdi), said the western countries should have no problem absorbing export goods from the east at a time of continuous economic growth, thus helping to alleviate the financial problems of the eastern countries.

The Federal Reserve chairman said it was one of the great challenges of the 1990s to mobilize the financial capital necessary for economic growth in Eastern European countries, including the Soviet Union.

The West German government expressed concern that its promises of economic change and well-being in East Germany may fall flat unless Western companies take a bigger role there.

Bonn Economics Minister Helmut Haussmann, also addressing the Bdi annual meeting, called on business leaders to become active, invest in East Germany and in Eastern Europe and do their buying there as well.

He said he was worried about seeing an erosion of the promises heard a while ago for courageous decisions to invest in creating modern jobs in East Germany.

He said 400 million people in central and Eastern Europe were hoping for reforms and market economies with the help of Western solidarity.

#90163d2890 06/12/1990 ~French/German News Agency

CAPE TOWN (JUNE 12) - A board of inquiry Tuesday ruled out sabotage as the cause of South Africa's Helderberg air disaster in which 159 people died in 1987, and concluded that, on the evidence available, no one could be blamed.

The 28 million rand (10.5 million dollar) inquiry headed by Mr. Justice Cecil Margo also found that the detection system and fire-fighting equipment on board the aircraft were inadequate.

The Helderberg, a South African Airways (SAA) Boeing 747, disappeared over the Indian Ocean on November 28, 1987 with 140 passengers and 19 crew on a flight from Taipei to Mauritius.

On board were 47 Japanese and 30 Taiwanese passengers, as well as 52 South Africans, two Australians, two Mauritians as well as passengers from Britain, Denmark, the Netherlands, West Germany and Korea.

According to Mr. Justice Margo's report, which was released here Tuesday, a fire developed in the right front pallet of the Helderberg's main deck cargo hold, but the board was unable to establish what caused it.

At some stage the fire got out of control and smoke, carbon monoxide and carbon dioxide penetrated the passenger department and possibly the cockpit. The fire also damaged the aircraft's systems and structure, the report says.

Shortcomings in firefighting measures could have meant that crew efforts to put out the blaze turned it into an inferno.

The board found that when the aircraft crashed into the sea it was out of control and that it was likely all those on board were either dead or unconscious at the time.

MAVINGA ANGOLA (JUNE 12) - Angola's UNITA rebels are sticking by an offer

to the government of a three-month cease-fire despite government calls for a lasting peace truce, UNITA generals said here this week.

UNITA's military intelligence chief, Peregrino Isito Wambu Chidondo, told Agence France-Presse in this key garrison town in Angola's southeast that UNITA wanted three months "to wait and see" if Luanda was "sincere" about lasting peace.

General Chidondo also called on government officials urgently to continue 1talks in Portugal about ending the 15-year-old civil war which he claimed had cost some 600,000 lives.

The National Union for the Total Independence of Angola, led by Jonas Savimbi, has said the cease-fire, proposed Thursday, would take effect on June 22, the first anniversary of peace agreements -- now suspended -- reached in Gbadolite, Zaire.

Reacting to a government call that UNITA recognize the country's leadership, Gen. Chidondo said that while the rebel movement recognized Jose Eduardo dos Santos as head of state, they did not regard his leadership nor his government as legitimate.

Gen. Chidondo also dismissed as "propaganda ploys" Luanda's claims that UNITA is launching attacks on Angola's civilian infrastructure.

He rejected claims that the decision to pull back FAPLA government troops from the Mukundi region close to Angola's border with Namibia towards the northern district of Caiundo was a goodwill gesture.

"They lost hopelessly and were forced to withdraw," Gen. Chidondo claimed. He said that in the latest regional offensive, between April 24 and May 30 12 UNITA soldiers had died to FAPLA's 97.

UNITA had also captured eight FAPLA troops and destroyed 34 of the enemy's armoured vehicles, three tanks, 31 trucks and six fuel tanks.

Gen Chidondo also warned the South West Africa People's Organisation (SWAPO), led by Namibian President Sam Nujoma, not to side with Luanda. He said SWAPO should hold talks with UNITA in a bid to halt a potential "disaster."

It was UNITA's policy not to attack independent countries. "But," he warned. "If they provoke us, they will pay for it."

TEHERAN (JUNE 12) - The Iranian parliament on Tuesday denied that it had

invited a British delegation to visit Iran.

"No United Kingdom church representative or British MP has been invited, nor has the Majlis (parliament) had any direct or indirect contacts with them," parliament's public relations office said in a dispatch carried by the Iranian news agency IRNA.

Britain's Sunday Times newspaper reported over the week end that the Foreign Office had approved a mission to Iran by four MPs to try to resolve the conflict over "The Satanic Verses," a novel by British author Salman Rushdie.

The novel was denounced here as blasphemous to Iran and the late Iranian spiritual guide, Ayatollah Ruhollah Khomeini, called for Mr. Rushdie to be hunted down and killed.

Iran broke off diplomatic relations with Britain in March 1989 after London refused to distance itself from the book.

The Times said the Foreign Office had agreed to the trip after the four MPs had been invited to visit Iran through the Archbishop of Canterbury, Robert Runcie.

FRANKFURT, WEST GERMANY (JUNE 12) - The chairman of the West German Olympic Committee, Willy Daume, wants a single German team for the Barcelona Olympics and the winter Games in Albertville in 1992.

Daume told Wednesday's edition of the Frankfurter Allgemeine Zeitung that his committee should start discussing the issue with East Germany this year.

"From an international point of view, top-level sport is the most prestigious dowry that East Germany is bringing to its union with West Germany", he declared, adding though that "we must reconsider the high price which East Germany has paid in the past for its sporting successes".

#90163d3160 06/12/1990 ~French/German News Agency

CAPE TOWN (JUNE 12) - Just hours after President Frederik de Klerk called on all South African organisations to foreswear violence, militant ultra-rightists Tuesday announced the formation of a new neo-fascist "fighting" unit.

To be known as the Boer Resistance Movement (BWB), it plans to become the

"military wing" of the far-right Boerestaat Party (BP) headed by Robert van Tonder, the movement's claimed head, Andrew Ford, told the media.

He said the BWB had already started military training for its members.

"No one can stop us now. The boer (farmers) have a right to defend and protect themselves," Mr. Ford told the South African Press Association.

He said he was negotiating an alliance with the BP as both movements were "fighting" for the restoration of the old Boer republics in Transvaal, Orange Free State and parts of Natal Province.

"The BWB will handle the military and the BP the political," Mr. Ford said.

In parliament, Mr. De Klerk earlier called on all organisations, both on the left and right, to foreswear violence, saying that all participants in talks about a future South Africa had to be committed to peaceful solutions.

He accused the rightwing Conservative Party (CP), which last week severely eroded the ruling National Party's support in a by-election, of being "ambiguous" on violence.

Attempting to woo back supporters, the president said the NP would now concentrate on convincing the African National Congress (ANC) that it was time to end its 29-year armed struggle.

Political commentators say the swing to the right was accelerated by Mr. De Klerk's decision to lift a 30-year ban on the ANC in February and the holding of exploratory talks with the organisation from May 2-4 in Cape Town.

Mr. De Klerk has guaranteed that he would take any significant constitutional changes to the electorate.

#90163d3190 06/12/1990 ~French/German News Agency

PARIS (JUNE 12) - The French Government reiterated Tuesday its commitment to helping the world's poor countries following a meeting with ministers from Third World nations.

The meeting was held in view of the second Least Developed Countries conference, to take place in Paris from September 3 to 14.

Edwige Avice, France's junior minister of external affairs, underscored France's commitment to LDC after her meeting with ministers from Bangladesh and the African countries, Somalia, Sudan, and Togo.

Of the 42 LDC, 28 are African with populations living in barely survivable conditions.

As most of the world's richest nations have decided to forgoe the debt of the poorest countries, the Paris LDC conference is expected to result in a new aid commitment from developed countries.

The first LDC conference, which took place in Paris in 1981, set the level of .15 per cent of gross national product as the amount rich countries should grant to poor nations.

Only Denmark, the Netherlands, Norway, and Sweden have achieved that level of aid, however. Belgium, Canada, and France have made "progress" without having reached the .15 per cent mark, African observers said.

On the first step of a European tour, the LDC delegates said they were emphasising three problems in preparing the forthcoming Paris conference: development aid, debt, and access to markets.

#90163d3240 06/12/1990 ~French/German News Agency

HELSINKI (JUNE 12) - Finnish President Mauno Koivisto said on Tuesday he had not received any reply from Israel about the settlement of Soviet Jews.

Mr. Koivisto said Finland had asked for "very exact details" concerning the settlement of Soviet Jews who wanted to emigrate to Israel through Finland.

"So far we have not received any official answer to our questions," he told journalists.

Finland has in principle agreed to allow Jews living in and around Leningrad transit visas to go to Israel, but is seeking assurances that the Jews through will not be settled in the occupied West Bank, East Jerusalem and Gaza.

Israel says over one million Soviet Jews have asked for visas to emigrate. Over 100,000 Jews live in and around Leningrad and in Estonia.

The Palestinian Liberation Organisation has said that a mass emigration of Soviet Jews is in itself an "unfriendly and provocative action against a Palestine nation suffering from occupation".

On Tuesday the PLO's representative here appealed to the Finnish Government to stop any emigration and to sever diplomatis relations with Israel.

The Finnish Foreign Ministry has emphasised that Finland strongly condemns

any settlement of Soviet Jews in the Israeli-occupied territories. But Finland also supports the right of the people to emigrate if the countries concerned agree.

Informed Jewish sources here said that Finland had set new conditions for Soviet Jews asking for transit visas.

"Soviet Jews have to sign a personal commitment that they are are not going to settle in the occupied territories, before they can get a visa", the sources said, adding that Soviet Jews would have to give up plans to use Finland as a transit route.

"When Jews in the Soviet Union have asked permission to emigrate, they have lost their citizenship, their job and their residence, and Finland is asking for details", the sources said.

#90163d3380 06/12/1990 ~French/German News Agency

PARIS (JUNE 12) - The Ivory Coast began negotiations this week with the London Club to reduce its private bank debt of 20 billion francs (3.68 billion dollars) by three-quarters, it was learned Tuesday.

Private bank loans represents nearly a third of Ivory Coast's total 54 billion francs (9.5 billion dollars) in foreign debt.

Alassane Outtara, president of the inter-governmental group trying to reverse the country's economic crisis, joined the governor of the Central Bank of West African States in meeting with the London Club for what were called "exploratory" talks.

The reduction scheme would involve the buy back of credits and the transformation of certain credits into negotiable bonds, sources said.

However, some sources said the creditor banks, led by the Banque Nationale de Paris, consider that Ivory Coast is asking too much compared to requests made to the Paris Club, which includes state and other lending institutions.

The Ivory Coast was not included in the recent reductions granted to the poorest debtor nations.

The government lending institutions insist they have already made considerable efforts to bail out the Ivory Coast and it is now the turn of the banks to lighten the debt burden of the country.

France, the main creditor of the Ivory Coast, has already provided the country with 1.5 billion francs (263 million dollars) in structural

adjustment loans for 1989-90.

#90163d3420 06/12/1990 ~French/German News Agency
TOKYO (JUNE 12) - Japanese Prime Minister Toshiki Kaifu met Mali President Moussa Traore here Tuesday and promised continued financial support for the West African country's economic development, a Japanese official said.

Mr. Kaifu talked for 30 minutes with Mr. Traore, who arrived Monday for a one-week visit, the official said.

The Malian leader asked for continued Japanese aid for projects started with the World Bank's cooperation.

Mr. Kaifu was said to have responded that Japan would continue its financial assistance "for the stability and prosperity of Africa."

The prime minister urged Mali to provide conditions that would attract private Japanese investment.

#90163d3500 06/12/1990 ~French/German News Agency
JOHANNESBURG (JUNE 12) - A massive education crisis is looming in Transvaal Province as teachers, parents and students have downed their books on in protest against poor education, discrimination and a shortage of textbooks.

On Tuesday some 120 schoolteachers staged a sit-in at the office of the Transvaal's chief education inspector, Johnny Francis, in a bid to push the authorities into addressing their grievances.

Mixed-race Education Director, Awie Muller, agreed late Tuesday to meet with a delegation of striking teachers on Wednesday in a bid to end the stalemate.

The teachers are demanding that they be paid their monthly salaries on time and are calling for extra supplies of text books and equipment and an end to sexual discrimination.

The 120 are supported by some 2,000 schoolteachers who have been striking since last week, causing the partial closure of 14 mixed-race schools in Transvaal Province.

Meanwhile, eight parents from Johannesburg's black township, Soweto, on Tuesday continued a sit-in which started Monday, to protest against the

shortage of textbooks.

Soweto Education Coordinating Committee (SECC) leader, David Maepa, said another two parents, who were also part of the delegation, were on Tuesday freed from the sit-in to act as "a link with the outside world and to see to the comforts" of the group.

A 150-minute crisis meeting between the Department of Education and Training (DET) and the SECC on Monday failed to produce a promise of more textbooks.

Mr. Maepa said that the delegation would remain holed up in the DET's building here as long as it takes to get a written reply for the delivery of much-needed books for Soweto schools.

In Pretoria, classes at the Transvaal College of Education were suspended on Tuesday following a class boycott by students which began on June 6.

DET Northern Transvaal Regional Director, Job Schoeman said the 1,028 students were demanding the unconditional withdrawal of two lecturers. He said he would launch an in-depth investigation into the students' grievances, but refused to divulge what they were.

TOKYO (JUNE 12) - Jogging in the morning may be hazardous to health, a study by Tokyo's Kyorin University has found.

The study found that volunteers who jogged in the morning were more prone to develop blood clots than those who jogged in the evening.

Large blood clots can obstruct arteries and lead to heart attacks.

In studies on 11 male volunteers aged 24 to 30, Professor Junichi Hayashi found that 30-minute jogs at 7.30 a.m. led to an average six percent increase in blood clots.

The same subjects had a 20 percent decrease in clots after jogging at 5 p.m., he said.

#90163d3650 06/12/1990 ~French/German News Agency

LIMA (JUNE 12) - Business and union leaders met Tuesday to take stock of the country's economic situation and study the options open to President-elect Alberto Fujimori for curing Peru's economic ills.

Responding to Mr. Fujimori's call for national dialogue to rescue the debt-and-inflation ridden economy, business leaders complained that the president-elect's Change-90 movement had come up with only vague plans so far.

"All we know are the general outlines ... What we need are concrete measures," said Jorge Camet president of the Confederacy of Private Business Institutions,
 the country's largest private enterprise group.

All the same, Mr. Camet said his group would gladly answer Mr. Fujimori's call for a concerted effort.

The 51-year-old agronomist and former university dean will take over from outgoing President Alan Garcia July 28.

Mr. Fujimori's apparent lack of a polished economic strategy is partly due to his meteoric rise from political anonimity, only three months ago, to his stunning victory in last Sunday's presidential runoffs against celebrated writer Mario Vargas Llosa.

Besides canvassing for votes, he has had little time for anything else, observers said.

And the country's economy needs a firm helmsman to steer it out of a 19-billion-dollar external debt and hyperinflation running at 40 percent a month since the beginning of the year. Minimum monthly wages are at 28 dollars and only 35 percent of the work force enjoy any job security.

The Exporters' Association Tuesday began an emergency session to study the new situation the country is facing in the wake of Mr. Fujimori's upset victory in the polls.

The country's predominantly white business community had hoped Mr. Vargas Llosa and his free-market policies would have triumphed over Mr. Fujimori's seemingly moderate policies.

#90163d3890 06/12/1990 ~French/German News Agency

ALGIERS (JUNE 12) - Voter turnout hovered around 50 percent in the Algerian capital Tuesday in the country's first multi-party elections since independence in 1962.

According to the Interior Ministry, voter turnout at 1700 GMT was as high as 74 percent in some areas and as low as 16 percent in others. The average turnout level appeared to be about 56 percent, the ministry said.

The turnout was weaker in the country's large cities, with Constantine at 56 percent and Oran at 55 percent, than in middle-sized cities, where the turnout was sometimes more than 70 percent.

On Tuesday aftenoon, voters were waiting in lines as long as two hours in order to cast their ballots in the municipal and departmental elections. Under the one-party regime, Algerian voters often cast ballots for their entire family. Often, children were sent to polling booths with "group" ballots to be cast in proxy.

The elections, the first multi-party vote since Algerian independence from France, has become a duel between the National Liberation Front (FLN) in power since 1962, and North Africa's first legal Moslem fundamentalist party, the Islamic Salvation Front (FIS).

The FLN and the FIS are contending for 48 district councils, with 1,520 and 1,265 candidates spread over 277 constituencies.

The outcome, which is not likely to be announced before Wednesday, will not affect the composition of the National Assembly which is overwhelmingly dominated by the FLN.

A total of about 13 million citizens are eligible to vote in the elections for the the 1,541 municipal and 48 district (wilays) councils.

During Tuesday's voting, FIS party workers were out in full force at polling stations, working as both scrutineers and observers. Some children were seen at polling stations discreetly reminding voters to "vote for the FIS."

One of the main issues in this election is the housing crisis in Algeria, where some young couples have been waiting for as long as six years for lodging.

Another issue is coffee: the current regime recently announced it planned to find a better-tasting coffee than the unpopular coffee-pea melange many Algerians drink.

SEOUL (JUNE 12) - Paraguayan President Andres Rodriguez will make a three-day official visit to South Korea starting from Wednesday next week, the foreign ministry announced here Tuesday.

Mr. Rodriguez will meet South Korean President Roh Tae-Woo to discuss ways of promoting relations between the two countries, the ministry said.

An officials of the ministry said Mr. Rodriguez would also visit the United States and Taiwan on his way to South Korea.

Since setting up ties in 1962, Paraguay has supported South Korea's position in international forums including the United Nations, he said. It has no diplomatic ties with South Korea's rival, the communist North Korea.

Bilateral trade volume amounted to 32.7 million dollars in 1989.

-30- 944

#90163d8900 06/12/1990 ~French/German News Agency

TOKYO (JUNE 12) - Japan's trade surplus shrank 16.6 percent from a year earlier to 3.1 billion dollars in May, the Finance Ministry said Tuesday.

Exports fell 0.9 percent to 21.5 billion dollars while imports rose 2.4 per- cent to 18.4 billion dollars, the ministry said in a preliminary report.

Japan's trade surplus with the United States was 2.4 billion dollars, with

exports to that country falling 4.5 percent to 6.8 billion dollars while imports declined 0.2 percent to 4.4 billion dollars.

The trade surplus with Asia was 1.7 billion dollars. Exports to non-communist Asian nations fell 1.7 percent to 6.7 billion dollars while imports from the region dropped 9.4 percent to five billion dollars.

The surplus with the European Economic Community was 1.2 billion dollars. Exports to the 12 nations rose 7.1 percent to 4.1 billion dollars while imports soared 32.3 percent to 2.9 billion dollars.

#90163d8930 06/12/1990 ~French/German News Agency

Manama (JUNE 12) - The United Arab Emirates Tuesday joined other regional countries in banning the import of live cows, beef and any of their products from Britain as ''mad cow'' scare reached the Gulf.

Last week Qatar and Saudi Arabia also banned the sale and import of beef of British or Irish origin on the basis of the feared effect of mad cow disease on humans.

Jassim Darwish, secretary general of Uae municipalities, said his country ''decided to halt the import of beef, livestock, all their products and any food containing cow products from the U.K.''

The U.K. beef already in the Uae market will be removed, Darwish said, adding the decision was reached after a review of scientific reports questioning the fitness of the beef for human consumption.

-30- 941

#90163d9050 06/12/1990 ~French/German News Agency

Tokyo (JUNE 12) - Prime Minister Toshiki Kaifu plans to set up a body to promote imports by removing Japan's non-tariff barriers, government sources said Tuesday.

The ''import board'', directly supervised by the premier, will tackle such trade problems as ''keiretsu'' or the business affiliations that foreign concerns criticise as a closed market.

The official consultation body, calling for the participation of foreign enterprises, will represent the government's trade and industry, finance, foreign and agriculture ministries.

The body is to meet twice a year to study ways to dismantle import barriers and enhance airport and harbour facilities, according to the sources.

In recent bilateral Structural Impediments Initiative (Sii) talks Washington had asked Japan to set up such a body under Kaifu's direct supervision.

Meeting the U.S. request, Tokyo plans to include the board's programme in a final report on the Sii meeting scheduled for late June, the sources added.

#90163d9190 06/12/1990 ~French/German News Agency

LONDON (JUNE 12) - British Airways has threatened to cut funding for the governing Conservative Party as a result of the company's dispute with the government over its plans to give U.S. airlines greater access to British airports, The Times reported Tuesday.

BA chairman Lord King of Wartnaby has said current negotiations between the British and U.S. transport departments could lead to a new air route agreement that would swamp British airlines and amount to a "sell out" to the United States, The Times said.

"We struggle not only against our competitors but the shackles imposed by our own government," Lord King said.

BA "has hinted future contributions to Conservative Party funds could be in jeopardy" as a result, The Times said.

According to the article, U.S. airlines American, Northwest and Delta would be given rights to fly directly to the northern city of Manchester from Chicago, Boston and Atlanta.

In exchange, Virgin Atlantic would get permission to fly from London's Gatwick airport to Boston while BA and other British airlines would be allowed to fly to large U.S. cities from any regional British airport.

BA says the deal, expected to be announced soon by Transport Secretary Cecil Parkinson, is "useless" because there is not enough demand for the proposed Britain-to-U.S. routes.

#90163d9200 06/12/1990 ~French/German News Agency

LONDON (JUNE 12) - The British government is planning to bring sterling into the exchange rate mechanism of the European Monetary System as early as the autumn, the Financial Times reported Tuesday.

But the move would be contingent on the British currency remaining relatively strong on foreign exchange markets and perhaps appreciating, the influential daily said.

Chancellor of the Exchequer John Major believes that if Britain joins the ERM it must do so with the pound at a comparatively high exchange rate in order to protect his anti-inflation strategy.

But while the exact timing of integrating the British currency has yet to be decided, "the balance of argument has tilted firmly towards joining by this autumn," the FT said.

Downing Street said meanwhile that there had been no changes in the government's policy on bringing sterling into the ERM, which it would do when the conditions were appropriate.

At present, nine European Economic Community currencies are part of the ERM, a system of adjustable exchange rates in which all member currencies can fluctuate only within a 2.25 percent margin except for Spain, which is allowed a six percent margin.

The report said however there was still "residual concern" among some ministeras that Prime Minister Margaret Thatcher, in the past a fierce opponent of full integration of sterling into the EMS, might again attempt to block the move.

PARIS (JUNE 12) - A one billion french franc (175.4 million dollars) Japanese tourism project will bring hotels, a golf course and marina to New Caledonia in the south Pacific, it was announced in Paris Thursday.

Japanese developer EIE has awarded an initial 40 million franc study-phase contract to the French Societe Generale de Techniques et d'Etudes (SGTE), a subsidiary of engineering group Schneider.

The tourist complex including sports and leisure centres and 400 self-catering appartments will be built at Tiari, 10 kilometres (six miles) from Noumea, capital of the French territory.

-30- 765

#90163d9760 06/12/1990 ~French/German News Agency

TOKYO (JUNE 12) - Foreign consumer goods are unusually expensive in Japan because they pass through the hands of numerous Japanese middlemen, but the sales practices of foreign exporters are also to blame, a study said Tuesday.

The Fair Trade Commission found, for example, that Italian spaghetti can be as much as three and a half times more expensive in Tokyo than in its country of origin.

British kitchen appliances are two and a half times more costly in Tokyo than in London, German cars one and a half times more, British raincoats are 40 per cent to 100 per cent higher, and French travel bags 30 per cent more.

The commission said that importers and wholesalers -- sometimes acting in agreement with foreign exporters -- pressured retailers to charge high prices in Japan, so that all those involved could make large profits.

It added that foreign exporters also preferred to deal exclusively with large Japanese department stores or luxury boutiques, shunning discount retail companies.

The commission studied the prices of instant coffee, travel bags, camera equipment, men's raincoats, automobiles, golf balls, spaghetti, electric razors and kitchen appliances.

The study was conducted from September to March in Tokyo, Paris, Frankfurt, New York and London.

#90163d9820 06/12/1990 ~French/German News Agency

PARIS (JUNE 12) - French company Entreprise de Travaux Petroliers Marins (ETPM) has signed a 1.3 billion franc (220 million dollars) contract to rebuild the Iranian oil terminal at Kharg, the world's largest.

The contract was signed in Teheran on Monday, ETPM said.

Virtually all of Iran's oil exports pass through Kharg in the northern Gulf, but due to damage suffered in the Iran-Iraq war it can now only handle some two and a half million barrels a day, against 6.8 million before the war in 1980.

ETPM, a subsidiary of the GTM-Entrepose group, was heavily involved in building the Kharg terminal in the 1970's.

It said it would be clearing away damaged parts of the terminal, carrying out rebuilding, providing equipment, and making and installing the new structures and equipment needed for loading oil passing through the terminal.

The work is expected to take 27 months.

The terminal on an almost deserted island in the northern Gulf 35 kilometers (21 miles) off the Iranian coast, had a jetty which could handle 10 oil tankers of up to 250,000 tons at a time and another which could take six 500,000 ton supertankers.

It had about 50 reservoirs with a capacity of some 14 million barrels.

ETPM had already won a 260 million franc (45 million dollars) contract in February to renovate and increase production capacity at oil platforms in the Nasr field.

Another French company, Technip, won a contract for an undisclosed amount to repair and complete the Bandar Khomeini petrochemical complex on the Gulf, whose construction was interrupted by the Iran-Iraq war.

#90163e0015 06/12/1990 ~Latin America New Agency

BEIRUT (JUNE 12) EFE - The leader of the Christian "Lebanese Forces" (LF) militia has said he can prove that four Iranians, who Iran claims are alive and being held hostage, were killed by his militia immediately after their capture eight years ago, Beirut daily Middle East Reporter said Tuesday.

"They are dead and we will give proof of it in the next few weeks," LF leader Samir Geagea told the newspaper.

Geagea said he had "sufficient evidence" to prove that the Iranians were "liquidated" immediately after his militia captured them in Lebanon in 1982 and that the then-LF leader Elias Hobeika "knows what happened to them".

Hobeika, however, has blamed Geagea for the disappearance of the Iranians.

Iran has said it will seek the release of Western hostages held by pro-Iranian militias in Lebanon if the West provides information on the whereabouts of the four -- a revolutionary guard, an embassy official, a photographer for the Iranian news agency IRNA and their driver.

"We are looking for more details on the subject but I can confirm that we do not have any Iranians," Geagea said.

Iranian President Ali Akbar Hashemi Rafsanjani has said that he has been informed by a third country that the missing Iranians are still alive.

SAO PAULO (JUNE 12) EFE - A 53-year-old Brazilian woman died in hospital of a brain hemorrhage while doctors on duty watched the World Cup soccer championships on television, her son claimed Tuesday.

The woman, Luiza Alvelina Bezerra, was found dead Monday by her son, who had searched the hospital corridors for a doctor in vain, only to find both on duty at the time in the physicians' lounge watching the World Cup Costa Rica-Scotland match on television.

Costa Rica edged Scotland 1-0.

Her son, Reginaldo Bezerra, reported the incident to the police, adding that while he was looking for a physician he saw several patients walking around unmonitored through the halls.

The doctors and neurosurgeon on duty disappeared shortly after the death was reported.

Alvelina Bezerra suffered the brain hemorrhage after celebrating Brazil's World Cup 2-1 victory Sunday over Sweden with her family.

MANILA (JUNE 12) EFE - A fugitive Philippine provincial governor surrendered Tuesday after several months in hiding to face rebellion charges for his alleged participation in a 1989 coup attempt against President Corazon Aquino, military officials said.

Rodolfo Aguinaldo, former governor of Cagayan province, 380 km north of Manila, turned himself in to a regional court in the presence of his lawyer, a military official said.

Aguinaldo's surrender followed a Supreme Court decision last week to rule out the twin charge of rebellion and murder, a non-bailable offense punishable by life imprisonment, with which he and other suspected coup leaders were charged.

Authorities said Aguinaldo posted a bail bond of an undetermined amount which would allow his freedom while he defends himself in court for the lesser charge of rebellion.

In March, Aguinaldo led 200 armed men in an attack on a hotel where government and military officials were staying in the provincial capital of Tuguerarao. A former Armed Forces officer was killed in the attack.

Aguinaldo launched the attack following a government order for his suspension from the governorship because of his alleged support for rebel soldiers during a December 1989 coup attempt.

Marines, backed by armored vehicles, launched a counter-attack in which scores of Aguinaldo's men were killed.

Aguinaldo went into hiding.

In a radio broadcast during the December coup bid, Aguinaldo promised to send artillery and armor from his province to rebel troops in Manila.

The promised support was never sent but prosecutors charged him, together with opposition Senator Juan Ponce Enrile and others, with rebellion and murder.

Aquino has survived six Army coup attempts in the past four years. Officials last week confirmed that a leader of previous rebellions was planning a seventh bid.

GERONA, Spain (JUNE 12) EFE - Nearly 450 police officers are being sent to Spain's Costa Brava, popular with British tourists, to combat the annual peak holiday season wave of robberies and muggings, officials said Tuesday.

A total of 219 National Police officers -- 41 more than the previous year -- and 230 members of the paramilitary Civil Guard are to be sent to the Costa Brava for July and August to bolster local forces.

Situated on Spain's northeastern Mediterranean coast, the Costa Brava attracts hundreds of thousands of foreign tourists, mostly Britons, every year.

In the peak tourist season last year, police arrested 633 people on the Costa Brava, 396 of whom were Spanish and 237 of them foreigners, a police spokesman said in the northeastern city of Gerona.

The figure was an eight per cent increase on the 585 arrests made over the same period in 1988.

This summer, police will be equipped for the first time with a helicopter for motorway surveillance, the spokesman added.

VALENCIA, SPAIN (JUNE 12) EFE - Nearly 200,000 Spanish women had legal abortions in London from 1974 to 1988, Spanish officials said Tuesday.

The Valencian Institute of Public Health Studies quoted figures from Britain's Office for Population Censuses and Surveys (OPCS) which showed

that 195,983 Spanish women had legal abortions in London during the period of which the vast majority, 107,000, were women in their 20s.

Only 24,000 women younger than 20 sought to terminate unwanted pregnancies in the British capital, while 54,000 women between 30 and 39 had abortions there.

Spain leads Europe in the number of foreigners seeking abortion in London. During 1988, Spanish women accounted for 40 per cent of the 7,000 Europeans who travelled to Britain for that reason.

Although abortion was legalized in Spain four years ago, more than 3,000 women opted to leave the country to abort in 1988.

The report, released in the southeastern Spanish city of Valencia, attributed the high figures to women wishing to safeguard confidentiality. London guarantees both secrecy and anonymity, while some Spanish judges require private clinics that regularly practice abortions to release patients' files.

One of the study's authors, Concha Colomer, said, +This data shows how abortion has been and continues to be a public health problem and, in spite of legalization, an important number of Spanish women have difficult access to the law or bow to social pressures.+

After 1983, the number of Spaniards in Britain for abortions began to gradually decrease because of a growing number of private Spanish clinics clandestinely performing abortions, the report said.

The first figures on legal abortions in Spain were released in 1987, when 16,000 were reportedly performed, followed by 26,000 in 1988.

BUCHAREST (JUNE 12) EFE - A group of Romanian hunger strikers said Tuesday that they would end their two-month-old protest once the government had made good its promise to back their demands for an independent television station.

Government officials agreed to support the hunger strikers' petition to set up the station in a meeting Monday but the protesters complained the government had failed to provide sufficient guarantees that their demands would be met.

+Until now, we have only obtained a promise from government representatives that they would back our petition. They did not guarantee that our petition would be accepted or rejected,+ a statement by the

protesters, which was published in the opposition daily Romania Libera, read.

Monday's meeting was the first between the caretaker government of Ion Iliescu and the hunger strikers since they started their protest April 22 in Bucharest's central University Square.

The 19 hunger strikers moved their protest Monday to Bucharest's Victoria Square, where the government palace is situated.

Police and Army troops then cordoned off the square to prevent thousands of demonstrators, who had taken to the streets in support of the hunger strikers, storming the government palace.

Iliescu, a former minister in the ousted dictatorship of Nicolae Ceausescu won presidential elections in May.

But opposition parties complained that Iliescu's National Salvation Front, which has been accused of harboring members of the former hardline Communist government, had manipulated Romania's state-owned media in its favor.

LIMA (JUNE 12) EFE - Hundreds of families have fled their homes near the base of a volcano in southern Peru which spewed lava last week and set off a series of strong earth tremors which have destroyed nearby houses.

According to reports reaching Lima Tuesday from the Sabacanya Volcano 1,000 km away, some 300 families have fled the area since the crater spouted out a stream of lava Friday, two weeks after the crater first started to erupt.

Families living within a 30 km radius of the Sabacanya, have abandoned their homes as aftershocks triggered by the eruption have ripped open land and swallowed up buildings in the area.

The stream of lava, which has poured across farmland and into a nearby river, has deprived the villagers of their usual food sources, and ash from the volcano has spread over a 20 km radius.

Airplanes have been diverted from routes which pass over the crater because of a 13,000 meter plume of thick, black smoke thrown up by the recent blast.

#90163e0041 06/12/1990 ~Latin America New Agency

BUENOS AIRES (JUNE 12) EFE - Argentine President Carlos Menem's outspoken and glamorous wife, Zulema Yoma, has been thrown out of the official presidential residence on the outskirts of Buenos Aires after a long-running, and often public, matrimonial squabble.

Presidential aide Raul Granillo Ocampo said Tuesday that Zulema left the Olivos residence Monday night and took the couple's two children with her.

Granillo said that Menem had issued a decree under which he forbade access to the luxury home to specific people.

"The president's children can go into Olivos whenever they want but the permit does not include Zulema Yoma," Granillo added.

Granillo denied a Buenos Aires press report Tuesday that the blonde first lady had been turfed out of the house by the presidential military guard.

Menem is to return to live in the house after staying at the homes of friends since the marital rift worsened in May.

The Argentine press has been speculating for months that the marriage was on the rocks, citing Zulema's opposition to Menem's economic policies as one of the reasons.

She is said to be a close friend of Saul Ubaldini, the Peronist leader of the CGT trade union faction that opposes Menem's austerity measures and plans to privatize dozens of overbloated state-owned companies.

Two weeks ago Zulema told a Buenos Aires magazine that Menem was been controlled by a group of civil servants.

+His economic policies will not stand up and the country will fall to pieces in August,+ she said.

"What will happen if the people rise up? I don't want the same to happen to me as happened to the wife of Ceausescu," she said referring to the execution of the Romanian dictator and his wife after they were overthrown in a popular uprising last December.

Both Zulema and Menem are of Syrian descent and while the president has converted to Roman Catholicism, his wife remained a Moslem.

Under the Argentine constitution, the president must be a Roman Catholic.

In an interview several months ago, Zulema claimed her husband was a known womanizer.

The couple reportedly separated several years before Menem was elected president but the couple got together again during the electoral campaign.

The Buenos Aires daily Clarin, quoting what it said was an Argentine secret services document, said Tuesday that the government was worried about the adverse publicity which the marital row has given Argentina in the foreign press.

#90163f0816 06/12/1990 ~United Press International

(JUNE 12) UPI - Nolan Ryan's mental approach to pitching under pressure has made the legendary right-hander the master of the no-hit game.

With five previous no-hitters to his credit, the 43-year-old Ryan worked through the final innings of his record sixth no-hitter, a 5-0 victory Monday over the Oakland Athletics, with an understanding for the moment and the ability to command his emotions.

''I've been through this a few times,'' said Ryan, the only pitcher record a no-hitter in three different decades. ''I know how important it is to keep a calm, emotional level.''

It is in the late innings when the special feat becomes particularly elusive, and when the psychological element of the game takes hold. But it is also during this crucial time that Ryan, holder of 12 career one-hitters, shines.

''I've never seen a look in a guy's eyes like his,'' said Rangers catcher John Russell, who was playing in his 10th game with the team and was catching Ryan for the first time. ''It was just a lot of determination and fire, all wrapped up in all those years (of his career). It was all right there. It was the greatest thing I've ever seen.''

Cool and delibertate, Ryan, now the oldest pitcher ever to throw a no-hit game, decided on the strategy he would use.

''Going into the ninth inning, my idea was I was just going to make good pitches and if I gave up a hit, it was going to be on a good pitch,'' Ryan said.

As the no-hitter moved into the late innings, Ryan's teammates began to avoid him, leaving the 22-year veteran to his own thoughts.

''They didn't bother me during the game. The longer it goes like this, the further they stay away from you,'' Ryan said.

Ryan opened the ninth by striking out pinch hitter Ken Phelps on a 1-2

pitch and retiring Rickey Henderson on a grounder to shortstop. He capped the performance by inducing Willie Randolph to foul out to right fielder Ruben Sierra.

It was Ryan's 294th career win, 59th career shutout and 201st game in which he has recorded at least 10 strikeouts.

As Sierra caught the ball, Ryan pumped his right fist in the air and turned to accept a congratulatory hug from Russell as his teammates raced from the dugout.

''This has a special place right next to No. 5,'' said the right-hander, whose last no-hitter came nine years ago. ''It's great, especially so late in my career. My teammates were so emotionally involved, it was a nice release for all of us.''

Ryan, baseball's all-time strikeout leader with 5,152, struck out 14 as he improved his record to 5-3.

Texas Manager Bobby Valentine called Ryan's performance ''absolutely marvelous. I've never been happier in my professional career for a player than I am tonight. He deserves every bit of it.''

Julio Franco belted two two-run homers and Russell added a solo shot to lead the Texas attack against Oakland starter Scott Sanderson, 7-3.

Elsewhere in the American League, Cleveland edged Boston 4-3 in 12 innings Milwaukee downed Toronto 4-1, Chicago nipped Seattle 3-1 and California dumped Kansas City 3-2.

In the NL, it was: Montreal 5, Philadelphia 0 in the first game of a doubleheader; Montreal 3, Philadelphia 2 in the nightcap; San Francisco 8, Atlanta 3; Chicago 8, New York 5; Pittsburgh 8, St. Louis 7; and Houston 5 Los Angeles 3.

-- AROUND THE AL --

Red Sox 4, Indians 3 (12 innings)

At Boston, Tom Brookens singled off Dennis Lamp, 0-2, driving home Jerry Browne with two out in the 12th inning to lift Cleveland. Rudy Seanez, 1-0 worked one inning to gain his first major league victory and Doug Jones picked up his 20th save. Boston stranded 14 runners, including three in the ninth after loading the bases with nobody out.

Brewers 4, Blue Jays 1

At Milwaukee, Bill Krueger tossed a two-hitter over eight innings in his

first start in almost a year, helping the Brewers snap a five-game losing streak. Krueger, 3-3, who allowed singles to Mookie Wilson and Tony Fernandez in the sixth, got his first start since last June 24 after 30 relief appearances. Dan Plesac earned his 11th save. Willie Blair, 0-3, took the loss.

White Sox 3, Mariners 1

At Seattle, Carlton Fisk homered and Melido Perez allowed four hits over seven innings, pacing Chicago. Perez, 6-4, walked three and struck out four and Ken Patterson retired the final two for his first save. Matt Young, 1-7, pitched 6 2-3, giving up five hits and five walks while striking out four.

Angels 3, Royals 2

At Anaheim, Calif., Lance Parrish hit a solo home run with two outs in the ninth inning to lift California and send Kansas City to its seventh straight defeat. Parrish hit his 10th homer off loser Mark Davis, 1-3, making a winner of Bert Blyleven, 6-3, who won for the fifth straight time and threw his 241st career complete game, giving up two runs, eight hits and fanning four.

HONG KONG (JUNE 12) XINHUA -- THE OVERALL U.S. TRADE WITH HONG KONG GREW 4.6 PERCENT IN THE FIRST QUARTER OF THIS YEAR OVER THE SAME PERIOD OF LAST YEAR, AND THE OVERALL TRADE VALUE REACHED 3.757 BILLION U.S. DOLLARS.

THE LATEST FIGURES GIVEN BY THE AMERICAN CONSULATE GENERAL IN HONG KONG SHOWED THAT THE U.S. EXPORTS TO HONG KONG ROSE BY 11 PERCENT AND ITS IMPORTS FROM HONG KONG BY 0.3 PERCENT ONLY.

THE U.S. EXPORTS OF AIRCRAFT ROSE 526 PERCENT TO 226 MILLION U.S. DOLLARS. ITS EXPORTS OF COMPUTERS ALSO RECORDED STRONG GROWTH OF 42 PERCENT.

THE ONLY MAJOR U.S. EXPORT CATEGORY TO DECLINE SIGNIFICANTLY WAS NATURAL

PEARLS AND PRECIOUS GEMS, DUE TO A 114 MILLION U.S. DOLLAR DECLINE IN ITS GOLD EXPORTS.

THE U.S. IMPORTS OF WATCHES AND CLOCKS FROM HONG KONG DECREASED 45 PERCENT TO 36 MILLION U.S. DOLLARS WHILE ITS IMPORTS OF APPAREL AND COMPUTERS WERE THE FASTEST GROWING CATEGORIES FOR THE QUARTER, BOTH WITH AN OVER EIGHT PERCENT INCREASE.

#90163h0112 06/12/1990 ~Chinese News Agency

BRASILIA (JUNE 12) XINHUA - BRAZIL'S FOREIGN DEBT WITH INTERNATIONAL COMMERCIAL BANKS FELL FROM 66.45 BILLION DOLLARS TO 63.19 BILLION DOLLARS DURING 1989, A REDUCTION OF 3.26 BILLION DOLLARS, ACCORDING TO A CENTRAL BANK REPORT MONDAY.

THE COUNTRY'S MEDIUM- AND LONG-TERM FOREIGN DEBT REGISTERED AT THE CENTRAL BANK WEIGHED IN AT A HEFTY 99.28 BILLION DOLLARS AT THE END OF LAST YEAR, SEEING A 3.2 PERCENT REDUCTION OVER THE PREVIOUS YEAR.

THE DECREASE IN THE FOREIGN DEBT WAS DUE TO A LACK OF FRESH FUNDS COMING FROM ABROAD AND THE CONVERSION OF PART OF THE DEBT INTO DIRECT INVESTMENTS THE BANK REPORT SAID.

IT SAID THAT 74.6 PERCENT OF BRAZIL'S FOREIGN DEBT IS SUBJECT TO

FLUCTUATIONS IN INTERNATIONAL INTEREST RATES, WITH 57.1 PERCENT LINKED TO VARIATIONS IN THE BASIC EUROPEAN MARKET RATES AND A MERE 3.1 PERCENT GEARED TO PREFERENTIAL INTEREST RATES OF U.S. BANKS.

OF THE NATION'S CRIPPLING 99.28 BILLION-DOLLAR MEDIUM- AND LONG-TERM FOREIGN DEBT, CASH LOANS ADDED UP TO 61.08 BILLION DOLLARS, FINANCING FOR IMPORTS 34.25 BILLION DOLLARS, AID FROM THE INTERNATIONAL MONETARY FUND 2.44 BILLION DOLLARS, DEBT DUE TO THE ISSUE OF BONDS 1.13 BILLION DOLLARS AND OTHER CREDITS 387 MILLION DOLLARS.

ACCORDING TO THE CENTRAL BANK, AT THE END OF 1989 BRAZIL ALSO ACCUMULATED SHORT-TERM DEBTS TO THE TUNE OF 15.46 BILLION DOLLARS, THUS CLOSING THE YEAR WITH A TOTAL FOREIGN DEBT OF 114.74 BILLION DOLLARS.

LAGOS (JUNE 12) XINHUA - THE WORLD POPULATION HAS HIT 5.3 BILLION MARK AND IS EXPECTED TO INCREASE BY ANOTHER ONE BILLION DURING THE 1990S, THE U.N. FUND FOR POPULATION ACTIVITIES (UNFPA) HAS SAID.

IN ITS 1990 REPORT ENTITLED "STATE OF WORLD POPULATION" CIRCULATED HERE TODAY, THE UNFPA ALSO SOUNDED ALARM THAT "OF THE PRESENT 5.3 BILLION PEOPLE ON EARTH, ABOUT ONE BILLION LIVE IN POVERTY."

IT PREDICTED THAT THE WORLD POPULATION WOULD PROBABLY DOUBLE AND EVEN TRIPLE DURING THE NEXT CENTURY WITH THE BIGGEST INCREASES EXPECTED TO OCCUR IN THE POOREST COUNTRIES.

THE CURRENT WORLD POPULATION INCREASE IS AT THE RATE OF THREE PERSONS PER SECOND OR ABOUT 250,000 PERSONS EACH DAY, SAID DR. NAFIS SADIK, EXECUTIVE DIRECTOR OF THE NEW YORK-BASED U.N. FUND IN THE REPORT.

"THE NEXT 10 YEARS WILL DECIDE THE SHAPE OF THE 21ST CENTURY", SHE SAID, ADDING THAT THE 1990S WOULD WITNESS GREATEST INCREASES IN THE NUMBER OF HUMAN BEINGS MORE THAN ANY OTHER DECADE IN HISTORY.

THE REPORT SAID THAT IN 15 COUNTRIES, 13 OF WHICH BEING IN AFRICA, BIRTH RATE ROSE SIGNIFICANTLY BETWEEN 1960 AND 1965, AND AGAIN BETWEEN 1980 AND 1985, WHILE BIRTH RATE FELL IN 23 COUNTRIES BY LESS THAN TWO PERCENT.

UNITED NATIONS (JUNE 12) XINHUA - THE WORLD HEALTH ORGANIZATION (WHO) WILL TAKE ALL POSSIBLE MEASURES TO ELIMINATE IODINE DEFICIENCY DISORDERS AS A MAJOR PUBLIC HEALTH PROBLEM IN ALL COUNTRIES BY THE YEAR 2000.

THE WHO SAID IN A PRESS RELEASE HERE TODAY THAT WHO MEMBER STATES ARE URGED TO CONTINUE GIVING PRIORITY TO THE PREVENTION AND CONTROL OF IODINE DEFICIENCY DISORDERS THROUGH NUTRITION PROGRAMS AS PART OF PRIMARY HEALTH CARE.

IODINE DEFICIENCY IS A MAJOR RISK TO BOTH THE PHYSICAL AND MENTAL DEVELOPMENT OF ANY INDIVIDUAL OF ANY AGE LIVING IN THE IODINE DEFICIENCY ENVIRONMENT.

IN PREGNANCY, IODINE DEFICIENCY CAN CAUSE SPONTANEOUS ABORTIONS, STILL BIRTHS AND INFANT DEATHS. IT INTERFERES WITH BRAIN DEVELOPMENT OF THE FETUS AND CAN RESULT IN THE BIRTH OF BRAIN DAMAGED BABIES.

IN CHILDHOOD, IODINE DEFICIENCY CAN CAUSE MENTAL RETARDATION, DELAYED MOTOR DEVELOPMENT, GROWTH FAILURE OR STUNTING, MUSCULAR DISORDER, PARALYSIS AND SPEECH AND HEARING DEFECTS.

ADULTS WITH IODINE DEFICIENCY LACK ENERGY, HAVE ENLARGED THYROID GLANDS AND ARE LESS PRODUCTIVE. ALL THESE DISORDERS ARE PREVENTABLE, BUT ONLY SOME OF THEM CAN BE CURED.

"IODINE DEFICIENCY IS SO EASY TO PREVENT THAT IT IS A CRIME TO LET A SINGLE CHILD BE BORN MENTALLY HANDICAPPED FOR THAT REASON," SAID THE WHO.

ACCORDING TO THE PRESS RELEASE, NEARLY 1 BILION PEOPLE STILL LIVE IN IODINE DEFICIENCY AREAS AROUND THE WORLD.

THE WHO SAID 300 MILLION PEOPLE STILL LIVE IN IODINE DEFICIENCY AREAS IN CHINA, 200 MILLION IN INDIA, 100 MILION IN INDONESIA, ANOTHER 100 MILLION IN AFRICA AND 60 MILLION IN LATIN AMERICA.

Newsline New York (WNYW-TV) June 11, 1990 Robert Golub Interview: An exclusive jailhouse interview with Robert Golub, the Long Island man convicted of the murder of 14- year-old Kelly Ann Tinyes in March of 1989. Golub continues to maintain that he is innocent. He offers up his own theories of why he was convicted, and how someone else, he thinks, could have committed the murder that he's doing time for -- 25 years to life. Guests include Kelly Ann's father and a forensic psychiatrist. (Transcript #101)

AMERICAN PICKED AS PRESIDENT OF NISSAN'S U.S. SALES ARM

NEW YORK (JUNE 11) KYODO - NISSAN MOTOR CORP. (NMC) IN THE UNITED STATES, A WHOLLY OWNED SALES SUBSIDIARY OF JAPAN'S NISSAN MOTOR CO., WILL BE HEADED BY AN AMERICAN PRESIDENT FROM NEXT MONTH, NISSAN NORTH AMERICA INC. ANNOUNCED MONDAY.

THE MAN SELECTED FOR THE POST IS THOMAS D. MIGNANELLI, CURRENTLY NMC'S EXECUTIVE VICE PRESIDENT IN CHARGE OF OPERATIONS.

MIGNANELLI'S APPOINTMENT WILL BE FORMALIZED JULY 1. HE WILL BE THE FIRST AMERICAN CHIEF EXECUTIVE OF ANY JAPANESE AUTOMAKER'S SALES SUBSIDIARY IN THE U.S., THE ANNOUNCEMENT SAID.

HIS APPOINTMENT "IS IN KEEPING WITH OUR STRATEGY TO BECOME A FULLY LOCALIZED, CUSTOMER-ORIENTED COMPANY," SAID YOSHIKAZU HANAWA, PRESIDENT OF NISSAN NORTH AMERICA.

NISSAN'S MANUFACTURING PLANT IN THE U.S., NISSAN MOTOR MANUFACTURING CORP. (NMMC) IN TENNESSEE, IS ALREADY HEADED BY AN AMERICAN, JERRY BENEFIELD.

TOKYO (JUNE 12) KYODO - HYUNDAI CORP., A MAJOR SOUTH KOREAN TRADING COMPANY, HAS FILED AN INSURANCE CLAIM TO RECOUP PART OF THE MONEY IT FAILED TO RECEIVE FROM THE SOVIET UNION IN CONNECTION WITH SOAP EXPORTS, YONHAP NEWS AGENCY REPORTED TUESDAY.

HYUNDAI HAS REPORTEDLY ASKED THE EXPORT-IMPORT BANK OF KOREA TO COVER 1.8 MILLION DOLLARS, A PART OF THE 5 MILLION DOLLAR EXPORT CHARGES.

THIS IS THE FIRST TIME A KOREAN COMPANY HAS APPLIED FOR INSURANCE PAYMENT

FOR GOODS EXPORTED TO THE SOVIET UNION, YONHAP SAID.

ACCORDING TO THE KOREA TRADE PROMOTION CORP. (KOTRA), COMMUNIST NATIONS OWED SOUTH KOREA A TOTAL OF 96.75 MILLION DOLLARS IN ARREARS AS OF THE END OF MAY. THE FIGURE INCLUDED 42.25 MILLION DOLLARS OWED BY THE SOVIET UNION AND 50 MILLION DOLLARS OWED BY CHINA.

#90163k0083 06/12/1990 ~Japanese News Agency

TOKYO (JUNE 12) KYODO - JAPANESE REAL ESTATE COMPANIES HAVE SPENT MORE MONEY ON U.S. REAL ESTATE THAN ON REAL ESTATE IN ANY OTHER COUNTRY IN RECENT YEARS, A GOVERNMENT SURVEY RELEASED TUESDAY SHOWED.

CUMULATIVE INVESTMENTS IN FISCAL 1986-1988 TOTALED APPROXIMATELY 2.6 TRILLION YEN, OF WHICH 51.3 PERCENT WENT INTO BUILDINGS, HOTELS, AND OTHER REAL ESTATE IN THE UNITED STATES, THE CONSTRUCTION MINISTRY SAID AFTER SURVEYING OF 1,859 COMPANIES.

OF THE COMPANIES SURVEYED, 62 PERCENT RESPONDED WITH 132 POLLEES POURING MONEY INTO FOREIGN REAL ESTATE DURING THE PERIOD.

THE SURVEY, THE FIRST OF ITS KIND, EXCLUDED CASH-RICH BANKS AND OTHER FINANCIAL INSTITUTIONS, AND MINISTRY OFFICIALS SAID OVERALL INVESTMENT BY JAPANESE CONCERNS COULD HAVE REACHED 10 TRILLION YEN.

GROWTH IN SUCH INVESTMENT BY THE 132 REAL ESTATE FIRMS WAS NEARLY FLAT DURING THE THREE-YEAR PERIOD, TOTALING 861.9 BILLION YEN IN FISCAL 1986, 873.8 BILLION YEN IN FISCAL 1987, AND 862.2 BILLION YEN IN FISCAL 1988.

THE MINISTRY DID NOT PROVIDE DOLLAR-BASED FIGURES, CITING DIFFICULTIES COMPILING SUCH STATISTICS DUE TO THE VARIETY OF CURRENCIES USED FOR DEALINGS IN FOREIGN REAL ESTATE.

REAL ESTATE IN OCEANIA WAS THE SECOND TARGET OF JAPANESE INVESTMENT, ACCOUNTING FOR 22.4 PERCENT OF THE TOTAL INVESTMENT, THE SURVEY SHOWED.

REAL ESTATE IN EUROPE, INCLUDING EAST EUROPEAN NATIONS, RANKED THIRD WITH 19.5 PERCENT, BRINGING THE SHARE OF THE U.S., OCEANIA AND EUROPE IN FOREIGN REAL INVESTMENT TO MORE THAN 90 PERCENT.

BY TYPE OF PROPERTY, OFFICE BUILDINGS RANKED FIRST WITH A 51.1 PERCENT SHARE, FOLLOWED BY HOTELS AND OTHER RESORT FACILITIES WITH 18.9 PERCENT, AND COMPLEXES OF HOTELS, HOUSING AND SHOPPING CENTERS WITH 10.6 PERCENT.

NEARLY 90 PERCENT OF THE PURCHASES WERE CONDUCTED BY OVERSEAS SUBSIDIARIES BECAUSE OF LOWER FUND-RAISING COSTS AND OTHER ADVANTAGES, ACCORDING TO THE SURVEY.

#90163k0085 06/12/1990 ~Japanese News Agency

TOKYO (JUNE 12) KYODO - JAPAN WILL NOT YIELD TO A DEMAND BY THE UNITED STATES TO PINPOINT A LEVEL OF PUBLIC WORKS SPENDING OVER THE NEXT DECADE, THOUGH TOTAL OUTLAYS ARE EXPECTED TO APPROACH THE AMOUNT REQUESTED BY THE AMERICANS, GOVERNMENT SOURCES SAID TUESDAY.

PRIME MINISTER TOSHIKI KAIFU AND FOREIGN MINISTER TARO NAKAYAMA AGREED AFTER A 40-MINUTE MEETING THAT JAPAN WILL NOT PLEDGE TO SET ASIDE EACH YEAR A CERTAIN PERCENTAGE OF ITS GROSS NATIONAL PRODUCT (GNP) FOR PUBLIC WORKS AS REQUESTED BY THE U.S., OFFICIALS SAID. NAKAYAMA IS TO CONVEY JAPAN'S POSITION TO THE UNITED STATES WHEN HE MEETS WITH U.S. SECRETARY OF STATE JAMES BAKER IN SAN FRANCISCO ON FRIDAY FOR TWO DAYS OF TALKS.

THE MEETING WILL FOCUS ON COMPILING A FINAL REPORT FOR THE STRUCTURAL IMPEDIMENTS INITIATIVE (SII) TALKS, WHICH ARE AIMED AT REDUCING STRUCTURAL BARRIERS TO TRADE.

A CABINET SOURCE SAID JAPAN'S TOTAL PLANNED OUTLAY WILL COME CLOSE TO MEETING THE U.S. DEMAND THAT JAPAN SPEND 9 PERCENT OF GNP ON PUBLIC WORKS FOR THE NEXT FIVE YEARS, AND 10 PERCENT OVER THE SUBSEQUENT FIVE-YEAR PERIOD.

JAPAN HAS REMAINED ADAMANT ABOUT NOT PINNING ITSELF TO A RIGID TIMETABLE FOR INVESTMENTS THAT COULD HINDER FISCAL ADJUSTMENTS NEEDED TO CUSHION FLUCTUATIONS IN THE ECONOMY.

THE TWO GOVERNMENTS, AFTER WEEKS OF INTENSE TALKS, PRODUCED AN INTERIM REPORT ON THE TALKS IN APRIL AND HAVE AGREED TO COMPILE A FINAL REPORT BY JULY.

BUT JAPANESE GOVERNMENT LEADERS HAVE BEEN ANGERED BY THE RESURGENCE OF THE DEMAND ON PUBLIC WORKS SPENDING AND A REQUEST TO ESTABLISH A JOINT GROUP TO MONITOR THE IMPLEMENTATION OF THE FINAL REPORT.

IT REGARDS THE DEMANDS AS BEING OUTSIDE THE FRAMEWORK PROVIDED IN THE INTERIM REPORT.

FOREIGN MINISTRY SPOKESMAN TAIZO WATANABE TOLD FOREIGN CORRESPONDENTS THAT THE ADDITIONAL DEMANDS ARE "UNJUSTIFIABLE" AND "A SOURCE OF IRRITATION AND EMBARASSMENT."

HE EXPRESSED DISPLEASURE AT PUBLIC COMMENTS ON THE MATTER BY U.S. OFFICIALS, WHICH HE SAID WERE MADE AFTER THE TWO GOVERNMENTS AGREED TO SETTLE THEIR DIFFERENCES IN QUIET TALKS.

IN THE WEEKEND FOREIGN MINISTERIAL TALKS, NAKAYAMA WILL ALSO SEEK BAKER'S UNDERSTANDING ON ITS PLAN TO EASE A FREEZE ON LOANS TO CHINA, THE GOVERNMENT SOURCE SAID.

THE FREEZE WAS IMPOSED A YEAR AGO FOLLOWING THE BRUTAL CRACKDOWN ON PRO-DEMOCRACY DEMONSTRATERS IN TIANANMEN SQUARE.

THE MATTER IS EXPECTED TO BE TAKEN UP AT THE JULY 9-11 HOUSTON SUMMIT OF LEADERS OF SEVEN INDUSTRIALIZED DEMOCRACIES -- BRITAIN, CANADA, FRANCE, ITALY, JAPAN, WEST GERMANY, AND THE UNITED STATES.

#90163k0086 06/12/1990 ~Japanese News Agency

TOKYO (JUNE 12) KYODO - SOME 223 SMALL AND MEDIUM-SIZED COMPANIES IN TOKYO ARE EMPLOYING FOREIGN WORKERS DUE MAINLY TO LABOR SHORTAGES, ACCORDING TO A SURVEY RELEASED TUESDAY BY THE TOKYO METROPOLITAN GOVERNMENT.

THE SURVEY WAS CONDUCTED LAST JULY AMONG 5,200 SMALL AND MEDIUM-SIZED FIRMS IN THE TOKYO METROPOLITAN AREA, 2,080 OF WHOM RESPONDED. IT WAS THE FIRST SURVEY OF ITS KIND TO BE CARRIED OUT BY THE GOVERNMENT.

THE POLL SAID 223 OF THE RESPONDING FIRMS WERE EMPLOYING FOREIGN WORKERS, TOTALING ABOUT 860. SIXTY-TWO PERCENT OF THE FIRMS CITED LABOR SHORTAGES AS THEIR REASON FOR EMPLOYING FOREIGNERS.

MOST WERE WORKING FOR THE SERVICE INDUSTRY IN RESTAURANTS, BARS AND HOTELS. MUNICIPAL GOVERNMENT OFFICIALS SAID THEY DID NOT ASK ABOUT THE NATIONALITY OF THE FOREIGN WORKERS.

THIRTY-FOUR PERCENT OF THE 223 FIRMS SAID THEY WANT TO EMPLOY MORE FOREIGN WORKERS, WHILE ONE IN FOUR OF THOSE WHO HAVE NEVER EMPLOYED FOREIGNERS ALSO WANT TO DO SO.

MEANWHILE, 11.7 PERCENT OF THE 223 DID NOT CONFIRM WHETHER THEIR EMPLOYEES HAD PROPER VISAS ALLOWING THEM TO WORK IN JAPAN, THE SURVEY SAID.

SINCE THERE ARE CURRENTLY ABOUT 770,000 SMALL AND MEDIUM-SIZED COMPANIES OPERATING IN TOKYO, THE GOVERNMENT ESTIMATES THE NUMBER OF FOREIGN WORKERS MIGHT BE MUCH LARGER THAN THE SURVEY FIGURE.

-30- 1478

#90163k0089 06/12/1990 ~Japanese News Agency

NEW YORK (JUNE 12) KYODO - NEW YORK AND TOKYO ON TUESDAY COMMEMORATED THE 30TH ANNIVERSARY OF THEIR SISTER CITY RELATIONSHIP, WITH THEIR RESPECTIVE MAYORS SIGNING A JOINT DECLARATION.

NEW YORK MAYOR DAVID DINKINS AND HIS JAPANESE COUNTERPART SHUNICHI SUZUKI SIGNED THE DOCUMENT WHICH URGED INCREASED COOPERATION IN FINANCIAL, CULTURAL, EDUCATIONAL, AND OTHER AREAS AND CALLED FOR FURTHER EXCHANGES OF INFORMATION ON METROPOLITAN POLICIES AND YOUTH PROGRAMS.

THE TWO CITIES, THE LARGEST IN THEIR NATIONS, BECAME SISTER CITIES IN 1960.

ON THE EVE OF THE ANNIVERSARY, A DISPLAY OF 2,000 JAPANESE FIREWORKS WAS HELD ALONG THE HUDSON RIVER TO CELEBRATE THE OCCASION.

SUZUKI WILL LEAVE NEW YORK LATER IN THE DAY FOR BRAZIL TO SIGN AN AGREEMENT TO ESTABLISH YET ANOTHER SISTER CITY RELATIONSHIP BETWEEN TOKYO AND SAO PAULO.

-30- 994

#90163k0090 06/12/1990 ~Japanese News Agency

TOKYO (JUNE 12) KYODO - A SENIOR FOREIGN MINISTRY OFFICIAL ON TUESDAY QUESTIONED THE CREDIBILITY OF A RECENT REPORT THAT THE SOVIET UNION HAS CUT OFF OIL SUPPLIES TO NORTH KOREA, BUT SAID REPORTS THAT THE NORTH KOREAN AMBASSADOR TO MOSCOW HAS BEEN RECALLED ARE "MOST LIKELY" TRUE.

THE OFFICIAL, SPEAKING ON CONDITION OF ANONYMITY, SAID A SOUTH KOREAN TELEVISION REPORT LAST SATURDAY OF A CUTOFF OF SOVIET OIL TO PYONGYANG MOST LIKELY HAS "NO FOUNDATION."

"THE SOVIET SIDE IS REALLY CAREFUL NOT TO HURT THEIR RELATIONSHIP NORTH KOREA," THE OFFICIAL NOTED.

THE OFFICIAL SUGGESTED AS A POINT OF REFERENCE THE NONCONFRONTATIONAL ATTITUDE TAKEN BY THE SOVIETS IN TALKS WITH PYONGYANG OVER A RECENT INCIDENT IN WHICH NORTH KOREANS WERE CAPTURED POACHING FISH IN SOVIET WATERS.

NORTH KOREA IS LARGELY DEPENDENT ON THE SOVIET UNION FOR ITS OIL NEEDS. LAST SATURDAY, SOVIET DEPUTY FOREIGN MINISTER IGOR ROGACHEV HINTED AT ECONOMIC FRICTION BETWEEN THE TWO NEIGHBORING COUNTRIES IN A MEETING WITH FOREIGN MINISTRY OFFICIALS IN TOKYO.

ROGACHEV SAID NORTH KOREA IS EXPERIENCING SEVERE ECONOMIC STRAINS AND THE FLOW OF GOODS FROM THAT COUNTRY TO THE SOVIET UNION HAS NOT BEEN PROCEEDING ACCORDING TO PLAN.

ON REPORTS THAT THE NORTH KOREAN AMBASSADOR TO MOSCOW HAS BEEN RECALLED TO PYONGYANG, THE JAPANESE OFFICIAL SAID JAPAN HAS FOUND "THAT SEEMS TO BE THE CASE."

THE NORTH KOREAN ENVOY'S RECALL IS BELIEVED TO BE RELATED TO SOVIET PRESIDENT MIKHAIL GORBACHEV'S DECISION TO MEET LAST WEEK WITH SOUTH KOREAN PRESIDENT ROH TAE WOO.

JAPANESE OFFICIALS HAVE BEEN EXPRESSING CONCERN OVER HOW NORTH KOREA WILL REACT AMID THE ENCROACHING TRANSFORMATIONS IN THE GLOBAL GEOPOLITICAL PICTURE.

#90163k0091 06/12/1990 ~Japanese News Agency

TOKYO (JUNE 12) KYODO - THE CANADA-BASED WEST EDMONTON MALL (WEM), KNOWN AS THE WORLD'S LARGEST SHOPPING CENTER, IS PREPARING TO START OPERATION IN JAPAN, ITS JAPANESE PARTNER SAID TUESDAY.

ALBERTA-BASED TRIPLE FIVE CORP., WHICH OPERATES WEM, AND THE TOKYO CONSULTING FIRM, COMMERCE SYSTEM CORP., HAVE AGREED TO SET UP AN EQUALLY OWNED FIRM IN TOKYO IN JULY WHICH WILL MARK WEM'S FIRST ADVANCE INTO THE FAR EAST MARKET, THE JAPANESE FIRM SAID.

THE JOINT FIRM, INTERNATIONAL MALLS INC. (IMI), PLANS TO SET UP 70 TO 80 LARGE SHOPPING CENTERS IN JAPAN IN THE FUTURE, COMMERCE SYSTEM SAID.

THE JAPANESE PARTNER SAID THAT UNDER THE PLAN, GIANT SHOPPING CENTERS WILL BE BUILT ON 33-HECTARE SITES IN 10 PREFECTURES, INCLUDING HOKKAIDO, NIIGATA, SHIZUOKA, AICHI, HYOGO, HIROSHIMA, AND FUKUOKA. IN ADDITION, TWO SHOPPING CENTERS WILL BE BUILT ON 16.5-HECTARE SITES IN EACH OF 36 OTHER PREFECTURES.

WITH JAPAN EASING THE CURBS ON THE OPENING OF LARGE RETAIL STORES, THE WORLD'S LARGEST TOY RETAIL CHAIN, TOYS ''R'' US, INC., BASED IN NEW JERSEY IS ALSO PREPARING TO OPEN A STORE IN NIIGATA.

#90163k0092 06/12/1990 ~Japanese News Agency

TOKYO (JUNE 12) KYODO - THE JAPAN ACADEMY HAS CHOSEN NOTED U.S. JAPANOLOGIST DONALD KEENE AS AN HONORARY MEMBER FOR HIS REMARKABLE CONTRIBUTION IN INTRODUCING JAPANESE CULTURE TO THE WORLD, ESPECIALLY IN THE FIELD OF CLASSICAL LITERATURE, OFFICIALS OF THE ACADEMY SAID TUESDAY.

THE 67-YEAR-OLD PROFESSOR OF COLUMBIA UNIVERSITY AND MEMBER OF THE U.S. ACADEMY, READ ORIENTAL LITERATURE AT BOTH HARVARD AND COLUMBIA UNIVERSITIES AFTER WORLD WAR II.

HE BECAME PROFESSOR OF COLOMBIA UNIVERSITY IN 1953 AFTER STUDYING AT JAPAN'S STATE-RUN KYOTO UNIVERSITY.

KEENE IS WELL KNOWN AS ONE OF THE WORLD'S LEADING JAPANOLOGISTS. THE OFFICIALS CITED AS ONE OF HIS ACHIEVEMENTS A STUDY OF "THE TALE OF GENJI" WHICH WAS WRITTEN IN THE EARLY 11TH CENTURY. IT HAS BEEN CALLED THE FIRST GREAT NOVEL IN WORLD LITERATURE.

-30- 999

#90163m0001 06/12/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 12) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

London stocks gain and the pound jumps on an unconfirmed newspaper report that Great Britain will join the European currency union later this year. BOEING receives a $4.8 billion order from KOREAN AIR LINES for 23 747-400s. ... CHASE MANHATTAN's credit rating was downgraded by MOODY'S INVESTORS SERVICE because of concern about the company's exposure in the real estate market. ... "Adam Smith's Money World," dubbed in Russian, will be the first American business program on Soviet television. ... NESTLE HOLDINGS announces that it is reorganizing several of its businesses in the United States.

WHAT'S AHEAD:

The COMMERCE DEPARTMENT releases 1st quarter current account data at 10 a.m. EDT. ... The FDIC is also scheduled to release quarterly banking statistics at 10 a.m. EDT. ... A NEW YORK STOCK EXCHANGE committee studying market volatility is expected to recommend today that a single federal agency be empowered to regulate both stocks and stock index futures and be permitted to supervise margin levels for stock index purchases. Those powers are now split between the SEC and the CFTC.

FROM THE BULLS:

Yesterday's close on the Dow is suggesting to many traders that the 3000 threshold will soon be broken. "It is not likely that the market would simply reverse itself in one spike this way and turn down," says LOU EHRENKRANTZ of EHRENKRANTZ & KING. "So, I would be one of those who would put myself in the camp of the bulls." (CNBC "Business View", 6/11)

"Odds are we haven't seen the end of this rally," says JAMES STACK of the "Investech Hotline" on June 9. He sees highs in the Dow blue chips possibly above 3000. DICK WEST in his "Morning Comment Fax" of June 11 says to "look for new Dow highs in the next 4 to 6 days." (FNN's "Marketwrap", 6/11)

STOCK MARKET:

Monday's stock market action, which was strongly influenced by buy programs, "will probably give us another assault on 2900" this morning, says ROBERT STOVALL of STOVALL/TWENTY-FIRST ADVISERS. "If we can poke through that [2900 level] and stay there through the lunch hour, we may get a pretty good start to what is going to be a fat filled week." (FNN's "Marketwrap", 6/11)

OPPENHEIMER's TOM GALLAGHER says that last week's consolidation was to be expected, and that now the market is ready to make another run on the Dow. "I would be surprised if the market went straight up, and I think it would be bad for the market if it did." The immediate concern for the market, according to Gallagher, is the release of the PPI and CPI within one day of each other later this week. If the news is bad, the market could tumble in a hurry. "Watch out, watch out. There's a lot of room between here and 2700 where they started and they can get down there in a hurry." (CNBC "World Business View", 6/11)

There's a 50/50 chance the Dow is topping now or headed to 3600, according to ROBERT PRECHTER's "Elliott Wave Theorist". Prechter says the public's willingness to pour money into stock funds is a bearish sign, which he calls a "natural psychological development in an aging bull market." Prechter sees the market riddled with intermediate-term divergence and non-confirmations. At the same time, he says, "Ingredients are there for another 800 points up." Taking the long view, Prechter's director of research, DAVID ALLMAN advises, "Investors should use any rallies as an opportunity to move out of equities because the long-term picture suggests you'll be able to buy stocks at a much more reasonably valued price several years down the road." (CNBC "World Business" and CNN "Business Day", 6/12)

"I think we've seen what is basically a technical bounce here, for lack of another description," says chief stock trader DAN MURPHY at C.J. LAWRENCE MORGAN GRENFELL. "Everyone was aware that most of Friday's losses arose from the unwinding of the June series of index futures and that there wasn't much institutional selling and no aggressive fund selling to speak of. On the contrary, the feeling is that most investors are fairly content with their positions here and that the Dow might have to give up 100 points or so" to get aggressive longer-term investors back into the market. ("The Washington Post", 6/12)

The market may require a mid-term vacation, writes ARCH CRAWFORD in "Crawford Perspectives" who advocates caution for now. But Crawford says a correction on the Dow should not exceed 5% before stocks head "up, up and away again with greater force and conviction." He warns: "Do not stand on the tracks in front of freight trains." (CNBC "World Business", 6/12)

"There is a lot of cash around, but the institutions are probably looking for a more attractive time to buy, especially with important economic data coming up this week," says PETER DaPUZZO, executive vice president of SHEARSON LEHMAN HUTTON. "The consolidation looks healthy so far. The Dow could give back 50 to 100 points over the next week or so, but that would be a normal retracement considering it has gone up 300 points. If that pullback were to occur, it could set up the possibility of a decent summer rally." ("Investor's Daily", 6/12)

"After last week, the positive tone of the market surprised a lot of people," says SHEARSON LEHMAN BROTHER's trader BILL LORD. "But all the economic reports will keep traders jittery and volume low. And the low volume will add to volatility." ("USA Today", 6/12)

"The market has moved up far enough that we needed to consolidate," says RICKY HARRINGTON, director of investment policy and asset management at MARION BASS SECURITIES in Charlotte, N.C. "It could be the middle of next week before we have an indication if we can break out and move up to 3000. I still have a constructive, optimistic view on the market. There's still a lot of cash out there." Mr. Harrington believes that we could have a little carryover of Monday's rally on Tuesday, "then some midweek weakness, and maybe early next week we'll break out on the upside." He adds, "The consolidation looked good, volume was low, and we like to see that." (UPI, 6/11)

MARY FARRELL of PAINEWEBBER says the slight decrease in interest rates is responsible for the resurgence in the stock markets. "This real strength in the market is a puzzle unless you view it in the context of the declining rates. Not that the rates have declined so dramatically, but the trend has been down and I think that's what has fueled this. And as long as they continue this even small trend down, I think you could see further strength in the market." (CNBC "World Business View", 6/11)

"We had a pullback last week, and now it's off to the races again," says FRANK CAPPIELLO JR., president of McCULLOUGH, ANDREWS & CAPPIELLO - a San Francisco - based money management firm. Noting that trading was narrow, he says, "What worries us is the activity seems to be mainly in blue-chip and story stocks." (WSJ, 6/12)

"This really has been a shallow, short-lived, well-constrained correction " says MONTE GORDON of the DREYFUS CORP. "Obviously, this market doesn't want to go down. With a cascade of economic news coming out at the end of the week, you would think the market would be stately, concerned and relatively careful." He adds that any economic surprises could rock the market's recent optimism. (NYT, 6/12)

Commenting on the economic data due out later this week, JACK CONLON,

managing director of ROTHSCHILD INC., says, "If the numbers are neutral, the market may be ready to resume its upward course. The consolidation seems to have run its course." (Reuters, 6/11)

STOCK TIPS:

ROGER SPENCE of PAINEWEBBER GROUP says food stocks look good because their earnings will be better than the market and they are less volatile. Among his favorites are RALSTON PURINA, SARA LEE, GENERAL MILLS, KELLOGG and GERBER PRODUCTS. ("Investor's Daily", 6/12)

"BOEING owns that market," says GARY REICH of SHEARSON LEHMAN HUTTON, referring to another huge order Boeing landed from the Pacific Rim, this time from KAL. "Boeing should continue to be an outstanding performer," says Reich in recommending the stock. "I'm estimating earnings of $4 a share this year and $5.20 next year." ("USA Today", 6/12)

Negative publicity has hurt tobacco stocks. "There's outstanding value in AMERICAN BRANDS and PHILIP MORRIS ... prices are very, very attractive," says KIDDER PEABODY analyst ROY BURRY. Burry says pricing for tobacco products remains strong and "cash flows are immense." Burry believes tobacco companies will benefit from the opening of the Eastern European market where the quality of cigarettes is now very poor. (CNN "Business Day", 6/12)

MICROCOM plummets on poor earnings news losing almost half its value Monday - finishing at $9 3/4, down 8 1/2. STEVEN LEVY of HAMBRECHT & QUIST says the selling has been overdone. "At the levels it is trading at today, we continue to be buyers," he says. PAUL JOHNSON of NEEDHAM & CO. says there is no rush. "The market is not tolerant of uncertainties like this. [The stock] is not going to bounce back anytime soon." ("USA Today" 6/12)

ELECTRONIC ARTS rose 1 3/8 to 14 1/2 following a strong buy recommendation from the ALEX BROWN brokerage. SHEARSON LEHMAN HUTTON upgraded its opinion of SYMBOL TECHNOLOGY pushing the stock up 1 1/8 to 12 7/8. ("Nightly Business Report", 6/11)

-30- 9880

#90163m0002 06/12/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 12) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"It's been very quiet today [Monday], all day long," says LORENZO TRONI,

the vice president for foreign exchange at PAINEWEBBER INTERNATIONAL LTD. in New York. "I think everyone [in the currency market] is waiting for some economic data." Mr. Troni says the market is anticipating lower inflation and lower retail sales that could prompt the Federal Reserve to push down interest rates, leading to a weaker dollar. (NYT, 6/12)

The dollar's current strength can be traced to the market's failure to push the currency below 150 yen last month, says JAVIER SANTALLA, a trader at NIPPON CREDIT BANK in New York. He explains that after a period of oscillation between 150.50 yen and 152 yen, the U.S. currency consolidated its position last week around 152.50 yen, persuading many by Friday to drop their long yen positions previously taken when it seemed the U.S currency wouldn't rise much against the yen in the near term. (WSJ, 6/12)

LINDA McLAUGHLIN, a currency trader at CHEMICAL BANK, attributes the dollar's strength against the yen to money from individual investors in Japan who have just received semiannual bonuses. The workers are apparently looking to invest in U.S. markets. ("Investor's Daily", 6/12)

"We're just resting, waiting for PPI and retail sales," says one bond futures trader. There are worries "inflation might be harder to get rid of" than previously thought. According to JOSEPH LIRO of S.G. WARBURG, "The [bond] market needs some more weak numbers to keep up the gains." But Mr. Liro is optimistic that if the data comes in as expected the market will be able to maintain its underlying support. (Reuters, 6/11)

"The back-to-back reports on the producer price index on Thursday and the consumer price index on Friday will serve as this week's focus of investor attention," says JOHN LONSKI, senior economist at MOODY'S INVESTOR SERVICES. "While both reports should be constructive for bonds, we don't believe that either will be weak enough to spur the Federal Reserve into easing its monetary and credit policy." ("Investor's Daily", 6/12)

"People [in the bond market] are waiting for the data deluge," says ELLIOTT PLATT, chief economist at DONALDSON, LUFKIN & JENRETTE SECURITIES CORP. "Whether prices break out of these ranges will depend mostly on the PPI and CPI." Mr. Platt says that a CPI and PPI of more than 0.4% for the month of May, would be a clear sign "to the bond market that the Fed will not ease." (WSJ, 6/12)

Describing Monday morning's bond sell-off PHILIP BRAVERMAN, chief economist at DKB SECURITIES CORP., an arm of the DAI-ICHI KANGYO BANK OF TOKYO, says, "The selling we witnessed at the opening resulted from a somewhat odd set of factors that developed overnight in Tokyo, not any shift in market sentiment, as was seen by the recovery later in the day." Mr. Braverman, who is bullish on the bond market, says the selling began in Japan after the ruling Liberal Democratic Party there lost an election. The lost seat was not important to the ruling party, but it was a

surprise, not to mention an embarrassment to the pollsters. (NYT, 6/12)

THE ECONOMY:

According to COMMERCE DEPARTMENT projections the Southwestern states are expected to lead the nation in economic growth through the end of the century, continuing the shift in economic activity to the Sun Belt. The report shows that Nevada and Arizona will show the fastest growth rates in personal income, jobs and population between 1988 and 2000. KENNETH JOHNSON, a Commerce Department analyst, says that Arizona and Nevada "have exhibited strength already over the last few years. They have shown a competitive [growth] advantage over the other states and we expect that to continue into the year 2000." (WSJ, 6/12)

IN WASHINGTON:

PRESIDENT BUSH and MEXICAN PRESIDENT CARLOS SALINAS de GORARI hailed the possibility of a free-trade pact between their two countries in a joint statement. "Free trade between Mexico and the United States can be a powerful engine for economic development, creating new jobs and opening new markets," they said. Salinas later said to reporters, "I would say there is a consensus on the benefits for both countries. If we reach agreement, this could be the biggest market in the world, and the most efficient." ("The Washington Post", 6/12

"Industry-wide, weak thrifts are getting weaker and being taken over by the R.T.C.," says SEN. DONALD RIEGLE JR. (D. - Mich.) criticizing regulators and Federal prosecutors for moving too slowly in resolving the savings and loan crisis. "Stronger thrifts seem to be improving modestly. The thrifts in the middle tier, that can go either way, are struggling to strengthen themselves and more time is need to see how this group will fare." He also says, "By every available measure, the need for additional investigative and prosecutorial resources is unprecedented. Yet the administration continues to oppose Congressional efforts to provide added resources." (NYT, 6/12)

-30- 5444

#90163p5186 06/12/1990 ~PR Newswire

DENVER (JUNE 12) PR NEWSWIRE - Unique Mobility Inc. today announced the victory of the UNIQ(R) powered Solectria Lightspeed solar car in the American Tour de Sol, the American Solar Car Championship. On May 27, this two seat sports car, built by the Solectria Corp. of Arlington, Mass. won the commuting vehicle category using two UNIQ(R) DR127 motors and two CR10-200 controllers.

The five day American Tour de Sol race, from Montpelier, Vt., to Boston, featured 15 entries. The race was sponsored in part by the U.S.

Department of Energy and was organized by the Northeast Solar Energy Association. According to Nancy Hazard, race co-director, the goal of the American Tour de Sol is to demonstrate the viability of solar/electric cars as non-polluting highway speed alternatives for urban commuters.

Unique and its venture partner, Alcan Aluminium Ltd., have developed a series of lightweight high power density brushless permanent magnet traction motors and high efficiency, regenerative motor controllers in several sizes and power ratings similar to those used in Lightspeed.

In addition to Solectria, many of the customers for these advanced drivetrain components are university student teams competing in the General Motors Sunrayce U.S.A. (Orlando to Detroit in July of this year) and teams participating in the Second World Solar Challenge (Darwin to Adelaide, Australia this November.) To date, 18 of the 32 GM Sunrayce teams are utilizing the UNIQ(R) systems.

"We are very pleased to be supporting so many of the Sunrayce teams," said Ray A. Geddes, Unique's chairman and chief executive officer, "and wish them all the best in the upcoming race. This race offers an excellent opportunity for applying engineering ingenuity to our future needs for clean transportation."

Unique Mobility, a publicly held Colorado based engineering firm, is currently involved in a variety of electronic and hybrid electric vehicle programs designed to improve vehicle operating efficiency while reducing pollution.

HIGHLAND PARK, MI (JUNE 12) PR NEWSWIRE - Renault and Chrysler announced today that they have decided to terminate the 50/50 ARCAD joint venture for the development and production of a new mini sport utility vehicle code named JJ.

The companies said that the joint program, as structured, is no longer economically attractive. Chrysler intends to continue with the JJ project and is reviewing various implementation alternatives.

Current distribution of Jeep vehicles in Europe by Renault is not affected by this decision.

#90163p5201 06/12/1990 ~PR Newswire

NEW YORK (JUNE 12) PR NEWSWIRE - Quotron Systems, Inc. today announced that it will begin delivering its financial information services over two additional industry-standard platforms by third quarter 1990. The announcement is in keeping with the company's strategy to move from proprietary to non-proprietary hardware systems.

Quotron's current financial information services that run on the Quotron 1000(R) will also be available over the two additional platforms. These services, the Quotron Advantage Services(TM), include real-time market data; online analytical tools; online business and financial reports, research and commentary; integrated branch-office services for portfolio management; and network services to access host computers and databases.

The first of the platforms, the QUOTRON 5300(TM), is based on an industry-standard Intel 386(TM) platform and UNIX operating system. It will be manufactured and integrated by a third party and will be available in production quantity by third quarter 1990.

At the same time, Quotron will begin offering the Quotron Advantage Services over the IBM PS/2(R) using AIX(TM), and UNIX-based operating system developed by IBM. In addition, Quotron has entered into a remarketing agreement with IBM to sell IBM hardware and software to Quotron customers for use with Quotron information services.

Customers may choose to use either DOS-based PCs or serial terminals as the display units for the QUOTRON 5300 or the PS/2 AIX offering. They have the option to buy or lease these systems and will be offered installation and maintenance contracts for the hardware.

A leading provider of financial information services for more than 30 years, Quotron Systems, Inc. delivers real-time prices for more than 120,000 investment instruments through an international network of more than 100,000 terminals in 23 countries. Quotron also provides sophisticated trading and decision-support systems, analytical software, integrated services for brokerage operations, and highly reliable communications network services to its customers worldwide.

SAN FRANCISCO (JUNE 12) PR NEWSWIRE - Transcisco Tours Inc., a subsidiary of San Francisco-based Transcisco Industries Inc. (AMEX: TNIA and TNIB),

announced today the appointment of Jack C. Chatham as president.

Chatham comes with 15 years experience in the cruise ship industry where he last held the position of senior vice president for Regency Cruises, and previously spent 12 years with Sitmar Cruises. During his career in the cruise ship industry, Chatham held positions of management responsibility in corporate planning, marketing planning, finance, and marketing and sales.

Chatham will be responsible for managing Transcisco Tours which will operate a luxury "cruise train" service called the Transcisco 49ers to Tahoe and Reno from the San Francisco Bay Area late in 1990. The Transcisco 49er will provide three days, two nights mini-vacation packages that will include round-trip transportation, hotel accommodations, transfers and discounts on ski-lift tickets, golf, rental cars and a variety of other destination attractions. Transcisco Tours will begin to operate a dinner train service in San Antonio, in June of this year. The dinner train will be similar to the Napa Valley Wine Train in that it will offer passengers an elegant meal and entertainment while riding a train for three to four hours. During the next three years, Transcisco Tours expects to operate several other trains in the Western and Southwestern United States, including a cruise train between Los Angeles and Las Vegas, and a dinner train between San Diego and Los Angeles.

The Transcisco 49er is designed and priced to provide affordable, quality mini-vacation packages to Northern California residents and exciting new alternatives for business meetings and pre- and post- conventioneers. For additional information and a free brochure, write to Transcisco Tours Inc., 601 California Street, Suite 704, San Francisco, CA 94108, or call 800-765-4937, or 415-677-9040. Transcisco Industries' shareholders will receive special discounts on ticket fares on all of Transcisco Tours' trains.

Transcisco Industries has a railcar maintenance and retrofitting division, it owns 36 percent of PLM International, an AMEX-listed diversified equipment leasing company, and Transcisco owns 20 percent of SOVFINAMTRANS a U.S.S.R. railcar leasing company that operates tank cars with Transcisco's Uni-Temp heating system. Transcisco expects to diversify its exposure, both in equipment-types and geography, to proprietary transportation equipment, parts and operating businesses using its own unique technologies and its proven financing skills.

SAN DIMAS, CALIF. (JUNE 12) PR NEWSWIRE - Vestar Inc. (NASDAQ: VSTR) today announced the completion of a $7 million private placement of convertible preferred stock and warrants. An additional stockholder, General Electric Pension Trust, invested $1.5 million, completing the offering which commenced with the investment of $5.5 million in May 1990 by Warburg, Pincus Capital Partners and Humana Inc.

Dr. Roger J. Crossley, president and chief executive officer, said, "We believe that the addition of General Electric to the Investor Group for this private placement further underscores the confidence in Vestar held by key stockholders. With the completion of this private placement and the continuing momentum of AmBisome product revenues, we are confident that we now have sufficient resources to complete the development and commercialization of AmBisome and expect to be at or near a breakeven level of operations by year-end."

Under the terms of the stock purchase agreement, the Investor Group (Warburg, Pincus, General Electric and Humana) purchased $7.0 million of newly issued Vestar voting preferred stock, convertible into common stock at $4.00 per share with a 10 percent per annum cumulative dividend payable in shares of common stock valued at the greater of $4.00 per share or market. The company has also issued the Investor Group warrants to purchase approximately 1,647,000 shares of Vestar common stock at $4.25 per share.

Vestar Inc. is a pharmaceutical company focused on the development of

therapeutic and diagnostic agents for cancer, AIDS and related diseases. AmBisome is the trade name for the intravenous liposomal formulation of amphotericin B, a broad-spectrum, anti- infective agent used to treat potentially fatal systemic fungal infections that often occur in heavily treated cancer, post- organ/bone marrow transplant and AIDS patients. In clinical trials, AmBisome has virtually eliminated the acute and chronic toxicity associated with conventional amphotericin B, even at 3-4 times higher doses, demonstrated by its 80 percent clinical response rate in patients who had already failed conventional therapy, or in whom it was contraindicated.

MONTVALE, NJ (JUNE 12) PR NEWSWIRE - An entirely new concept has been developed and launched by Inter-Continental Hotels Corp.: "Inter-Continental Vacations."

"Inter-Continental Vacations provides travelers with an all-inclusive trip to one of the most exciting destinations in the world, Cancun," said Graeme Smith, vice president-marketing and sales for Latin America.

Starting at $499, the program includes airfare, deluxe accommodations, all meals and drinks, water sports, airport transfers, taxes and gratuities, morning and afternoon tea, and a welcome gift.

"Whether basking on the beach, or exploring the ancient Mayan ruins, the luxurious Hotel Inter-Continental Cancun always has been a favorite retreat for a relaxing holiday since its 1988 opening. With our new Inter-Continental Vacation, we think it's more popular than ever before," said Smith.

The Hotel Inter-Continental Cancun offers sailing, windsurfing, snorkeling and water volleyball; two swimming pools; two tennis courts, and a health club.

Special "Vacations" rates are available now through Dec. 12, 1990. For reservations, contact "Inter-Continental Vacations" at 800-628-9045.

#90163p5214 06/12/1990 ~PR Newswire

ROCKY MOUNT, NC (JUNE 12) PR NEWSWIRE - Hardee's Food Systems, Inc., as part of its continuing effort to offer nutrition-conscious customers a

range of menu choices, today announced the introduction of a light hamburger sandwich called THE LEAN 1.

THE LEAN 1 is the lowest-fat quarter-pound hamburger offered as a standard-menu item by any national fast food hamburger chain, the company said. It will be introduced on a market-by-market basis and be nationwide by year-end.

According to Bill Prather, Hardee's President and Chief Executive Officer, THE LEAN 1 is made from 100 percent American beef and contains an average of 18 grams of total fat, which is about 30 percent less than Hardee's other quarter-pound hamburgers.

Hardee's introduced THE LEAN 1 because many of the chain's customers repeatedly expressed a desire for a lower-fat hamburger as a product they could order everyday.

More than two years ago, Hardee's become the first and is still the only, major hamburger restaurant chain to switch to all-vegetable oil to cook all its fried products, including french fries. About the same time, the company introduced four varieties of pre-packaged salads made fresh in the restaurant each day, and also switched to a low calorie mayonnaise for its sandwiches.

Hardee's was also the first hamburger chain to add a non-breaded, non-fried chicken sandwich to its everyday menu when it introduced the Grilled Chicken Breast Sandwich last year. That product has since been copied by other members of the "Big Four" burger chains.

Hardee's began testing THE LEAN 1 last month in Peoria, IL, Charleston, SC , Montgomery, AL, and Harrisburg, PA. The product has been well-received in all markets.

Hardee's Food Systems, Inc. is the third largest fast-food hamburger restaurant company in the world, with over 3,300 Hardee's and 648 Roy Rogers restaurants in 41 states and 9 foreign countries. The company is headquartered in Rocky Mount, North Carolina.

MILWAUKEE (JUNE 12) PR NEWSWIRE - Midwest Express Airlines today has formed an agreement with London-based Virgin Atlantic Airways to offer joint fares and connecting flights to London. In addition, Virgin Atlantic, Wyndham Hotels & Resorts and Hub Express Airlines will participate in the Midwest Express Frequent Flyer program effective July 1 1990, the airline announced today.

Wyndham Hotels & Resorts is a Dallas-based division of the Trammell Crow Group, the nation's largest real estate developer. Wyndham operates 35 upscale hotels and resorts throughout the United States and the Caribbean, many in cities served by Midwest Express Airlines, including Dallas, Atlanta, San Diego and Milwaukee. The company has aggressive growth plans in place with a goal of achieving national presence over the next five years.

Midwest Express Airlines, based in Milwaukee, is a wholly owned subsidiary of K-C Aviation, which, in turn, is a subsidiary of Kimberly-Clark Corporation. Midwest Express has approximately 882 employees throughout its system. Operating since June, 1984, Midwest Express has earned its reputation as "The best care in the air" by offering passengers luxury-class service at coach fares or less. A nationally reported survey of 75 major airlines has rated Midwest Express' two-by-two leather seating "the most comfortable coach seat" for three consecutive years. Midwest Express is the second largest carrier at Mitchell International Airport based on passenger boardings.

NEWMARKET, NH (JUNE 12) PR NEWSWIRE - Vitronics Corporation (AMEX: VTC) today announced that materials supplied by two major corporations, which are used in Vitronics' cleaning system, have passed a key benchmark test for the cleaning of printed circuit boards by military contractors. The Institute for Interconnecting and Packaging Electronic Circuits ("IPC") conducted the benchmark tests and recently announced the results.

These alternative materials replace chlorofluorocarbons ("CFCs") utilized traditionally in the cleaning of printed circuit boards. CFCs cause depletion of the ozone layer, which protects the earth from the harmful effects of ultraviolet radiation. Vitronics Corporation, as a result of an intensive three-year research and development effort, manufacutures and sells semi-aqueous cleaning systems that utilize these new cleaning materials that do not require the use of CFCs. VITRONICS(R) has several semi-aqueous systems operating successfully in the United States, Europe and Asia. Calcomp, a division of Lockheed, is one of the first multinational companies to incorporate VITRONICS' semi-aqueous cleaners into its production lines. Glenn Larsson, Calcomp's manager of Production Engineering, states, "Calcomp, an environmentally conscious manufacturer, has taken the first step to eliminate the use of CFCs in its production process. VITRONICS' semi-aqueous system has produced both superior cleaning results and cost-effectiveness to the traditional methods of using CFCs for cleaning printed circuit boards." Baumer Electric, Ltd. of Switzerland, a manufacturer of photoelectric sensors and assorted electrical devices, has been processing all of their printed circuit boards for the last six months with great success using a VITRONICS Semi-Aqueous Cleaner.

Vitronics Corporation is a rapidly growing supplier of state-of-the-art thermal processing and associated equipment, with an established reputation as an innovator and leader in the surface mount industry. VITRONICS equipment is primarily aimed at the huge electronics industry and has achieved considerable technical recognition in the production of printed circuit boards. The company also supplies equipment to the medical, chemical, pharmaceutical, plastics, graphics and textile industries. VITRONICS customer list includes all 20 of the largest electronics companies with IBM, AT&T, Hewlett Packard, Delco, Electronics, Chrysler, Compaq Computer and Motorola among the grouping.

STERLING, VA (JUNE 12) PR NEWSWIRE - Star Technologies, Inc. (NASDAQ: STRRC) today announced an agreement to license the SunOS, operating system

and related software products from INTERACTIVE Systems Corp. of Santa Monica, Calif. SunOS, developed by Sun Microsystems, Inc., is the technical workstation industry's leading UNIX operating system.

Under the terms of the agreement, Star has licensed SunOS source code and related programming and networking software for the development of a new product based on the SPARC Scalable Processor ARChitecture microprocessor, Sun's standard RISC architecture. Star selected SunOS as the operating system because of its support of industry standards and its wide acceptance as the premier platform for technical computing applications. There are more than 2,000 application software packages available for SPARC-based systems.

INTERACTIVE Systems Corp., a leading supplier of UNIX products and development services, is the sole licensed distributor of Sun Microsystems' SunOS and related software products. INTERACTIVE is licensed to distribute SunOS to systems manufacturers who are building systems based on Sun's SPARC microprocessor architecture.

This agreement follows Star's recent announcement of its membership in SPARC International, a worldwide consortium committed to establishing SPARC as an open industry standard for reduced instruction set computing (RISC).

"Star is committed to supporting industry standards and open systems architecture," said Dr. Glen J. Culler, Star's vice president of Technology Integration and head of Star's Santa Barbara R & D Center. "We selected SPARC technology because of the availability of a broad range of SPARCware software applications. With SunOS we are positioned to leverage the OS evolution activities of an industry leader."

Sun has demonstrated its commitment to open systems computing through the support of industry standards, continually evolving its products to support current and emerging standards, Culler added.

"By licensing SunOS, Star Technologies joins INTERACTIVE's other customers using SPARC technology who believe that the combination of SunOS and SPARC-based systems offer a powerful platform for open systems computing," said Fred Simmons, Vice President of INTERACTIVE.

In addition to SunOS, Star has licensed high-level programming languages, including Sun C, a highly evolved implementation of the C programming language, and Sun FORTRAN, GSA-certified ANSI standard FORTRAN with extensions. Star has also licensed Sun's Open Network Computing (ONC) products, including Network File System (NFS), providing a rich set of networking tools for multi-vendor, heterogeneous environments.

INTERACTIVE Systems Corp., a Kodak company, is the leading supplier of

UNIX software products, licensed software technologies, and consulting and development services to the UNIX industry and the Open Systems marketplace. INTERACTIVE Systems is headquartered at 2401 Colorado Ave., Santa Monica, Calif., 90404.

Star Technologies is a leading manufacturer of high-speed computing products for image and signal processing applications. Star's R & D Center in Santa Barbara, Calif., provides advanced technology and engineering. Star is headquartered at 515 Shaw Rd., Sterling, Va., 22170.

UNIX is a registered trademark of AT&T in the United States and other countries. SPARC, SPARCware, ONC and NFS are trademarks of Sun Microsystems Inc.

#90163p5232 06/12/1990 ~PR Newswire

SAN FRANCISCO (JUNE 12) PR NEWSWIRE - The Charles Schwab Corp. (the company) (NYSE: SCH) today announced that it has commenced a tender offer for up to 700,000 warrants issued in 1987 to certain former shareholders of the company's predecessor.

The per warrant purchase price is $13.00 net cash to the seller. Each warrant allows the holder to purchase one share of the company's common

stock for $1.42 per share. There are 2.1 million warrants outstanding. The offer, proration period and withdrawal rights expire at 5 p.m. PDT on Wednesday, July 11, 1990, unless extended.

The company said that the warrants become exercisable only when the shares of common stock underlying the warrants are registered under the Securities Act of 1933 and that it expected this to occur approximately six months after expiration of the offer.

In the offering materials to warrantholders, the company reported that for the two months ended May 31, 1990, it earned $2.5 million, or 9 cents a share, on net revenues of $63.1 million. Average trades per day during the two month period were 12,700. Average trades per day for the period from April 1, 1990, through June 8, 1990, have been 12,900. The company cautioned that its business, like other securities firms, is directly affected by the many fluctuations in volumes and price levels in securities markets, which in turn are affected by many national and international economic and political factors that cannot be predicted. Accordingly, results of any interim period are not necessarily indicative of results for the full quarter or year.

In the first quarter of 1990 the company earned $3.7 million, or 14 cents per share, on net revenues of $92.9 million. Average trades per day for the first quarter were 12,900.

The company, through its operating subsidiary, Charles Schwab & Co. Inc., is America's largest discount broker.

ATLANTA (JUNE 12) PR NEWSWIRE - Great Northern Nekoosa Corp., a subsidiary of Georgia-Pacific Corp. (NYSE: GP), has set June 22, at 9:30 a.m., for a special meeting of shareholders.

At the special meeting, shareholders will be asked to consider and vote upon a proposal to approve and adopt an Agreement and Plan of Merger, dated Feb. 19, which provides for the merger of NM Acquisition Corp., a wholly owned subsidiary of Georgia-Pacific, and Great Northern Nekoosa.

The merger is the second and final step in the acquisition of Great Northern Nekoosa by Georgia-Pacific. On March 8, NM Acquisition Corp. completed its cash tender offer to purchase all outstanding shares of Great Northern common stock at $65.75 per share, giving Georgia-Pacific beneficial ownership of approximately 96.5 percent of the then outstanding shares of Great Northern Nekoosa common stock.

Georgia-Pacific beneficially owns and has the right to vote at the special meeting sufficient shares to assure approval and adoption of the merger agreement.

The meeting will be held at the Georgia-Pacific Center in Atlanta.

PASADENA, CA (JUNE 12) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) today announced that is has been selected by the U.S. Army for a contract to provide technical support to environmental programs at army installations nationwide. This contract adds to the company's record backlog of environmental work. A company spokesman stated, "In the last 18 months, Jacobs has been awarded environmental engineering and construction services contracts with a maximum value of more than $500 million."

Subject to successful contract negotiations and specific task order

requirements, Jacobs will provide services including remedial investigations to characterize toxic and hazardous materials contamination problems, feasibility studies to evaluate containment and cleanup measures and remedial action planning. Services could also include environmental compliance and training support, assistance with planning for base closures, emergency waste disposal operations, and assistance with location and disposition of unexploded ordnance.

The U.S. Army Toxic & Hazardous Materials Agency (USATHAMA) at the Army's Aberdeen Proving Ground in Maryland will provide scopes of work for the proposed 4.5-year contract.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural construction, construction management, contract maintenance, and operations services to government and industry worldwide.

#90163p5245 06/12/1990 ~PR Newswire

LE ROY, NY (JUNE 12) PR NEWSWIRE - Jones Chemicals, Inc. of Le Roy is introducing a non-combustible electronic circuitboard defluxer which is safer to handle, works faster, cleans more thoroughly and is less expensive that other defluxing agents now in use, according to A. Richard Koetzle, national product manager for Organic Chemicals.

The product will be marketed as Sunny Sol(R) ESC-10, and is a patent-pending industrial solvent composed entirely of organic compounds derived from by-products of the pulp and paper industry. The environmentally safe liquid replaces hazardous materials currently used in printed circuitboard defluxing, including chlorofluorocarbons, 1-1-1 trichloroethane, methylene chloride, acetone, petroleum-based solvents and D-limonene solvents.

Sunny Sol ESC-10 has a flash point greater that 212 degrees Fahrenheit, the boiling point for water, which significantly reduces the fear of combustion associated with most other defluxing agents. Some products currently used for electronic components and printed circuitboards combust at 120 degrees Fahrenheit or less, requiring safety precautions.

Jones Chemicals will introduce Sunny Sol ESC-10 at the NEPCON electronic trade show in Boston June 12-14. It is the first of several environmentally friendly solvents that will be introduced for industrial and municipal use this year.

Other Benefits -- ESC-10 can be diluted in water. -- ESC-10 is

water-soluble. -- ESC-10 works up to six times faster than conventional solvents currently used.

-- ESC-10's cost will be about one-half that of conventional solvents. -- ESC-10 can be used at equal strength for maximum efficiency, or diluted in water by as much as 10:1.

-- ESC-10 can be applied by converted vapor degreasers, soak tanks, aqueous or alkaline degreasers, part washers or ultrasonic devices.

-- ESC-10 eliminates the need for environmentally hazardous and ozone-depleting solvents.

CONTACT: Kerry Gleason of ICE Communications, 716-244-5400, for Jones Chemicals.

PHOENIX, AZ (JUNE 12) PR NEWSWIRE - Aquapore Moisture Systems, Phoenix and Chicago, has started a TV and radio test advertising campaign in Los Angeles in June and July. The product is the Moisture Master Soaker Hose used for watering lawns, plants and shrubs.

The product uses up to 70 percent less water than traditional watering methods, as the porous Soaker Hose lets water leak evenly in desired locations, the company said. This eliminates improper water distribution. Water flow can be controlled. The Soaker Hose can be used above ground or can be buried below ground.

The Soaker Hose is made from recycled rubber auto and truck tires. Every year, Aquapore takes some 500,000 old tires out of the environment to produce the Soaker Hose.

Media include KABC-TV, KCBS-TV, KABC Radio, KFWB Radio and KMPC Radio. The test budget is $225,000.

Shannon Bard, vice president-sales and marketing, said the product has an established track record with consumers throughout the United States.

"Factors such as water conservation and recycling have added to our product's benefits. We believe the '90s will see tremendous growth in environmentally correct products," Bard said.

MAYNARD, MA (JUNE 12) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) today announced the signing of a five-year contract valued at $30 million-$50 million with the State University of New York (SUNY) to provide networks and systems for administrative, academic, and research computing on 17 campuses. The agreement is one of the largest technology contracts this 64-campus system of higher education has awarded in over a decade.

The agreement provides for each campus to replace outdated computer equipment with one or more of Digital's VAX 6300/6400 computer systems. Digital Equipment will also be used to network the campuses together and strengthen their linkage with the central administration's data systems.

Charles Blunt, SUNY's Associate Vice Chancellor of Information Technology, said, "SUNY, like many university systems, is confronted with severe budget limitations. Digital's technology platform is extremely cost-effective and allows modular, flexible growth with an ability to network with both campus and system-wide resources."

SUNY will take advantage of Digital's Education Initiative program, which provides site licenses for up to 265 Digital software products at no charge. The grant program will save the university system millions of dollars in software licensing fees.

Blunt said that SUNY's upgrade program will insure that each campus has a common, affordable technological environment that can be sized according to varying campus requirements.

Objectives of the program are to enhance academic and administrative services, improve staff productivity through the use of modern data base and application development tools, and increase availability of high-quality software for administrative and academic applications.

With 64 campuses and over 350,000 students, SUNY is one of the largest systems of higher education in the United States.

Digital Equipment Corporation, headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

FORT LAUDERDALE, FLA. (JUNE 12) PR NEWSWIRE - Severe skin problems are breaking out among people who have taken dietary supplements of L tryptophan. The problems add to a growing list of serious side effects grouped as eosinophilia-myalgia syndrome that recently caused the FDA to pull the product from the market.

"We are seeing patients with swelling, severe thickening of the skin and skin ulcerations," says Cleveland Clinic Florida dermatologist Marta I. Rendon, M.D. "It's frightening because some of these patients stopped taking tryptophan long before their skin trouble began."

Until last year, tryptophan was believed to be safe because it occurs naturally in milk. Consumers were taking an average of twice the usual dietary dose for reasons including insomnia, menstrual cramps and depression.

But in early 1989, tryptophan users started reporting reactions such as muscle pain, neuropathy and edema. One-third of these patients have required hospitalization, and some have died from respiratory failure.

Although physicians don't know what causes these severe reactions, they suspect the body may be breaking down the amino acid into a substance that it cannot tolerate. The possibility of contamination also is being investigated, as tryptophan is synthesized with bacteria.

"Eosinophilia-myalgia syndrome affects many organs in the body," says Dr. Rendon. "Fortunately, sometimes its skin manefestations will respond to prednisone or other anti-inflammatory medications. For some patients, though, nothing seems to work.

"This new and very complicated disease is frustrating for both patients and physicians. So many questions are still unanswered."

BEAVERTON, ORE. (JUNE 12) PR NEWSWIRE - Epitope Inc. (AMEX: EPT) today announced that it has granted an option for rights to its powdered iodine products to Lake Pharmaceutical of Mission Viejo, Calif. In return for payment of a non-refundable option fee, Lake has been given a six-month option to obtain exclusive world-wide rights to EPIdyne(TM), Eptiope's patented powdered pre-iodine product line. If Lake exercises the option, Epitope will receive a technology transfer fee and royalties from the subsequent sales of EPIdyne products.

"The licensing of rights to proprietary products such as EPIdyne is a key element of Epitope's strategic decision to narrow the scope of its activity to concentrate on developing our three most promising product areas, specifically, a saliva-based AIDS test, therapeutic drugs for protozoan-caused diseases such as malaria, and fruits, flowers and vegetables with longer shelf and bloom life. The agreement with Lake Pharmaceutical represents a model for future agreements licensing other diverse technologies developed by Epitope over the past 10 years. By licensing certain technologies which are outside our primary areas of focus, we can improve both our cash position and revenue stream and, at the same time, maintain maximum progress on our highest priority projects " stated Adolph J. Ferro, Epitope president and chief executive officer.

Lake Pharmaceutical, a unit of Wakunaga Pharmaceutical Co., Ltd. of Hiroshima, Japan currently markets Yeast-Guard(TM) a leading over-the-counter feminine hygiene product which is sold nationwide through pharmacies and grocery stores.

Epitope Inc. is a 10-year old Oregon company utilizing biotechnology to develop diagnostic tests for AIDS, therapeutic drugs for protozoan diseases and, through its agricultural unit, Agritope Inc., agronomically

superior new plant varities.

SACRAMENTO, CA (JUNE 12) PR NEWSWIRE - American Confectionery Corp. (NASDAQ: CNDY), headquartered here, today said it had received

approximately $1.4 million from the exercise of warrants issued in conjunction with the company's recent acquisition of the assets of J. Higby's Inc.

The company said approximately 63 percent of 800,000 warrants scheduled to expire June 7, 1990, were converted into 503,000 shares of American Confectionery common stock. The remaining unexercised warrants will not be extended.

Currently trading are 300,000 outstanding Series B Warrants (NASDAQ: CNDYZ), also issued at the time of the J. Higby's acquisition. Each Series B Warrant entitles the holder to purchase one share of American Confectionery common stock at the purchase price of $3.00 per share until Sept. 5, 1990.

American Confectionery is a manufacturer and distributor of gourmet treats including nuts, candies, chocolates and frozen yogurt. The company is also the franchiser of J. Higby's Yogurt and Treat Shoppes, Morrow's Nut House, and House of Almond retail chains.

PARSIPPANY, NJ (JUNE 12) PR NEWSWIRE - General Public Utilities Corporation (NYSE: GPU) today announced that its board of directors amended the corporation's bylaws to exclude GPU from the following two provisions of the Pennsylvania Business Corporation Law enacted in March.

The control shares provision. In certain circumstances, this provision limits the voting rights of shareholders owning 20 percent or more of the voting stock of a Pennsylvania corporation.

The disgorgement provision. In certain circumstances, this provision permits a corporation to require 20 percent shareholders to give up their profits on the sale of their shares.

The GPU board took no action on the law's provision relating to the exercise of the board's fiduciary duty.

The provisions automatically apply to Pennsylvania corporations unless their bylaws are amended to exclude them.

Standley H. Hoch, chairman and chief executive officer of GPU, said, "GPU

has a deep commitment to enhancing shareholder value. Therefore, the board of directors felt it was inappropriate to deprive shareholders of their voting rights and profits under the circumstances provided in the Pennsylvania statute."

With respect to the fiduciary measures, Hoch added, "A public utility's statutory obligation to provide adequate and safe electric service to its customers has long been held to be consistent with the long-term interests of its shareholders. We believe that the board's response to the changes to the business corporation law will prove to be in the best interest of our shareholders."

General Public Utilities is a registered electric utility holding company with three operating subsidiaries: Jersey Central Power & Light Company, Pennsylvania Electric Company and Metropolitan Edison Company. The GPU System provides approximately 39 billion kilowatt hours of electricity for approximately 1.9 million customers.

#90163p5262 06/12/1990 ~PR Newswire

FORKED RIVER, NJ (JUNE 12) PR NEWSWIRE - Oyster Creek Nuclear Generating

Station has received a Systematic Assessment of Licensee Performance (SALP) report from the Nuclear Regulatory Commission (NRC).

The report covers a period from Feb. 1, 1989, to March 15, 1990. The report noted that improvements were made in the areas of plant operations and technical and engineering support while the plant's radiological controls program requires strengthening. The report pointed out that several programs for plantwide improvement have recently been put into place, but that sufficient time had not elapsed to allow improvements to be observed during the report period.

The NRC uses the assessment as a basis for allocating its resources to fulfill its regulatory responsibilities. It supplements the regulatory process that is used to ensure compliance with NRC rules and regulations. The assessment is similarly used by nuclear plant licensees to focus additional attention on areas needing improvement.

The NRC assessment is done by placing activities in categories 1 to 3, all of which indicate acceptable performance.

Category 1 is defined as "licensee management attention and involvement are readily evident and place emphasis on superior performance on nuclear safety or safeguards activities, with the resulting performance substantially exceeding regulatory requirements... Reduced NRC attention may be appropriate."

Category 2 is defined as "licensee management attention to and involvement in the performance of nuclear safety or safeguards activities are good. The licensee has attained a level of performance above that needed to meet regulatory requirements...NRC attention may be maintained at normal levels."

Category 3 is defined as "licensee management attention to and involvement in the performance of nuclear safety or safeguards activities are not sufficient. The licensee's performance does not significantly exceed that needed to meet minimal regulatory requirements...NRC attention should be increased above normal levels."

The NRC describes the SALP process as a means of expressing NRC senior management's observations and judgments, one that should not be limited to focusing on weaknesses. It is used by the NRC to clarify its observations of and insights into a licensee's performance and to identify common themes or symptoms. It is not intended to identify proposed resolutions or solutions to problems.

#90163p5264 06/12/1990 ~PR Newswire

YORK, PA (JUNE 12) PR NEWSWIRE - Sonoco Graham announced today that a new project with the Kendall/Amalie Division of Witco Corp. (NYSE: WIT) will put Sonoco Graham past its year-end goal for producing bottles made with recycled plastic.

Sonoco Graham, based in York, is the nation's largest manufacturer of high density polyethylene (HDPE) bottles and a leader in the use of recycled plastic.

Phil Yates, Sonoco Graham's senior vice president, said that Witco plans to convert its Kendall and Amalie motor oil brands to bottles made with recycled high density polyethylene (HDPE) plastic.

"When the Kendall/Amalie Fun-L-Fil bottles are in full production this summer, we'll be making bottles made with recycled plastic at a rate of more than half a billion bottles per year -- a goal we had set for the end of 1990," Yates said.

The Fun-L-Fil recycled bottles will be introduced nationwide this month, according to Sonoco Graham. At first, the bottles will contain 15 percent recycled material, Yates said because demand for recycled plastic is outstripping supplies.

He said the company fully expects to have a bigger percentage of recycled plastic in Witco's bottles as supplies increase.

The white Fun-L-Fil bottles will be made with plastic from used milk bottles. The unpigmented plastic from milk bottles is ideally suited for white and light colored bottles, Yates said.

In two test markets -- Indianapolis and Atlanta -- the new bottles will be readily identifiable, he said, because they'll carry a special "Bottle Made with Recycled Plastic" sticker.

The consumer demand for recycled plastic packages is one of the reasons Sonoco Graham is building a new $5 million plastics recycling plant in York, Pennsylvania. When it's completed this fall, the new plant will be capable of recycling 20 million pounds of old plastic annually -- the equivalent of 200 million used bottles.

A private company based in York, Sonoco Graham is 60 percent owned by the Graham Companies, a privately held group, and 40 percent owned by Sonoco Products Co. (NASDAQ: SONO), of Hartsville, S.C.

LANGHORNE, PA. (JUNE 12) PR NEWSWIRE - Cabot Medical Corp. (NASDAQ-NMS: CBOT) today announced the introduction of a new disposable surgical device which the company said will find broad use in the rapidly growing field of less invasive surgery and will add to the company's high margin disposable product lines used for these procedures.

The Cabot Medical/Corson Disposable Suction/Irrigation Probe(TM) enables the surgeon to efficiently irrigate and aspirate fluids surrounding the surgical site during laparoscopic procedures. One important unique feature of the Probe is a Hydrodissection Insert(TM) (patent pending) which allows the surgeon to easily adjust the irrigation flow from a gentle rinsing action to a jet stream facilitating the cutting of adhesions and the separation of organs from one another. Additionally, it in corporates a unique trumpet valve design which eliminates leakage and provides maximum suction/irrigation capability by eliminating clogging.

Finally, the disposable nature of the device simplifies operating room setup and cleanup and assures reliability during surgical procedures.

Cabot Medical Corp. designs, develops and manufactures medical devices for less invasive diagnostic and surgical procedures. The products are sold under the Cabot, Berkeley, KLI, Cryomedics and Ultroid trade names.

NEW YORK (JUNE 12) PR NEWSWIRE - In response to the computer industry's difficulty in dealing with the complex of issues surrounding the UNIX(R) operating system environment, and the need for more detailed product and market information, Datapro today introduced Volume II of "Datapro Reports on UNIX Systems and Software." The new volume includes enhanced coverage of the Open Software Foundation and UNIX International, as well as of major venders such as AT&T, Digital Equipment Corporation, IBM and Sun Microsystems.

The information service reports on vendors, products, issues and standards in addition to providing executive briefings on the following topics:

-- UNIX International's influence on AT&T's UNIX System V -- POSIX Standard updates -- Implementation of UNIX technology -- IBM RISC System 6000 Because value-added resellers (VARs) play a major role in the UNIX world, the new volume features an up-to-date directory of over 300 VARs. A section covers over 1,500 applications software profiles for engineering

and scientific products, vertical markets, and data management.

"Reports on UNIX Systems and Software" is designed for DP and MIS professionals, programmers, researchers and developers in academic, government and corporate communities. The monthly updated information service includes a newsletter that focuses on new developments and critical issues surrounding UNIX; reports that analyze different systems and products; and directories and profiles that encompass a broad spectrum of UNIX products and vendors.

The annual subscription price for "Reports on UNIX Systems and Software" is $799. For more information, contact Datapro Research Group, 600 Delran Parkway, Delran, NJ 08075, 800-328-2776 or 609-764-0100.

Datapro Research Group, a unit of McGraw-Hill, is the leading independent source of information on the computer, communications, and office automation industries.

UNIX(R) is a registered trademark of American Telephone & Telegraph Company (AT&T).

NEW YORK (JUNE 12) PR NEWSWIRE - Air Canada is offering a special fare on many of its flights between New York/Newark and Toronto/ Montreal/Ottawa this summer, which reflects discounts of up to 55 percent off the regular coach fares between the cities.

Effective for travel between July 1 and Aug. 31, 1990, the fares offer U.S. travelers the opportunity of a low-cost mini foreign vacation in some of Canada's most diverse cities. During the summer months Toronto, Montreal and Ottawa are alive with dozens of exciting festivals and special events.

Special "city tour packages" are available in all three cities, such as the "Toronto Alive" package priced from $225 per person (plus air fare), which includes three nights' accommodation and a dinner. The package also offers tickets to many of Toronto's famed theater attractions, including Phantom of the Opera, or to the home baseball games of the Toronto Blue Jays, at a supplementary cost.

The special round trip fares from New York/Newark: Toronto ($135) -- Montreal/Ottawa ($117) are subject to certain conditions including a 14-day advance purchase requirement and a minimum stay of the first Sunday

following departure.

The fares are available on selected Air Canada daily flights between LaGuardia and Newark airports and Toronto/Montreal/Ottawa.

Additional information and bookings are available through travel agents or by calling Air Canada.

DANBURY, CT (JUNE 12) PR NEWSWIRE - Union Carbide Chemicals and Plastics Company Inc. (NYSE: UK) (UCC&P) today announced that a major capital program related to the manufacture of polyols is nearing completion at its manufacturing facility in South Charleston, W.Va. The program will result in a 75-million-pound increase in polymer polyols capacity.

Included in the capital program, which is scheduled to be completed late this year, are general environmental process improvements and overall emission reduction programs.

"This capital program supports ongoing marketing and technology programs in slab; automotive; and coatings, sealants and adhesives markets," said John B. Hollingsworth, vice president-urethanes in UCC&P's specialty chemicals division. "The program gives us the capability to support the growth objectives for these critical market segments of the polyols business."

Late last year, ARCO Chemical Company reached agreement to purchase the worldwide urethane polyols and propylene glycols businesses of UCC&P's Specialty Chemicals Division, including the facilities affected by this capital program. The purchase is subject only to completion of applicable government reviews.

#90163p5275 06/12/1990 ~PR Newswire

BOSTON (JUNE 12) PR NEWSWIRE - U.N.A. Corporation (OTC) today reported the results of its operations for the nine months ended April 30, 1990. For the current nine-month period, a net loss of $1,546,000, 26 cents per share was reported, compared to net income of $390,000, 7 cents per share in the comparable nine-month period of last year. Revenues, which

consist primarily of commisssion income, were $2,745,000 compared to $4,857,000 in the nine-month period ended April 30, 1989.

A net loss of $623,000, 11 cents per share was reported for the third quarter compared to net income of $29,000, 1 cent per share in the comparable quarter ended April 30, 1989. Revenues, which consist primarily of commission income, were $851,000 compared to $1,410,000 in the prior year's quarter.

Seymour N. Schwartz, CEO, commented, "The decrease in revenues and the loss in the third quarter and nine months of fiscal 1990 was due to the continued weakness in the United States manufacturing sector which caused a weakened demand for the products sold by the company. This in turn resulted in competitive pressures on selling prices which resulted in decreased operating margins, the basis on which the company earns its revenues. The company is continuing to make every effort to control its expenses and improve the results of operations.

As previously reported the company had announced that it has signed a letter of intent for a merger with Okura & Co. (America), Inc. or its nominees. The transaction is subject to the execution of a definitive merger agreement in form and terms mutually satisfactory to both parties and duly approved by their respective board of directors. If the definitive agreement is executed it will contain appropriate provisions for the convening of a meeting of the stockholders of the company to vote on the merger."

U.N.A. Corporation is a leading distributor and processor of specialty steels.

LOWELL, MASS. (JUNE 12) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WGL) today introduced enhancements to its VS Systems Network Architecture (SNA) Emulation products.

Wang's VS SNA Emulation Release 2.70 broadens the comprehensive set of communications software products that enable Wang VS computer systems to emulate the features of IBM communications controllers and attached peripherals.

VS SNA Emulation Release 2.70 features integration with Wang OFFICE, a set of office information management and electronic mail applications. The new version of VS SNA Emulation also allows users to receive Wang OFFICE message alerts while in a VS SNA Emulation session.

"Providing VS SNA users with the added functionality of Wang OFFICE notification is another example of Wang's ability to bring innovation to industry standards," said Dennis Francoeur, Wang's director of IBM coexistence products.

Mellon Bank (NYSE: MEL) in Pittsburgh served as a beta site for VS SNA Emulation Release 2.70. "Wang's emphasis on quality is clearly evident with this new release of VS SNA," said Terry Decker, assistant vice president at Mellon Bank. "We tested all aspects of the product and it proved to be an extremely solid offering with highly desirable options."

NORTH WHITE PLAINS, NY (JUNE 12) PR NEWSWIRE - Fingermatrix, Inc. (NASDAQ: FINX), announced today that it has raised over $2 million through private offerings. Fingermatrix is proceeding with its offerings to strengthen working capital needs, to prepare for shipping against its current orders, and to establish a relationship with a partner.

Over the past several months, Fingermatrix has significantly reduced its projected operating overhead reflecting the company's commitment in transforming itself from a development stage company to a company focused on achieving rapid sales growth on its finished product line.

This process is expected to be completed during the current fiscal year as the company places a major emphasis on increasing its order backlog, responding to Requests for Proposals (RFP) with larger corporations (to absorb the costs involved in the RFP process), and securing a strategic partner. Fingermatrix anticipates that a major partner will provide the impetus for dramatically increasing its order backlog as well as providing global sales/marketing opportunities and financial stability.

Fingermatrix has recently announced orders from NEC Technologies, Inc., a subsidiary of Nippon Electric Corporation (NEC), for nine Z1050R live scan finger terminals with a total purchase price estimated at over $450,000 and a $407,000 contract from UNISYS Corp. to provide a central automatic fingerprint matching system and 32 live scan finger readers at several locations within Suffolk County, N.Y.

Fingermatrix, Inc., is a world leader in state-of-the-art automated fingerprint technologies, with system applications ranging from access control to law enforcement.

CONTACT: Scott G. Schiller of Fingermatrix, 914-428-5441; or Debra Berliner of Georgeson & Company, 212-440-9801, for Fingermatrix.

#90163p5279 06/12/1990 ~PR Newswire

NEW YORK (JUNE 12) PR NEWSWIRE - Ramtron Australia Ltd. (NASDAQ: MEMRY) announced that its majority owned microelectronic subsidiary, Ramtron International Corporation, based in the United States, has completed construction, received cleanroom certification, and is installing equipment at its new $20 million headquarters in Colorado Springs, Colo.

The facility includes a production plant for the design and manufacture of a new generation of patented microelectronic memories based on the Ferroelectronic Random Access Memory (FRAM) technology, patented by Ramtron.

The 70,000 sq. ft. facility is scheduled to begin operation in August 1990 with initial production of Ramtron's 1 kilobit - 16 kilobit FRAM product family which is currently undergoing engineering characterization. First samples will be provided to over 400 companies worldwide who have asked to purchase these first generation FRAM products.

Employment during initial production is expected to increase to 120 people further increasing to 220 people for a full production output of approximately $100 million per year. Ramtron also has an option on 26 acres adjacent to its present 6-acre site to allow for expansion with the construction of a 100,000 square foot manufacturing plant as demand dictates.

Additional FRAM manufacturing capacity is also being brought up to production status at ITT's semiconductor facility in West Germany and at Seiko-Epson's semiconductor manufacturing operations in Japan. The total combined manufacturing output of these three facilities, when fully operational, should provide Ramtron with adequate manufacturing capacity to meet initial product sales.

Ramtron's move into its new building, one of the most advanced semiconductor memory facilities in the United States, will enable the company for the first time to centralize equipment and technical personnel who have been operating in five separate buildings. At full operation, the new facility will be capable of producing sub-Micron 16 megabit (16 million bits per chip) density memory products.

Additionally, Ramtron's 4 megabit (4 million bits per chip) Dynamic Random Access Memory (DRAM) being designed and co-developed for licensed manufacturing by NMB Semiconductors of Japan is undergoing characterization. This 4mb CMOS DRAM, currently the world's fastest, is

scheduled to enter volume production in NMB's soon-to-be-completed $350 million manufacturing facility in Tateyama, Japan. Commercial sales are scheduled to begin during the second half of 1990. Worldwide sales and distribution of this product will be conducted by Intel, the world's largest manufacturer of microprocessors. Ramtron's royalties from the sale of this product are scheduled to commence at that time.

Geoff Lee, a director of Ramtron Australia, stated that the board of directors would be recommending that shareholders approve a private placement of up to US$10 million by issuing up to 5 million special preference shares at US$2 per share. This new capital will enable Ramtron Australia to continue to maintain its majority ownership control of its U.S. subsidiary, Ramtron International Corporation. The funds will be used to repay debt and meet working capital requirements in the 1990-91 years.

US$5 million will be taken up by Oren Benton of Denver, Colo., whose business interests are in banking, resource trading and venture capital. Benton has provided ongoing financial support to Ramtron during the last three years. He would also be subscribing for US$10 million in redeemable preference shares in Global Alliance Pty. Limited for 49 percent of the voting shares in a capital restructuring and retiring of long term debt obligations of Ramtron's largest shareholder.

Shareholders will be asked to approve these transactions, and documentation, including independent advice from Coopers & Lybrand (Securities) Limited that the transactions are fair and reasonable, will be in the hands of Ramtron Australia shareholders shortly.

Ramtron Australia Ltd., through its majority owned subsidiary Ramtron International Corporation, develops leading-edge semiconductor memory products based on proprietary ferroelectronic materials and advanced processing and design technologies. Ramtron's products include non-volatile Ferroelectronic Random Access Memories (FRAMs) and high-performance Dynamic Random Access Memories (DRAMs).

CONTACT: Ross Lyndon-James of Ramtron International Corp., 212-752-1717, or Matthew Haines or Mark Cohen of Cameron Associates, 212-683-4545, for Ramtron Australia.

LITTLETON, CO (JUNE 12) PR NEWSWIRE - Bingo King Co. Inc. (NASDAQ: BNGO) has announced the election of a new director and a new vice president finance and administration and chief financial officer.

In addition, Leonard A. Stuart, chairman of the board and chief executive

officer, was elected to the additional position of president.

Brian E. Baker was elected director by the stockholders of the company at the annual meeting of the stockholders held on June 4, 1990. Baker succeeds Edward G. Bradley, former president and chief operations officer of the company, who resigned as a director on May 22, 1990 in order to devote more time to his other business interests. Stuart stated that Baker the third largest stockholder of the company, "is an individual with a long and distinguished business career who complements well the other board members."

Richard H. Ellison, controller of the company since December 1986 and secretary since March 1989, was elected to the positions of vice president finance and administration, chief financial officer and treasurer. Ellison will retain his position as secretary of the company. Ellison succeeds John A. McCray who resigned to pursue other business interests.

Stuart stated that he was "pleased with the additions of Mr. Baker and Mr. Ellison" and confident that the "significant experience and expertise of the company's board of directors and senior management team will enable the company to continue its growth pattern."

Stuart also expressed his gratitude to Bradley and McCray for their significant contributions to the company and wished them every success in their new endeavors.

Bingo King is the leading manufacturer of supplies and fund raising products associated with the game of bingo.

#90163p5281 06/12/1990 ~PR Newswire

NEW BRIGHTON, PA (JUNE 12) PR NEWSWIRE - Tuscarora Plastics Inc. (NASDAQ: TUSC) today reported record results in sales and net income for its third quarter ended May 31, 1990.

Net sales were $22.4 million, an increase of 11 percent over net sales of $20.1 million for the same quarter a year earlier. Net income was $1.3 million, compared with $1.1 million for the same period a year earlier, an increase of 10 percent. Earnings per share increased 11 percent to $.42, compared with $.38 per share earned during the third quarter of fiscal year 1989.

For the nine months ended May 31, 1990, net sales were $64.7 million, an increase of 15 percent over net sales of $56.1 million for the same period a year earlier. Net income was $3.7 million, an increase of 14 percent

over net income of $3.2 million for the first nine months of fiscal year 1989. Earnings per share for the period also were up 14 percent to $1.23, compared with $1.08 per share for the same period a year earlier.

The company attributes the increase in net sales for the quarter to continued strength in most of the markets it serves. The increase in net sales for the quarter and nine months ending May 31, 1990, was augmented by the acquisition of a similar business in November 1989.

Tuscarora also announced that its regular semiannual dividend will be increased to $.13 per share from $.12 per share, bringing the annual dividend rate to $.26 per share, an increase of 13 percent over the annual dividend rate of $.23 per share for fiscal 1989. The dividend is payable July 2, 1990. This will be the 17th consecutive year the company has increased its annual dividend rate.

The company also announced that on May 4, 1990, it had purchased the cushion packaging business of Cellox Corp. of Reedsburg, Wis. The company expects the purchase will add approximately $2.0 million to its annual net sales volume.

Tuscarora Plastics is the country's largest manufacturer of custom-molded foam plastic products made from expanded polystyrene, polypropylene, polyethylene and related co-polymer foams. The company's products are sold to a wide variety of customers for use with both consumer and industrial goods. It currently operates 23 manufacturing facilities east of the Mississippi River.

HOUSTON (JUNE 12) PR NEWSWIRE - Tenneco Inc. (NYSE: TGT) said that the central agreement its J I Case unit reached with the United Auto Workers on June 3 was ratified late Friday by a majority vote of Case UAW members. Exact results of the voting were not announced.

The 40-month master contract, which will expire on Oct. 3, 1993, covers approximately 5,100 active and laid-off UAW employees at Case facilities in Racine, Wis.; East Moline and Hinsdale, Ill.; Burlington, Iowa; St. Paul, Minn.; and Southaven, Miss.

The agreement continues the 100 percent job guarantee provisions of the previous contract and renews the parties' joint commitment to employee involvement. It also provides the company with additional flexibility in work assignments, and contains increases in wages, pensions and insurance coverage during the term of the agreement.

Richard D. Sibbernsen, Case senior vice president of corporate relations, said the company was "very pleased" with the vote to ratify, noting that "the agreement contains positives for both sides."

"This agreement gives our UAW employees continued job security, a competitive economic package, and improved pension and medical insurance benefits," said Sibbernsen. "At the same time, it provides the company with greater flexibility in its manufacturing operations and lays the groundwork for the continued cooperation and commitment to quality needed to compete successfully in the world market for agricultural and construction equipment."

A unit of Tenneco Inc. of Houston, Case is a leading worldwide maker of agricultural and construction equipment.

Tenneco is a diversified industrial corporation with major business interests in shipbuilding, automotive parts, packaging, chemicals and minerals.

HAUPPAUGE, NY (JUNE 12) PR NEWSWIRE - Pharmetics, Inc. (NASDAQ: PHRM), a leading manufacturer of new and remanufactured sterilization equipment, washers and dryers, has received the largest single contract in the

company's history totalling $1.7 million.

The Burroughs Wellcome Company of Greenville, N.C., has selected Pharmetics to manufacture all process sterilization equipment for its new "totally computerized" sterile products manufacturing facility. Several specialized microcomputer-operated autoclaves will sterilize the manufacturing components used in its sterile manufacturing process.

Burroughs Wellcome has also selected the Pharmetics Cascading Spray Terminal Sterilizer for its injectable product sterilization. Pharmetics developed these unique spray sterilizers to reduce operating costs while maintaining compliance with stringent FDA "Good Manufacturing Practices" (CGMP) guidelines.

Pharmetics, Inc. of Hauppauge, recently move to a new expanded 40,000-square-foot manufacturing facility. The company's unprecedented sales backlog will enable them to produce the full range of sterilization and glassware washing products more efficiently.

#90163p5301 06/12/1990 ~PR Newswire

MODESTO, CA (JUNE 12) PR NEWSWIRE - Ragu Foods, under pressure from federal and state authorities who believe the company is misleading consumers, has told the U.S. Food and Drug Administration (FDA) that it "is prepared to make certain labeling changes" in its Fresh Italian product line.

The unit of Chesebrough-Ponds Inc., in a recent letter to the FDA, said "Ragu is willing to revise the labeling of Ragu Fresh Italian institutional packs to indicate in an appropriate way, to be agreed upon between the FDA and the company, that the product is made from remanufactured tomatoes." No such addition would appear on retail products.

Bob Ilse, a member of the California Tomato Fresh Packers Coalition which first brought Ragu's labeling practices to the attention of the FDA, said "We are pleased that Ragu may prominently display on institutional labels the fact that its product is made from a remanufactured concentrate, but why not do the same for retail customers?"

Ilse, who is chief operating officer of Stanislaus Food Products of Modesto, Calif., commented that "The FDA and state authorities still have a job to do -- and that is to ensure that Ragu and others are not allowed to deceptively use the word 'fresh' on their labels."

Ragu's offer, contained in a May 23 letter to Janice P. Oliver, director of the FDA's Division of Regulatory Guidance, also said that Ragu "is willing to add the word 'brand' after the trade name Ragu Fresh Italian."

Ilse countered, "Adding the word 'brand' does not turn an otherwise false claim into a truthful one."

The FDA first wrote a regulatory letter to Ragu on April 3, citing Ragu with six violations of the Food, Drug and Cosmetic Act. Earlier, Congressmen Henry A. Waxman, D-Calif., and Edward R. Madigan, R-Ill., several national consumer organizations including the Public Voice For Food & Health Policy and the National Consumers League, and state regulatory agencies in Texas, Florida and New York protested Ragu's use of the term "fresh" to describe a heat-processed and remanufactured product. In its letter, the FDA threatened Ragu with regulatory action, including product seizure, if the tomato processor did not begin to address the violations.

The New York State Department of Agriculture and Markets similarly threatened Ragu in a May 17 letter which ordered the company to "remove this violative product from sale within this state by June 16, 1990."

#90163p5302 06/12/1990 ~PR Newswire

WHITE PLAINS, NY (JUNE 12) PR NEWSWIRE - When NYNEX Corp. (NYSE: NYN) wants to deploy a new intelligent network service, it uses a unique, customized version of the Network Services Test System (NSTS) to catch tiny glitches and bugs before they can do any harm to the customer or the network.

NYNEX said it has taken a basic test system developed by Bell Communications Research Corp. (Bellcore) and expanded it to perform total functional testing of Signaling System 7 intelligent network services and capabilities before, during and after they are deployed.

"We have taken Bellcore's system and added our own customized software to ensure whichever feature or service is introduced can be integrated into our network and will meet the unique needs of our customers," said Bruce Johnson, staff director-common channel signaling, and head of the team that uses the new test system at NYNEX.

NYNEX felt it could not afford to be limited by Bellcore resources, test plans and testing schedules.

"We had to be certain we could deploy a new piece of vendor equipment when

we wanted to and assure ourselves that it performed in harmony with the rest of the network," said Johnson. "This involves testing hundreds of functions connected with intelligent network services.

"We simply could not afford to leave all the testing responsibility in Bellcore's hands," he added. "They do not have the manpower to do the nitty-gritty analysis that we need to assure the integrity of our network."

The heart of the new test system is the network test controller (NTC), a minicomputer which controls the NSTS test equipment. Local test units (LTUs) are connected to the NTC via a Datakit Packet Network or dial-up lines. They can be programmed to originate, terminate or monitor SS7 messages or to perform traditional trunk and line signaling functions.

Under the control of the NTC, the test units can be used to simulate the network, and respond to and monitor network operations. LTUs are equipped with a satellite clock to provide precise timing and allow performance measurements down to the millisecond level. The satellite clock is a common clock used for precise synchronous timing.

"One of the great advantages of this new test system is that we can do 'regression' testing, for example, before updating or adding a new generic to an existing switch program," Johnson noted. "This kind of test enables you to discover the tiny glitches that could otherwise cause major problems in the network further down the road."

WEST ORANGE, NJ (JUNE 12) PR NEWSWIRE - Micro Healthsystems, Inc. (NASDAQ: MCHS), a manufacturer of Bedside Nursing Patient Care Systems and Healthcare Financial Management Systems, today reported fiscal 1990 earnings 147 percent greater than the prior year.

"This result was about 10 percent above our forecast earlier in the year," S. M. Caravetta, chairman and chief executive officer, reported today.

Net revenues for the fiscal year ended March 31, 1990, rose 40 percent to a record of $7,449,000 from $5,321,000. Net earnings, up 147 percent, were a record $911,000 or $.49 per share on a weighted average 1,862,000 shares outstanding, compared with $369,000 or $.21 per share on 1,830,000 weighted average shares outstanding the year before.

The increase in the number of shares reflects the exercise by public shareholders of 338,825 warrants at $5 per share on Nov. 14, 1989.

For the fourth quarter ended March 31, 1990 net revenues were a record $2,311,000, up 88 percent from $1,226,000 in the comparable period the year before. Net income was $.14 per share as compared to $.01 per share in the similar quarter of fiscal 1989.

"With more than 4,000 Medtake(R) bedside units installed or contracted for at 29 healthcare clients, Micro Healthsystems is the clear leader in this burgeoning marketplace," Caravetta said.

"Our recent marketing agreement with IBM of our proprietary software for their clinical workstation hardware entry into this market broadens our reach, as we attempt to capitalize on our dominant position in a potential market of 1.3 million U.S. hospital beds. This alliance preserves our marketing strategy of offering the Medtake hardware/software system at a cost of $2,100 to $2,800 per bed, while also permitting the migration of our software into the higher priced IBM hardware," Caravetta said.

Caravetta noted also that "Our financial packages for outpatient programs at healthcare clients experienced a record year in sales and profits, and we intend to exploit this opportunity as well."

The company's Healthcare Financial Management products include an Inpatient Management System; an Integrated Hospital Financial System; a Home Care Management System; a Physician's Billing and Management System for hospital-based and private physician group practices; and a Facilities Management program for out-patient billing and accounts receivable to hospitals, utilizing MICRO Healthsystems' own staff.

NEW YORK (JUNE 12) PR NEWSWIRE - Thomson McKinnon Asset Management L.P.

(TMAM) today announced the appointments of Paul H. Troyer, Jr., Edward C. Ittner, and David Gard as the regional vice presidents for the Pacific, Northeast, and South Central regions of the U.S., respectively.

TMAM, an investment management firm with more than $6.5 billion in assets on behalf of mutual funds and private accounts, is aiming to increase its distribution of retail mutual fund products through broker/dealers across the nation by expanding both its field marketing effort and dealer marketing desk.

TMAM currently distributes the Thomson McKinnon Investment Trust (TMIT), a family of nine open-end mutual funds, solely through Prudential-Bache Securities, and expects to make TMIT available to other broker/dealers later this summer. The appointments of Troyer, Ittner, and Gard are in line with TMAM's new marketing thrust. They join William Lynch in the southeast and Paul Moody in the North Central regions, both of whom have been with TMAM for several years.

John O. Leasure, TMAM's executive vice president and chief operating officer, commented, "We welcome Paul, Ed and Dave to our team. They all come to us with years of experience and industry knowledge, and we are excited about the work they plan to do within their respective regions. Our goal is to forge ahead in the marketplace and continue to provide high levels of service and performance to brokers and investors."

Troyer, who was formerly an executive vice president and national sales manager for Metric Capital Corporation (an affiliate of Metropolitan Life Insurance Company), has had 18 years of experience in the field. As the TMAM regional vice president for the Pacific region, he will be responsible for the states of California, Alaska, Hawaii, Idaho, Montana, Nevada, Oregon, Utah, and Washington.

Ittner was formerly a senior vice president and Eastern U.S. sales and marketing manager for Metric Capital Corporation (an affiliate of Metropolitan Life Insurance Company). As the TMAM regional vice president for the Northeast region, he will be responsible for the states of Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

Gard was formerly the national marketing director for CRI, Inc. As the TMAM regional vice president for the South Central region, he will be responsible for the states of Arizona, Arkansas, Colorado, Kansas, Louisiana, Missouri, New Mexico, Oklahoma, Texas, and Wyoming.

In addition to the TMIT family of mutual funds, TMAM also manages and administers the Cash Accumulation Trust (A family of three money market funds), and the Thomson McKinnon Accumulation Plan Trust (five funds which serve as the underlying investment for a variable annuity contract). TMAM

also serves as advisor to private accounts through its Columbus Circle Investors division (Stamford, Conn.), and its Foxhall Investment Management division (Washington, D.C.).

#90163p5310 06/12/1990 ~PR Newswire

JAMESTOWN, NY (JUNE 12) PR NEWSWIRE - Electronic Technology Group, Inc. (NASDAQ: ETEK; BSE: ETE) announced today that it has acquired certain assets and the business of Liberty Engineering, Inc. of Waltham, Mass.

The acquisition of Liberty Engineering by Electronic Technology Group was accomplished through a combination of cash, notes and restricted stock, which if certain earnings benchmarks are attained during the next three years, will total approximately $1.1 million.

Electronic Technology Group is a manufacturer of high-quality, high-reliability electronic assemblies for original equipment manufacturers. In addition to the production of specialized power supplies Liberty Engineering performs extensive engineering for its customers. Certain current Liberty Engineering customers include Digital Equipment Corp., C.R. Bard and Raytheon.

Edmond Lonergan, the president of Electronic Technology Group, said, "The acquisition of Liberty Engineering to the Electronic Technology Group family provides increased customer service and production capabilities in the New England market." Electric Technology Group, Inc. also owns and operates E.J.E. Research Corporation of Buffalo and Moog Music Manufacturing Inc. of Jamestown.

James G. Bath, president and founder of Liberty Engineering, has agreed to stay as president of the newly formed Liberty Engineering subsidiary of Electronic Technology Group, Inc. Frank T. Costanzo, CEO of Electronic Technology Group stated that he was pleased that Bath had agreed to continue to lead Liberty Engineering through its next phase of growth.

Curt B. Westrom, CFO of Electronic Technology Group, Inc., indicated that based upon Liberty Engineering's historical results of operations acquisition was anticipated to add approximately $3 million in revenues and approximately $400,000 in additional pre-tax earnings, respectively, to Electronic Technology Group on an annual basis.

Bath stated that he was very pleased to become a part of a dynamic growth company like Electronic Technology Group, Inc. Bath continued that he was pleased to be able to bring to Liberty customers more and varied services

and capabilities.

#90163p5311 06/12/1990 ~PR Newswire

MELROSE PARK, IL (JUNE 12) PR NEWSWIRE - Alberto-Culver Company (NYSE: ACV) today announced a major new capital investment in the United Kingdom in response to its strengthening European business.

This strategic move is being made to better equip the company's operations in Europe to meet the opportunities and challenges that the evolution of the European Common Market and the opening of other European markets represent for Alberto-Culver's already well-established European business. Sales of the U.K. division have doubled in the last three years.

Central to the expansion plan is the construction of a 140,000 sq. ft. factory and warehouse facility in Swansea, South Wales, by Alberto- Culver Company (U.K.) Ltd., the subsidiary responsible for European consumer product activities.

The company will invest more than $17 million to provide state-of- the-art manufacturing and distribution facilities for the anticipated rapid growth of Alberto-Culver Company (U.K.) Ltd.'s retail and professional hair care business throughout Europe, through the year 2000. The factory will be constructed on an 11-acre site leased from the Swansea City Council in what is an important Enterprise Zone and Development Area of the U.K.

The project will be funded partly by a capital injection from the U.S. parent company, and partly by local financing. The company will also receive a Regional Selective Assistance Grant from the Welsh Office towards the cost of the project, and has negotiated favorable terms with Swansea local authorities.

The factory is scheduled to be completed by autumn of 1991. At that time the U.K. company's production activities will be transferred from the current facility in Basingstoke, Hampshire, which will be closed. Appropriate measures will be taken to assist and protect the interest of any staff members who do not wish to accept the company's relocation program.

#90163p5313 06/12/1990 ~PR Newswire

NEW ROCHELLE, NY (JUNE 12) PR NEWSWIRE - Micro Bio-Medics, Inc. (NASDAQ: MBMI) told shareholders at the company's annual meeting here today that for the fiscal year ending Nov. 30, 1990, it expects to once again achieve record sales and earnings, despite what appears to be a marginally lower or flat second quarter ended May 31, 1990, primarily attributable to investment costs associated with several small acquisitions made during the course of the last six months which will result in increased future sales and profitability, according to Bruce J. Haber, president.

Haber noted, "These acquisitions provide Micro Bio-Medics with a customer base in geographic areas previously untouched by the company and with the expenses of integrating those operations into our existing facilities behind us, we can concentrate on expanding upon these new client bases which will reflect in greater sales and earnings." Haber also attributed the company's growth to its strategy of moving away from the lower margin hospital base business to the higher margin alternate care market which includes doctors in their offices and sports medicine customers.

For the fiscal year ended Nov. 30, 1989, Micro Bio-Medics had sales of $40,291,619 and net income of $555,007, or 11 cents per share. In last year's second quarter, Micro Bio-Medics had sales of $9,710,529 and net income of $95,175, or 2 cents per share.

At the annual meeting, shareholders unanimously approved the re- election of the company's four directors for the term of one year. They are Bruce J. Haber, president of the company; Marvin S. Caligor, consultant to the company and founder of the company's Caligor division; Renee Steinberg, secretary to the company; and K. Deane Reade Jr., managing director of John Hancock Capital Growth Management, Inc.

Micro Bio-Medics, headquartered in Mount Vernon, N.Y., is a leading supplier of thousands of medical and pharmaceutical products to doctors in their offices, nursing homes, hospitals and government agencies. In additional, the company is the nation's largest distributor of sports medicine supplies to professional sports teams, schools and colleges.

ARLINGTON, VA (JUNE 12) PR NEWSWIRE - USAir has announced that five high school students are winners of $1,000 Leslie O. Barnes Scholarships

presented annually to children of USAir employees.

Winners are: -- Mark Anthony of Carnegie, Penn., a 1990 graduate of Carlynton High School. He is the son of Donald Anthony, a lead inspector with USAir in Pittsburgh.

-- LaShanda Yvette Brown of Winston-Salem, N.C., a 1990 graduate of Carver High School. She is the daughter of Judy Brown, a USAir intermediate clerk, Revenue Accounting, in Winston-Salem.

-- Richard Joseph Thomas Gorniak of Abilene, Texas, a 1990 graduate of O.H. Cooper High School on June 1. He is the son of Greg Gorniak, a USAir first officer based in Pittsburgh.

-- Kerri O'Donnell of Orchard Park, N.Y., a 1990 graduate of Orchard Park High School. She is the daughter of William Kenneth O'Donnell, a USAir customer service agent at Buffalo International Airport.

-- Thomas Delaney Santoro of King, N.C., a 1990 graduate of South Stokes High School. He is the son of Brenda Santoro, USAir senior clerk, Revenue Accounting, in Winston-Salem.

The scholarships are awarded in honor of Leslie O. Barnes, who served as president of USAir's predecessor company, Allegheny Airlines, from 1953 to 1975. The scholarships are supported by employee contributions and matching funds from USAir.

CONTACT: USAir Corporate Communications, 703-418-5100 or 213-417-1294 (Western Region).

#90163p5321 06/12/1990 ~PR Newswire

ATLANTA (JUNE 12) PR NEWSWIRE - Scientific-Atlanta Inc. (NYSE: SFA) has received orders for a 30-channel headend and set-top terminals from Comment Cablevision, a partnership between U.S. Cable Corp. and U.S. West.

The PAL I headend incorporates Scientific-Atlanta's satellite receivers, video modulators and video processors. The set-top order is for Scientific-Atlanta's Model 8592 addressable set-top terminals. The equipment will be installed in Comment Cablevision's Tyneside franchise, the third-largest franchise awarded in the U.K. When completed, the system will serve approximately 340,000 homes.

Mark McGraw, operations manager of Comment Cablevision, indicated that Scientific-Atlanta PAL I headend equipment was selected because of the product's quality and performance characteristics. "We chose the Model 8592 converter because of our favorable experience with Scientific-Atlanta

subscriber equipment in the U.S. Not only does the 8592 offer enhanced baseband scrambling for signal security, but it also features the user friendliness and subscriber options -- volume control remote, complete remote control -- that we want to provide to our U.K. subscribers."

Scientific-Atlanta offers a complete line of signal processors, demodulators and accessories for NTSC and PAL formats to ensure that high-quality video and audio are available for distribution. Headends containing multiple channels can be easily configured to meet a variety of requirements.

The 8592 set-top terminal is designed specifically to meet U.K. market requirements. The one-way addressable terminal is NICAM stereo and teletext transparent and features some of the most flexible interface options with home audio and video systems. The 8592 provides volume control with a visual sound level indicator. Other features include 10 downloadable PLL-stabilized UHF output channels, eight-event 14-day VCR program timer, last channel recall and favorite channel memory.

The unit comes ready to handle PPV purchasing activities with a one-touch BUY function and can be upgraded for IPPV through the addition of an electronic module. In addition, it incorporates the latest in baseband scrambling technology to provide high-level signal security.

Scientific-Atlanta Inc. is a leader in cable television electronics, satellite-based communications networks and instrumentation for industrial telecommunications and government applications.

ARLINGTON, TEXAS (JUNE 12) PR NEWSWIRE - BizMart, Inc., (NASDAQ-NMS: BZMT) one of the nation's fastest-growing office products superstore retailers, today announced that Dean Groussman, the president, chief executive officer and a director of Canadian Tire Corporation, Limited, has been appointed to BizMart's board of directors.

"Mr. Groussman's retailing experience will be invaluable to BizMart during this time of extremely rapid growth for our company," said Ron Stegall, BizMart's president and chief executive officer.

As CEO of Canadian Tire, Groussman directs a multi-billion dollar retail chain of large format stores offering automotive products and services, and home and leisure products through a network of over 400 dealer-operated stores across Canada. He has also been associated in retail management capacities with the Target store division of Dayton

Hudson, the Venture store division of May Department Stores and various divisions of Zale Corporation.

BizMart, Inc., operates a chain of high-volume office products superstores in Texas, Missouri, Kansas, Colorado, Arizona, Nevada, New Mexico and Utah. Over 7,000 brand-name, high-quality products are sold to small and large businesses at everyday low prices that are discounted 40 to 60 percent from manufacturers' suggested retail prices.

#90163p5326 06/12/1990 ~PR Newswire

FARMINGTON HILLS, MICH. (JUNE 12) PR NEWSWIRE - Anti-lock braking systems (ABS), an automotive safety technology virtually unknown to most American car buyers five years ago, will become as commonplace as the seat belt or rear-view mirror by the year 2000, according to Robert Bosch Corporation, a leading supplier of ABS.

"The growing interest and awareness among Americans of ABS -- once viewed as an 'invisible' safety option that wouldn't sell -- is fueling a trend that may impact highway safety more than any other device used in the past 40 years," said Leo L. Weber, president of Bosch's Automotive Group.

ABS uses microprocessor technology to enhance driver control by preventing a car's wheels from locking up during emergency braking situations or inclement conditions such as rain, ice or snow.

ABS Prevents Accidents Anti-lock braking systems, like the Bosch four-wheel, full-function system, can actually help drivers prevent or avoid accidents, unlike the passive restraint systems, which just protect the driver and passengers after an accident is in progress.

"Twenty-four million auto accidents occurred last year in the U.S. ABS has the potential to prevent many of these accidents, save thousands of lives and prevent injuries -- all of which cost drivers, and the economy as a whole, billions of dollars each year," Weber said.

Studies conducted in Europe, where more vehicles than in the U.S. feature ABS, indicate that widespread ABS usage might reduce accidents by 10 to 15 percent. Applying that to the United States, where an estimated 24 million accidents claim 49,000 lives and cost $68.9 billion in economic losses each year, such a reduction could indicate the saving of 5,000 lives and $7 billion.

In addition to automotive equipment, Bosch is a worldwide name in communications technology, consumer goods and capital goods.

MORRISTOWN, NJ (JUNE 12) PR NEWSWIRE - Recycling Revenue(SM), a pioneering plastics recycling program initiated by Allied-Signal Engineered Plastics and its employees, will donate all proceeds from the program to Morristown-area charities, Ronald C. Lawwill, vice president and general manager, announced at the program's inauguration here today.

As part of the ceremonies, Lawwill oversaw the production of the first 50-pound bale of recycled plastic containers by a customized, compacting baler installed at its Morristown headquarters. Allied-Signal Engineered Plastics will donate the average market price for recycled plastics collected in the Recycling Revenue program to charities.

"We're relying entirely on the efforts of our own employees to supply the plastic containers needed to keep the baler running," Lawwill said. The plastics are PET (polyethylene terephthalate) from soda bottles and HDPE (high-density polyethylene) from milk jugs. Allied-Signal employees deposit the containers in three large collection bin locations on the corporate grounds.

"Ultimately, everyone benefits from the Recycling Revenue program," said Lawwill. "The Morristown area, in general, benefits because plastics are being removed from the waste stream. Charities benefit because of the revenue generated. And business benefits because recycled plastics are an economical source of materials for new industrial products."

In his remarks, Lawwill noted that the Recycling Revenue program is based on experience gained by establishing pilot plastics recycling programs between Allied-Signal Engineered Plastics and the Pennsylvania communities

of Pottsville and West Chester.

In those programs, Allied-Signal donated the use of bottle balers and agreed to purchase the bales of PET bottles and HDPE jugs collected in the communities' curbside recycling programs.

"Communities can reduce their costs by intercepting plastics from the waste stream before they reach the landfill, the recycling programs and charities can earn revenue, and we can reclaim the plastics as feedstock. And in a world where the plant and equipment costs to produce new materials have become so high, it just makes good business sense to look to the waste stream as a source," Lawwill said.

Lawwill expressed his and Allied-Signal Engineered Plastics' intent that the Recycling Revenue program serve as a model and driving force for establishing similar programs between Allied-Signal Engineered Plastics and other qualified communities and charitable organizations.

Allied-Signal Inc. (NYSE: ALD) is an advanced technology company with businesses in aerospace, automotive products and engineered materials.

#90163p5329 06/12/1990 ~PR Newswire

CHICAGO (JUNE 12) PR NEWSWIRE - Popular TV star Connie Sellecca has agreed to sign her name to an exclusive new line of Montgomery Ward women's career apparel which will include unstructured related separates as well as slacks, blouses, sweaters and jackets.

The line, which will be available in Montgomery Ward stores in mid-August, also includes fine jewelry -- specifically gemstones, gold bracelets, necklaces and earrings. Beginning in October, Montgomery Ward will add intimate apparel to the Connie Sellecca line.

Sellecca was selected from among 50 celebrity names tested because of her national appeal and credibility. She joins tennis phenomenon Chris Evert and top fashion model Elle MacPherson in Montgomery Ward's aggressive plan to provide celebrity endorsed, contemporary, quality apparel at affordable prices, said Chairman and Chief Executive Officer Bernard F. Brennan. In April, the company announced that Evert had agreed to sign her name to a new line of women's apparel to be designed and manufactured by Colonial Corp. and marketed by Montgomery Ward. In May, the retailer announced plans for the "ELLE MacPHerson" line of sportswear.

Sellecca. who began her career as a fashion model, has become familiar to TV fans after four series and a host of TV movies in 12 years. Her

popular series included "The Greatest American Hero," and "Hotel," in which she co-starred with James Brolin. Her TV movies include "The Last Fling" with John Ritter, "Miracle Landing" with Wayne Rogers and, most recently, she appeared as Ruby Nolte Renthal in "People Like Us," NBC's four-hour miniseries based on Dominick Dunne's best-selling novel. Sellecca has a new sitcom, "Baby Talk," which is based on last year's hit movie "Look Who's Talking," and will be appearing on ABC this Fall.

"Our introduction of celebrity lines goes hand-in-hand with our greater emphasis on quality and contemporary styles in our apparel merchandise," Brennan said. "This is a continuation of Montgomery Ward's plan to position its apparel strategy as a value-oriented specialty business."

STAMFORD, CONN. (JUNE 12) PR NEWSWIRE - Cognitronics Corporation (AMEX: CGN) today announced that it has entered into a development and license agreement with Expert Systems, Inc. (ESI) of Atlanta, under which ESI will develop a customized version of its voice processing application generator software, EASE(TM), for use in Cognitronics' line of Multi-channel Intelligent Announcement Systems (McIAS)(TM).

Matthew J. Flanigan, president and CEO of Cognitronics, stated, "EASE is a high-level development tool that will enable Cognitronics and its customers to efficiently create and modify interactive voice response (IVR) application software used in McIAS systems beginning in the fourth quarter of this year. It is anticipated that EASE will be available in McIAS systems beginning in the fourth quarter of this year. Further, it will be offered as an optional upgrade to customers of the approximately 400 McIASs currently installed."

Cognitronics Corporation is a leading manufacturer and supplier of voice processing equipment, including telephone announcement products and interactive voice response (IVR) systems, to telephone operating companies OEMs and commercial users. Cognitronics also manufactures optical scanning and imaging processing systems and precision machined parts.

SAN ANTONIO, TX (JUNE 12) PR NEWSWIRE - Valero Energy Corporation (NYSE: VLO) today filed with the Securities and Exchange Commission (SEC) a registration statement for a public offering of 4.75 million shares of common stock including a 950,000 share offering in Europe. The shares will be offered by a group of underwriters managed by Shearson Lehman Hutton Inc. and Salomon Brothers Inc.

Valero intends to use the proceeds from the stock offering to finance a portion of the cost of various capital projects being undertaken by the company including a Hydrocracker/Reformer project at its specialized refinery in Corpus Christi as well as the construction of a major natural gas pipeline segment which will be leased to Valero Natural Gas Partners, L.P. (NYSE: VLP).

The Hydrocracker/Reformer project involves construction of a 25,000-barrel-per-day hydrocracker and a 27,000-barrel-per-day continuous catalyst regeneration reformer to turn currently produced naphtha, distillate and gas oil streams primarily into gasoline blendstocks.

The 105-mile East Texas extension of the North Texas pipeline, which will run from Bethel, southeast of Dallas, to Carthage near the Louisiana border, will be constructed by a subsidiary of Valero and leased to Valero Natural Gas Partners. Through subsidiaries, Valero is general partner of and has an approximate 49 percent interest in Valero Natural Gas Partners.

A registration statement relating to the securities has been filed with

the SEC but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

Valero Energy is involved primarily in refining high-sulfur atmospheric residual oil into premium products, principally unleaded gasoline, through its specialized refinery in Corpus Christi, Texas, and in the marketing of those products. Valero Natural Gas Partners, L.P., owns a 7,100-mile network of natural gas transmission and gathering lines throughout Texas and in Oklahoma, purchases and sells natural gas throughout the United States, provides third party gas transportation services, and owns 11 natural gas processing facilities.

#90163p5338 06/12/1990 ~PR Newswire

SOUTHFIELD, MI (JUNE 12) PR NEWSWIRE - Herbert W. Kaufman, speaking at today's annual meeting of shareholders of the H.W. Kaufman Financial Group said he believed the company would achieve record levels of premium volume and commission and fee income for 1990.

He also said that the insurance industry was showing signs that the soft market cycle of the last five years may be reaching its end.

"We expect to achieve a new record level of commission and fee income for 1990 in the $21-24 million range on the strength of record premium volume, which is expected to exceed $100 million compared to $93 million in 1989," he said. "Based on our first-quarter results, interim second-quarter data and continued branch office expansion, we believe these levels are achievable and indicate that insurance markets are perhaps beginning to enter a harder cycle.

"Over the last five years for the insurance industry as a whole, and since 1987 for the H.W. Kaufman Financial Group, the average rates per policy have been steadily dropping," Mr. Kaufman said. "Fortunately for us, we've been able to overcome this trend and increase total revenues by expanding the number of policies written from 8,700 in 1987 to 17,300 at the end of 1989, an increase of 99 percent. Moreover, this upward trend has continued into 1990. In fact, we're projecting that over 22,000 policies will be written this year."

Mr. Kaufman continued by saying, "In the insurance industry, a soft market

refers to a cycle in which policies are written at generally lower rates as a way to generate funds for investment purposes. The soft market started about the same time that interest rates were swelling in the mid-1980s, and insurance rates have been falling since that time as insurers have been competing for available investment dollars. In fact, Kaufman's average premium per policy declined 23 percent since 1987 from an average of $6,930 to $5,290 per policy in 1989," he said.

"However, beginning in the fourth quarter of 1989 and continuing through the first quarter of 1990 and to the present time, we've noted that the average premium per policy has stabilized and is no longer declining. This development seems to indicate that the soft market cycle is nearing its end, and that improvement in rates charged insureds are on the horizon " Mr. Kaufman said.

"For the first quarter of 1990, the average unit cost per policy was $5,630, which reinforces our belief that rates are at least stabilizing. Because we continue to achieve increases in the number of policies written we are even more optimistic about the growth prospects for the company; the combination of continued growth in policies written and the stabilization of rates leads us to conclude that revenues will accelerate " he said.

The H.W. Kaufman Financial Group is a general agent and broker of specialty insurance products and services provided through three subsidiaries -- Burns & Wilcox, Service General and Royal Premium Budget. The company is not an underwriter, and instead focuses on serving independent agents in 46 states by linking them with major carriers to provide coverages for specialty risks. For these services, the company receives fees from agents and commissions from carriers.

Since 1982, the H.W. Kaufman Financial Group has added 19 new branch offices, including its most recent opening in New Jersey in January. Aggressive expansion of branch offices and new products have allowed the company to more than double in size since 1986, despite the soft market conditions that have been prevalent.

The company is based in Southfield and its common shares are traded on NASDAQ under the symbol HWKF.

CONTACT: Herbert W. Kaufman of H.W. Kaufman Financial Group, Inc., 313-354-0200; or Dan Reid, 312-266-7800, or Nancy Eichorn, 212-661-8030, both of Financial Relations Board, for H.W. Kaufman Financial Group.

#90163p5340 06/12/1990 ~PR Newswire

JACKSONVILLE, FL (JUNE 12) PR NEWSWIRE - The U.S. Labor Department's

Occupational Safety and Health Administration (OSHA) has proposed penalties totaling $28,500 against GAP Enterprises, Tallahassee, Fla., for alleged trench safety violations.

According to Richard Dayoub, OSHA's Jacksonville, Fla., area director, the citations followed investigation of a fatality caused when a trench caved in at Summerbrooke II subdivision.

"We are committed to insuring worker safety in hazardous trenching operations," said Dayoub. "Statistics show that accidents occur more frequently in excavation work than in construction in general and are much more likely to be fatal."

OSHA proposed $20,000 for two alleged "willful" violations of its safety standards; $8,400 for nine "serious" violations, and an additional $100 for one of six "other than serious" violations.

Alleged willful charges included failure to properly shore and slope trench walls to prevent cave-in, and failure to instruct employees regarding trench hazards.

Among the serious allegations were failure to provide a safe means of egress from the trench and to provide adequate head protection, and lack of a chemical hazard communication program.

Dayoub emphasized that the vast majority of trenching-related incidents could be prevented through education, training and compliance with OSHA's standards.

The agency defines willful violations as those committed with an intentional disregard of, or plain indifference to, the requirements of the OSH Act and regulations.

A serious violation is one in which there is a substantial probability that death or serious physical harm could result, and that the employer knew or should have known of the hazard.

An other than serious violation is one which does not have substantial probability of causing death or serious physical harm but would have a direct and immediate relationship to the safety and health of employees.

Employers have 15 working days to contest OSHA citations and proposed penalties before the independent Occupational Safety and Health Review Commission.

Inspections of the subdivision worksite were conducted by the OSHA area office located at 3100 University Boulevard S, Room 303, Jacksonville, FL 32216; telephone 904-791-2895. Information and technical assistance with

the agency's revised trenching and excavation standard and other safety and health standards can be obtained at this location.

CONTACT: Richard Dayoub, OSHA area director, 904-791-2895.

#90163p5343 06/12/1990 ~PR Newswire

WARREN, MI (JUNE 12) PR NEWSWIRE - Chevrolet today announced its least expensive convertible price -- $9,740 for the 1990 Geo Metro LSi convertible.

Initial production of the newest member of the Geo family will be limited to approximately 3,000 cars distributed in nine states: California, Florida, Hawaii, Illinois, Michigan, New Jersey, New York, Pennsylvania and Texas.

The car will be available in greater volume nationally as a 1991 model. The convertible features an easy-to-operate manual top with a unique hard tonneau cover that secures in place in both top-up and top-down positions. The replaceable tonneau lends a finished appearance and conserves the car's six cubic feet of trunk space. A pass-through feature accommodates skis and other long objects.

Standard equipment includes a driver's side supplemental inflatable restraint system (air bag), a gage package including tachometer, power front disc/rear drum brakes, rack-and-pinion steering, active 3-point seat belts for driver and passenger, front stabilizer bar, 13-inch wheels and tires, mirrors and intermittent wipers.

The Metro convertible's standard powerplant is a 1.0-liter, 3-cylinder, single overhead cam engine with electronic fuel injection and a 5-speed manual transmission. A 3-speed automatic transmission is an option.

All Metro convertibles have uplevel LSi appointments: flush-fitting halogen headlamps, body-color bumpers and side moldings, uplevel wheel covers, a new remote trunk release, intermittent wipers and dual sport mirrors.

The metro convertible has an EPA mileage rating of 40/city and 46/hwy with manual transmission.

Exterior colors are red, white and -- unique to the convertible model -- yellow.

According to Chevrolet's marketing task force, key reasons for purchasing the Metro convertible will be the low initial price, low operating costs and the convertible's fun-to-drive quality. The car is expected to be

popular with young singles who attend college or live at home. A large percentage of Geo convertible sales will be to first-time car buyers.

KIRKLAND, WA (JUNE 12) PR NEWSWIRE - Tom A. Alberg will join McCaw Cellular Communications, Inc. (NASDAQ: MCAWA) as executive vice president for legal and corporate affairs, effective July 1, the company announced today. Alberg's responsibilities will include the direction of the company's legal, governmental and communications-related activities.

Craig O. McCaw, chairman and chief executive officer of McCaw Cellular Communications, Inc., stated: "Tom Alberg is a remarkably talented individual, and his proven expertise in many aspects of corporate affairs will greatly facilitate our efforts to build the value of the McCaw Cellular franchise for our shareholders, customers and employees. We are delighted that he will be joining the McCaw Cellular team."

Alberg joins McCaw after serving as executive committee chairman and partner of the law firm of Perkins Coie of Seattle.

Under his leadership, Perkins Coie grew to become the largest law firm headquartered in the Pacific Northwest, with approximately 330 lawyers and offices in Seattle and Bellevue, Wash.; Portland, Ore.; Anchorage, Alaska; Los Angeles, and Washington. Alberg's clients have included corporations such as the Boeing Company, Burlington Resources, Inc., and the Weyerhaeuser Company. He holds a B.A. from Harvard and a J.D. from Columbia.

McCaw Cellular Communications, Inc. is the nation's largest cellular telephone company. It currently offers cellular service, primarily under the "Cellular One" name, in 132 markets in 26 states across the country. McCaw Cellular operates major regional systems in California, Florida, Texas, the Pacific Northwest, the Midwest, the Rocky Mountain states and the Northeast.

LIN Broadcasting, 51 percent-owned by McCaw Cellular, holds significant interests in cellular systems in New York, Los Angeles, Philadelphia, Dallas and Houston, operates seven network- affiliated television stations and publishes advertiser-supported hardcover magazines placed in the rooms of distinguished hotels in 37 metropolitan areas.

ST. PAUL, MN (JUNE 12) PR NEWSWIRE - Mark W. Osterberg has been named to the newly created position of vice president- chief accounting officer for Northwest, the nation's fourth- largest airline.

Osterberg, 40, will direct all accounting-related functions at Northwest and will report to Herbert Ihle, senior vice president-finance and controller. Osterberg will be stationed at the airline's world headquarters in Eagan, Minn.

Osterberg held senior financial management positions with Braniff Airlines from 1984 through 1989, most recently as senior vice president-finance and chief accounting officer. His responsibilities included negotiating aircraft and facilities leases, financial analysis, budgets, payroll, treasury and purchasing.

Since leaving Braniff, Osterberg has been vice president-finance at

Foxmeyer Drug Company, a Dallas drug wholesaler. Prior to Braniff, he was an audit manager at Deloitte Haskins & Sells, an international public accounting firm based in Dallas.

Osterberg holds a master of business administration degree from the University of Florida, a master's in economics from Rice University in Houston and a bachelor's degree in business administration and economics from Southern Methodist University in Dallas. He also is a certified public accountant.

ANAHEIM, CALIF. (JUNE 12) PR NEWSWIRE - Board-level precision time code processors for VMEbus, PC AT/XT, Unibus, Qbus, STD and Multibus 1 are now available from Odetics (AMEX: OA, OB). These time code processors achieve precise time synchronization with one microsecond resolution.

Representing the widest functional range of bus compatible precision time products on today's market, the Odetics series offers users a variety of options for adding time code processing to existing computer systems.

Time data transfers occur directly over the system bus. These bus level modules thus make full use of bus interrupt logic, enabling faster and more versatile data acquisition algorithms.

Board-level time code processors fulfill a growing industry need for packaging economy, realizing significant savings in space, costs, power

and installation time over rack mounted instrumentation. These time code processors provide time-correlated distributed data collection and other time-critical functions for system integrators at NASA, DOD and government prime contractor installations. Time code processors are also useful to research laboratory engineers involved in coordinating instrumentation measurements with precise time. Other applications include radar data collection and "bit- creep" elimination.

Plugging directly into the system bus, the processors accept IRIG-B modulated input from a master clock, such as a GPS synchronized receiver, correct for propagation delay, and generate local "on time" frequencies and rates from 1 MHz to 1 PPS.

An optional VME video inserter superimposes precise time and other data alpha-numerically onto video signals.

Celebrating its 20th year, Anaheim, California-based Odetics is a leading maufacturer of precision timing systems as well as products that incorporate data storage, robotic and machine vision technologies.

BETHESDA, MD (JUNE 12) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) has appointed Ronald H. Schack to be vice president and director of Martin Marietta Laboratories at Baltimore.

Schack, who had been vice president of special programs for Martin Marietta Aero & Naval Systems, also in Baltimore, will report to Robert J. Whalen, president of Martin Marietta Advanced Development & Technology Operations.

Martin Marietta Laboratories conducts advanced development and technology programs for the corporation, government agencies, and private industry.

Schack joined the corporation in 1968 at Orlando, Fla., as director of advanced programs and held a number of increasingly responsible positions before being named to the Aero & Naval Systems post in 1988.

A native of New York City, he holds bachelor's and master's degrees in electrical engineering from New York University.

HOUSTON (JUNE 12) PR NEWSWIRE - Seagull Energy Corporation (NYSE: SGO) announced today that it has executed a letter of intent and is finalizing a definitive agreement to acquire Wacker Oil Inc., an independent oil and gas company headquartered in Houston. Execution of the agreement is subject to the approval of each company's board of directors.

Seagull plans to pay approximately $77 million in cash to purchase the stock of Wacker, a wholly owned subsidiary of Costain Holdings Inc. of Chicago, an affiliate of Costain Group PLC, which is headquartered in London.

Because the planned acquisition will be economically effective as of Jan. 1, 1990, the purchase price will be adjusted for revenues, less direct operating and capital expenditures incurred since the beginning of the year. The parties expect to formally consummate the planned acquisition by mid-summer.

Wacker's exploration and production activities are concentrated in the Gulf of Mexico and onshore in Texas, Louisiana, and North Dakota. As of the beginning of 1990, the company had 43.2 billion cubic feet (bcf) of proved natural gas reserves and 2.6 million barrels of proved oil reserves from its interests in 114 producing gas and oil wells. It also held leasehold interests in approximately 51,000 net undeveloped acres and an extensive inventory of seismic and other geological data. Wacker has no long-term debt that will remain outstanding after the closing.

Wacker was created by Costain in 1984 as a vehicle for investing in oil and gas. In the fall of 1987, it acquired certain assets of Valero Producing Company. It has approximately 50 permanent employees who work in the Houston headquarters and at district exploration offices in Denver, Houston and New Orleans.

In addition to its exploration and production activity, Houston- based

Seagull is also engaged in the transportation, distribution and marketing of natural gas, liquids products and petrochemicals, and natural gas processing.

MILL VALLEY, CA (JUNE 12) PR NEWSWIRE - Vitafort International Inc. (NASDAQ: VFRT) announced today the appointment of Barry E. Loughrane as a member of the board of directors. Loughrane's appointment increases the size of the board to six members.

From 1986 until January 1990, Loughrane was chairman and chief executive officer of Diversified Agency Services, a division of Omnicom Group Inc. (NASDAQ: OMCM) and a member of Omnicom's board of directors.

Diversified Agency Services manages more than 20 companies spanning virtually every facet of the communications marketplace, with capitalized billings of nearly $1,800,000,000.

Prior to the formation of Omnicom in 1986, he was president and chief executive officer of Doyle Dane Bernbach Group Inc., as well as president and chief executive officer of DDB-U.S. He also served as a director of the merged DDB Needham Worldwide Agency.

In addition to his advertising and marketing background, Loughrane has extensive experience in the restaurant business. He was a general partner in restaurant chains in Los Angeles and New York. These included Sojourn, Inc. for The Egg and Eye and The Greenhouse; Trident Foods, Inc. for The Trident Room and Courtside Bistro; and Northfall Inc. for Night and Day.

Vitafort International Corporation, founded in 1986 by Joseph Daly and Dr. Barry Saltzman, designs nutritionally enhanced food and beverage products, and develops fully integrated development, processing and marketing programs for them.

Products being sold with the Vitafort symbol include: Powerburst sports drink, Crystal Geyser mineral water, Crystal Geyser juice squeeze, and Good Health sports drink.

ANAHEIM, CA (JUNE 12) PR NEWSWIRE - Citing the proven ability of the Odetics (AMEX: OA, OB) large library management video cart system to efficiently play both spots and programming directly to air, KRON-TV in San Francisco has purchased an Odetics TCS2000 Cart Machine and an XR-800 External VTR Controller.

KRON, an NBC affiliate in the nation's fifth largest market, ordered a

Beta-SP format Odetics system to replace the station's two Sony Betacarts. Craig Porter, KRON's studio engineering manager, estimates that the Odetics system will be handling 800 events in a typical 24-hour period.

According to Warren Allgyer, engineering vice president of KRON's parent company, Chronicle Broadcasting, Odetics has the only cart system on the market that will allow the station to efficiently air programming as well as commercials. "The Odetics software has the proven capability we needed " he said. "Many systems do a good job of playing spots, but the Odetics system allows the smooth integration of spots and program segments for extended periods of time, without sacrificing key system functions."

KRON-TV is the third Chronicle-owned station to select an Odetics system. The other two are WOWT-TV, Omaha, Neb., and KAKE-TV, Wichita, Kan.

Celebrating its 20th year, Anaheim-based Odetics is a leading manufacturer of large library management video cart systems. There are close to 100 Odetics large library management cart machines playing directly to air throughout the world.

ANAHEIM, CALIF. (JUNE 12) PR NEWSWIRE - Independent Television News (ITN) Ltd., London, England, has purchased five Odetics (AMEX: OA, OB) TCS2000 large library management cart machines and five Odetics News Control Terminals to handle the network's extensive news broadcasting needs. ITN produces a number of local news shows and 16 national news programs per day, many of which are distributed worldwide via its satellite World News Service. Four of the Odetics Cart Machines, equipped with BVW75 PAL videotape recorders in the Betacam SP format, using the Odetics News Control Terminals to automate news cart play out during newscasts, as well as performing record duties. A fifth cart machine with an expansion tower will be used as an archiving system.

According to Ted Taylor, chief engineer, ITN, the decision to purchase the Odetics machines was based on the equipment's sophisticated, flexible software which allows a high degree of user customerization, and its reputation for reliability.

Celebrating its 21st year, Anaheim, California-based Odetics is the inventor and leading manufacturer of large library cart systems for broadcast television. The company is also a major supplier of intelligent data collection systems for commercial and government applications.

SAN DIEGO (JUNE 12) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced the completion of a full year of profitable operations for fiscal 1990, after four years of operating losses.

IRT reported revenues of $19.3 million and net income from continuing operations of $2 million, or $.37 per share, for its 1990 fiscal year ended March 31, 1990. Discontinued operations posted a net loss of $299,000, for a combined net income of $1.7 million, or $.31 per share. The results for continuing operations include $960,000 of other income, mostly from the settlement of a patent infringement suit. These results compare with prior-year revenues of $13.7 million; a net loss from continuing operations of $2.9 million, or $.59 per share; and a net loss from discontinued operations of $320,000, for a combined net loss of $3.2 million, or $.65 per share. These prior-year results include other income of $2.9 million.

Operating income, after interest, discounting the effects of other income in both fiscal years, returned to a profit of $1.1 million in fiscal 1990 from a loss of $5.8 million in the previous year.

For the fourth quarter of fiscal 1990, IRT reported revenues of $5.3 million and net income from continuing operations of $337,000, or $.06 per share. Discontinued operations posted a net loss of $231,000, for a combined net income of $106,000, or $.02 per share. These results compare with fourth-quarter revenues in the previous year of $3.1 million and a net loss from continuing operations of $1.9 million, or $.38 per share. In the same period discontinued operations posted net income of $281,000, for a combined net loss of $1.6 million, or $.32 per share. IRT's contract backlog at the end of fiscal 1990 was $4.3 million, compared with $5.9 million at the end of the previous fiscal year.

IRT Corp. is a major supplier of industrial real-time X-ray systems, with more than 500 systems installed and is the technology leader in automated X-ray inspection systems with computerized defect-recognition capability. The company develops and manufactures inspection and process monitoring systems, including integrated systems for electronics, automotive, aerospace and defense applications. The company also operates a commercial radiation processing facility which provides high-energy electron-beam processing for a number of commercial applications. Company headquarters are in San Diego.

#90163p5386 06/12/1990 ~PR Newswire

UPPER SADDLE RIVER, NJ (JUNE 12) PR NEWSWIRE - Western Union Financial Services, Inc. (NYSE: WU) today announced a major enhancement to its telegram service which enables users to send telegrams for delivery on future dates simply by calling a toll-free number. The new service enhancement, called Telegram Reminder Services(sm), is part of a major campaign Western Union has launched to re-emphasize the telegram's unique features.

The new Telegram Reminder Service, scheduled for availability Oct. 1, can be accessed by dialing 800-325-6000 anywhere in the continental United States. It is designed for the needs of individuals, as well as business customers, and assures that important social, personal and administrative events are not overlooked. In fact, they are automatically addressed with the impact only a telegram can deliver.

For example, with a single phone call placed during the first week of January, a customer can arrange social and personal greetings such as anniversaries, birthdays and graduations for the entire year, or any key future event that requires a special and impactful message.

As an option, the customer can request to be contacted a week prior to the event to be reminded of the date and then asked to dictate a desired message to be delivered via Western Union telegram. The entire service can be charged directly to the customer's telephone number.

In making the announcement, Edward J. Fuhrman, president of Western Union Financial Services, Inc., stated, "Reminder Service represents considerable added value to our telegram customers and is made possible through Western Union's extensive communications network -- utilizing the expertise that we have developed over the past 139 years. We also view it as particularly relevant in today's fast paced social and business environments."

To publicize Reminder Service, as well as regular usage of the telegram, Western Union has an extensive promotional program under way in conjunction with the opening of Universal Picture's new film "Back To The Future Part III." A Western Union message is a key element linking the plots of "Back To The Future Part II" and "Part III."

At the end of "Back To The Future Part II," a message is sent via Western Union in 1885 for delivery 70 years later -- in 1955. That Western Union message triggers the action in "Back To The Future Part III."

A telegram possesses special characteristics; it is a high-impact,

socially appropriate, legally relevant, and convenient product with true keepsake value. Currently, Western Union is vigorously expanding its network to extend the physical delivery of telegrams to virtually anyplace in the country, within four hours. It is this unique delivery aspect that makes the telegram such a special form of communication.

Carrying the message that telegrams are still the best way to get a point across -- across the street, across town, across the continent or across the ocean -- will be a Western Union spokesperson addressing key potential user groups in at least 11 major U.S. markets.

Part of this campaign deals with the telegram as part of Americana. According to the company, there probably isn't an historical event over the last 139 years -- major or minor -- that hasn't been recorded on, or communicated about, in a telegram...from the first telegraphic message announcing the presidential nomination of Henry Clay in 1844, to the end of World War II in 1945, to the crumbling of the Berlin Wall in 1989, to a parent's good wishes on the birth of a grandchild, the telegram is a truly special form of communication and personal expression.

Just as the "Back To The Future" trilogy deals with the past, present and future, Western Union has a strong history, a vital present and an exciting future serving the public's message and financial needs. The company continues to enrich its service offerings to individuals and companies throughout the United States and the world as the pre-eminent supplier of money transfer and message services.

CONTACT: Donn Dutcher of Western Union, 201-818-5730, or Maureen O'Day of ORA Corporation, 201-984-9433, for Western Union.

#90163p5390 06/12/1990 ~PR Newswire

LOS ANGELES (JUNE 12) PR NEWSWIRE - United Dominion Industries and IHC/Caland announced today that they have entered into a letter of intent pursuant to which IHC/Caland will acquire the IMODCO single point mooring and floating production business owned by a subsidiary of United Dominion. The acquisition includes the IMODCO Limited Subsidiary located in London.

Terms of the transaction were not disclosed. The parties anticipate closing the transaction prior to June 30, 1990. IMODCO, headquartered in Los Angeles, engages primarily in the design, engineering and manufacture of single point mooring systems designed to facilitate the loading and unloading of liquid cargo including moorings for Floating production Storage and Offloading Systems, and in the provision of related products and services.

United Dominion Industries, formerly AMCA International Corp. and

headquartered in Charlotte, N.C., serves three primary markets: non-residential construction, energy and industrial. Principal products and services include pre-engineered buildings, construction services, steel fabrication and erection, pertrochemical-related engineering services, compaction equipment, food equipment and aerospace components.

The Dutch public company IHC/CALAND is an international group of marine technology oriented companies. Its business is to serve on a worldwide basis the offshore oil industry and dredging industry. The group is already active in the offshore terminal business through its wholly owned subsidiary, Single Buoy Moorings Inc. of Fribourg, Switzerland.

IHC/Caland's principal activities include supply of single point moorings, floating production systems, standard and custom-built dredgers, and design of floating cranes and other structures mainly for the offshore oil industry.

#90163p5396 06/12/1990 ~PR Newswire

BLOOMFIELD, CT (JUNE 12) PR NEWSWIRE - Kaman Corp. (NASDAQ: KAMNA), based here, has signed a joint venture agreement with SNPE of Paris to form Advanced Energetic Materials Corporation of America.

AEMC will develop products and systems for defense and industrial applications based on "insensitive" explosives materials technology.

"We formed this new venture with SNPE to capitalize on our individual strengths and bring to market emerging technologies in specialized energetic materials," said Kaman Corp. chairman and chief executive officer Charles H. Kaman.

"A synergy between our companies developed as we began working on next generation reactive armor. Upon further exploration, we concluded that there were other opportunities for combined effort on related projects and that a jointly owned corporation could be beneficial and position us well for leadership in the application of this technology.

"A key mission of AEMC, in light of declining defense budgets, is to develop cost-effective, advanced products which will improve existing armored vehicles' defense capabilities against munitions attack," said Kaman.

Emile E. Blanc, chairman and president of SNPE added, "We believe that defense priorities will focus now on retrofitting existing armored vehicles, instead of new production, and upgrading them to improve

survivability. The combined expertise of Kaman and SNPE will open up significant opportunities in this emerging market."

Products to be developed by AEMC will be based on SNPE's proprietary energetic materials, a new generation of insensitive explosives. These materials do not act like normal high explosives and are highly stable during handling and operating conditions. Kaman will provide scientific research, aerospace materials expertise, and weapons systems engineering to the joint venture.

Richard E. W. Smith, 55, vice president of Kaman Corp., will act as president of AEMC. Daniel J. Quentin, 57, senior vice president of SNPE, will be vice president of the new joint venture company.

Kaman and SNPE began working together in 1986 on a company funded research project. This original work led to a Memorandum of Understanding for a cooperative Nunn Amendment funded program between the U.S. and French governments for an advanced reactive armor technology development program. Kaman and SNPE were selected by their respective governments to participate. Both companies have continued to support separate and joint research and development work.

Testing of AEMC products has indicated that as defense against incoming munitions increases, damage to the armor vehicle is reduced and the reactive armor destruction is localized with the AEMC product versus conventional reactive armor construction. The new AEMC products are also lighter and more stable than existing products.

SNPE is a European leader in the field of solid rocket and gun propulsion, and insensitive high explosives. The company is also diversified in specialty chemicals and advanced materials. SNPE had revenues of $700 million in 1989.

Kaman Corp. is a highly diversified company with business activities in defense, industrial and commercial markets. The company had revenues of more than $800 million in 1989.

CONTACT: J. Kenneth Nasshan of Kaman, 203-243-7319.

NEW YORK (JUNE 12) PR NEWSWIRE - The Bank of New York Company, Inc. (NYSE: BK) today announced that Alan R. Griffith has been elected president and chief operating officer of The Bank of New York, the company's principal operating unit.

Griffith was also elected a director of the bank, and senior executive

vice president and a director of the company.

Peter Herrick, president of the company, was elected vice chairman the bank. He continues as a director of both the bank and the company.

Herrick, who is 63, reaches mandatory retirement age in 1991, will be responsible for trust, investment, and the entire securities processing businesses of the bank.

Griffith, 48, brings a wide range of experience to his new position. He started his career in 1964 as a management trainee with the Empire Trust Company. He joined the bank when Empire Trust was acquired by the bank in 1966, and was appointed vice president in 1974. For several years he was in charge of one of the bank's leading retail offices in midtown Manhattan. For many years he was actively involved in lending to media companies. Griffith was elected senior vice president in 1982, the same year in which he organized the communications, entertainment and publishing division, which has been one of the fastest-growing parts of the bank's corporate banking business and has gained recognition as a leader in lending to the cable television industry, broadcasting companies newspaper and magazine publishers, and the entertainment industry.

In 1985, he was elected executive vice president and named head of the special industries sector which, in addition to managing relationships with media companies, is responsible for the bank's business with public utilities, the oil, gas and extractive industries, surface transportation, middle market, mortgage and construction lending, and the securities and commodities industries. He was appointed to the Steering Committee of the company in December 1986. Two years later he was elected senior executive vice president. For four years he was in charge of the bank's international banking business. During the Irving transition period in 1989, he also served as the bank's chief credit policy officer.

The Bank of New York Company, Inc. is the thirteenth-largest bank holding company in the country, with consolidated assets of $48 billion at March 31, 1990. The company's major businesses are corporate and retail banking trust and investment management, and financial market services.

CONTACT: Michael M. Pascale, VP, 212-495-1041; Pierre S. Brull, VP, 212-495-1721; or Margaret Southerland, AVP, 212-495-1725, all of The Bank of New York Company.

#90163p5405 06/12/1990 ~PR Newswire

ROCKY MOUNT, NC (JUNE 12) PR NEWSWIRE - Shareholders of Peoples Bancorporation (AMEX: PBK) and The Planters Corporation (NASDAQ-NMS: PNBT) today approved the companies' proposed merger to form Centura Banks Inc. The votes were announced at the respective annual meetings of each company.

The merger still requires approval by federal and state regulatory agencies. Planters Chairman J. Richard Futrell Jr. and Peoples Chairman Robert R. Mauldin said they expect final approvals by late summer.

"This partnership between two old rivals offers so many opportunities to you, our shareholders, as well as to our employees, customers and communities," said Futrell, who will be chairman and chief executive officer of Centura.

"We will be, in most respects, an entirely new and better bank (after the merger). In the 1990s, Centura Bank will be one of the most competitive banks in the state of North Carolina."

Mauldin, who will be Centura's president and chief operating officer, cited "synergies" expected from the merger as the major factor in

increased earnings potential for the new bank.

"The advantages of the merger will allow you (our shareholders) the opportunity to earn a significantly higher return on your investment while providing more quality services for our customers and increased opportunities for our employees.

"Your new management team is utilizing all the resources available between these two banks to make Centura Banks an even stronger bank -- ready to compete in a rapidly-changing financial services industry in the coming years."

Both men said the target date for completion of the merger is October 1 of this year and recognized the contributions of their employees, who they said are "working long and hard" to complete the details of the merger.

Centura Banks Inc. will be the eighth largest bank holding company in North Carolina with total assets of approximately $2.5 billion.

LOS ANGELES (JUNE 12) PR NEWSWIRE - Jerry R. Farrar, president and chief executive officer of General Group International (GGI), has been selected as a finalist for the Greater Los Angeles Area's Entrepreneur Of The Year Awards, according to Ronald H. Silver, program director for Entrepreneur Of The Year.

Award recipients will be selected by an independent judging panel and announced at an awards reception and banquet Thursday, June 14, at the Beverly Hilton Hotel in Beverly Hills, Calif. Farrar will be introduced as a finalist at this event, which is sponsored by Ernst & Young, Inc. Magazine and Merrill Lynch.

The program will culminate at a National Conference in Scottsdale, Ariz., where award recipients from the Greater Los Angeles area and other regions will be honored and inducted into the Institute of American Entrepreneurs.

Eight years after founding one automotive financial services company which became an industry leader, Farrar founded another: General Warranty Corp. In less than a decade, Farrar's vision and leadership has led to the development of General Group International. In 1988, GGI entered into an innovative joint venture with Clarion Co. Ltd. of Tokyo to form General Warranty Corp. of Japan, which introduced vehicle service agreements to consumers in Japan. CONTACT: Dinah Berland of General Group International,

MONTREAL (JUNE 12) PR NEWSWIRE - BCE Mobile Communications Inc. today announced that it is selling, to Nesbitt Thomson Deacon Ltd., RBC Dominion Securities Inc., ScotiaMcLeod Inc. and Trilon Securities Corporation, three million special warrants to purchase units, each consisting of:

(i) one newly issued common share of BCE Mobile, and
(ii) one common share purchase warrant entitling the holder to purchase, on
or before April 30, 1991, one common share of BCE Mobile at $27.25.

The special warrants will be reoffered on a private placement basis at a price of $25.25 each. The dealers have an option until June 14, 1990, to increase the size of the issue to 3.5 million special warrants.

The net proceeds of the issue, excluding funds to be raised by the exercise of the share purchase warrants, will be approximately $72.8 million. The proceeds will be held in escrow pending qualification, by Aug. 31, 1990 at the latest, for resale of the units to the public. Qualification includes filing of and obtaining receipts for a long-form prospectus.

The net proceeds will be used primarily to fund planned capital expenditures of Bell Cellular Inc., a wholly owned subsidiary of BCE Mobile which operates a cellular network in Ontario and Quebec.

Upon completion of the transaction, before exercise of the common share purchase warrants, BCE Inc.'s ownership of BCE Mobile will have declined from 73.0 percent to 69.7 percent. Assuming full exercise of the share purchase warrants, BCE's ownership would decrease to 66.6 percent.

BCE Mobile is the Canadian leader in mobile communications. Its diversified activities include cellular telephone, paging, telephone answering and private radio services integrating communications and information systems technology. The principal subsidiaries of BCE Mobile are Bell Cellular Inc., National Pagette Ltd. and National Mobile Radio Communications Inc. BCE Mobile is a subsidiary of BCE Inc. (NYSE: BCE).

CONTACT: Pierre N. Lessard, (514) 748-3230, or John P. Gutpell, (514) 748-3235, both of BCE Mobile Communications.

SIMSBURY, CT (JUNE 12) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL)

announced today that the inspectors of election for the annual meeting of shareholders of Kollmorgen held on May 31, 1990, confirmed today that Kollmorgen decisively won its proxy contest against Vernitron Corporation.
The inspectors' preliminary report confirms that all of Kollmorgen's nominees for director were elected to the board and that the Vernitron proposals were defeated, in each case by a significant margin.

In summarizing the reported results, John Youngblood, president, chief executive officer and chairman of the board of Kollmorgen, stated, "The results show that Vernitron's efforts to gain control of a majority of the board received the support of only 29 percent of the votes cast -- only 23 percent when you exclude the shares voted by Vernitron. Further, notwithstanding Stephen Bershad's public statements, only 28 percent of the votes cast by holders of common shares not owned by Vernitron voted in favor of handing control of the Kollmorgen board over to Bershad and his designees.

"With the overwhelming support of our shareholders, as demonstrated by these results, we intend to pursue our business plan and work hard to build the value of Kollmorgen for all of our shareholders," concluded Youngblood.

The report of the inspectors of election is expected to be finalized by the end of the week.

Kollmorgen has continuing operations focused in two business segments: special purpose servo motors and controls and electro-optical instruments.

FORT LAUDERDALE, FL (JUNE 12) PR NEWSWIRE - Sea-Land Service, Inc. today announced resumption of container ship service from Jamaica to the United States.

Sea-Land's Americas Division had suspended its northbound service from Kingston in January 1989 after illicit drugs were found hidden in containers aboard vessels inbound from Jamaica.

The joint announcement was made today in Kingston with officials of the government of Prime Minister Michael Manley and H. Macaulay Orrett, Ltd., Sea-Land's agent in Jamaica. Ron Gabbett, speaking on behalf of Sea-Land, said that the U.S. flag carrier "is confident that Jamaican port and law enforcement officials have taken the precautions necessary to protect against illicit drug trafficking in the port.

"We have but the highest regards for the integrity of these Jamaican officials," added Gabbett, who is vice president and general manager of the division.

Sea-Land will accept cargo northbound at Kingston to all areas served by its North Atlantic Service vessels. Northbound container volumes from the Caribbean Basin are expected to rise about 5 percent per year over the next five years, company forecasts indicate.

According to Duncan Davidson, managing director of H. Macaulay Orrett, Ltd., and general manager for Sea-Land in Jamaica, that nation has attracted more than $165 million in new foreign investment over the past five years. Major exports to the United States, said Davidson, include textiles, produce, beer, rum and coffee.

The Americas Division is one of four Sea-Land divisions which combine to operate more than 60 container ships and 128,000 containers in worldwide service. Sea-Land Service, Inc. is a unit of CSX Corporation (NYSE: CSX), Richmond, Va.

SEATTLE (JUNE 12) PR NEWSWIRE - A Boeing 767 arrived in Nairobi on June 10 after a record-setting flight from Seattle, covering 9,253 statute miles (14,890 kilometers) in 18 hours, 29 minutes, Boeing Commercial Airplane Group said today.

The new 767-200ER (extended-range) model was in the yellow and white colors of Royal Brunei Airlines, national carrier of the country of Brunei Darussalam.

Pending final verification, the National Aeronautic Association established the flight as a world distance record for twin-engine commercial airliners, eclipsing the previous record, also held by a Boeing 767, of 8,893 statute miles (14,332 kilometers).

Averaging 518 miles per hour (834 kilometers per hour) during the flight, the 767 set new twinjet speed records between Seattle and several cities, including Amsterdam, Munich, Nairobi and Mombasa.

The airplane overflew Nairobi, continuing on to Mombasa before turning back to land at Nairobi.

Aboard were 20 passengers and a flight crew of four. The aircraft, first

Boeing 767 for Royal Brunei's fleet, continued on to Brunei Monday.

Powered by Pratt & Whitney PW4056 engines, the airplane is configured for 216 passengers (16 business, 200 in economy) and outfitted for extra-long-range service such as trans-Pacific routes. The only change for this delivery flight was use of high-density jet fuel in the airplane.

Oil-rich Brunei, with about 250,000 inhabitants, is on the north coast of the island of Borneo, surrounded by the country of Malaysia. Royal Brunei also operates one Boeing 737 and three 757s. The record-setting 767 is on lease from Ansett Worldwide Aviation Services.

NEW YORK (JUNE 12) PR NEWSWIRE - IDD Information Services, a leading publisher and supplier of on-line financial information, announced the release today of the latest addition to its comprehensive range of international mergers and acquisitions data bases.

The continental European data base includes more than 4,000 deals from Jan. 1, 1989, sourced from original documentation and covering domestic and cross-border mergers, takeovers and joint ventures.

Along with the 50,000 deals on the U.S. and U.K. M&A data bases, the addition of continental Europe will make IDD the most extensive and comprehensive international M&A service available.

The data base is updated daily by a team of highly skilled analysts who provide foreign language translation. Up to 200 data items can be accessed allowing comprehensive analysis of the deal, including key financial information for both target and acquiring company.

Users of the service include merchant and investment banks, corporate acquires, accountants and management consultants.

Martin McCarthy, president of IDD Information Services, commented, "The release of the continental European data base marks a significant step towards IDD Information Services establishing itself as a provider of global information and this event is the first in a series of enhancements and new products to be launched into the European market."

Access to the continental European data base can be made via simple menu-driven screens using a PC linked by a standard telephone line to the IDD computers.

IDD Information Services, a member of the United Newspapers group (NASDAQ: UNEWY), is a leading supplier of on-line financial information services covering mergers and acquisitions, new issues and international securities pricing. IDD has offices in New York, Boston and London.

NEW YORK (JUNE 12) PR NEWSWIRE - FNN:PRO, a dramatic, technological breakthrough in meeting the information needs of the professional investment community, was unveiled today by Shark Information Services Corp., a newly formed subsidiary of Infotechnology, Inc. (NASDAQ: ITCH).

Infotech's market data group acquired Shark's professional market quote business, formerly Wang Financial Information Services Corp., from Wang Laboratories on June 8.

Introduced at the Securities Industry Association conference in New York, FNN:PRO will, for the first time, offer the professional institutional and retail investment community a combination of real-time quotes, high-quality software, full news services plus a video component which will allow users to "watch" breaking news from their desks.

Earl W. Brian, chairman and chief executive officer of Infotech, said, "FNN:PRO is the direct result of our years of expertise and technological leadership in the integration of news and information into a useful and compelling product. We believe that FNN:PRO will have a significant impact on the investment landscape and alter how the professional investor accesses and uses market moving information."

"What FNN:PRO has to offer the professional investor is a full quotation system, enhanced by our business television network that covers market moving events. For the first time ever, all this information is available on one screen, and that is what will lead the broker to action," stated Brian.

According to Brian, FNN:PRO combines the strengths, both technological and otherwise, of several of Infotech's companies. In addition to the Shark Market Data platform, he cited the video contributions from Financial News Network (NASDAQ: FNNI) and Institutional Research Network (IRN), the news retrieval services of Comtex (NASDAQ: CMTX), and the worldwide news gathering capabilities of United Press International (UPI).

"What makes FNN:PRO unique in the marketplace is the fact that the user can simultaneously follow the market, receive news from several sources, and most important, watch the special FNN:PRO Video Network television

programming in an upper quadrant of the stock quote terminal," said Brian.

B. Douglas Smith, executive vice president of Infotech's market data group stated, "FNN:PRO builds on the existing strength of the Shark system by adding the impact of television in real-time information gathering and broadcasting. Shark has extensive marketplace experience, a service-intensive orientation and a reputation for excellence. Our experience tells us that the presentation qualities of television provide for the most natural, appealing form of electronic information dissemination. We know that seeing is believing and FNN:PRO will afford the user the visual impact missing from competitive products."

Smith continued, "Through the video component of FNN:PRO, traders and brokers can watch interviews with business and government leaders, analysts and corporate executives from their desks and make immediate investment decisions. FNN:PRO integrates credible, accurate and timely information -- the driving force in today's marketplace."

According to Smith, the unique element of FNN:PRO's video service will include exclusive live interviews with market leaders, analysts, corporate executives and provide immediate delivery of primary, market- moving information. Users will also be offered the full range of services now available through the Shark system -- viewing selected stocks, bonds and commodities, various market indices and "tickers," creating analytical graphs and screens, and access to all major financial news wires.

"Priced competitively with existing stock quote services, we believe that FNN:PRO will be a must for today's professional investor. In fact, FNN:PRO transforms a securities quote terminal from an 'overhead' cost to revenue-generating tool for retail brokers, as brokers will be encouraged to make increased contact with their customers based on programming they will watch on FNN:PRO," added Brian.

Brian concluded, "We are pleased by the initial reaction to FNN:PRO by the investment community. These professionals share our excitement and belief that FNN:PRO will set a new standard for stock quotation systems."

Shark Information Services Corp., based in New York, is majority owned and controlled by Infotechnology, Inc., with Financial News Network Inc. holding a large minority position.

Infotechnology, Inc. is an integrated communications and information company positioned to meet the needs of businesses and consumers with fast easy-to-use information products of economic value to its customers. Infotech owns 47 percent of Financial News Network Inc. and owns Institutional Research Network and United Press International.

SEATTLE (JUNE 12) PR NEWSWIRE - Nendels Corp. announced the opening of two new construction properties on the Oregon coast in Brookings and Tillamook. The grand opening of the Nendels Inn in Brookings Harbor is June 14, from 4-6 p.m. The Tillamook grand opening is scheduled for June 15 from 4:30-6:30 p.m.

Tim Gannon, group tour promotion director for the Oregon Coast Association said, "With the addition of the latest two Nendels Inns on the Oregon coast, Nendels will now be a major player in the expanding Northwest coast tourism market."

Each room in the 39-unit Nendels Inn in Brookings includes a private balcony overlooking the ocean; some feature wet bars and microwaves. The Inn also offers a conference room for 50 people. Future phasing could include an indoor spa, exercise room, additional rooms, suites and possibly a restaurant. The Brookings property is located at 16008 Boat Basin Road, 15 miles south of Gold Beach. It is one of the only ocean front lodging facilities in Southern Oregon.

The 42-unit Nendels Inn in Tillamook features 18 mini-suites with refrigerators and microwaves. There is a meeting room for 40, an indoor hot tub and exercise room. Additional features include salmon cleaning facilities and a guest laundry. This Tillamook property is located on Highway 101 in North Tillamook City.

Nendels offers inns, suites, hotels and resorts for the mid-priced traveler and Valu Inn by Nendels for the economy traveler. Nendels currently has 61 franchises with more than 4,400 rooms in seven western states and Canada, five of these properties are located along the Northwest coast.

DENVER (JUNE 12) PR NEWSWIRE - Hundreds of Japanese college students at Teikyo-Loretto Heights University in Denver, now get their cash from an on-campus ATM machine that explains instructions in Japanese.

The ATM, installed by First Interstate Bank of Denver, is believed to be the first ATM in the nation to have instructions explained in Japanese, according to Cary Karcher, vice president of Retail Sales and Planning, who created a special banking package for 380 Japanese college students who recently arrived in at Teikyo-Loretto Heights for intensive English training.

Last year, Teikyo University purchased Loretto Heights College and this fall students will begin their regular classes designed to teach them more about Western culture and intercultural business.

Karcher says he set up the banking package and the Japanese-voiced ATM to allay parents' concerns for the safety and security of their college-age children.

"The Japanese, as a rule, don't use checking accounts," Karcher says. "But I explained that in the United States it is not customary to carry large amounts of cash, and that an ATM provides convenient access to cash at all times." A woman's voice explains instructions in Japanese. However, receipts are printed in English and the ATM only delivers U.S. currency.

Karcher personally arranged the accounts during a three-day business trip to Tokyo where he met with parents. Arrangements were made possible with the help of First Interstate Bank Ltd. in California and First Interstate Bank Ltd. in Tokyo.

First Interstate Bank of Denver is a wholly-owned subsidiary of First Interstate Bancorp, the nation's eighth largest banking company with 32 offices worldwide including the Pacific Rim.

BILTHOVEN, THE NETHERLANDS (JUNE 12) PR NEWSWIRE - ASM International N.V. (NASDAQ: ASMIF), the Netherlands-headquartered manufacturer of semiconductor production equipment, announced today a joint agreement with AT&T (NYSE: T) to complete the development of Aluminum Chemical Vapor Deposition (Aluminum CVD).

Aluminum Chemical Vapor Deposition is a metallization technology for use in the production of advanced semiconductors. This CVD process provides better properties of aluminum films than those produced by physical vapor deposition. Aluminum CVD also provides an alternative to Tungsten CVD at a lower cost, while allowing it to retain the inherent advantages of aluminum in more advanced devices.

As a pioneer of this technology, ASM had performed research and development on Aluminum CVD on its own, before joining forces with AT&T in 1989. Starting from the basic process on prototype equipment developed by ASM, both companies are now working on completing process development aiming at qualification for production of state-of-the-art devices.

Both companies' studies show superior quality aluminum films by using the basic Aluminum CVD process in combination with a pre-deposited layer of other material in a multi-chamber reactor system. Furthermore, the studies have proven the feasibility of incorporating copper in the Aluminum CVD film, which further improves the properties of the aluminum film.

ASM International N.V. dedicates its resources to the research, development, manufacturing, marketing, and servicing of equipment and materials used to produce semiconductor devices. The company provides production solutions for the main areas of semiconductor production: wafer processing, assembly and encapsulation. The company's principal facilities in the Netherlands, the United States, Hong Kong and Japan enable it to meet local specifications and to sell and service its products in the world's major semiconductor markets of Europe, the United States and Asia. ASM's subsidiary in the United States is ASM America, located in Phoenix, Ariz.

ORLANDO, FL (JUNE 12) PR NEWSWIRE - RoTech Medical Corporation (NASDAQ-NMS: ROTC), a marketer and distributor of home care products and repackaged pharmaceuticals, announced earnings for its third quarter ended April 30, 1990 of $.08 per share as compared to $.04 per share for the quarter ended April 30, 1989. For the nine months ended April 30, 1990 earnings were $.21 per share vs. $.12 per share for the nine months ended April 30, 1989.

Net income was $368,327 and $948,844 for the quarter and nine months ended April 30, 1990, respectively. This compares to $157,870 and $552,716 for the quarter and nine months ended April 30, 1989, respectively. Net revenue increased 33 percent to $4,329,995 from $3,251,308 in comparing the quarters ended April 30, 1990 and 1989, respectively. Net revenues for the nine months ended April 30, 1990 increased 26 percent to $11,815,482 from $9,343,374 for the nine months ended April 30, 1989.

Management attributes increases in net revenues to its Southeastern expansion and the continued growth of its home infusion therapy division. Increases in net income were achieved as the company's cost of revenue, as a percentage of net revenues, declined due to an emphasis on the more profitable products. In particular, equipment rentals and home infusion therapy have become the company's focus during 1989 and 1990.

NEW YORK (JUNE 12) PR NEWSWIRE - ITT Corporation (NYSE: ITT) announced today that it will sell 7 percent of Alcatel N.V. to Compagnie Generale d'Electricite, its partner in the worldwide joint venture, for $640 million. The transaction will result in an after-tax capital gain for ITT of approximately $139 million, which will be reflected in the company's second-quarter earnings. The transaction is expected to close on June 14.

As a result, ITT's ownership in Alcatel will be reduced to the 30 percent level ITT proposed in the 1986 negotiations with CGE during the formation of the joint venture. However, in order to complete the deal at that time ITT agreed to take an additional 7 percent, bringing its ownership then to 37 percent.

The ITT board of directors approved management's plan to use the after-tax proceeds primarily to buy back additional shares of ITT common stock as part of the company's ongoing stock repurchase program. Since this program's inception in 1987, ITT has bought back 25 million shares, including 11.7 million shares repurchased in connection with the Employee Stock Ownership Plan (ESOP).

ITT also announced that General (ret.) Edward C. Meyer, a member of the ITT board, will join Robert Burnett, another ITT director, and Araskog on the nine-member supervisory board of Alcatel. Araskog continues in his role as chairman of this board, a position he has held since the inception of Alcatel N.V. in December 1986.

"These directors, and the ITT board in general, recognize the great benefits to the corporation and its stockholders which will flow from ITT's continued investment in Alcatel," Araskog concluded.

ITT recently established a center in Brussels to be named ITT Europe N.V. The board of directors of ITT Europe will be headed by Araskog and will include DeRoy C. Thomas, ITT president and chief operating officer; M. Cabell Woodward Jr., ITT's vice chairman and chief financial officer, and several other ITT senior executives responsible for significant operations

in Europe.

The ITT Europe board will meet at least four times per year. In addition to its Alcatel participation, ITT employs over 40,000 people in 14 countries in Europe and in 1989 derived about $5 billion of its more than $20 billion in sales and revenues from the community with operating income of $475 million, 30 percent of ITT's total segment income. Alcatel contributed an additional $167 million to ITT's net income. ITT's assets in Europe total $5 billion, 11 percent of total assets.

SUNNYVALE, CA (JUNE 12) PR NEWSWIRE - Fortrend Engineering Corp. of Sunnyvale announced the signing of a letter of intent with the Academy of Sciences of the U.S.S.R. to form a joint venture to develop products evolving from research underway in Moscow.

The technology involves the use of short wavelength ultraviolet light to remove organic contaminants. Cleaning applications include semiconductor wafers, optical components, welding processes and other processes where ultra clean surfaces are required.

Currently a number of prototypes are operating in semiconductor wafer fabs in the U.S.S.R. According to Professor Leonid V. Velikov of the Department of Submicron Lithography at the Academy of Sciences, "Yield improvement approaching one hundred percent has been attained."

The Academy of Science delegates indicated the selection was based on Fortrend's track record in automation and product development.

ATLANTA (JUNE 12) PR NEWSWIRE - Finalizing two days of meetings in Atlanta, the chief executives of Delta Air Lines, (NYSE: DAL) Singapore Airlines, and Swissair today in a news briefing discussed the year-old Alliance between Delta, Singapore, and Swissair.

The press briefing followed a two-day meeting of the Alliance's Executive Board which discussed the status of programs already underway as well as new programs in various stages of implementation.

The three airlines last year created the world's first global airline alliance through cross-equity investments in each of the other carriers. Meetings Monday and Tuesday of the Alliance Executive Board were headed by Ronald W. Allen, Delta's chairman of the board and chief executive officer; Dr. Cheong Choong Kong, chief executive officer and managing director of Singapore Airlines, and Otto Loepfe, president and chief executive officer of Swissair.

At the news briefing the three airline chiefs elaborated on plans to pursue joint purchasing opportunities, possible aircraft interchange flights, joint globe-spanning tour packages, and a global door-to-door small package service.

Before today's announcements, the Alliance had already shown tangible results in the form of expanded frequent flyer programs, coordinated globe-spanning flight schedules and joint fares to name a few.

Also, Delta and Swissair completed a loan of more than 70 Delta flight attendants to Swissair for a three-month period. The exchange helped Swissair through a temporary personnel shortfall while allowing Delta personnel to gain the experience of working with a service-oriented international carrier.

Additionally, Singapore and Delta have entered into blocked space agreements for traffic from Singapore to Dallas/Ft. Worth and to New York. Passengers travel from Singapore to Los Angeles with Singapore Airlines, then complete their travel on Delta. About the Alliance members:

- Delta presently operates over 2,400 daily flights with service to 176 cities in 12 countries. The Delta fleet numbers 426 aircraft;
- Singapore operates flights to 57 cities in 37 countries;
- Swissair serves 110 cities in 67 countries. Its fleet of over 50 aircraft, like its Alliance partners, is one of the world's youngest.

NEW YORK (JUNE 12) PR NEWSWIRE - Today, Infotechnology, Inc. (NASDAQ: ITCH), and its subsidiary, Institutional Research Network, Inc. (IRN), and the New York Society of Security Analysts (NYSSA) announced a three-year exclusive agreement in which IRN will broadcast NYSSA's daily meetings live to institutional investors throughout the United States and into eight countries in Europe. NYSSA also entered into a three- year programming agreement with Financial News Network (owned 47 percent by

Infotech) to produce financial television programs at NYSSA. Both agreements commence immediately.

The New York Society of Security Analysts has approximately 5,000 members who attend daily meetings where CEO's set expectations for the outlook for their company's performance. IRN's television team at NYSSA broadcast these meetings to 2,000 portfolio managers at the top 100 institutions nationwide.

Jonathan Fram, president, IRN, said, "Our exclusive ability to broadcast NYSSA meetings allows money managers throughout the world to get first-hand information from the most influential and important analyst groups in the country."

In addition to money managers worldwide, NYSSA meetings will be made available to more than 15 other analyst societies across the country through IRN.

"We are delighted to enter into this long-term agreement," said T. Wayne Whipple, executive director, NYSSA. "NYSSA strongly values its firm ties with Infotech and its IRN and FNN operations," said Whipple.

NYSSA also entered into an agreement with Financial News Network, Inc. in which FNN will produce "Inside Corporate America," a series featuring CEOs of top U.S. corporations, at the newly created NYSSA Media Center. FNN will have the exclusive ability to broadcast excerpts of NYSSA meetings for its highly rated news programs that reach 34 million businesses and households.

Earl W. Brian, chairman and chief executive officer of Infotech, said, "Our relationship with NYSSA establishes a firm bond between Infotech and the experts on Wall Street. This agreement illustrates how the synergies of our FNN and IRN units fulfill our mission of remaining a leading supplier of financial information throughout the world."

Infotechnology, Inc., is an integrated communications and information company that develops, distributes and markets economically useful information products and services to business consumers. Its lines of business include Financial News Network (NASDAQ: FNNI) and United Press International.

PHILADELPHIA (JUNE 12) PR NEWSWIRE - WLR Foods Inc., the Virginia- based turkey and chicken production and marketing company, selected Weightman Advertising as its agency of record, responsible for all retail advertising of the company's major poultry brands.

Founded in 1927, WLR Foods is currently ranked as the 27th largest American meat company, with 1989 reported sales of more than $450 million. Its major brands include Wampler-Longacre(R) and Rockingham(R).

Weightman Advertising, a member of the Philadelphia-based communications company The Weightman Group, was selected because of the agency's strong experience in packaged goods, as well as its previous work in the poultry industry.

"We're very happy to have The Weightman Group on our WLR Foods team," said James L. Keeler, chief executive of WLR Foods. "Their experience in packaged goods fits well with our strategic marketing plan."

According to Weightman President and Chief Operating Officer John Goodchild, the addition of WLR Foods to the agency's client roster is a vote of confidence in the talent available in the Philadelphia marketplace.

"We're thrilled to have WLR Foods on board," Goodchild said. "They continue to be a company that's growing and making real strides in an already thriving marketplace, and we feel very lucky to be able to help them continue to grow and prosper."

Goodchild added that the agency selection process included an impressive list of New York-based advertising agencies, as well as medium agencies out of the New York area. He said he believes the decision of WLR Foods to come to Philadelphia reflects a growing trend of businesses to move away from New York and to mid-sized agencies where they get the hands-on talent and attention often missing from the large agency conglomerates.

Weightman Advertising is a member of The Weightman Group, one of the largest independent communications companies in the Delaware Valley, and among the top 100 in the United States. The Weightman Group is comprised of five operating units: Weightman Advertising, Weightman Schaefer Public Relations, Weightman Research, Roska Direct Marketing and Schaefer Advertising.

NEW YORK (JUNE 12) PR NEWSWIRE - The trustees of HRE Properties (NYSE: HRE) declared a quarterly dividend of 45 cents per share at their regular meeting today. The rate set by the trustees restores the dividend to its regular level from a one-time reduced payment last quarter. The dividend declared represents the eighty-third consecutive quarterly dividend since the trust began operations in 1969. It is payable July 20, 1990 to shareholders of record on June 29, 1990.

HRE Properties also announced its financial results for the quarter ended April 30, 1990. Funds from operations in the second quarter were $2.3 million or 43 cents a share on fewer common shares outstanding compared to $2.3 million or 40 cents a share in the year ago quarter. Gains on sales of properties in the second quarter were $162,000 or 3 cents a share compared to $121,000 or 2 cents a share in the same fiscal period last year. Net income was $1.1 million or 20 cents a share a share compared to the $1.2 million or 21 cents a share in the same quarter a year ago. For the first six months, net income was $1.3 million or 23 cents a share compared to $2.6 million or 43 cents a share for the same period last year. Six-month results reflect the unusual charges incurred in defense of a takeover attempt of the trust. These costs lowered 1990 net income by $915,000 or 15 cents a share.

President and Chief Executive Officer Charles J. Urstadt said, "Net earnings and cash flow were what we projected for this quarter. While most of HRE's properties are almost fully leased, which is a significant achievement in today's severe real estate markets, rents continue to be depressed in many of the real estate markets in which we operate. One of our goals has been to contain costs and we are beginning to see the results of our efforts as both real estate operating and general and administrative expenses declined this quarter compared to last year."

HRE Properties is a self-administered equity real estate investment trust providing investors with a means of participating in ownership of income-producing properties with investment liquidity.

NEW YORK (JUNE 12) PR NEWSWIRE - Freddie Mac (NYSE: FRE), the creator of the first conventional mortgage passthrough security in 1971, today announced plans to enhance its Mortgage Participation Certificates (PCs) with a faster payment passthrough to investors.

Called Gold PCs(A), these enhanced securities will pass through the first payment to investors 45 days after issuance -- the fastest payment to investors of any agency-issued, conventional mortgage passthrough currently available. The faster passthrough is expected to command higher security prices. Investors in Freddie Mac's existing PCs currently receive payments within 75 days of issuance.

The corporation also announced that it will offer investors the option to convert their existing PCs to Gold PCs once issuance of the enhanced PC begins.

Freddie Mac expects to issue Gold PCs in phases, beginning in October with securities backed by 15- and 30-year, fixed-rate, single- family mortgages (including balloon resets, second mortgages and fixed- rate Giant PCs). These will be followed by Gold PCs backed by other mortgage types. Implementation dates for each phase will be announced separately.

In addition to faster payment passthroughs, Gold PCs will also offer PC investors:

-- a guarantee of timely payment of interest and scheduled principal. -- pass through of actual, rather than predicted, prepayments. -- one payment cycle for all Gold PCs. -- immediate eligibility for use in REMICs, Giants and other types of derivative securities.

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a continuous flow of funds to mortgage lenders in support of homeownership and rental housing. By linking the capital markets with the mortgage markets, Freddie Mac brings the efficiencies and lower costs of the secondary mortgage market to the lender, the investor and the homebuyer. Over the years, Freddie Mac has helped finance one in eight American homes, including more than half a million apartments units.

#90163p5487 06/12/1990 ~PR Newswire
ROCKVILLE, MD. (JUNE 12) PR NEWSWIRE - CRI Insured Mortgage Association, Inc. (known as CRIIMI MAE), a real estate investment trust specializing in insured, multi-family mortgage investments, took the first step today in a plan to acquire 100 percent control of four insured mortgage investment funds sponsored by Integrated Resources, Inc.

The acquisition plan was detailed in a registration statement (including a preliminary prospectus/offer to purchase) filed today with the Securities and Exchange Commission. In the filing, CRIIMI MAE and a newly formed company -- AIM Liquidating REIT, Inc. -- offer investors the right to exchange units in each of the four Integrated-sponsored funds for, at their option, shares of common stock of either CRIIMI MAE or AIM Liquidating REIT.

CRIIMI MAE has retained Salomon Brothers Inc. to serve as dealer/ manager for the offer.

The four funds, which in the aggregate hold insured mortgage investments of approximately $642 million, are American Insured Mortgage Investors (AIM 84), Integrated Resources American Insured Mortgage Investors - Series 85, A California Limited Partnership (AIM 85), American Insured Mortgage Investors L.P. - Series 86 (AIM 86), and American Insured Mortgage Investors L.P. - Series 88 (AIM 88).

The offer will not commence until the registration statement is declared effective by the SEC.

CRIIMI MAE is an actively managed, infinite-life real estate investment trust which is one of the largest and most active investors specializing in the market for federally insured mortgages on multi- family housing. It was created to effect the merger in November 1989 of three predecessor insured mortgage funds sponsored by CRI, Inc., and its shares are listed on the New York Stock Exchange. Approval of a majority of the outstanding shares of CRIIMI MAE is required for the consummation of the offer.

AIM Liquidating REIT is a newly formed finite-life self-liquidating company that intends to qualify as a REIT and its assets will initially consist solely of the units tendered and accepted pursuant to the exchange offer.

MCLEAN, VA. (JUNE 12) PR NEWSWIRE - BDM International, Inc. has been awarded a competitive five-year contract by the state of Montana.

The contract, valued at just under $16 million, will support the Montana Department of Social and Rehabilitation Services (SRS) through the design, development, implementation, and management of a new computer system called The Economic Assistance Management System (TEAMS).

The TEAMS development and facilities management contract runs from February 1990 through July 1994. The computer system, to be developed by

BDM and its subcontractors, will be the largest automated system ever implemented in state government in Montana. It will provide faster, more accurate processing of applications for aid to families with dependent children, food stamps, and Medicaid.

Montana SRS Director Julia Robinson said: "In addition to providing a significant improvement in the state's administration of public assistance services, the TEAMS project represents a major economic development program for Montana. This is an exciting example of the benefits of privatization which Governor Stephens has directed his agency administrators to be looking for and working towards."

This contract award to BDM represents Montana's most impressive entry into private sector facilities management since Governor Stephens took office in 1989. BDM, as prime contractor, is responsible for system design and development in the first two years and for facilities management and maintenance of the entire system in the succeeding three years of the contract. BDM is teamed with Andersen Consulting of Chicago.

All work will be performed in Montana. BDM will employ approximately 24 people in Helena, where the company has opened an office. BDM President Earle C. Williams said, "We are committed to making a positive difference in Montana, to show the benefits of privatization in programs where it makes good economic sense."

BDM International, Inc., a wholly-owned subsidiary of Ford Aerospace Corporation, provides diversified professional and technical services to the public and private sectors. Systems integration, information management, logistics, and advanced manufacturing technology/systems applications are among the professional services provided by BDM.

DEARBORN, MI (JUNE 12) PR NEWSWIRE - James P. Quinlan has been appointed manager of the Employee Relations Department, Engine Division, for Ford Motor Company's North American Automotive Operations. He succeeds John E. Senterfitt who has been named director of employee relations - Ford Mexican Affairs.

Quinlan previously was manager of the Employee Relations Department, Finance Staff, a post he had held since June 1989. In his new position, he will coordinate employee relations activities involving 13,500 people at the Engine Division's general office and at seven engine plants throughout North America.

Quinlan joined the company's Ford Division in 1966 as a statistical analyst and has served in a wide variety of employee relations assignments.

In his new capacity, Senterfitt will advise senior management at Ford's North American Automotive Operations and Automotive Components Group on a wide range of employee relations matters in Mexico.

He joined the company's Lincoln-Mercury Division in 1963 as an industrial relations analyst and has served in a wide range of employee relations assignments. He had held his previous post at Engine Division since June 1989.

#90163p5500 06/12/1990 ~PR Newswire

CLEVELAND (JUNE 12) PR NEWSWIRE - To compete globally and successfully, U.S. manufacturers must set their sights on three vital elements: a focus on customer satisfaction, a long-term view and commitment to investing in manufacturing, marketing and people.

This was the message delivered today by Scott Whitlock, executive vice president of Honda North America, at the opening session of a two- day conference "World Class Manufacturing: Can America Compete?", sponsored by Cleveland-based McDonald & Company Securities, Inc. (NYSE: MDD). Top executives from 33 companies will address the symposium.

The conference has attracted more than 200 institutional investors and portfolio managers from North America, Europe and the Far East.

Whitlock told the McDonald & Company conference: "Our goal at Honda North America is to produce a product at a reasonable price that will satisfy our customers."

In striving toward this goal, Whitlock said his company has taken a long-term perspective. "We're willing to accept reduced income while we build sales and expand our markets. We want to establish a self-reliant motor vehicle company in the U.S. which can compete world-wide.

"Without a full commitment to quality, a company cannot succeed in the global marketplace," the Honda North America executive emphasized. "Commitment encompasses manufacturing, marketing and the work force," Whitlock said. "Employees must be drawn into the manufacturing process and be involved in shop-floor decisions which ensure the production of a quality product."

Honda North America, based in Marysville, Ohio, is the fourth largest U.S.

auto manufacturer. Its Accord model was the best selling car in the U.S. last year. The auto maker has a $2 billion investment in Ohio and employs more than 9,000 people.

Ivan W. Gorr, chairman and chief executive officer of Cooper Tire & Rubber Co. of Findlay, Ohio, said, "We manage for long-term results. We take pride in our ability to plan operationally for the short-term and strategically for the long-term."

Cooper Tire's president and chief operating officer, William T. Fitzgerald noted that to be competitive, a company must understand that costs exist not just in the purchase of raw materials. "Costs are also involved in design, production and distribution of the product," he said. "You must be fully competitive in all facets."

Cooper Tire's stress on quality has been recognized by world-wide vehicle manufacturers. "Our products have been selected by all of the nine foreign, or joint-venture manufacturers of vehicles in the U.S. That in itself is a statement of quality," stated J. Alec Reinhardt, the firm's chief financial officer.

Johnson Controls, based in Milwaukee, sees its employees as the principal element in being successful in the competitive marketplace. Said James H. Keyes, the firm's chief executive officer, "We want our employees to have the best training possible, to understand our goals and be recognized and rewarded for their contributions to our success." Keyes anticipates higher earnings for all of 1990 despite a decline in first-quarter results.

McDonald & Company Securities, Inc. is a leading regional investment banking and brokerage firm with offices throughout Ohio, Michigan and Indiana and in Boston, Chicago, Jersey City, and Dallas.

CONTACT: Ron Petrie of McDonald & Company, 216-443-2334, or Dick Pergler of FitzSimons Public Relations, 216-241-5656, for McDonald & Company.

#90163p5503 06/12/1990 ~PR Newswire

NEW YORK (JUNE 12) PR NEWSWIRE - U.S. Bankruptcy Court Judge Harold F. White today approved the appointment of Barry L. Zaretsky, a Brooklyn Law School professor and counsel to the international law firm of Kelley Drye & Warren, as examiner in the Revco Drugstores bankruptcy case.

This is the first time an examiner has been officially appointed to review a junk bond-financed LBO in the course of an ongoing bankruptcy. The appointment of an examiner in the Revco case was requested by United States Trustee Conrad J. Morgenstern.

Professor Zaretsky, with Kelley Drye as his counsel, will investigate the failed $1.25 billion management-led leveraged buyout of the 2,000 drugstore chain, the first major junk bond finance LBO to go into Chapter 11. Professor Zaretsky will prepare a written report to determine whether the Revco LBO was a fraudulent conveyance and if there are other legal actions that exist as a result of the LBO.

If Professor Zaretsky's investigation finds that the Revco junk bond financed LBO is a fraudulent conveyance -- that is when a troubled debtor transfers an asset to a third party for less than the asset's true value -- and if the courts ultimately uphold the findings, it would further jeopardize junk bond financed LBOs as a method of corporate acquisition. It could retroactively call into question billions of dollars of outstanding tenuous LBO debt. Conversely, if it is determined that the transaction did not constitute a fraudulent conveyance, the findings would lend support to the integrity of junk bond financing in LBOs. Professor Zaretsky has been ordered to file a preliminary written report on or before July 16, 1990.

Professor Zaretsky, an expert in the field of bankruptcy, has been a member of the faculty of Brooklyn Law School since September 1978 and counsel to Kelley Drye & Warren since 1989. Professor Zaretsky has written, lectured, and consulted extensively on the topic of leveraged buyouts. He writes the regular bankruptcy column for the New York Law Journal and is a co-author of the monthly Commercial Law Report. He is

also one of the original inductees into the American College of Bankruptcy.

Kelley Drye & Warren has a national bankruptcy practice in both the debtor and creditor areas. In addition to counseling its clients in structuring transactions in regard to bankruptcy concerns, the firm is involved in a wide variety of major Chapter 11 cases, representing creditors' committees and representing debtors in both judicial and non- judicial workouts.

U.S. Trustee Conrad J. Morgenstern, the Justice Department official charged with supervision of the case, has been lobbying for the appointment of an examiner to investigate the LBO since the inception of the case in 1988. Morgenstern was forced to appeal all the way to the Sixth Circuit in order to obtain this appointment.

Kelley Drye & Warren has more than 400 attorneys worldwide and nine offices throughout the United States, Asia and Europe: Brussels; Chicago; Los Angeles; Miami; New York; Stamford, Conn.; Parsippany, N.J.; Tokyo, and Washington, D.C.

CONTACT: Leonard Borrino of Makovsky & Company, 212-532-6300, for Kelley Drye & Warren.

COLUMBUS, OHIO (JUNE 12) PR NEWSWIRE - John C. Kane has been elected a director of Bank One, Columbus, NA. The announcement was made today by William M. Bennett, president and chief executive officer of Bank One, Columbus.

Kane is president of the Ross Laboratories Division, of Abbott Laboratories. Ross Laboratories, headquartered in Columbus, Ohio, manufactures and markets nutritional and other health care products. Kane joined Abbott Laboratories, which is headquartered in Chicago, in 1974 and was promoted to president of the chemical and agricultural products division in 1981. In May 1989, he was named executive vice president of Ross Laboratories in Columbus, Ohio. He was named president of Ross Laboratories in January 1990. Prior to joining Abbott Laboratories, Kane was general manager at Lau Industries in Cleveland and a plant manager with Schick, Inc. in Lancaster, Pa.

Kane holds a bachelor of science degree in education at West Chester State College in Pennsylvania. He serves on the board of directors of The Clara Abbott Foundation, the Nonprescription Drug Manufacturers Association, Columbus Area Chamber of Commerce and of INROADS, a career development program in business and industry for minorities. He has also been apointed to the board of Children's Hospital Research Foundation. Kane, 50, is married with three children and resides in Dublin, Ohio.

Bank President Bennett said, "With John Kane's manufacturing background, he will be an important addition to the bank's board of directors." With the addition of Kane to the board, there are now 14 directors of Bank One, Columbus.

Bank One, Columbus has 42 banking centers in a five-county region of central Ohio and is an affiliate of Banc One Corporation (NYSE: ONE) which has assets of $27.2 billion. Banc One Corporation operates 52 banking organizations in Indiana, Kentucky, Michigan, Ohio, Texas and Wisconsin.

RICHMOND, VA (JUNE 12) PR NEWSWIRE - Ethyl Corporation (NYSE: EY) announced today it has signed an agreement with Quantum Chemical Corporation to purchase the fixed assets and inventories of Quantum's poly alpha olefin (PAO) production facilities in Houston, Texas, for approximately $48 million. Completion of the purchase is subject to regulatory review.

Under the agreement, Ethyl said Quantum will operate the PAO unit for Ethyl. With a capacity of approximately 30 million gallons per year, it will be Ethyl's first such production unit in the United States.

Poly alpha olefins have achieved wide acceptance as performance fluids for premium multigrade motor oils. They provide excellent low-temperature fluidity and high-temperature stability with fuel efficiency and extended oil life. Other applications include greases, hydraulics and lubricants for gears, automatic transmissions, compressors and two-stroke engines.

DALLAS (JUNE 12) PR NEWSWIRE - Dr. Richard E. Leakey, director, Kenya Wildlife Service, has retained Media West Communications Inc. of Dallas/Fort Worth, Texas as media coordinator for United States media representatives desiring information or arranging interview opportunities. Media West Communications is a public relations firm specializing in work with non profit corporations and organizations. For information on Leakey or on his work to prevent the poaching of the African elephant and rhino

or to arrange interviews, contact John Samford at 817-467-5843 or write:

Media West Communications Inc.
320 Westway Place, Suite 509
Arlington, TX 76018 Leakey, a renowned paleontologist following in the footsteps of his parents, the late Dr. Lewis Leakey and Mary Leakey, already has attained international media coverage for drastic steps he has taken in his new position since appointed in mid April 1989 by Kenyan President Daniel Arap Moi, including a massive burning last July of 2,500 elephant tusks weighing 12 metric tons and valued at 60 million shillings to prove Kenya's commitment to preserving the country's wildlife.

Untamed Kenyan lands once proved roaming grounds for 65,000 elephants in 1979; that number had dropped to 20,800 by 1987, and the poaching continues. However, within four months, Leakey and his enforcement staff had reduced the animal killing from an average of two elephants per day to only one known killing in a two-and-a-half month period last summer.

Leakey also severed 2,000 employers from Kenya's Wildlife and Conservation Management Department, newly named Kenya Wildlife Service. Leakey believed many of the departments employees were taking kickbacks and actually aiding poachers. Unafraid to take the unpopular stance, Leakey now travels with a constant bodyguard.

Leakey is in constant demand by corporations, organizations, and media representatives for information and presentation on the development of programs to prevent the further decline of Africa's wildlife and environment.

#90163p5517 06/12/1990 ~PR Newswire
NEW YORK (JUNE 12) PR NEWSWIRE - Flora Lewis will retire as the foreign affairs columnist of The New York Times on Dec. 31 and become the newspaper's senior columnist. She will be succeeded as the foreign affairs columnist by Leslie H. Gelb, the deputy editorial page editor and Op-Ed page editor. His successor in the Op-Ed position will be Mitchel R. Levitas, a senior editor of The Times. The announcements were made today by the publisher, Arthur Ochs Sulzberger.

Lewis will contribute periodic commentary on international affairs, writing from her base in Paris.

Gelb, 53-years-old, will be the fourth person to serve as foreign affairs columnist. The first was Anne O'Hare McCormick, who held the position from 1937 to 1954.

Her successor, C.L. Sulzberger, served until 1977. Lewis was appointed in 1980, after a period in which visiting columnists rotated in the position.

Gelb has served since 1986 in his present position as deputy to Jack Rosenthal, the editorial page editor. His duties have included supervision of the Op-Ed page and writing and editing editorials. A new deputy editorial page editor remains to be designated. Kyle Crichton will continue as deputy Op-Ed page editor.

Gelb graduated from Tufts University and has a Ph.D. from Harvard. He worked for Senator Jacob Javits and served as a senior official in the Departments of Defense and State. He was a senior fellow at the Brookings Institution and the Carnegie Endowment for International Peace.

At The Times, Gelb has held the posts of diplomatic correspondent and national security correspondent. In 1987, he was a member of the team that won the Pulitzer Prize for Explanatory Journalism for The Times.

Levitas, 60-years-old, will be the fifth person to head the Op-Ed page since it was created in 1970. The others were Harrison Salisbury, the founding editor, who served until 1974; the late Charlotte Curtis, 1974 to 1982, and Robert B. Semple Jr., now the associate editorial page editor, 1982 to 1988.

Levitas has headed several major departments of The Times. Most recently, he has served as senior editor for weekends and on special assignments. From 1983 to 1989, he was editor of the Book Review. Before that, he was editor of The Week in Review and metropolitan editor.

Before joining The Times in 1965, Levitas was a reporter on labor for the New York Post and an assistant editor of Time magazine, specializing in foreign news and education. He is a 1951 graduate of Brooklyn College, was a Nieman Fellow at Harvard in 1958 and 1959 and is the author of a book, "America in Crisis."

Lewis, 67-years-old, joined The Times in 1972 after having written extensively about Europe for The Associated Press and The Washington Post. She was graduated summa cum laude from the University of California and earned a graduate degree from the Columbia School of Journalism.

She has been the recipient of numerous awards for outstanding foreign and diplomatic reporting and is the author of four books.

CHICAGO (JUNE 12) PR NEWSWIRE - Kemper Financial Services, Inc. (KFS) said today that it endorses the eight recommendations announced today by the New York Stock Exchange Panel on Market Volatility and Investor Confidence, but that the recommendations are not far reaching enough or strong enough to ameliorate the problem of market volatility.

"We think that these recommendations would have a salutary effect on investor confidence, and would reduce the frequency and magnitude of excessive volatility, provided they are adopted by the appropriate entities and implemented by our industry," said Kemper Chief Investment Officer and Senior Executive Vice President Stephen B. Timbers. "Recently, investors in this country have all too often endured episodes of excessive market volatility," he said.

Timbers said, however, that the recommendations in the report, and particularly the analysis, do not fully represent Kemper's position. "Obviously, we were but one of 19 members of the panel, and we did not expect the panel to adopt our views completely.

"The panel was comprised of a wide range of participants from the business community and the investment industry, who brought very different opinions and experiences together. Even though the specific Recommendations of the report were endorsed by the vast majority of the panel members -- including Kemper -- we were nonetheless troubled by the fact that some panel members refused to accept the need for any substantial changes."

Timbers said that he believed opposition to change was largely based on academic ideological grounds, such as the argument that markets are efficient and abhor any strictures, or for parochial business reasons -- for example, fears that the Recommendations might cost a firm or exchange some trading business in the near term. "Even though these views did not prevail, they served to dilute certain aspects of the Recommendations and many of the conclusions in the report," he said.

"In spite of the progress that this report represents, we remain concerned that trading practices such as index arbitrage, and the high leverage in the structure of the markets will continue to exist largely unchanged, until another market debacle as we experienced in 1987 and 1989 renews the call to action," Timbers continued. "We recognize that volatility is a characteristic of equity markets and that liquidity entails some cost and risk, but there is nothing of value in the bouts of excessive volatility we have witnessed. In this regard, the recommendations on coordinated circuit breakers, centralized regulation, better detection of abuses and manipulation, and stabilizing execution in index arbitrage programs move in the right direction. Nevertheless, stronger recommendations would be

even more effective.

"For example, the report calls for coordinated circuit breakers in times of market stress. Unfortunately, 'a time of market stress' is defined by the report as occurring at 12 Standard & Poor's 500 Stock Index points, which is quite large, since it is noted in the report that the public becomes unsettled when the stock market moves more than two percent in price during a day. Therefore, it seems more logical to us that circuit breakers should take effect at two percent rather than at close to four percent, as recommended -- if one wants to preserve public confidence."

KFS is a major investment management and financial products company and part of the Kemper Group. KFS currently has over $60 billion in assets under management.

BALTIMORE (JUNE 12) PR NEWSWIRE - The board of directors of MNC Financial (NYSE: MNC), at its meeting today, declared a regular quarterly cash dividend of $.29 per share on the corporation's common stock.

The common stock dividend is payable June 29, 1990, to stockholders of record June 22.

Following the MNC board meeting, Chairman and Chief Executive Officer Alan P. Hoblitzell Jr. announced that the board of directors has adopted a program developed by management entailing a comprehensive review of a variety of practices, policies and procedures, including those relating to loan quality, and the implementation of any appropriate enhancements

identified by that review. The program, which includes the completion in the near future of the company's ongoing evaluation of its loan portfolios is consistent with the board's and management's longstanding commitment to assure that the company continues to operate in accordance with regulatory requirements and to facilitate and enhance the company's efforts to meet changing economic conditions and applicable regulatory requirements. The company has also committed to the banking regulators to implement the program and to provide them with reports concerning its progress.

The company said that real estate markets in which it has significant loans outstanding are continuing to exhibit softness, a trend likely to have an adverse effect on MNC Financial's second quarter results.

MNC Financial is a diversified financial services company which delivers a broad range of commercial and consumer banking products in the Baltimore/Washington common market and in the mid-Atlantic states. In addition, MNC is the largest national marketer of endorsed group credit cards, a pioneer in asset securitization and sales, and a leader in national consumer finance products. MNC manages one of the largest trust entities in the region.

WARRENTON, OR (JUNE 12) PR NEWSWIRE - A.B. Holding Group, Inc. (NASDAQ: AGBG) announced today that it and its 56 percent-owned joint venture partner had entered into an agreement with KW Agriculture Ltd. whereby KW Agriculture will act as the company's exclusive sales and marketing agent for the sale of Ag-Bag products and services in the United Kingdom.

Sohail Masood, president of A.B. Holding Group, Inc., said, "We are extremely pleased to be associated with KW Agriculture Ltd. in this marketing venture inasmuch as they are a premier company selling to the agricultural industry in the U.K. We expect that Ag-Bag Europe plc, our 56 percent-owned joint venture company, will benefit greatly from this association beginning in late 1990 or early 1991."

Masood noted that A.B. Holding will benefit in two separate ways: (1) through its ownership in Ag-Bag Europe and (2) through the sale of machinery and bags to Ag-Bag Europe for use by KW Agriculture.

KW Agriculture Ltd. is a part of the Kenneth Wilson group of companies, which are wholly owned by Bunge and Company Ltd. of London and which in turn is part of the worldwide Bunge organization of Brazil. KW Agriculture has in excess of $600 million in revenues selling grains, alternative feeds, feed additives and other products to the agricultural industry in the U.K.

Until recently, Ag-Bag Europe had been 50 percent-owned by A.B. Holding Group, Inc. The company increased its stake to 56 percent by agreeing to invest up to an additional $170,000 in Ag-Bag Europe. At the same time, a 25 percent-partner who is co-chairman of Ag-Bag Europe, has agreed to match the company's investment in return for which his stake has increased to 31 percent.

A.B. Holding Group, Inc. manufactures and sells patented bagging machinery and large (up to 250 feet long) disposable plastic storage bags to the agricultural industry for the storage of feed.

FOXBORO, MA (JUNE 12) PR NEWSWIRE - The Foxboro Company (NYSE: FOX) announced that it has received several proposals for the purchase of 100 percent of its shares and that additional proposals may also be forthcoming.

Salomon Brothers Inc., and the law firms of Skadden, Arps, Slate, Meagher & Flom and Goodwin, Procter & Hoar, will be assisting the company in evaluating and negotiating the terms of the proposals.

The company also pointed out that no decision regarding a sale had been made and that there can be no assurance that any transaction will be consummated. However, as previously announced, the company is seeking a strategic partner to provide complementary strengths to its existing strong process control capability as the basis of a broader competitive offering which it believes will be required in the 1990's.

IRVINE, CA (JUNE 12) PR NEWSWIRE - Century 21 Real Estate Corp., the world's largest franchisor of real estate brokerage services, announced

today that it has selected Campbell-Mithun-Esty Advertising, Minneapolis, to direct and coordinate its $30 million national advertising budget after a highly competitive 60-day review that involved nearly 100 agencies nationwide.

The $30 million Century 21 account is believed to be the biggest single award in the United States this year.

After initial screening, the number of agencies considered was reduced to a dozen. Finally, seven agencies including the incumbent, McCann-Erickson of New York, were invited to make creative presentations last week.

Campbell-Mithun-Esty Advertising, with billings of $900 million, is a member of the largest advertising company in the world, Saatchi and Saatchi. The firm represents more than 20 Fortune 500 companies.

The new agreement will take effect in approximately 60 days.

DETROIT, (JUNE 12) PR NEWSWIRE - Detroit Edison Company (NYSE: DTE) today announced electricity sales last month up 3.7 percent from a year ago, setting a record for any May in the company's 87-year history.

Sales in all three major customer categories -- industrial, commercial and residential -- recorded all-time highs for the month. A total of 3.2 billion kilowatt-hours (kWh) were sold in May.

The overall monthly sales increase was the first since September and only the second in the last 12 months.

Residential sales of 835 million kWh were 4.5 percent higher than May 1989. The residential sales increase can be attributed, in part, to an increase of 21,000 residential customers in the past year.

Commercial sales of 685 million kWh were up nearly 6 percent over last May marking the ninth consecutive month that sales in the commercial sector exceeded those of a year earlier.

For the first time in 1990, monthly industrial sales, which have declined for seven months, marked an increase over the year-earlier period. Total industrial sales for May were 1.6 billion kWh, up 1.6 percent from a year earlier, despite declining sales to the automotive and steel industries.

NEW YORK, (JUNE 12) PR NEWSWIRE - Vernitron Corporation announced today that the preliminary report of the inspectors of election for the annual meeting of shareholders of Kollmorgen Corporation (NYSE: KOL) confirmed that a plurality of the independent shareholders of Kollmorgen voted in favor of Vernitron's nominees and proposals. Approximately 10.9 million shares were voted at the meeting. Excluding the 3.1 million shares voted by the Ruttenberg Group, management and related parties, Vernitron's nominees received a plurality of the votes cast for the election of directors.

Stephen W. Bershad, Vernitron's chairman and chief executive officer, stated, "There is no way that the results can be interpreted as support by shareholders for Kollmorgen management. On the contrary, shareholders have sent a strong message that they want Vernitron's auction and merger proposals and that they want Kollmorgen sold now. Shareholders have rejected management's record and programs."

DUBLIN, OH (JUNE 12) PR NEWSWIRE - Wendy's Old Fashioned Hamburgers (NYSE: WEN) announced today that its comparable sandwich to the Hardee's new lean hamburger is LOWER IN FAT.

"Wendy's 1/4 pound Single hamburger with lettuce, tomato, pickle, onion and ketchup contains only 15 grams of fat -- which is lower than any of our competitors' comparable sandwiches," said Charles Rath, Wendy's executive vice president of marketing.

"We applaud the efforts of our competitors to bring lower fat alternatives to the American consumer -- but today's announcement by Hardee's is not accurate. Wendy's comparable hamburger sandwich is lower in fat," Rath said.

"This is documented in our nutrition/ingredient brochure that is available on request in our stores. Additionally, independent research shows that consumers perceive Wendy's as having the highest quality, most nutritious food choices," Rath continued.

"For more than 20 years, Wendy's has been proud to offer the widest variety of tasty, healthy food choices to our customers," Rath said.

DES MOINES, IA (JUNE 12) PR NEWSWIRE - Allied Group, Inc. (NASDAQ: ALGR) board Chairman and President John E. Evans today announced that the company has received oral assurance from the Internal Revenue Service that a favorable private letter ruling regarding the sale of Allied Life will be issued by the end of June. The sale of the life subsidiary will allow completion of the restructuring plan proposed in October 1989.

The original plan was comprised of four steps: -- Selling the life subsidiary to the company's parent, Allied Mutual, in exchange for 2.7 million shares of Allied Group, Inc. common stock valued at $36.5 million.

-- Replacing the existing pension plan with an employee stock ownership plan (ESOP) for all Allied employees.

-- Leveraging the ESOP to purchase 2.4 million shares of company convertible preferred stock valued at $36 million.

-- Adding $28 million from the proceeds of the sale of convertible preferred stock to the surplus of the company's property-casualty subsidiaries, enabling them to increase their pooling participation to 53 percent from 41 percent.

The company took interim measures to allow the increase in the pooling participation to be effective Jan. 1, 1990, absent receipt of the favorable private letter ruling. Those measures included establishing a non-leveraged ESOP and incurring a $20 million bank debt to fund the necessary increase in the property-casualty subsidiaries' surplus.

"As soon as we receive written approval from the IRS," Evans said, "we'll sell the life subsidiary, leverage the ESOP, repay the $20 million bridge loan, and transfer an additional $8 million to the property-casualty subsidiaries." When the restructuring is complete, the ESOP will be a 37 percent owner of the company, and Allied Mutual's ownership will be reduced to 37 percent from 75 percent.

SEATTLE (JUNE 12) PR NEWSWIRE - Ben Whittle has been promoted to Western Regional ChemCare Manager for Van Waters & Rogers Inc., the U.S. subsidiary of Univar Corp. (NYSE, PSE: UVX). Whittle replaces Bob Crandall, who was recently named director of sales and marketing for the innovative hazardous waste management service.

Whittle joined Van Waters & Rogers more than 27 years ago and has served the company in numerous sales and managerial positions during that time. He has managed VW&R's branch office in Riverside, Calif., for the past three and one-half years.

"The combination of Ben's experience and dedication to responsible chemical waste management made him the clear choice for this position," said Rod Nugent, western regional vice president. "We are excited to announce his promotion."

Introduced by Van Waters & Rogers in 1988, ChemCare provides a

comprehensive service to assist waste generators in the proper handling and disposal of their waste in a legal, environmentally responsible and safe manner. The service has received a tremendous response nationwide from VW&R's customers.

Univar Corp., headquartered in Seattle, is a leading North American distributor of chemicals to industry. It operates through two subsidiaries, Van Waters & Rogers Inc. in the United States, and Van Waters & Rogers Ltd. In Canada.

CONTACT: Jerry Fischer of Van Waters & Rogers Inc., 206-447-5911; or Leslie Lewis of Hill and Knowlton Inc., 206-682-6944, for Van Waters & Rogers Inc.

#90163p5614 06/12/1990 ~PR Newswire

SAN JOSE, CA (JULY 12) PR NEWSWIRE - A Texas-based graphics software developer affiliated with Control Data Corp. today sought an injunction to halt the sale of three popular Harvard Graphics software products.

Computer Support Corp. of Dallas has filed suit in the U.S. District Court Northern District of California, alleging copyright infringement by Software Publishing Corp. of Mountain View, Calif. Software Publishing Corp. (SPC) is the developer of Harvard Graphics.

The suit alleges that hundreds of clip-art images contained in Computer Support Corp. (CSC) products were copied without permission by SPC.

An injunction would halt sales of the current Harvard Graphics program, along with the Harvard Graphics Military Symbols and Business Symbols Accessory Paks.

CSC also has requested damages, profits from Harvard Graphics sales, attorneys' fees and court costs.

The action is a counterclaim against an SPC suit filed on April 13, 1990 alleging that CSC's software programs and clip-art are not protected by U.S. copyright laws.

"The SPC position attacks the entire principle of copyright by claiming that our images and software are not protected from unauthorized use," said CSC President Fred Schoeller. "They claim our libraries of more than 15,000 Arts & Letters and Diagraph clip-art images cannot be copyrighted and that they can use and re-sell our images at will without permission or license agreements.

"We find both claims ludicrous and reprehensible," Schoeller said. "A

software developer should have the same copyright protection as a writer, photographer, composer, or artist in creating and selling any original work.

"Previous rulings already have extended copyright protection to computer software programs and CSC is convinced the court will uphold our position."

Schoeller said SPC approached his firm in April 1989 to negotiate a license to use CSC clip-art in Harvard Graphics products. Negotiations ended after SPC filed suit.

"We view SPC's lawsuit as a dangerous ploy to excuse themselves of any wrongdoing," Schoeller said. "If SPC's actions are upheld, it could set a precedent that might be used to weaken the copyright laws software developers depend upon to protect their intellectual property."

At issue is the unauthorized copying of hundreds of computer clip-art images which CSC commissioned professional artists to create, including renderings of complex objects into highly stylized images.

An advanced business presentation tool sold in 47 countries, Arts & Letters recently won Publish Magazine's 1989 Readers Choice Award for the best clip-art for the IBM PC. A version compatible with Windows 3.0 will be released this month, offering sophisticated drawing options, automatic charting, and the largest available supply of electronic clip-art.

Computer Support Corp., an IBM Business Partner headquartered in Dallas, is a developer of computer graphics products for personal computers. Products currently available from CSC include Picture Perfect, Diagraph, PC-Emcee, On-Command, Arts & Letters Graphics Composer, Arts & Letters Graphics Editor, and Decipher.

Software Publishing Corp. is a publicly-held firm traded on the NASDAQ system under they symbol SPCO.

DALLAS (JUNE 12) PR NEWSWIRE - J.C. Penney Company Inc. (NYSE: JCP) today announced the 18 winners of the company's seventh annual Minority Supplier Development Awards at a reception near JCPenney's corporate headquarters in Dallas. The awards honor minority suppliers and JCPenney associates (employees) who have been instrumental in developing professional

relationships between the company and the minority business community.

William R. Howell, chairman and chief executive officer, presented the 1990 supplier grand award to So's Oriental Products Inc. of New York, which supplies JCPenney with sterling silver, gold plate on sterling silver and semi-precious stones. The company is the leading genuine stone supplier to JCPenney and other department stores. The grand award winner among JCPenney associates was Frank Napoli, a banking manager in the treasurer's department in the corporate office. He has continued to develop our minority banking program which consists of 40 banks. In addition, a second associate grand award winner was named for the merchandise division, a new designation created last year within the associates category. The recipient of this award was Tom Zehmer, a buyer for men's ties in Dallas.

According to Terry S. Prindiville, executive vice president and director of support services, the Minority Supplier Development Awards were created to recognize businesses and JCPenney associates for outstanding performance and contribution to the company's ongoing Minority Supplier Development Program. JCPenney currently purchases products and services totaling more than $335 million from more than 1,830 minority-owned businesses in areas such as fashion, cosmetics, administrative services, construction services and data processing.

"The JCPenney Minority Supplier Development Program reflects our commitment to improving the economic position of minority groups through the encouragement of minority business concerns," said Prindiville, who is also vice chairman of the National Minority Supplier Development Council. "We strongly support programs that enable all groups to share in the promise of America, and we believe that minority supplier development is just good, common sense."

J.C. Penney Company Inc., the national department store, has stores in all 50 states and Puerto Rico. The company employs more than 198,000 associates in the United States.

BASKING RIDGE, NJ (JUNE 12) PR NEWSWIRE - AT&T and Universal Bank today announced that the one millionth card member account has been opened for the AT&T Universal Card, a combined long-distance and general purpose credit card.

"We knew we had a good offering when we introduced the AT&T Universal Card

78 days ago," said Paul Kahn, president, AT&T Universal Card Services Corp. "Now, over one million consumers have told us they agree. We think that's a terrific response rate for a brand new product, and we're very proud of it."

Kahn said the speed with which the AT&T Universal Card reached one million accounts has set a new record in the bank credit card industry.

The AT&T Universal Card offers consumers the simplicity of a combined long-distance calling card and general purpose credit card with worldwide acceptance.

AT&T has teamed as an affinity partner with Universal Bank, a subsidiary of Synovus Financial Corp. of Columbus, Ga. Universal Bank issues the AT&T Universal Card. Another Synovus subsidiary, Total System Services Inc., handles billing on card transactions and maintains customer records.

"There are several unique attributes of this card that have made it a big hit with the public," said James H. Blanchard, chairman of the board, Universal Bank. "We're delighted with the card's popularity among consumers."

The AT&T Universal Card is accepted by MasterCard and VISA merchants, includes a 10 percent discount on AT&T long-distance calling card rates, offers an interest rate lower than its major competitors, and is supported by the only service guarantee offered on any MasterCard and VISA.

The AT&T Universal Card also comes with no annual fee for life for those who acquire the card in 1990 and use it at least once a year thereafter.

In addition, features normally associated only with gold bank cards are standard on the AT&T Universal Card. These include, free collision damage coverage on rental cars, free extension of a manufacturer's warranty on products purchased with the AT&T Universal Card and free purchase protection from loss, theft or breakage.

Headquartered in Jacksonville, Fla., AT&T Universal Card Services Corp. currently has 1,100 employees. Kahn commended those employees on the round-the-clock job they've done responding to customers.

SAN DIEGO (JUNE 12) PR NEWSWIRE - HomeFed Bank, Federal Savings Bank, the primary subsidiary of HomeFed Corp. (NYSE: HFD), today reported an

increase of $81 million in gross non-performing assets during May according to HomeFed president and chief executive officer, Robert F. Adelizzi.

HomeFed's gross non-accrual loans and foreclosed real estate rose to 3.12 percent of total assets, up from 2.73 percent at April 30, 1990.

During May, non-accrual loans increased by $72 million to $315 million, while foreclosed real estate increased by $9 million to $264 million, bringing the company's total gross non-performing assets to $579 million.

"Naturally, we are disappointed by these recent increases in non-performing assets," said Adelizzi. "We did not feel that April's $44 million rise in non-performing assets was indicative of a trend."

Non-performing assets have approached the September 1989 level which was $592 million.

"We are, however, more concerned today about the quality of our portfolio than we were last September, as a result of these recent increases and our general concern for the overbuilt condition of commercial real estate markets nationally and certain multi-family markets outside of California " said Adelizzi.

HomeFed's total amount of real estate loans delinquent 30 days or more (not including non-accrual loans) was approximately $140 million at May 31 1990.

"Given these facts, it is probable that the level of non-performing assets will increase further in June and our goal of reducing these assets below $400 million by year-end 1990 will be extremely difficult to achieve," said Adelizzi.

In addition to its normal portfolio review process, the company is currently conducting an in-depth review of all large loans in its portfolio. This analysis includes a review of loan collateral and borrower status, and will be completed by the end of June 1990. The result of this special portfolio review and the recent increases in non-performing assets could result in a further increase in the company's provisions for loan losses in the second quarter of 1990.

Adelizzi stated the company will determine total additions to non-performing assets and provisions for loan losses once the portfolio analysis is completed.

HomeFed Bank, one of the nation's most highly capitalized federal savings banks, ended the first quarter in 1990 with $1.1 billion in stockholders' equity. At March 31, 1990, the bank exceeded all current regulatory

capital requirements with core, tangible and risk-based capital ratios of 5.83, 5.03 and 7.55 percent, respectively.

#90163p5625 06/12/1990 ~PR Newswire

BEVERLY HILLS, CALIF (JUNE 12) PR NEWSWIRE - After 15 months of worldwide investigation, Giorgio Beverly Hills, in conjunction with Yves Saint Laurent, last week raided three key counterfeit perfume operations in Taiwan and Singapore, uncovering what appears to be a significant link in a worldwide counterfeit syndicate.

Al Vetter, Giorgio's director of security, and Jean-Louis Faure, YSL's director of security, worked with local police in Taiwan and Singapore to uncover bogus perfume bottles, cartons, printing plates and scented oils for a variety of prestige perfumes including: Giorgio, Opium, Chanel, Anais Anais, Chloe, Estee Lauder and Poison. An estimated $4 million worth of fragrances were confiscated.

The first raid occurred on June 5 in Taipei at the Mentax Glass Company, where the owners were arrested. Numerous counterfeit bottles of Paris,

Estee Lauder, Poison, Giorgio and Chanel were found along with information that led to the next raid at the Chee Hup printing company in Singapore. There, over 100,000 freshly printed cartons of Giorgio, Anais Anais, Poison and Estee Lauder were recovered along with printing plates and artwork for Giorgio and Chloe.

Information from that raid led the investigative team to conduct the third bust on June 9 at a private residence in Singapore acting as a filler factory. There, counterfeit scented oils and assembly equipment were found. Indications were that the scented oils originated from Grasse, France.

Currently, Singapore has not anti-counterfeiting laws, making the city one of the main centers for worldwide counterfeit perfume trading. However, new legislation prohibiting counterfeiting will take effect in June, 1991.

"This is the third major counterfeit bust that Giorgio has led in the last two years," said Michael Gould, president and chief executive officer. "And we will continue to pursue these professional counterfeiters around the world until this problem is stopped."

In 1988, Giorgio uncovered $20 million worth of bogus perfumes at three different California sites. An in Feburary 1989, the company again led the crackdown of a multi-million dollar counterfeit ring in Rockaway, N.Y.

#90163u0124 06/12/1990 ~United Press International

AUSTIN, TX (JUNE 12) UPI - The state of Texas, which recently conducted its first oil spill response drill, is unprepared for the blazing Mega Borg to lose its 38 million-gallon cargo of crude in the Gulf of Mexico, officials said Monday.

''The drill dealt with something like 20,000 gallons, which is nothing

compared to this,'' said Dave Roberts, a spokesman for the state General Land Office of the drill in Corpus Christi in April.

''Really, we did not deploy any equipment then because that takes money,'' Roberts said. ''The April drill was mostly a communications drill, trying to get everybody involved knowing what they're supposed to be doing.''

The drill was conducted by federal, state and local officials and private industry on the recommendation of a task force appointed by Gov. Bill Clements after the 11 million-gallon spill of crude from the Exxon Valdez in Alaska last year.

Even after that spill the land office said contingency plans by private industry, state and federal officials and the Coast Guard were inadequate for the potential record-breaking spill from the Mega Borg, which has been on fire in the Gulf since early Saturday.

''We're doing OK (on spills) up to 200,000 gallons,'' Roberts said. ''We've been talking oil spill readiness for a long time now.''

Roberts noted that the equipment brought in to spray foam on the fire Monday had to come from the Netherlands, and the nearest booming and other shore protection equipment was in Mobile, Ala.

Robert Lansford, state coordinator for the Division of Emergency Management, said the drill was beneficial to the state, federal and local officials who have been working with the Coast Guard and private contractors hired by the ship's owner.

''We went through this exact scenario. So we're kind of fresh off the presses,'' Lansford said.

State officials from several agencies now are preparing for booming operations to protect the coast should a major spill occur, and the state is lucky the weather is calm and the ship is nearly 60 miles offshore, Lansford said.

An estimated 100,000 gallons had spilled by late Monday, but Lansford said there was minimal threat to the Texas coast because it is light crude. ''It's burning up and it's evaporating up so it may not have an impact at all,'' he said.

Meanwhile, Attorney General Jim Mattox prepared for possible legal action against the owners of the oil and the ship should the Texas coastline be affected.

''We have investigators along the coast, as do the Parks and Wildlife Department and the Texas Water Commission, that are prepared to document

any damages, source of the damages, cause of the damage and liability,'' Mattox spokesman Ron Dusek said.

''If there is a spill, there more than likely will be damages to the coastline, cleanup costs, damages to wildlife, so we're gathering the proof for a lawsuit.''

The Mega Borg is owned by K.S. Mega Borg II of Farsund, Norway. The cargo is owned by ELF-Aquitine, a French oil company with offices in Houston.

#90163u0130 06/12/1990 ~United Press International

SEOUL, South Korea (JUNE 12) UPI - Dissident students in the city of Kwangju firebombed a new U.S. cultural center Tuesday that had been opened with great fanfare the day before, an official at the American Embassy said.

Embassy spokesman Jack Sears said the students hurled about 200 Molotov cocktails at the building in Kwangju, about 170 miles south of Seoul. The new center replaced an earlier facility that was closed in May 1989 because of repeated attacks.

The domestic Yonhap News Agency said 400 students stormed the center at about 5:30 a.m. and threw some 400 firebombs. They were driven away in 15 minutes by Korean police who fired tear gas, Yonhap said.

The students ran out of a park and back streets and dashed some 70 yards toward the building shouting ''close down the cultural center'' and ''crush the (ruling) Democratic Liberal Party,'' Yonhap said.

They staged demonstrations on the streets around the center and vowed in leaflets to fight to have the facility closed down for good, Yonhap said.

''The U.S. cultural center is the propagator of anti-communist and Cold War ideologies spying on forces of patriotic movements and suppressing popular aspirations for self-reliant and democratic reunification (of Korea),'' the students said in the leaflets, according to the agency.

''We totally refuse the presence of the center on Kwangju soil. We will also stage determined struggles to force a U.S. air base at Songjong-ri outside Kwangju to be withdrawn,'' the leaflets said.

Yonhap said police were investigating two students who were arrested on the scene.

The U.S. cultural center in Kwangju was closed down in May 1989 after repeated attacks by dissidents. It was reopened at a new location Monday

in a ceremony attended by U.S. Ambassador Donald Gregg, Korean national officials and city leaders.

#90163u0140 06/12/1990 ~United Press International
BY UNITED PRESS INTERNATIONAL

(JUNE 12) UPI - With approval of a Likud-led ruling coalition Monday, Israel's political crisis appeared over. A chronology of the highlights of Israeli political events and the widening rift between the Labor and Likud parties over the peace process follows.

November 1988: Elections provide nearly even number of seats in the Israeli parliament, the Knesset, for Likud, 40, and Labor, 39. Smaller right-wing parties receive seven seats, left-wing parties 16 and religious parties 18.

Dec. 14, 1988: In Geneva, Palestine Liberation Organization Chairman Yasser Arafat declares recognition of Israel and renounces terrorism. United States subsequently begins dialogue with the PLO.

Dec. 22, 1988: Knesset approves new ''national unity'' Likud-Labor government, led by Prime Minister Yitzhak Shamir. Labor Party leader Shimon Peres heads Finance Ministry. In addition to Likud and Labor, coalition members are ultra-Orthodox parties, Shas and Agudat Israel, and the National Religious Party.

May 14, 1989: Shamir unveils Israel's peace initiative, which includes proposal for elections in the occupied territories for Palestinians to select representatives who will negotiate with Israel on limited autonomy.

July 5, 1989: Likud Central Committee adopts resolution calling for continued Jewish settlement in occupied territories and vetoing participation of East Jerusalem Arabs in elections proposed in Israeli peace initiative. Labor warns coalition government may be in jeopardy because of hard-line Likud stance.

October 1989: U.S. Secretary of State James Baker presents five points aimed at achieving Palestinian-Israeli talks on the basis of Israeli government initiative.

Nov. 6, 1989: Israeli inner Cabinet fails to give clear-cut answer to Baker framework and seeks clarifications.

Dec. 31, 1989: In widening split over direction of peace process, Shamir dismisses Labor Minister of Science and Technology Ezer Weizman from Inner Cabinet, saying he was undermining government policy by holding contacts

with the PLO.

Feb. 12, 1990: In dispute over peace process, hard-line Trade and Industry Minister Ariel Sharon resigns from Cabinet at chaotic meeting of right-wing Likud Central Committee, sending party into turmoil.

Feb. 21: Labor Party lays groundwork for government crisis by giving coalition partner Likud two-week deadline to advance the peace process.

March 11: Israeli Inner Cabinet fails to reach decision on Baker peace proposal, edging coalition government to brink of collapse. Labor ministers walk out of meeting after Shamir refuses request by Peres to bring the U.S. proposal to a vote.

March 13: Shamir fires Peres as vice premier and finance minister because he said the Labor leader ''acted to bring about the dissolution of the national unity government and has undermined its existence.'' Peres's fellow Labor ministers resign. Israel's second Likud-Labor coalition collapses. Shamir remains caretaker prime minister.

March 15: Labor orchestrates vote of no confidence against Shamir government in Knesset. Shamir government toppled in 60-55 vote, with Shas Party members failing to vote.

March 20: President Chaim Herzog picks Peres to try to form next government. He is given a 21-day mandate.

April 4: Peres informs Herzog he has necessary support to form government. Three days later, estimated 100,000 Israelis demonstrate in Israel for electoral reform, angered by involvement of ultra-orthodox spiritual leaders in politics and demands of politicians in exchange of support for Peres.

April 11: Peres's plans to form government dashed when two members of ultra-Orthodox Agudat Israel party refuse at last minute to support Labor Party-led coalition. Peres receives 15 more days to form government, but tells Herzog April 26 he has failed.

April 27: Shamir accepts 21-day presidential mandate and seeks extension three weeks later.

June 8: Within hours of midnight deadline, Shamir informs Herzog he has support for Knesset approval of Likud-led government. Coalition guidelines and agreement signed. Supporters of Likud are right-wing Tehiya, Moledet and Tzomet parties, ultra-orthodox Shas and Degel HaTorah, National Religious Party and two Knesset members who left the Labor and Agudat Israel parties.

June 11: Israeli Knesset approves Likud-led coalition by 62-57 vote.

#90163u0143 06/12/1990 ~United Press International

(JUNE 12) UPI - The Coast Guard says firefighters will wait until dawn to launch a chemical foam assault on a Norwegian super-tanker that's been burning since Saturday, 57 miles off the Texas Gulf Coast. Officials say the time is needed to bring deck temperatures down and reduce the danger of reigniting the oil. Firefighters hope to douse the flames before the tanker sinks and discharges its cargo of 38-Million gallons of light crude oil into the Gulf of Mexico.

Heavy, sticky fuel oil washed ashore on two islands off Cape Cod, Massachusetts, Monday and clean-up efforts are to begin Tuesday. The oil came from a crippled cruise liner that ran aground Sunday while waiting to enter the Cape Cod Canal en route to Nova Scotia. Foul weather delayed efforts to repair the rips in the vessel. The Coast Guard expects the weather to clear by Tuesday... and efforts to patch the ship and remove its oil will begin.

Two Seattle demonstrators who burned American flags last fall to protest a federal anti-desecration law say they're NOT surprised by Monday's Supreme Court decision ruling flag burning legal. They vow to fight expected efforts to give Old Glory constitutional protection. By a narrow 5flag burning law passed by Congress last October.

Johannesburg-based officials investigating the 1987 crash of a South African Airways 747-400 that burst into flames in flight say the jumbo jet had design flaws that created an ''UNacceptable'' risk of fire. In a report issued Tuesday, they urge Boeing to change on-board fire procedures or ban the model. The board of inquiry's leader says Boeing disputes the conclusions. But a spokesman for the Seattle-based company says Boeing hasN'T seen the report. All 159 people aboard the jet died when it plunged into the Indian Ocean.

#90163u0147 06/12/1990 ~United Press International

(JUNE 12) UPI - The rap group 2 Live Crew returned Monday night to south Florida, where a third band member faces charges for violating state obscenity laws. Attorney Bruce Rogow, who represents 2 Live Crew, says the band member plans to surrender. Broward County sheriff's deputies arrested two band members early Sunday... shortly after the band finished a concert in Hollywood, Florida. The group's album ''As Nasty As They Wanna Be'' has been declared obscene in south Florida and in at least eight other counties in the state.

The parents of an American man kidnapped by Colombian rebels say they expect a long and ''awful'' wait for word the kidnappers accepted a 60-thousand-dollar ransom payment. 27-year-old Scott Heimdal of Peoria, Illinois, was nabbed April 28th while working for a gold-mining firm. The kidnappers initially wanted one-point-two-Million dollars, but lowered their demands after learning the Heimdals were NOT wealthy. The money was to have been delivered Monday.

#90163u0218 06/12/1990 ~United Press International

(JUNE 12) UPI - Excessive heat from flaming oil delayed a chemical foam assault Monday on the burning Norwegian super-tanker Mega Borg, 57 miles off the Texas Gulf Coast. Coast Guard officials now say firefighters will spent the night pouring water onto the vessel. They'll attempt at dawn to douse the fire that's been burning since early Saturday.

A U-S Embassy official in Seoul, South Korea, says dissident students in the city of Kwangju firebombed a new U-S cultural center Tuesday. NO word of any injuries or damage. The center had opened just the day before. It replaced an earlier facility closed in May 1989 because of repeated attacks by dissidents. South Korea's domestic news agency says the students were driven away by police firing tear gas.

New U-S ambassador to Nicaragua Harry Shlaudeman arrived in Managua Monday vowing to help President Chamorro ''improve the welfare of the Nicaraguan people.'' The 64-year-old Shlaudeman is the first American envoy to Nicaragua in two years. The previous ambassador was expelled by the former Sandinista government.

President Bush is planning NO family celebration to mark his 66th birthday Tuesday. But members of the Republican party are planning a birthday tribute with a big fund-raiser... the President's Dinner. More than four-thousand people are expected to attend the 15-hundred-dollar-a-plate gala. Proceeds will go to G-O-P challengers in this fall's elections.

(JUNE 12) UPI - A runoff between a former Ku Klux Klan sympathizer and a black man for the Republican lieutenant governor nomination in Arkansas, and a Democratic gubernatorial race in South Carolina top a light primary schedule Tuesday.

In addition to those states, voters will cast ballots in Maine, Virginia and North Dakota, bringing to 24 the number of states that will have chosen candidates for the general election.

An eight-week string of primaries in August and September will decide almost all the remaining nominations.

In none of the states were any incumbents facing serious challenges.

Perhaps the most watched contest was in Arkansas, where Ralph Forbes, a former member of the American Nazi Party and a Ku Klux Klan sympathizer, faced Kenneth ''Muskie'' Harris, a black real estate agent and former Arkansas Razorback football player, for the GOP nomination for lieutenant governor.

The two men finished first and second in a primary two weeks ago, with Forbes receiving 46 percent and Harris 36 percent.

Forbes's connections to the Nazi Party and the Ku Klux Klan have been a focal point of the runoff contest and Harris, who has received considerable mainstream GOP support, argued Forbes wanted to ''make this race emotional and racial.''

But Forbes has countered by contending he has been unfairly attacked by the media and argued ''the average Arkansan is going to see through all that.''

No matter who wins the runoff, he will be a decided underdog in November against the Democratic nominee, former Rep. Jim Guy Tucker of Little Rock.

In South Carolina, Republican Gov. Carroll Campbell is unopposed as he seeks his second GOP nomination and is expected to be a heavy favorite against either Theo Mitchell or Ernie Passailaigue, two state senators vying for the Democratic nod.

Mitchell, attempting to become the first South Carolina black since the turn of the century to win a major party nomination to a high office, has fashioned himself as a coalition builder who can cross racial, social and economic lines to unite the state.

But Passailaigue, a certified public accountant and former owner of a minor-league baseball team, has a populist image and centered his campaign on a pledge to revamp a state tax system he considers unfair to working people and too generous to the wealthy.

In the state's Senate race, there was no opposition for Republican Sen. Strom Thurmond. Democrats do not have a candidate.

But the South Carolina contest that has attracted the most attention pits state Sen. Sherry Martschink against former U.S. attorney Henry McMaster for the Republican lieutenant governor's nomination.

McMaster has portrayed himself as very conservative, while accusing Martschink of being too liberal, particularly on the issue of abortion rights. Polls indicate the race is too close to call.

In Maine, there were no primaries in either party in the gubernatorial or Senate contests. In November, incumbent Republican Gov. John McKernan will face Democrat Rep. Joseph Brennan, who is trying to regain his old job. In the Senate race, Republican incumbent William Cohen will face Democrat Neil Rolde.

However, there was a Tuesday scramble for the House seat being vacated by Brennan.

Five candidates, led by state Attorney General James Tierney and former Maine House majority leader Elizabeth Mitchell, are vying for the Democratic nomination.

On the Republican side, former Rep. David Emery is hoping to win back the seat he lost in 1982.

He is opposed by lawmaker John McCormick Jr., who hopes to make the primary election a referendum on abortion. McCormick opposes legalized abortion, while Emery is a recent convert to the abortion-rights ranks.

In Virginia, Republican Sen. John Warner has no primary opposition and no Democratic opponent.

In North Dakota, the main question facing voters was a measure to boost the state's sales tax rate from 5 percent to 6 percent, with most of the nearly $42 million in revenue to go to schools.

#90163u0233 06/12/1990 ~United Press International
(JUNE 12) UPI - ''Another 48 Hours'' grossed 19-point-four-Million dollars during its opening weekend, making it number one at the box office. The film reunites Eddie Murphy and Nick Nolte in a sequel to the flick that launched Murphy's movie career. Rounding out the top-five box office draws last weekend were ''Total Recall,'' ''Back to the Future Three,'' ''Bird on a Wire,'' and ''Pretty Woman.''

An apparent wisecrack by Michael Dukakis at Boston's Logan International Airport could've landed the Massachusetts governor in trouble. A Boston television station says Dukakis was boarding a U-S-Air flight Sunday night

when he spotted political foe Ron Kaufman and joked about checking the White House aide and his baggage for a bomb. According to the F-A-A, such remarks about airline safety- even in jest- are against federal law. But U-S-Air agents recognized Dukakis and let him go. An airline official calls the comment ''an error in judgement.''

#90163u0309 06/12/1990 ~United Press International

CAPE CANAVERAL, Fla. (JUNE 12) UPI - An $80 million Indian communications satellite that survived a $10 million launch pad mishap and the San Francisco earthquake finally was launched into orbit Tuesday atop a Delta rocket.

By the light of a waning moon, the slender $50 million Delta rocket, equipped with nine strap-on solid-fuel boosters for extra takeoff power, thundered to life at 1:52 a.m EDT and quickly climbed away from launch complex 17 at the Cape Canaveral Air Force Station.

''Three, two, one, zero, ignition and liftoff!'' said launch commentator Ray Adams as the rocket vaulted skyward atop a streamer of bright-orange fire that was visible for miles around.

The solar-powered INSAT-1D satellite, the fourth in a series of Indian communications stations, was successfully fired into a preliminary orbit about 24 minutes after takeoff.

''Everything looked good,'' said a blockhouse engineer after the Delta's third stage burned out as planned.

Launch marked a major milestone for India's goal of bringing education, science and industry to rural towns and villages.

''Its advantages to us are many,'' said Abid Hussain, India's ambassador to the United States. ''We in India believe science and technology can be put into the service of the people, especially those people who have been so far deprived of some of the advantages of (modern communications).''

If all goes well, on-board rocket motors will be fired later to boost the spacecraft into a circular orbit 22,300 miles above the equator.

At that altitude, satellites take 24 hours to complete one orbit and thus appear to hang stationary in the sky, eliminating the need for costly, steerable ground antennas. INSAT-1D is to be stationed over the equator at 83 degrees East longitude.

Built by Ford Aerospace of Palo Alto, Calif., INSAT-1D will replace an identical but aging satellite already in orbit to provide telephone, television and weather forecasting service to India. Two other INSAT relay stations are no longer operational.

Launch originally was scheduled for last June, but just 10 days before takeoff, a frayed cable snapped and a 75-pound hook on a launch pad crane fell onto the satellite's ''C-band'' radio antenna.

As a result, the spacecraft had to be removed from its Delta booster and shipped back to the factory in Palo Alto for extensive repairs that cost some $10 million, according to Fred Stang, an official with Ford Aerospace.

Stang said insurance covered the cost of the repairs, along with another $150,000 in damage caused during the San Francisco earthquake last October when several solar cells were broken. The repair work pushed the total value of the satellite to some $80 million.

India's Department of Space bought insurance to cover the satellite from the moment of launch through orbital checkout.

Once checked out and in operation, INSAT-1D will provide data and voice communications between 31 ground stations in India and provide high-power direct broadcast television signals to thousands of low-cost TV, radio and disaster warning devices across the nation.

''In India, we've got 800 million people,'' Hussain said. ''A large majority of them are still not exposed to education. Through this new satellite we would like to spread education and knowledge, science and new culture to hundreds of thousands of those who have been out of the mainstream of life.''

The multi-purpose satellite also will be used to monitor weather patterns to improve forecasting and to relay meteorological data to various ground stations for analysis.

INSAT-1D is equipped with 12 high frequency transponders, each one capable of handling 1,000 one-way voice or data channels or one television signal. Direct broadcast television signals will be beamed down to more than 100,000 receive-only ground terminals, most in rural areas.

#90163u0311 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - Federal Reserve Board Chairman Alan Gree called Tuesday on the Soviet Union and other nations in Eastern Europe to open their economies to encourage foreign investment.

In remarks prepared for delivery to the General Assembly of the Federation of German Industries in Bonn, Greenspan said, ''East European countries and the Soviet Union can benefit from the competition of increased trade with the rest of the world.''

''Increased exports help relax the financing constraints that these countries face, and, with increased foreign exchange, can accommodate increased imports as well as meet other financing requirements,'' Greenspan said.

''The ability of the world economy to absorb increased exports from East European countries and the Soviet Union should not be underestimated.''

But Greenspan also said it is necessary for those countries to open their markets to the other nations of the world to reap the benefits.

''Capital is likely to flow to these countries from foreign investors who seek opportunities to invest in industries in these countries,'' Greenspan said. ''However, the climate must be conducive and hospitable to cross-border investment.

''A low inflation environment, fostered by sound economic policies, is critical for countries not only to mobilize their domestic savings, also to attract foreign capital,'' he said.

#90163u0313 06/12/1990 ~United Press International

SAN FRANCISCO (JUNE 12) UPI - The nation's first big outdoor advertising campaign for condoms will feature a silver condom package on placards, displayed on cable cars, taxicabs and municipal bus shelters, officials said.

The two-month campaign by Schmid Laboratories, Little Falls, N.J., was timed to start a few days before the 6th International AIDS Conference scheduled in San Francisco next week and expected to draw 8,000 conferees and 2,000 journalists.

''We knew that during the conference there would be people in San Francisco from around the world who are sensitized to using condoms,'' Don Falk, president of the company, said Monday.

The placards bear the words ''For extra protection - Ramses Condoms'', on a white background with a photo of the glossy silver condom package. The placards will appear on 75 taxicabs, 10 cable cars and 23 municipal bus shelters, officials said.

Health care agencies have promoted condoms as a protection against the AIDS virus but condom advertising remains controversial and is not accepted by many outlets, including network television.

The New Jersey company has resorted to some unusual methods to promote its condoms. It even hired a plane to tow a Ramses banner over the racetrack during the Indianapolis 500.

The private San Francisco AIDS Foundation has sponsored billboard campaigns in the past that were public health-oriented and did not cite any brand of condom.

The AIDS group said it approved of the commercial effort.

''Condoms should be advertised just like anything else,'' said Les Pappas of the foundation.

#90163u0315 06/12/1990 ~United Press International

(JUNE 12) UPI - For the past two days, Casey Candaele has been an unexpected sparkplug that has recharged the Houston Astros.

Candaele, not known for his power, hit a two-run homer Monday night, to break a seventh inning tie and lift Houston to its fourth straight win, 5-3, over the Los Angeles Dodgers.

Candaele has hit a total of three home runs in three years in the major leagues.

With the score tied 3-3, Rafael Ramirez opened the seventh with a single off Mike Morgan, 6-5, and moved to second on a Rich Gedman sacrifice.

Candaele, who tripled home the winning run in Houston's victory Sunday over Cincinnati, ripped Morgan's first pitch over the right-field fence for his second homer of the season.

Larry Andersen, 3-1, pitched two innings for the win and Dave Smith worked the ninth to record his 12th save.

Two of Candaele's major-league homers have come against the Dodgers.

''You can tell by my weak home run trot that I don't hit a lot of them,'' Candaele said.

''I was just looking for something to get the run home. I had no idea where it was going. I got the head of the bat on it and things went my way again,'' Candaele said.

Morgan offered his own explanation.

''I tried to cut the ball in on his hands,'' Morgan said. ''I was looking to get the two outs and save the run. But give him credit. Anyone with a bat in his hands is capable of doing it.''

Dodger catcher Mike Scioscia, who hit a 400-foot drive to the centerfield wall that turned into a double play to end the sixth inning, said the Dodgers weren't expecting the long ball from Candaele.

''Mike just got a breaking ball up a little and Casey got the head of the bat around quick and hit it hard,'' Scioscia said. ''He has a little pop but it's just not something you expect in that situation.''

Houston Manager Art Howe referred to Candaele as his trump card.

''I like keeping him as my ace in the hole and bring him out when I need him,'' Howe said. ''He's really given us a big lift.

In other NL games, San Francisco pummeled Atlanta 8-3, Chicago beat New York 8-5, Montreal swept Philadelphia, 5-0 and 3-2, and Pittsburgh nipped St. Louis 8-7.

In the AL it was: Cleveland 4, Boston 3 in 12 innings; Milwaukee 4, Toronto 1; Texas 5, Oakland 0; Chicago 3, Seattle 1 and California 3, Kansas City 2.

-- AROUND THE NL --

Giants 8, Braves 3

At Atlanta, Kevin Mitchell belted a two-run homer, his 16th home run of the season and Brett Butler banged out three hits to lead San Francisco. Scott Garrelts, 3-6, surrendered five hits over 6 1-3 innings for the win. John Smoltz, 3-5, took the loss despite striking out a career-high 11 batters.

Cubs 8, Mets 5

At Chicago, Ryne Sandberg triggered a 15-hit attack with four hits, and Mark Grace and Luis Salazar added three hits and two RBI apiece, to help Chicago stretch their winning streak to four games. Reliever Mitch Williams, 1-5, pitched two-thirds scoreless innings for the victory. Reliever Alejandro Pena, 1-2, absorbed the loss.

Pirates 8, Cardinals 7

At St. Louis, Jeff King scored three times and singled home the winning run in the eighth inning to guide Pittsburgh, which had allowed St. Louis to come back from a six run deficit. Stan Belinda, 2-1, pitched two-thirds of an inning for the win and Bill Landrum notched his ninth save. Tom Niedenfuer, 0-1, took the loss in relief.

Expos 5, Phillies 0 (1st)
Expos 3, Phillies 2 (2nd)

At Philadelphia, Otis Nixon scored on a wild pitch in the eighth inning to help Montreal sweep their doubleheader and send the Phillies to their fifth straight defeat. Jeff Parrett, 2-5, took the loss in the second game. Drew Hall, 4-6, picked up the victory. Dave Schmidt notched his fifth save. In the first game, Kevin Gross, 8-4, pitched a four-hitter and Mike Fitzgerald homered to lead Montreal to a 5-0 triumph. Dennis Cook, 5-2, absorbed the loss. Philadelphia's Lenny Dykstra went 0-for-3 in the first game with a walk to snap a 23-game hitting streak, the longest in the majors this season, and was hitless in five at-bats in the second to drop his batting average to .392.

#90163u0390 06/12/1990 ~United Press International

OAKLAND, CALIF. (JUNE 12) UPI - Nolan Ryan, who already held the record for most no-hitters in a career, added a couple of other no-hit standards Monday night.

Ryan hurled the record sixth no-hitter of his career in leading the Texas Rangers to a 5-0 victory over the Oakland Athletics. At age 43, Ryan became the oldest pitcher to throw a no-hitter and the first to accomplish the feat in each of three decades.

''This has a special place right next to No. 5,'' said the right-hander, whose last no-hitter came nine years ago. ''It's great, especially so late in my career. My teammates were so emotionally involved, it was a nice release for all of us.''

Ryan, baseball's all-time strikeout leader with 5,152, struck out 14 in pitching the third no-hitter of the year.

California's Mark Langston and Mike Witt combined to no-hit Seattle on April 11, the second day of the season, and Seattle's Randy Johnson accomplished the feat June 2 against Detroit.

Ryan, 5-3, was shelled for five runs, two earned, and four hits in five innings by Oakland in his previous start. But he turned the tables Monday night against an Athletics lineup that was missing sluggers Jose Canseco, Mark McGwire and Carney Lansford.

''I was surprised I had the velocity I had,'' Ryan said. ''My last outing was not that good. It was cool tonight and a lot of circumstances contributed to the game.''

The only Oakland batters to reach base were Walt Weiss and Mike Gallego, both on walks. The closest the Athletics came to a hit was in the fourth inning, when Willie Randolph sent a fly ball to left field that Pete Incaviglia caught with one foot on the warning track.

As the no-hitter moved into the late innings, Ryan's teammates began to avoid him, leaving the 22-year veteran to his own thoughts.

''They didn't bother me during the game. The longer it goes like this, the further they stay away from you,'' Ryan said. ''I've been through this a few times and know how important it is to keep a calm emotional level.''

Meanwhile, catcher John Russell was awestruck.

''I've never seen a look in a guy's eyes like his,'' said Russell, a journeyman playing only his 10th game with the Rangers and catching Ryan for the first time. ''I'll never forget. You'd have to see it to believe it. It was just a lot of determination and fire, all wrapped up in all these years (of experience). It was all right there. It was the greatest thing I've ever seen.''

Ryan opened the ninth by striking out pinch hitter Ken Phelps on a 1-2 pitch and retiring Rickey Henderson on a grounder to shortstop. He capped the performance by inducing Willie Randolph to foul out to right fielder Ruben Sierra.

It was Ryan's 294th career win, 59th career shutout and 201st game in which he has recorded at least 10 strikeouts.

''Going into the ninth inning, my idea was I was just going to make good pitches and if I gave up a hit, it was going to be on a good pitch,'' Ryan said.

As Sierra caught the ball, Ryan pumped his right fist in the air and turned to accept a congratulatory hug from Russell as his teammates raced from the dugout.

''It was like I was in a coma,'' Russell said. ''I had no feeling whatsoever. I was numb. I just wanted him to keep going, just keep up what he was doing.''

The Rangers lifted Ryan to their shoulders, carrying him from the first-base line to the dugout as the Oakland Coliseum crowd of 33,436 gave

him a standing ovation and chanted ''No-lan! No-lan!''

Shortly after entering the dugout, Ryan re-emerged for a curtain call, waving his cap to the crowd as his teammates formed a semi-circle around him.

''When the opposing fans give you an ovation, it makes you feel really good,'' Ryan said. ''It reflects the type of baseball fans they have here and how supportive the fans are of this Oakland ballclub and of baseball.''

Texas Manager Bobby Valentine called Ryan's performance ''absolutely marvelous. I've never been happier in my professional career for a player than I am tonight. He deserves every bit of it.''

Julio Franco belted two two-run homers to lead the Texas attack against Oakland starter Scott Sanderson, 7-3.

Franco gave the Rangers a 2-0 lead in the first inning. Gary Pettis led off the game with a single and stole second before Franco blasted his homer over the right-field fence.

The Rangers took a 3-0 lead on Russell's solo homer in the second inning, his second of the year.

In the fifth, Rafael Palmiero received a two-out walk before Franco smashed his second shot, this one to left for his sixth homer of the year. It was the first multi-homer game in Franco's career.

Previously, the oldest pitcher to throw a no-hitter was Cy Young of the Boston Red Sox, who was 41 when he recorded an 8-0 no-hit victory over the New York Highlanders on June 30, 1908.

Ryan's no-hitter was his first since Sept. 26, 1981, when he pitched the Houston Astros to a 5-0 victory over Los Angeles.

''In his case, longevity is a factor,'' Oakland Manager Tony La Russa said. ''He's been doing it a lot of years.''

Ryan's other four no-hitters were recorded as a member of the California Angels, coming within 25 months of each other.

He notched his first no-hitter on May 15, 1973, a 3-0 victory over Kansas City, and followed that up with another two months later, blanking Detroit 6-0 on July 15.

He also recorded no-hitters on Sept. 28, 1974, a 4-0 win over Minnesota, and June 1, 1975, a 1-0 victory over Baltimore.

In addition to the six no-hitters, Ryan has 12 career one-hitters.

(JUNE 12) UPI - Around the world... around the clock... U-P-I has the latest news.

The Coast Guard commandant flew over a burning Norwegian tanker in the Gulf of Mexico today and said the vessel was still too hot to spray with a chemical foam. Firefighters showered the crippled oil tanker with water yesterday and hope to douse it with the special foam later today. The ship is carrying 38-Million gallons of light crude oil.

If there is a major oil leak from the burning tanker, it would come during the peak nesting season for thousands of gulls and terns that live along the fragile Texas coast. There also is concern for the possible toxic effects on fish, shell fish, and sea turtles. Coast Guard officials say they have NOT seen any signs of environmental damage so far.

The attorney for former national security adviser John Poindexter says he will appeal his client's six-month jail sentence. Judge Harold Green sentenced Poindexter in Washington yesterday for his part in the Iran-Contra affair. Poindexter remains free pending his appeal.

349 Americans who were evacuated from Liberia arrived in Charleston, South Carolina, yesterday. 175 children were aboard the flight along with a 68-year-old man who left behind his Liberian wife and eight children. The West African nation has been torn apart by rebel efforts to oust the current government.

A Delta rocket successfully boosted an 80-Million-dollar Indian communications satellite into orbit early today after blasting off from Cape Canaveral. One year ago, the relay station was damaged in a launch pad mishap. The so-called INSAT will provide India with telephone, television and weather forecast service.

#90163u0417 06/12/1990 ~United Press International
(JUNE 12) UPI - British Airways says the cockpit window that blew out at 23-thousand feet over England and almost sucked a pilot out of the plane had been replaced two days before the incident. The captain is recovering from injuries he sustained Sunday when part of his body was sucked through a three-foot hole after the windshield fell off.

The leaders of three Soviet Baltic republics are set to meet with President Gorbachev today to discuss their drives for independence. A

spokesman for the Lithuanian delegation says the fact that Gorbachev is willing to meet without the independence declarations being rescinded shows progress.

Egypt's Middle East News Agency says a P-L-O spokesman has condemned any military action against civilians. But the agency adds that the Palestine Liberation Organization official did NOT specifically mention last month's unsuccessful attack on an Israeli beach by a P-L-O faction. The United States has called for the P-L-O to denounce the raid.

A Gallup Poll of 230 teachers finds most teachers think the public school system needs to upgrade the quality of education. The poll of semi-finalists in a teachers award program also indicates most public school teachers feel they could do a much better job if given the chance to contribute more to the designing of curriculum and scheduling.

Officials of Schmid Laboratories in Little Falls, New Jersey, say they plan to launch the nation's first big outdoor advertising campaign for condoms in San Francisco. The ads will feature a picture of a glossy silver condom and will be displayed on cable cars, taxicabs, and municipal bus shelters.

#90163u0465 06/12/1990 ~United Press International

JERUSALEM (JUNE 12) UPI - An 18-year-old Israeli Jew walking to the Western Wall Tuesday was stabbed near the Old City's Damascus Gate, prompting police to round up dozens of Arab suspects, police and witnesses said.

Police quickly shut the Damascus Gate entrance to the Old City and nearby shops lining the street outside, while paramedics gave aid to the Israeli, who wore a yarmulke and was identified as a student from the southern town of Dimona studying at a Jerusalem religious institute.

A hospital spokesman said the Jewish student was in stable condition after being stabbed in the stomach and lower back.

The attack occurred while the student was on his way to the Western Wall, also known as the Wailing Wall, believed to be part of the western section of the wall surrounding Herod's Temple. Jews traditionally gather at the site for prayer.

The Israeli struggled with his assailant and chased him about 20 yards from the Damascus Gate before he collapsed, Army Radio reported. Police rounded up dozens of Arab youths as suspects.

Police allowed the stores near the Damascus Gate to reopen soon after the

attack.

Several stabbings have occurred in the Old City in recent months, including an attack on a 29-year-old Jewish tourist from the United States who was stabbed Friday and slightly wounded in his hand while walking in the Old City's Armenian Quarter.

#90163u0514 06/12/1990 ~United Press International

(JUNE 12) UPI - Blustery thunderstorms swept across the Midwest early Tuesday, pounding Minnesota and Wisconsin with heavy rain and lightning, while scattered storms dumped rain over the Rockies and northern Plains.

The National Weather Service said rain also dampened the Pacific Northwest but generally clear skies prevailed along much of the East Coast.

Thunderstorms were reported early Tuesday from east-central South Dakota to International Falls, Minn., and Wausau, Wis., the NWS said.

Strong storms in the central Minnesota counties of Crow Wing and Morrison dumped small hail, sometimes heavy rain and whipped the area with winds gusting to 55 mph.

Temperatures in the region were in the 50s and 60s through Wisconsin, and warmer in the south. Milwaukee was cloudy with 67 degrees. Chicago was mostly cloudy and 71, while St. Louis was clear and 72.

Scattered thunderstorms were reported early Tuesday in the northern Rockies of Colorado and in east and central New Mexico.

Low-level clouds drifted over south and central Texas, but the skies were mostly clear over northern Texas, Oklahoma and Louisiana.

Skies were clear and temperatures warm over much of the South. Early morning readings ranged from 66 in Knoxville, Tenn., to 67 in Jacksonville Fla., 69 in Atlanta and 78 in Miami.

Skies also were clear over much of the mid-Atlantic region, but scattered showers dampened eastern Maryland. Temperatures ranged in the 40s and 50s under clear skies in Pennsylvania; New Jersey and Delaware were partly cloudy.

A stubborn area of low pressure just east of Cape Cod in Massachusetts that left New England in rain for three days moved northeast overnight, leaving mostly clear skies early Tuesday.

Some scattered clouds lingered Tuesday over the Cape and the South Shore

of Massachusetts and the southern coast of Maine near Portland, but skies were clear in the rest of the region. Temperatures ranged from 38 near the Canadian border, to 53 in Boston and Providence, R.I.

In the West, northwest winds were expected to send weak storms into Oregon for the rest of the week. Temperatures will remain 5 to 10 degrees below normal.

A few showers also fell over Western Washington, and there were wind gusts to 30 mph in the east. Snow fell above 5,000 ft. in the Cascades and mostly cloudy weather was expected through mid-week.

It was mostly sunny with a high of 91 degrees in Las Vegas Monday - 6 degrees below normal. A slight warming was expected Tuesday under mostly clear skies.

More sunny weather was expected in California through mid-week.

#90163u0522 06/12/1990 ~United Press International

(JUNE 12) UPI - The latest news from across the nation and around the world... details and developments from the wires of United Press International.

Firefighters are racing against time in the Gulf of Mexico to douse a burning Norwegian oil tanker before it breaks apart and spills its cargo.

The 853-foot Mega Borg has been an inferno since an explosion Saturday. It's carrying 38-Million gallons of light crude oil... more than three times the amount spilled from the Exxon Valdez in Alaskan waters in March 1989.

Yesterday, the tanker's stern fell below the water line, although it bobbed above the surface occasionally.

Coast Guard officials do NOT believe the Mega Borg is in danger of sinking. But if the hull does break apart... Texas Land Commissioner Garry Mauro says the resulting spill would be what he called ''our worst nightmare.''

Salvage workers began dousing the tanker continuously with water to try to cool it enough to begin spraying chemical foam on the vessel at dawn today. The Coast Guard says use of the foam could control the blaze within one hour.

But if foam is applied too soon and fails to extinguish the blaze... officials say the hot metal of the ship's deck could combine with oxygen

to ignite residual oil vapors and cause more explosions and damage.

President Bush and lawmakers on Capitol Hill are renewing their campaign for a constitutional amendment banning flag desecration.

Bush said yesterday he has NOT changed his mind on the issue. In his words- ''I will continue to press for what I strongly believe is in the best interest of this country.''

The Supreme Court voted 5-4 to negate the Flag Protection Act of 1989. The justices said the measure violated the right of free speech guaranteed by the First Amendment. Congress passed the legislation last year when the Supreme Court struck down a Texas law against flag burning.

Within minutes of the justices' decision, Senate Republican leader Robert Dole of Kansas said- ''Now we need to move to a constitutional amendment.'' Dole said he hopes to present the Senate with a proposal for an amendment that would enable Congress and the states to ban flag desecration.

Senate Democratic leader George Mitchell of Maine opposes any such amendment and says it would be a ''grievous error'' to change the First Amendment's guarantee of free speech in ''haste and the heat of controversy.''

-30- 2611

#90163u0529 06/12/1990 ~United Press International

(JUNE 12) UPI - Soviet President Gorbachev is to meet with the leaders of the three Soviet Baltic republics today at the Kremlin.

Observers say the meeting may signal a breakthrough in the current impasse between the Kremlin and the independence-minded Baltic republics.

Latvian President Gorbunovs ... Lithuanian President Landsbergis... and Estonian President Ruutel met yesterday to plot strategy for their drives for independence.

Gorbachev previously rejected any meetings with the presidents until their respective parliaments rescind declarations of independence from Moscow.

However, a Lithuanian spokesman says the Soviets agreed to meet after Lithuania last month offered to suspend laws implementing the republic's independence declaration.

In Bulgaria, Sofia radio is reporting the first official results from weekend parliamentary elections... and they are pointing to a communist victory.

The report appears to confirm computer projections of a decisive win for the ruling Bulgarian Socialist Party over the democratic opposition.

Tens of thousands of people chanting ''The Communist Party is mafia!'' gathered in Sofia yesterday after hearing the projections of a Communist victory.

In Czechoslovakia, President Havel is expected to ask Prime Minister Calfa- a former communist- to form the new government.

Havel's pro-democracy Civic Forum party won an overwhelming victory in the elections. Civic Forum said earlier it wanted a coalition regardless of election results in order to win a wide mandate.

The Communist Party finished second in voting in the Czech Republic.

-30- 1792

#90163u0533 06/12/1990 ~United Press International

KATMANDU, Nepal (JUNE 12) UPI - King Birendra, resolving one of Nepal's lingering questions in its movement toward democratic reform, Tuesday granted amnesty for and dropped charges against all people prosecuted for religious activity.

The king, ''on the recommendation of the prime minister, has granted amnesty to all religious prisoners in view of the new political environment ... in the country,'' a royal palace announcement said.

The amnesty has been given ''in accordance with the constitution of Nepal, and instructions have been given for the dismissal of all cases against persons awaiting trial for religious activities,'' the announcement said.

Although the statement made no specific reference, the amnesty primarily will benefit Nepalese Christians arrested for proselytizing and conversion which are banned in the world's only Hindu kingdom.

There are about 50,000 Christians in Nepal, where the population of 19 million is 90 percent Hindu.

Prime Minister Krishna Prasad Bhattarai, 65, a devout Hindu, had said the new government will not allow religious conversions on the basis of ''pressure or materialistic allurements.''

Edgar Metzler, executive director of the United Mission to Nepal, told United Press International: ''It is right that the people should be released and will create a favorable international opinion.''

Metzler's mission is funded by Christians worldwide and finances hospitals several industries and some community projects.

Home Ministry spokesman Ram Chandra Paudyal said 29 Nepalese Christians will benefit from the amnesty.

''The formal papers have to come from the palace through the cabinet,'' he said. ''The papers are expected today. They will be released as soon as the papers arrive.''

Tuesday's announcement did not specify how future cases would be handled, although it was expected the issue of religious rights would be addressed in the new constitution now being drafted as part of Nepal's move toward multi-party democracy.

The World Hindu Federation of Nepal has claimed that about 30,000 Nepalese have converted to Christianity since April, when a seven-week campaign of nationwide strikes and demonstrations forced Birendra to enact sweeping reforms including an end to the monarchy's 29-year ban on opposition political parties.

A delegation sponsored by Zurich-based Christian Solidarity International visited Nepal for three days at the end of May to seek the release of 29 Christian prisoners, including several children, and the dismissal of charges against 33 others being held on bail pending appeals.

The four-member delegation consisted of David Atkinson, a conservative member of the British House of Commons, Dorothy Taft, legislative assistant to U.S. Rep. Christopher Smith, R-N.J., the Rev. Steven Snyder, the group's U.S. president, and Zak Patnaik, adviser to the group's international president in Zurich, Switzerland.

The delegation requested that the new constitution being drafted for Nepal ''permit the same kind of religious freedoms, including the right to promote one's religion, which are accepted without question in our own countries.''

#90163u0538 06/12/1990 ~United Press International

BEIJING (JUNE 12) UPI - Government officials have called for a crackdown on persistent grave robbing across China by organized gangs that steal artifacts from ancient tombs and sometimes blast their way in with explosives, the state-run press reported Tuesday.

The semi-official China News Service, quoting police and officials of the national Cultural Relics Department, reported that tomb break-ins and grave robbing ''have spread unchecked for many years and have become

rampant recently.''

The report cited at least five provinces, from Inner Mongolia in northern China to Sichuan Province in the west, in which organized bands of grave robbers have been pillaging tombs of cultural artifacts that are often centuries old.

''The officials concerned again called for legislation to severely punish the grave robbers,'' the CNS report said, noting such activities have been banned by local authorities repeatedly without impact and ''can now only be severely punished.''

In central Henan Province, grave robbers ''used explosives crazily to rob the ancient tombs, even in daylight,'' the CNS report said.

Other gangs have robbed ancient graves ''on a large scale'' in nearby Anhui Province, where graves from the Han, Song and Ming dynasties were ''severely damaged'' in the break-ins, CNS said.

The report said police have determined that many of the gangs are organized with identifiable leaders. Some employed elaborate planning to select the sites, break into the graves, haul away the booty and escape, even posting armed lookouts.

''All these were carefully planned and special persons were in charge of the activities,'' CNS said.

The report noted that efforts to halt grave robbing have been spotty and lack a unified standard, and that ''punishment is not severe.''

''It is imperative to punish grave robbers on a large scale,'' the report quoted an official as saying.

-30- 2109

#90163u0541 06/12/1990 ~United Press International

(JUNE 12) UPI - Voters in several states will vote in primaries today, and perhaps the most closely watched race will take place in Arkansas.

A former member of the American Nazi Party and a Ku Klux Klan sympathizer- Ralph Forbes- is running against black real estate agent Kenneth ''Muskie'' Harris for the Republican nomination for lieutenant governor.

Harris has won considerable mainstream G-O-P support. Forbes says he has been unfairly attacked by the media and says the average Arkansas voter will see past the criticism.

In South Carolina, G-O-P Governor Carroll Campbell is unopposed as he

seeks his second Republican nomination. Campbell is expected to be the heavy favorite opposite either Theo Mitchell or Ernie Passailaigue who are vying for the Democratic nomination.

Maine will hold NO primaries for either the Senate or the gubernatorial races. But voters will go to the polls to choose a Democratic nominee for the House seat being vacated by Congressman Joseph Brennan. In November, Brennan will face incumbent Republican Governor John McKernan.

A Vancouver, Washington, man faces the death penalty after pleading guilty yesterday to the sex murders of three young boys.

Westley Dodd pleaded guilty to three counts of aggravated murder and one count of attempted murder in the case of a boy who escaped from his clutches.

Dodd stood before the judge and described how he killed brothers William and Cole Neer... ages 10 and 11... last September. He also told how he kidnapped and killed four-year-old Lee Iseli of Portland in October.

Dodd also pleaded guilty to attempted murder in the unsuccessful abduction of six-year-old James Kirk.

Dodd rejected the advice of his lawyers in entering his guilty plea.Prosecutors say they will seek the death penalty.

A jury now must decide his sentence. Aggravated murder in Washington state can carry the death penalty or life in prison. Officials say jury selection would begin June 25th and all three cases will be heard together.

Dodd has a history of abusing children since he was a teen-ager.

-30- 2271

#90163u0553 06/12/1990 ~United Press International

MANILA, Philippines (JUNE 12) UPI - President Corazon Aquino announced Tuesday the formation of a new political movement designed to ease poverty in the last two years of her term.

In her independence day speech at the seaside Rizal park, Aquino told some 20,000 Filipinos and a national television audience that she formed the movement after her aides worried that politicians' focus on the 1992 elections would mean nothing would be accomplished in her remaining years in office.

''Let them talk of the 1992 elections. We will talk about what we will do for our country and our people to prosper,'' Aquino said.

Aquino said the anti-poverty movement, called Kabisig, meaning linking arms, would include politicians, peasants and non-government organizations as members.

Aquino did not address speculation that the movement would serve as a vehicle for her re-election bid in 1992 although she has repeatedly stated she has no intentions of seeking another term.

Commentators said the creation of Kabisig would signal the demise of the ruling coalition of three major political parties that helped sweep Aquino to power in 1986.

At a public square several blocks away from the park, about 500 left-leaning workers staged a rally denouncing Aquino and calling for the dismantling of six U.S. military bases in the Philippines whose lease expires next year.

In a statement, the outlawed Communist Party of the Philippines blasted Aquino's ''all-round servility'' to the United States and vowed ''to exert all effort in order to expand and intensify the armed and unarmed struggle against the bases.''

Security was tight at the park at the edge of Manila bay for the elaborate independence day celebrations. Aquino spoke behind a bullet-proof podium and 2,000 troops patrolled the area.

Officials placed the entire 159,000 armed forces on red alert - the maximum state of readiness - amid threats of a new coup attempt.

''There is no coup that we see today and in the next several days and thereafter,'' Defense Secretary Fidel Ramos told reporters.

At least 119 people were killed and more than 500 were wounded in the Dec. 1-9 coup attempt, the sixth in Aquino's four years as president.

Also Tuesday, Gov. Rodolfo Aguinaldo of the northern province of Cagayan surrendered and posted bail after the crime of rebellion with murder was struck down by the Supreme Court last week. He was charged only with rebellion, an offense that allows for bail.

TOKYO (JUNE 12) UPI - Japanese women have too much education and too few babies, the nation's finance minister reportedly told his fellow Cabinet members Tuesday.

During a Cabinet discussion on Japan's falling birthrate, Ryutaro

Hashimoto blamed the trend on women's increasing tendency to seek higher education, according to local news reports.

Hashimoto reportedly suggested the government limit access to higher education as a way to reverse the birthrate trend.

Officials in the Finance Ministry deflected inquiries, but an official in the Health and Welfare Ministry, speaking on condition of anonymity, told United Press International the reports were accurate.

Japan, with one of the lowest birthrates in the world, now has only 1.57 children per household. Less than a fifth of the population is under 20, and the proportion is falling steadily.

Conversely, people over 65 make up 11 percent of the population, and that number is expected to double within a decade, presenting the government with massive labor and social services problems.

Women's college enrollment has more than doubled in the last 20 years to 37 percent. Many are choosing to delay childbirth into their 30s.

However, making the choice is not always easy. With the pill banned as a means of contraception, condoms and abortions represent the main forms of birth control in Japan.

Condoms are widely available in drug stores, while abortions are permitted virtually on demand for economic reasons.

(JUNE 12) UPI - The Coast Guard says firefighters hope to be able begin a massive chemical foam assault this morning on a burning Norwegian oil tanker in the Gulf of Mexico. The Coast Guard estimates the foam could control the blaze within an hour. Boats have been pumping water on the burning tanker in order to cool its surface. Foam on too hot of a surface may cause further damage to the tanker.

Lawmakers are marshalling their forces for a constitutional amendment to ban flag desecration. The U-S Supreme Court ruled 5-4 yesterday that the anti-flag burning law Congress passed last year was unconstitutional. Within minutes of the court's decision, Senate Republican leader Robert Dole declared he will lead an effort to enact a constitutional amendment.

Leaders of the three Soviet Baltic republics meet with President Gorbachev today at the Kremlin to discuss their independence movements. The three Baltic presidents met yesterday in Lithuania to map strategy... but details were NOT released. The three Baltic presidents also are expected

to attend a meeting of Gorbachev's Federation Council, which consists of the 15 Soviet republics.

NASA technicians are moving the shuttle Columbia and its mobile launch platform back to the Vehicle Assembly Building at Cape Canaveral this morning to repair a hydrogen fuel leak. Columbia originally was scheduled for launch May 30th... but the ship was grounded by the massive hydrogen leak. If the repair work goes well... Columbia could be launched in mid-August.

(JUNE 12) UPI - Police and witnessess in Jerusalem say unknown assailants today stabbed and wounded a Jewish man near the Old City's Damascus Gate. Israeli police quickly shut the gate entrance to the Old City and shops lining the street outside as they rounded up at least two carloads of Arab suspects. There's NO word on the condition or identity of the victim.

The New York Times says America's new second city... Los Angeles... now is the nation's Number One port. The report cited growing trade with the Far East and changing shipping trends for L-A taking over New York's role as the nation's pre-eminent port. The report says New York is hindered in trade competition by higher handling fees and by traffic that delays trucks to and from the docks.

U-S, Soviet and Japanese television broadcasters have agreed to produce a pictorial history of the 20th century. A-B-C News, the Soviet broadcast company Gostelradio and N-K-H-Japan Broadcast Corporation will participate. They will convene a panel of historians to cite the leading trends in 20th century politics, culture, medicine, technology and other areas.

Reports from Beijing say Chinese government officials are calling for a crackdown on persistent grave robbing across China. The semi-official China News Service says organized gangs have been pillaging tombs of cultural artifacts, which are often centuries old. China's Cultural Relics Department complains that the grave robbing has spread unchecked for many years.

BELGRADE, YUGOSLAVIA (JUNE 12) UPI - Rep. Jim Moody, D-Wisc., Tuesday sought to dispel ''misimpressions'' over Washington's stand on Yugoslavia's most serious ethnic crisis, which has angered majority Serbs and soured relations between its largest republic and the United States.

Moody, a member of a U.S. delegation that monitored last weekend's elections in Bulgaria, said he stopped in Belgrade on his way home to dispel a controversy ignited during another congressman's visit in May to Kosovo, the southernmost province of the Republic of Serbia.

''One of the reasons it is so important to correct any misimpressions is to avoid damaging the extremely strong and lasting friendship between the people of the U.S. and the many people of Yugoslavia,'' Moody said at a news conference.

Kosovo has been engulfed for the past 10 years by strife between Serbs, the largest ethnic group in the country of 23 million, and ethnic Albanians, who are in a majority in the province bordering Albania.

Albanians complaining of discrimination by the Serbian government have been pressing a campaign for greater autonomy that has frequently been marked by violence. At least 30 people have been killed and more than 300 injured in unrest this year.

The crisis, the most serious of Yugoslavia's ethnic conflicts, is an extremely emotional issue for Serbs, who were once the majority in Kosovo and regard it as the birthplace of their culture and religion.

During his visit to Kosovo in May, Rep. Tom Lantos, D-Calif., angered Serbs with statements interpreted as assertions that the United States supported ethnic Albanian demands that the province be made an autonomous republic.

Lantos also stated that the Bush administration intended to open a U.S. cultural center in the Kosovo capital of Pristina. No such decision, in fact, has been made.

The atmosphere was further vitiated by the presence on the trip of Joe DioGuardi, a former New York congressman who is now a lobbyist for Albanian-American interests.

Moody sought to assuage Serbian concerns, explaining that ''when a congressman travels to a country and gives his views on conditions there, he is giving his own views, not those of the (U.S.) administration.''

''Mr. Lantos' reported views on an independent republic for Kosovo are not shared by the administration,'' said Moody, who also added that his colleague's statements did not reflect ''the will of Congress.''

He stressed that the U.S. mission in Belgrade ''totally reflects the views of the Bush and previous administrations which have totally opposed'' congressional resolutions calling for autonomy for Kosovo.

#90163u0760 06/12/1990 ~United Press International
(JUNE 12) UPI - Stock prices on the Tokyo Stock Exchange plunged in thin trading for the third consecutive session Tuesday as the yen's weakness discouraged stock market investors.

The closely-watched blue-chip Nikkei average of 225 selected issues, which plummeted 453.11 points Monday, lost another 217.87 points to 32,322.31.

The broader-based Tokyo Stock Exchange Price Index of all major listed shares, slipped 12.45 points to 2,380.56.

An estimated 500 million shares changed hands, up from the 352 million shares traded on Monday.

Declines outnumbered advances 604 to 328, while 189 issues remained unchanged.

Elsewhere in Asia, stock prices surged 1.6 percent on the Hong Kong Stock Exchange as overseas and local investors streamed into blue-chip issues in the heavest trading session of the year.

The closely-watched Hang Seng Index, which fell 19.34 points Monday, surged through the 3,200-level climbing 48.01 points to 3,203.00.

Among the narrower indexes, utilities rose 22.04 points, financials added 32.83, industrials gained 53.78 and properties jumped 104.44 points.

An estimated 2.28 billion shares changed hands in the heavest session this year, compared with 1.61 billion shares on Monday.

In Singapore, investors ignored Wall Street's rally and sent stock prices broadly lower for the second consecutive day on the Singapore Stock Exchange.

The key Straits Times Industrial Index, which fell 11.18 points Monday, tumbled 16.05 points to 1,540.84. The narrower All Singapore Index lost 2.91 points to 435.08.

An estimated 53.2 million shares changed hands, compared with 53.4 million shares on Monday.

In Manila, markets, banks and most major businesses were closed for a national holiday. Trading will resume on Wednesday.

In Australia, stock prices closed lower in light trading on the Sydney Sharemarket, dragged down in part by a stronger Australian dollar.

The closely watched All Ordinaries Index, which lost 5.1 points last Friday, eased 2.3 points to 1,501.5. The All Industrials Index slipped 0.6 points to 2,357.3 and the All Mining Index lost 4.9 points to 723.7.

An estimated 80.1 million shares changed hands, compared with 138.3 million shares on Friday.

Markets in Australia were closed Monday for the Queen's birthday.

#90163u0782 06/12/1990 ~United Press International

BOSTON (JUNE 12) UPI - Gov. Michael Dukakis's joke about a bomb on a USAir plane and a White House aide could have landed the 1988 Democratic presidential candidate in trouble with airport security.

Dukakis was boarding a USAir flight from Logan International Airport to Washington Sunday evening when he spotted White House aide and political foe Ron Kaufman.

According to WBZ-TV in Boston, Dukakis reportedly joked about checking Kaufman and his baggage for a bomb.

Such remarks about airline safety, even in jest, are prohibited by federal law and should be reported to authorities, a Federal Aviation Administration spokesman said.

''He apparently made some comment that caused the USAir agent to check with his supervisor to see if security shold be notified,'' said USAir spokesman Dave Shipley.

Shipley said the supervisor recognized the governor and let him go.

''That was an error in judgment,'' Shipley said. ''He should have been detained and questioned if in fact he made some remark'' about carrying a bomb.

Massachusetts Democrats have accused Kaufman, a longtime GOP operative in the state, of conspiring with a police union to picket the Democrats' June 2 state convention in Springfield. The picketing delayed the convention's opening for four hours and embarrassed delegates and party officials.

Kaufman played a role in the 1988 presidential election when the White House aide worked for George Bush. During the campaign, Kaufman successfully engineered a boat ride on Boston Harbor in which Bush attacked Dukakis's environmental record.

Asked about the alleged remarks at the airport, Dukakis said, ''After going through the experience that we Democrats went through in Springfield I can tell you we will always be concerned when this Kaufman is around, whether it's on a plane, or on the ground, whether it's in Springfield or Boston or Washington.

''We've learned enough from his shenanigans over the years to be very, very careful,'' the governor said.

#90163u0801 06/12/1990 ~United Press International

HONG KONG (JUNE 12) UPI - By barring American corporations from doing business in Vietnam, the United States is effectively yielding a billion-dollar market to its economic competitors, an American Chamber of Commerce delegation said Tuesday.

The Hong Kong delegation, which recently returned from a lobbying mission in Washington, painted a bleak picture for American firms hoping to trade with Vietnam in the next two years.

American companies and individuals have been prohibited by U.S. statute from conducting commercial transactions with Vietnam since American troops pulled out of the nation in 1973, toward the end of the Vietnam War.

"The people who are managing this (U.S.) strategy don't spend a lot of time thinking of the costs," said Warren Williams, who led the AMCHAM delegation to Washington. "As each day goes by, we are once again giving business away to the Japanese, the Koreans, the Germans and everybody else who is already there."

Williams said there were now at least 150 joint ventures in Vietnam and many new trading companies. "Japan alone has 16 trading companies in Vietnam," he said. "It is hard to put a dollar figure on how much U.S. companies are losing out on, but international ventures in Vietnam now are worth at least $1 billion."

Members of the delegation, which traveled to Washington in late May, said

they did not make much progress in lobbying the Bush administration and Congress to lift the Vietnam embargo.

"Frankly, the issue is not in the top 50 issues that are on most lawmakers' minds," said delegation member Mark Michelson. "We were told by both Bush administration people and people in Congress that it would be at least two or three years before any policy change would come about."

The group, which called on U.S. companies to lobby for access to the Vietnamese market, said they were not asking the American government to normalize relations with the communist Southeast Asian nation.

"Our business is business. We don't know what the appropriate state of diplomatic relations between governments should be and it is not for us to decide," Williams said. "But since our business is business, we want the ability to do business with the rest of the world and to join the nations that have companies in Vietnam."

Of 162 multinational corporations surveyed recently by Business International, 75 percent said they were interested in doing business in Vietnam and 31 percent said they had sent representatives on exploration visits to Vietnam.

A Business International spokesperson said 87 of the firms polled were U.S. corporations, of which 57 said they wanted to do business in Vietnam but were hampered by the embargo.

TOKYO (JUNE 12) UPI - Grandstanding by U.S. officials could hinder trade negotiations with Japan just as they enter the critical phase, a senior Foreign Ministry official said Tuesday.

"I think we should not hear too much (publicly) about these kind of talks when both sides are engaged seriously (on) the points of disagreement," chief Foreign Ministry spokesman Taizo Watanabe said at a news conference.

New, last-minute demands from the Americans are "a source of embarrassment " Watanabe said. The United States and Japan are struggling to agree on broad economic reforms to cut the nearly $50 billion annual U.S. trade deficit with Japan. Watanabe declined to identify the demands, but added "some comments made by the American government were an additional source of embarrassment."

Watanabe implied that the U.S. tactics might disrupt attempts to gain concensus among various Japanese factions. Heated discussions are under way between ministries to resolve their differing positions, he said.

The talks, dubbed the Structural Impediments Initiative, are intended to eliminate obstacles to balanced trade between the two nations. A final report is to be hammered out during a meeting of the two nations in Tokyo June 25 and 26. Failure to do so would jeopardize the report's scheduled release in time for the Houston summit of leaders of advanced nations in mid-July.

In recent weeks, U.S. officials have grumbled that Japan was backsliding on interim agreements reached in April on such things as toughening enforcement of Japanese anti-trust law.

Japanese officials reportedly are annoyed that the United States has renewed demands that Japan base its public works spending to a percentage of its gross natonal product. Finance Minister Ryutaro Hashimoto has repeatedly said Japan will refuse to do so.

Compounding the task of completing the final report, Watanabe said, are disagreements over the earlier one. "Some of the agreements reached at the interim report time were wrongly interpreted by American side, and there is overexpectation on the part of the United States," he said.

He refused to identify areas of disagreement but declared himself cautiously optimistic American side would be "reasonable enough" to accept Japanese explanations of its position. "Whatever we have promised will be done," Watanabe said.

#90163u0825 06/12/1990 ~United Press International

ISLAMABAD, PAKISTAN (JUNE 12) UPI - Afghan troops have failed to oust U.S.-backed guerrillas from a strategic valley west of Kabul despite the longest continuous government offensive of the 12-year-old civil war, Western diplomatic sources said Tuesday.

They said heavy fighting was continuing between forces of the pro-Soviet government and guerrillas in the Paghman valley, 9 miles west of Kabul, which the rebels use as base to stage rocket bombardments against the capital.

The government assault began March 25, with troops, militiamen and special guard units backed by air strikes and artillery barrages staging repeated attacks against rebel positions in the valley.

The sources said troops last week also launched an assault at the entrance to the Maidan valley, about 20 miles west of Kabul, in an attempt to reach resistance supply bases supporting the guerrillas in Paghman. They said the guerrillas repulsed the attack, but casualties on both sides were high.

The sources said the Paghman operation is now the longest continuous government offensive since the Moslem rebels began an insurgency against the Kabul regime following the 1978 communist revolution.

But they said the troops had failed to dislodge resistance forces from Paghman. Officials in Kabul, however, said last week the government had captured some rebel posts in the area.

The sources said the offensive was designed to force the guerrilla positions westward out of rocket range of Kabul.

The rebels, who are based mostly in Pakistan and backed by the United States and Saudi Arabia, have staged almost daily rocket barrages against the capital in the past few weeks. The government said scores of people were killed and hundreds more wounded in the attacks.

Officials in Kabul said the stepped-up guerrilla strikes were timed to coincide with efforts by President Najibullah to broaden the base of his regime and make it more acceptable to the majority of the people.

The 44-year-old president last month lifted a 15-month-old state of emergency and held a grand assembly, known as a Loya Jirgah, which approved changes in the constitution removing the leading role of his People's Democratic Party of Afghanistan and liberalizing the economy.

The party later this month is to hold its first congress in 25 years, at which members are expected to vote to change its name to the ''Homeland'' party and approve a new charter.

Diplomats described Najilbullah's liberalization moves as largely cosmetic. ''They do not affect the way the party holds onto real power,'' one source said Tuesday.

Analysts said Najibullah is capitalizing on failures by the guerrillas, who have been unable to capture any major urban centers despite the February 1989 withdrawal of Soviet troops backing the government.

The president, meanwhile, has defied Western predictions of his swift overthrow following the pullout.

The Soviet Union invaded Afghanistan in December 1979 to support a series of Marxist rulers. It withdrew its 100,300 troops as a result of a U.N.-brokered accord signed by Pakistan and Afghanistan.

GENEVA (JUNE 12) UPI - U.S. and Soviet delegates began an intensified effort Tuesday to complete a strategic nuclear arms reduction treaty while multilateral talks resumed on a global ban on chemical weapons.

The superpower negotiators were under instructions from Presidents Bush and Mikhail Gorbachev to try and finalize a START agreement by year's end.

Bush and Gorbachev at their recent Washington summit signed a basic treaty outline on reductions and ceilings on various long-range nuclear warheads and delivery systems.

But a maze of complex unresolved problems on verification and other issues in the 1,000-page plus draft remained for the negotiators, who briefly left Geneva to attend the summit.

''We do not anticipate another break such as a summer recess,'' an American official said. ''A few people at a time may take a rest but it is unlikely that there will be a recess as such until the task is completed.''

U.S. chief delegate Richard Burt and his Soviet counterpart, Yuri Nazarkin resumed the talks at a meeting at the Soviet delegation's headquarters.

START negotiations began March 12, 1985, with the target of 50 percent cuts in strategic nuclear arsenals.

U.S. and Soviet scientists and military experts complained in Geneva on Monday that the cuts will actually be only between 25 percent and 35 percent of current levels.

Meeting at an east-west worskshop, the participants said the cuts also involve mainly obsolescent systems facing withdrawal in any case and that both sides would be allowed to keep modernizing their arsenals.

The United States in particular can deploy its latest hard-to-detect cruise missiles launched from the sea and air, they said.

START II negotiations should begin as soon as the initial treaty is completed, the 36 scientists and other private experts said, and aim at ''much deeper'' reductions in all classes of warheads and delivery vehicles.

Bush and Gorbachev also agreed at the summit on major reductions in each power's stockpile of chemical weapons but made total elimination conditional on a global prohibition treaty.

Multilateral talks on such a treaty resumed Tuesday when the 40-nation

Disarmament Conference - discussing chemical weapons for the past 20 years - began its 1990 summer session.

While some delegates believe an international ban can be completed by the end of 1991, other experts are less confident about an early agreement because chemical arms are seen as the ''poorer countries' nuclear bomb.''

The United States and Soviet Union in their initial bilateral accord said they would dispose of all stocks only wshen all nations possessing or able to make chemical weapons abide by a global ban.

Ambassador Oswaldo de Rivero of Peru, chairing the new disarmament conference conference, said a chemical weapons ban remains the first objective.

He also said the two superpowers would report regularly on their private START negotiations.

#90163u0858 06/12/1990 ~United Press International

JERUSALEM (JUNE 12) UPI - Prime Minister Yitzhak Shamir, on his first full day heading the country's new hard-line government, pledged Tuesday to work toward peace with the Arab world but said success of his efforts depends on the good will of Israel's neighbors.

The new government won approval from Israel's parliament, the Knesset, Monday on a 62-57 vote after nearly six hours of sometimes acrimonious debate. One Knesset member, Avraham Verdiger of the ultra-Orthodox Agudat Israel party, abstained.

''It is clear that we will make very important efforts to make progress in our efforts for getting peace with the Arab world,'' Shamir said after he presented his new government to President Chaim Herzog. ''The success of these efforts will depend mainly on the good will and understanding of our neighbors.

''I think that we have good solutions for the most important problems concerning the Palestinian Arabs,'' the Likud Party leader said. ''And if (there) will be a readiness to talk with us and to come toward us with an understanding of our positions and interests, I am sure that it is possible to find in the not-very-far future a positive solution.''

The coalition's guidelines call for the new government to ensure the sovereignty of the state, strengthen security, prevent war and achieve peace with its neighbors.

But the coalition, the most right-wing since 1984 and one of the most

hard-line in the country's history, opposes creation of a Palestinian state and rejects negotiations with the PLO, direct or indirect. The Camp David accords and Israel's 1989 peace initiative, which indicate limited autonomy for Palestinians, will be the basis for furthering the peace process, the coalition guidelines say.

Prominent Palestinians in the occupied territories have indicated their pessimism over the creation of the new coalition and predicted an escalation in the Israeli-Palestinian conflict.

Foremost among the objectives of the new government is the absorption of hundreds of thousands of Soviet Jews immigrating to Israel. Palestinian fears that some of those immigrants may settle in the occupied territories have been heightened by the appointment of hard-liner Ariel Sharon as housing and construction minister.

Sharon, who believes the West Bank and Gaza Strip must be under Israeli rule, will oversee major aspects of Soviet immigration.

''This government is going to increase Jewish settlements, bring in more settlers,'' said Elias Freij, mayor of the West Bank town of Bethlehem. ''More land will be lost ... and this government is not interested in making peace.''

In his speech to Israel's 24th government, Herzog said the country faced significant external and internal challenges, including the need to assess Israel's electoral system so that the ''irregular phenomenon'' of the last few months will not occur again.

Israel had been with a transition government since March 15 when the Knesset voted no confidence in Shamir after the ''national unity'' Likud-Labor coalition collapsed. Labor Party leader Shimon Peres failed in his attempt to form a government and it took Shamir 42 days of political bargaining to achieve a signed coalition agreement.

''At this hour, when we are at the height of the struggle, voices threatening our very own existence can once again be heard,'' Herzog told the new government. ''We are once again faced with the challenges of furthering peace.''

(JUNE 12) UPI - In South Korea, dissident students in a southern city today threw about 200 firebombs at a new U-S cultural center. The new center... which was opened yesterday with great fanfare... replaced an earlier facility that was closed a year ago because of repeated attacks. There's NO word on the extent of damage.

Thunderstorms packing 55-mile-an-hour winds swept across the upper Midwest this morning... pounding Minnesota and Wisconsin with heavy rain and lightning. The strong storms dumped small hail and sometimes heavy rain in the central Minnesota counties of Crow Wing and Morrison.

Federal Reserve Board Chairman Alan Greenspan today called on the Soviet Union and other nations in Eastern Europe to open their economies to encourage foreign investment. Greenspan made his remarks to the General Assembly of the Federation of German Industries in Bonn.

Former President Richard Nixon will play host to fellow chief executives Gerald Ford... Jimmy Carter... Ronald Reagan... and George Bush at the dedication of the Richard M. Nixon Library in Yorba Linda, California. Lady Bird Johnson- widow of President Lyndon Johnson- also will attend the July 18th and 19th celebration.

George Bush celebrates... or rather, refuses to celebrate... his 66th birthday today. But his G-O-P supporters arranged to give him a birthday tribute at an annual black-tie fundraiser, the President's Dinner. Bush is one of just 13 men aged 65 or older ever to serve as president.

#90163u0930 06/12/1990 ~United Press International

(JUNE 12) UPI - Emergency crews are hoping a burning Norwegian tanker in the Gulf of Mexico will be cool enough this morning so they can shower the vessel with chemical foam. If the foam is applied too soon and doesn't put out the blaze, it could combine with oxygen to ignite residual oil and spark more explosions and damage. The tanker carries 38-Million gallons of light crude oil.

Legislators in the Soviet republic of Russia have declared independence from the Soviet Union. The Russian legislature approved the measure with a 907-13 vote, just before republic president Boris Yeltsin was to meet with Soviet President Gorbachev and the leaders of Lithuania, Latvia, and Estonia. Russia's declaration has NO immediate legal force and it's NOT clear how the rest of the Soviet Union will react.

President Gorbachev presented the Supreme Soviet with a report on his

Washington meeting with President Bush today. Gorbachev said he told Bush there were alternatives to a united Germany in NATO. But the Soviet leader added Moscow would accept an ''associated membership'' in NATO for a united Germany if the Western alliance adopts reforms. Gorbachev did NOT specify what ''associated membership'' means.

Sofia radio in Bulgaria says the first official results from weekend parliamentary elections indicate the communists have won more than half of the 111 seats in 200 individual races. The election marked Bulgaria's first democratic balloting in 44 years. The results show Bulgaria is on its way to being the only Eastern European nation to return to the ruling Communist Party since democratic changes reforms were embraced last year.

#90163u0933 06/12/1990 ~United Press International

(JUNE 12) UPI - The family of the black teen slain in Brooklyn's Bensonhurst area last summer says the verdict handed down against two teen-agers is a ''great victory'' for New York's black people. 19-year-old Joseph Fama, convicted of killing Yusuf Hawkins during a mob attack, was sentenced to the maximum term of 32 years and eight months to life in prison. 19-year-old Keith Mondello, convicted on lesser charges, also was given the stiffest sentence, five-and-a-third to 16 years in prison.

Washington, D-C, Mayor Marion Barry is steadfastly denying reports that he's trying to reach a plea bargain agreement with federal prosecutors. The mayor also is pushing aside persistent reports he'll give up plans to run for a fourth term in order to help his defense. Jury selection in Barry's drug and perjury trial is in its second week.

Japan's finance minister told his fellow Cabinet members today that women should skip college to stay home and have babies. Local news reports say Defense Minister Ryutaro Hashimoto made the comments in Tokyo during a Cabinet discussion about Japan's falling birthrate. Local news reports say he suggested the government limit access to education as a way to reverse the birthrate trend.

President Bush celebrates his 66th birthday today... but there won't be much fanfare. Bush is regarded as one of the most vigorous presidents and enjoys a 70 percent approval rating. Yet there are controversial issues such as the budget, gun control and abortion that he will have to deal with as he campaigns for Republican candidates in November's elections.

BOSTON (JUNE 12) UPI - The Boston Celtics called a news conference for Tuesday afternoon to promote assistant Chris Ford to head coach.

Ford, who has been with the Celtics organization since 1978 both as a player and assistant coach, became the prime candidate for the job after Duke University basketball coach Mike Krzyzewski turned down the post last week.

Ford will become the Celtics' 11th head coach, replacing Jimmy Rodgers who was fired last month after Boston was eliminated from the NBA playoff

opening round.

Ford, 41, met for several hours Monday with the team's new head of basketball operations, Dave Gavitt, and has taken part in all scouting meetings regarding the upcoming draft.

The Celtics' assistant coach since 1983, Ford played his college ball at Villanova, was drafted by Detroit in 1973 and played for the Pistons for six seasons. He was traded to Boston in 1978. On Oct. 12, 1979, Ford scored the first 3-point field goal in NBA history.

Celtics President Arnold ''Red'' Auerbach and team owner Donald Gaston were expected to attend the news conference at Boston Garden.

#90163u1038 06/12/1990 ~United Press International

GALVESTON, Texas (JUNE 12) UPI - A dozen experts on oil fires boarded the tanker Mega Borg Tuesday morning and said the inferno raging in its stern had diminished during the night, possibly enough to allow an assault on the fire with 100 tons of foam.

Coast Guard Chief Petter Officer Howard Holmes said the men approached the fire across the relatively intact front decks for a look.

''The fire seems to be highly suppressed,'' Holmes said. ''The less fire we have, the less heat we have. The less heat the closer we are to getting ready to disperse the foam and put this thing out.''

At 4 a.m. salvage workers put a temperature probe into the rear superstructure and found temperatures of 900 degrees, considerably lower than they had been. There was also less flames visible and the heavy black smoke was not as dark, indicating less of the tanker's 38 million gallon of crude oil was seeping from storage compartments into the inferno.

Four of the six fireboats on the site kept steady streams of water flowing onto the back 200 feet of the 853-foot-long ship during the night to suppress the flames and help keep the steel plates cool. Some flaming crude oil still was rolling over the rear end, which was awash, and drifting downwind from the ship.

Coast Guard Petty Officer Gene Maestas Monday said the hull of the tanker was intact, though a few plates on the flat deck had warped from the heat.

''There's no evidence at all of any buckling or any structural damage at this time,'' Maestas said.

The fire began Saturday at 1 a.m. when an explosion ripped through the

tanker's engine room, killing two men and leaving two missing, while it was loading its crude oil into a smaller tanker for transport up the Galveston Ship Channel. It is riding at anchor 57 miles southwest of Galveston in international waters and has burned out of control since.

Some 100,000 gallons of crude oil have been spilled, though much of it has burned away. The oil itself is light crude oil, which evaporates and disperses on its own far more readily than heavy crude.

Smit America, the private company hired by the tanker's owner to fight the fire and salvage the ship, had 100 tons of foam on hand, enough to spray for two hours when the final assault on the fire begins. The Coast Guard estimated the foam could control the blaze within an hour.

The prospect of an ecological disaster along the Texas Gulf Coast loomed larger Monday afternoon when the rear of the tanker's fell below the water line, although it bobbed above the surface occasionally.

Coast Guard Capt. Tom Greene, the federal on-scene coordinator who twice flew over the Mega Borg Monday, said the ship ''could burn for months,'' similar to the tanker Burmah Agate, which collided with a freighter 4 1/2 miles offshore in Galveston Bay in 1979.

Thirty-two people died in that accident and an estimated 10.7 million gallons of oil spilled or were consumed in a fire that burned for 69 days.

Smit America, which encountered the reignition problem during foaming efforts while fighting the Burmah Agate blaze, proceeded cautiously Monday said Coast Guard Chief Petty Officer Todd Nelson.

''We're not going to start until it's safe,'' Nelson said.

Greene said he did not believe the Mega Borg was in danger of sinking. ''The hull's still intact,'' he said.

If the Mega Borg were to sink or break apart it could create a catastrophic oil spill, said Texas Land Commissioner Garry Mauro.

''This is our worst nightmare,'' he said. ''We're not ready to deal with a catastrophic oil spill off the coast.''

Salvage workers were preparing to use the foam Monday morning when a new stream of flaming oil erupted from the vessel in front of the original fire about noon. The fire was quickly knocked back, but other fires burned on fuel leaking across the deck and on the water's surface.

The Mega Borg's cargo of 38 million gallons is more than three times the amount spilled from the Exxon Valdez in Alaska's Prince William Sound on

March 24, 1989, the worst oil spill in U.S. waters. But the Alaska spill involved heavy crude; light crude spilled by Mega Borg was likely to disperse and evaporate relatively fast.

The fire began with an explosion at 1 a.m. Saturday in the engine room that killed two crewmen and left two others missing and presumed dead. Officials reported 17 other crew members suffered non-serious injuries.

Five more explosions rocked the tanker Sunday, signaling the start of oil leakage.

Oops Inc. of New Orleans, a private cleanup company, had dumped 4,500 gallons of chemical dispersants on the floating oil near the ship by Monday night. It was not known whether the chemicals were having an impact.

The Mega Borg is owned by K.S. Mega Borg II of Farsund, Norway. The cargo is owned by ELF-Aquitaine, a French oil company with offices in Houston.

#90163u1056 06/12/1990 ~United Press International

MIAMI (JUNE 12) UPI - Union pilots at Eastern Airlines, frustrated in their efforts to reclaim seniority in the cockpit, will consider whether to resurrect their strike against the troubled carrier at a meeting Tuesday, a spokesman said.

"I expect that all the lawyers will be laying out all the pieces," said union spokesman E.J. Breen. "I think this will be a critical meeting. However, Breen said he didn't expect the master executive council of the Air Line Pilots Association at Eastern to make a final decision on the issue until Wednesday or Thursday. The council was to meet in Washington.

Breen said pilots are frustrated by Eastern's position on two issues regarding their seniority, as well as the slow pace of management change at Eastern since the court appointment of trustee Martin Shugrue. On Friday, Eastern announced the recall of 90 pilots, in the first such re-hiring since ALPA voted to pull down its picket lines in November.

Breen said Eastern chose to recall 53 pilots who offered to cross union picket lines before the strike ended and were placed on a preferential hiring list by the airline, instead of recalling pilots with the most seniority.

"It is kind of a slap in the face," he said. "They recalled with complete and total prejudice. It was such a small thing for them to do, but it was such a big thing for our people."

Breen also said Eastern has insisted that working pilots with less than

one year of experience be given seniority over pilots who have been flying for decades. "We just don't think it is right that a captain with 31 years of experience should have to come back in an inferior postion," he said.

Negotiators for Eastern and the union have been seeking to resolve those differences in talks held under the supervision of the National Mediation Board. Breen said Shugrue initially appeared receptive to union pilots, but since has hardened his stance. "We are very disappinted with the turn the trustee has taken," he said.

Shugrue was appointed to run Eastern in April by U.S. Bankruptcy Court Judge Burton Lifland, who stripped control away from Texas Air Corp. Chairman Frank Lorenzo.

"He (Shugrue) has kept the old Texas Air guard in there, and our real concern is that maybe Frank Lorenzo is still pulling the strings," Breen said. "Quite frankly, it appears the Texas Air mentality has not been removed."

Eastern filed for bankruptcy in March 1989, five days after unions representing its pilots, flight attendants, and ground workers launched a crippling strike. Union pilots and flight attendants pulled down their picket lines in November. The International Association of Machinists remains on strike.

Eastern currently employs 1,775 pilots, including 860 pilots who defied the union by crossing picket lines, and 915 others who were hired as replacement pilots. Eastern quit hiring pilots in August, and told those union pilots who wanted to return that it had no jobs for them.

#90163u1057 06/12/1990 ~United Press International

(JUNE 12) UPI - There was some good news today for firefighters trying to bring a tanker fire in the Gulf of Mexico under control. The Coast Guard says the color of the column of smoke coming from the tanker Mega Borg has changed. Chief Warrant Officer Rick Meidt in Galveston, Texas, says officials inspecting the ship at daybreak think the blaze that's been burning out of control since Saturday may be putting itself out.

Lawmakers in Soviet Russia passed a declaration of sovereignty as republic leader Boris Yeltsin prepared for a meeting with Soviet President Gorbachev and leaders of secession-bent Baltic states. The new Russian Congress of People's Deputies proclaimed Russia's laws the highest authority in the republic's territory. The move seeks to give the republic veto power over decisions by Gorbachev's central government.

Soviet President Gorbachev softened his stance on Lithuanian independence

in advance of a meeting with leaders of the rebellious Baltic republics. Gorbachev told the Supreme Soviet today that a temporary suspension of Lithuania's declaration of independence would be enough for negotiations on its secession. Gorbachev had asked earlier that Lithuania suspend or rescind indefinitely its March 11th declaration of independence.

Minnesota Republican Senator David Durenberger is said to be ''upbeat and cautiously optimistic'' about today's start of Senate Ethics Committee hearings examining his personal finances and dealings with a publishing company. The hearing is the first public ethics inquiry into the affairs of a U-S Senator since the Abscam bribery scandal almost a decade ago.

(JUNE 12) UPI - Experts says the oil fires aboard a stranded tanker in the Gulf of Mexico off Galveston, Texas, are diminishing. A dozen oil fire experts this morning boarded the Mega Borg and are trying to figure out their next step. They say the ship needs to cool before they spray foam, or else the heat could produce more chemical explosions.

Soviet President Gorbachev is meeting in Moscow today with the presidents of Lithuania, Estonia and Latvia... for the first time since the republics declared their independence. The meeting of Gorbachev's Federation Council includes leaders of the 15 Soviet republics.

Also attending the meeting is Boris Yeltsin, the leader of the Russian republic. The republic's legislature today passed a radical declaration of sovereignty. The new Russian Congress of People's Deputies voted 907-13 to proclaim its laws the highest authority in its territory. Russia is the Soviet Union's biggest republic.

Election results today confirmed a communist victory in Bulgaria on Sunday... but opposition demonstrators are crying foul play. The Union of Democratic Forces says the vote was manipulated, and they say they'll wage an all-out war for parliamentary seats that will be decided in a run-off election on Sunday.

(JUNE 12) UPI - Israeli Prime Minister Yitzhak Shamir kicked off the first full day of his new right-wing government by pledging to work toward peace with the Arab world. But Shamir indicates that the chances for peace will depend largely on the goodwill of Israel's Arab neighbors.

A senior military official in Sri Lanka reports that about 800 armed Tamil rebels launched simultaneous attacks on four army camps, killing at least 66 people. About 100 people were wounded in the attacks 135 miles northeast of Colombo. It was the worst fighting since India's peace-keeping forces pulled out of the country last March.

Liberia's government says peace talks with rebel leaders were delayed because the rebels had NOT arrived for the negotiations. The negotiations between government representatives and the rebels were to have begun yesterday in the west African capital of Sierra Leone . It's NOT immediately clear when talks will begin toward ending nearly six months of civil war.

Senior White House staff pulled President Bush away from his horseshoe pit this morning to present the him with a new brown leather briefcase on his 66th birthday. White House spokesman Marlin Fitzwater says Bush thanked his staff by saying- ''It's just what I needed.'' The gift replaces the president's tattered briefcase that has known better times.

#90163u1198 06/12/1990 ~United Press International
EASTON, PA (JUNE 12) UPI - The makers of Crayola crayons, responding to the bolder, brighter tastes of children, said Tuesday they are retiring eight standard colors and introducing eight new ones with snazzy names like dandelion, cerulean and wild strawberry.

To make room for the new hues, Binney & Smith Inc. is eliminating eight old favorites: maize, raw umber, blue gray, lemon yellow, green blue, orange red, orange yellow and violet blue. The retired shades will be enshrined this summer in Crayola's crayon Hall of Fame at its international headquarters in Easton.

But starting next month children around the world will be able to draw a teal blue ocean, a fuchsia azalea, a dandelion sun, a jungle green tree, a vivid tangerine tiger, a royal purple king's cloak, a cerulean (bright medium blue) sky and a wild strawberry.

It is the first time Binney & Smith has stopped production of any color and the first time since 1972, when eight fluorescent shades came on the market, that any new colors have been introduced.

Company spokesman Brad Drexler said the change was a matter of economics and customer satisfaction.

''We are being more and more responsive to kids' needs,'' he said. ''Maybe 10-15 years ago we did not look out for kids' needs. There's always been a lot of competition in the crayon market. It's just a smart move for us to make.

''Because kids are people using our products, we should be talking to the kids about what they like or do not like.''

So they talked to kids. Company officials surveyed boys and girls around the nation and found that they liked bolder, brighter colors.

''We talk to kids frequently and get their feedback on what they think about our product,'' Drexler said.

It took the company about 1 1/2 years to research and develop the new colors and decide which ones to eliminate.

''When we layed all the colors out on a sheet, we looked for places in the color spectrum where we could improve the color offering by introducing brighter, bolder colors,'' Drexler said. ''We looked for colors we could retire that wouldn't take away from the existing assortment by leaving colors completely void.''

Drexler said a team of employees came up with the tantalizing names for the new colors, many of which are the names used for professional fine art materials.

For the record, the most popular colors are red and black - red because it's a primary color and black because it's best for outlining. Boys seem to favor fluroescent colors and girls prefer pastels, Drexler said.

Four or more of the new colors will be available in boxes of 24, 32 and 48. The box of 64 will feature all eight new colors. The new colors are being sold in some stores now but will be more widely available in July.

The first box of Crayola crayons was sold in 1903 and consisted of red,

blue, yellow, green, orange, violet, black and brown.

NEW YORK (JUNE 12) UPI - Former Philippines first lady Imelda Marcos returned to her racketeering trial Tuesday, declaring herself healthy after a dramatic courtroom collapse and hospitalization 11 days ago.

''I feel better. I'm all right,'' a smiling Marcos said to reporters as she emerged from a black van minutes before her trial resumed.

Asked if she would be able to finish the lengththy trial, she replied, ''I will be well enough.''

On May 31 during a morning session, the widow of outsted Philippine president Ferdinand Marcos suddenly pitched forward in her chair, her head hitting the table on front of her, and began coughing up blood.

Marcos was rushed on a stretcher to New York Hospital, where she remained for four days. U.S. District Judge John Keenan recess the trial to give her time to recuperate.

Her doctors reported the attack had been triggered by erosive gastritis, an inflammation of the stomach caused by excessive acid.

Marcos's trial began March 20. She is charged with bilking millions of dollars from the Philippine treasury and using the money to buy art and real estate.

Her co-defendant, Saudi arms dealer Adnan Khashoggi, is charged with

falsifying documents showing that he, rather than Marcos, owned the properties.

The May 31 collapse marked the third time that Marcos has been stricken during the trial. The first two attacks were attributed to high blood pressure and her physicians have insisted that she wear a heart monitor.

#90163u1229 06/12/1990 ~United Press International

HOLLYWOOD (JUNE 12) UPI - Eddie Murphy and Nick Nolte shot down Arnold Schwarzenegger at the boxoffice last week as the sequel ''Another 48 HRS.'' topped the Austrian strongman's ''Total Recall.''

The two heavyweight action summer releases slugged it out in almost 4,500 theaters with ''Another 48 HRS.'' coming away with $19.4 million in its opening week on 2,301 screens.

The movie is more of the same scatalogical and violent action of ''48 Hours.'' with Murphy as the convict on hiatus, smart-mouthing the establishment and knocking heads to the consternation of his cop baby-sitter played by Nolte.

Despite universally negative reviews, ''Another 48 HRS.'' led the box-office parade with an $8,462 per-screen average.

Paramount Pictures' reported figure of $19.4 million was questioned by other studios as being inflated but was accepted by Entertainment Data Inc. and other objective organizations.

In its second week, ''Total Recall'' fell from its top perch while collecting $15 million in 2,076 situations for a two-week tally of $51.1 million, almost as much as its reported production cost.

Schwarzenegger, playing a spy seeking his true identity, travels to Mars where he proves himself as adept at trashing that planet's heavies as he is at eliminating Earthling scum.

Playing in 225 fewer theaters than its competition, and suffering a 41 percent drop from its record-breaking three-day opener, ''Total Recall'' notched a $7,255 per-screen average.

The summer sweepstakes will heat up with ''Dick Tracy'' and ''Gremlins 2'' in the starting gate for release this Friday.

No. 3 last week was another big summer production, ''Back to the Future 3.'' The finale of the Michael J. Fox time-travel trilogy lost 26 percent from the previous week to rack up $7.6 million on 2,054 screens for a

$3,725 per-screen average.

''Back to the Future 3'' has grossed $49.5 million in its first three weeks.

No. 4 was ''Bird on a Wire,'' the romantic action-comedy starring Goldie Hawn and Mel Gibson. ''Bird'' continued to peck up respectable change with a gross of $4.8 million in 2,008 houses. In four weeks it has grossed $49.7 million.

Slipping only 6 percent, ''Pretty Woman,'' No. 5 and now in its 12th week, latched onto $4.4 million in 1,777 theaters. The Richard Gere-Julia Roberts comedy romance has amassed a very pretty $133.3 million.

The top eight pictures in the rankings scored at least $1 million each. Four of the elite group have earned more than $100 million apiece.

Surprise of the week was ''Driving Miss Daisy,'' which reappeared in the top 10 with the addition of 390 theaters for a gross of $642,840.

It was a stunning box-office week at North America's 23,000 theaters, which drew $110.5 million, significantly more than the $98.9 million total for the same week in record-setting 1989.

So far, the 1990 box office tally is $1.8 billion, as compared with $1.7 billion at this juncture in 1989.

The top 10, last week's gross, total gross, weeks in release:

1. ''Another 48 HRS.,'' $19.4 million, 1 week.
2. ''Total Recall,'' $15 million, $51.1 million, 2 weeks.
3. ''Back to the Future 3,'' $7.6 million, $49.5 million, 3 weeks.
4. ''Bird on a Wire,'' $4.8 million, $49.7 million, 4 weeks.
5. ''Pretty Woman,'' $4.4 million, $133.3 million, 12 weeks.
6. ''Cadillac Man,'' $1.7 million, $22.3 million, 4 weeks.
7. ''Teenage Mutant Ninja Turtles,'' $1.5 million, $125.2 million, 11 weeks.
8. ''Fire Birds,'' $1.2 million, $12.3 million, 3 weeks.
9. ''The Hunt for Red October,'' $802,750, $113.4 million, 15 weeks.
10. ''Driving Miss Daisy,'' $642,840, $102.6 million, 26 weeks.

#90163u1248 06/12/1990 ~United Press International

CLEVELAND (JUNE 12) UPI - An executive vice president of Honda of America Manufacturing Co. told analysts Tuesday that Honda, like the Big Three automakers, has made marked quality improvements.

"Detroit is clearly improving the quality of vehicles they are making, but so are we," Scott Whitlock said in response to questions about competition from America's major manufacturers. "Right now, our internal quality surveys tell us we're producing the best cars we have ever produced.

"Everybody in this industry is getting better. ... (But) there is such a fundamental difference in the technology that we are using from what our competitors are doing that it is very difficult for them to copy us. They have to pursue their own path."

Whitlock, one of three executive vice presidents reporting directly to the president of Honda of America in Marysville, Ohio, was the first of several executives to speak during McDonald & Co. Investments Inc.'s two-day conference on America's ability to compete in manufacturing.

Honda's central Ohio operation has the capacity to produce 500,000 Accord and Civic Sedan models a year. Honda produces only three models, with the third - the Prelude - being imported.

"That's why we have two cars in the top ten best sellers, the Accord and the Civic," Whitlock said. "But if we're going to continue to grow, we're going to have to add models."

Whitlock said the three major challenges facing Honda are developing a manufacturing and marketing operation in Europe, significantly increasing sales outlets in Japan and moving forward on self-reliance in the United States.

Honda's cars produced in Ohio now have a domestic content of about 72 percent. He said it is becoming easier to increase the domestic share because, as Honda increases its production, suppliers have become more willing to make major changes necessary to satisfy Honda's requirements.

"There is something about Honda that has made it successful," Whitlock said. "It goes into the design of the parts. ... What we have found is that our technology is very foreign to many domestic OEM (original equipment manufacturers) suppliers."

Honda began exporting Ohio-made Accords to Japan in 1988 and last year, Whitlock said, it became the No. 1 selling U.S. car in Japan. South Korea, Taiwan, Israel, and Canada are also Honda export destinations, with a goal to export ten percent of its U.S. production.

But beyond the Accord wagon - which will be introduced this fall - Honda does not have major plans for exporting U.S.-made cars to Europe. "We don't see the United States ever becoming the principal source of supply for Europe," Whitlock said. "We see the principal source of supply being in Europe, just as we have become a principal source of supply in America."

#90163u1263 06/12/1990 ~United Press International

COLOMBO, SRI LANKA (JUNE 12) UPI - The government announced a cease-fire Tuesday night with Tamil separatists in the wake of a rebel attack on four army camps that killed at least 66 people and wounded more than 100.

''it was agreed by 12 noon Wednesday that all acts of violence must have stopped,'' a government comminique said. ''It was agreed that every endeavor must be made by both sides to avoid situations that could give rise to confrontation or conflict.''

The cease-fire was reached in the wake of the worst fighting in Sri Lanka since the withdrawal of the Indian peace-keeping force in March. It followed the third attack in less than a week on government troops by the Liberation Tigers of Tamil Eelam.

Tamil militants since 1983 have fought a bloody war for independence in their strongholds of northern and eastern Sri Lanka, claiming persecution by majority Buddhist Sinhalese who dominate the government of the Indian Ocean island nation.

The government announcement came after Justice Minister Shahul Hameed, the government's main negotiator with the Tigers, flew to northern Jaffna peninsula for talks with the rebels in the wake of the latest guerrilla attack.

About 800 heavily armed Tiger rebels, the most powerful Tamil militant group in the country, launched simultaneous attacks Tuesday on four army camps in the eastern district of Batticaloa, 135 miles northeast of Colombo, a senior military official said.

The attacks on the camps at Vellaweli, Kalmunai, Kiran and Kalawanchikudi killed at least 30 civilians, 26 soldiers and police officers and 10 rebels, the official said. He said more than 50 civilians and 55 rebels were wounded.

Sri Lankan navy gunboats positioned off the eastern coast fired shells at Tiger positions, and air force helicopters were called in to provide air support, the official said.

Military officials in Colombo said the Tigers suffered heavy casualties in the attack on the four camps, but could not provide exact numbers.

The government said the justice minister and Tamil Tiger leaders will ''meet again Thursday in Batticaloa to review the progress and to settle any outstanding issues.''

Police said Tamil rebels also robbed at least one state-run bank in Batticaloa district, getting away with thousands of dollars worth of rupees.

On the northern Jaffna peninsula, authorities Tuesday said Tiger rebels took hostage 12 police officers - four at Point Pedro and eight others in Kankesanthurai. The rebels ordered all other officers to vacate police stations and leave behind all arms and ammunition, police said.

Also, a main military camp located within the old Dutch fort on the penninsula was surrounded by rebels armed with mortars and rocket-propelled grenade launchers, police said.

The recent bloodletting shattered a period of relative calm following the departure from Sri Lanka in late March of an Indian peace keeping force.

India was invited to send troops to Sri Lanka in July 1987 after Colombo and New Delhi signed a peace accord aimed at halting a separatist uprising by Tamil militants.

Several Tamil militant organizations battled the Sri Lankan military from 1983 until the Indo-Sri Lankan peace agreement in 1987.

Under terms of the accord, troops were sent to Sri Lanka to maintain law and order and to supervise the surrender of weapons by militant groups who had agreed to quit fighting in exchange for greater Tamil autonomy in their areas.

But the Tigers refused to hand over their guns, maintaining that the peace accord did not fulfill Tamil aspirations for autonomy.

The refusal ignited a war between the Tigers and Indian troops. At one point during the conflict some 70,000 Indian soldiers were present in Sri Lanka, but could not defeat the Tigers who fought from jungle hideouts.

More than 1,100 Indian troops and some 600 Tigers were killed in the conflict.

After the departure of Indian forces, the Tigers demanded that an election be held, but Colombo has refused until the Tigers disarm.

#90163u1271 06/12/1990 ~United Press International

BOSTON (JUNE 12) UPI - It is not just the young who can benefit from pumping iron - weight training can produce dramatic strength increases even in the very old, scientists said Tuesday.

A study of 10 frail nursing home patients ranging in age from 86 to 96 who undertook an eight-week weight training program showed ''remarkable'' results, said Dr. Maria Fiatarone of Tufts University and Harvard Medical School.

She said the study was the first involving very elderly people that focused on improving their strength through weight lifting, rather than using aerobic exercise to change cardiovascular fitness.

By working out with a weight machine three times a week, the six women and three men who completed the program were able to increase the strength of their right legs by an average of 174 percent, boosting the average amount of weight they could lift with the legs from 17 pounds to 45 pounds, Fiatarone said.

''The favorable response to strength training in our subjects is remarkable in light of their very advanced age, extremely sedentary habits multiple chronic diseases and functional disabilities, and nutritional inadequacies,'' she and co-researchers reported in the Journal of the American Medical Association.

As a result of the strength gains, five patients who were tested for walking speed were able to move an average of 50 percent faster following the training program than they had at the beginning, the study said.

In addition, it said two of the elderly were able to give up the canes they had used to help them walk and one of the three patients ''who could not initially rise from a chair without use of the arms became able to do so.''

All of the study participants were residents of the Hebrew Rehabilitation Center for Aged in Boston. In addition to their age, they were selected for the study because most had suffered repeated falls due to muscle weakness and because they had multiple medical disorders, including arthritis, heart disease, high blood pressure and osteoporosis, a bone-thinning condition, Fiatarone said.

''We wanted to find a kind of worst-case scenario, so that we could see if people who were very old and not in very good shape could benefit from weight training the way that younger people can,'' she said.

During the thrice-weekly training sessions, the study participants performed three sets of eight weight-lifting repetitions with each leg. The primary aim of the program was to increase the strength of leg muscles known as quadriceps.

The only patient who did not complete the regimen was a man with a prior

hernia repair who was advised to drop out. Fiatarone said she was ''impressed'' not only with the gains the participants made, but with ''the dedication they had. And they were pleased as well - none of them had done anything like this before.''

Although the patients came through the program with no ill effects other a few aches and pains, Fiatarone cautioned that ''this still needs to be regarded as research. I wouldn't recommend that everybody go out and do this unsupervised.''

With the help of a trained instructor, though, she said a large proportion of older people should be able to benefit from weight training exercise. However, just as in younger people, she said the training has to be ongoing for the changes in muscle function to continue.

#90163u1300 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - Coast Guard helicopters Tuesday plucked eight persons from a life raft near their burning, 50-foot sport fishing boat about 50 miles off the coast of New Jersey.

The burning boat, the Escavator, out of Beach Haven, N.J., sank shortly after the rescue, said Coast Guard Lt. Gregory Martin.

None of the eight persons rescued was identified immediately. There were no immediate reports of injuries, Martin said.

Shortly after dawn someone on the boat radioed it was afire in the Atlantic about 50 miles off Barnegat Light, and about 100 miles southeast of New York City. Three helicopters were dispatched from the Brooklyn air station at Floyd Bennett Field.

The three aircraft arrived at the burning ship about 7:22 a.m., and spotted the eight persons in the raft, Martin said.

Coast Guard survivalman Joseph Beyer was lowered to the water and helped each of the survivors into rescue slings so they could be hoisted into the hovering helicopters, he said.

Four of the survivors were taken into one of the helicopters and four in another. They were flown to Atlantic City Airport, Martin said.

The oil tanker Exxon Charleston saw the smoke from the burning vessel and steamed to the scene just as the eight were plucked from the water, Martin said. The ship picked up Beyer and was scheduled to drop him off at Ambrose light tower around noon.

Cause of the fire aboard the Escavator was not known, Martin said.

#90163u1328 06/12/1990 ~United Press International
WASHINGTON (JUNE 12) UPI - The AIDS epidemic appears to be leveling off in the United States but surging at such an alarming pace in the Third World that the deadly virus may strike 20 million people by the year 2000, the World Health Organization said Tuesday.

Third World nations account for about 66 percent of HIV-infected people today, but will make up nearly 80 percent by 2000 and a staggering 90 percent by 2010, according to new WHO estimates.

''The global balance of HIV infection is rapidly tipping towards the developing countries,'' said Dr. Michael Merson, the new director of WHO's Global AIDS Program.

''I can't imagine that there has ever been any disease that would have the social and economic impact that HIV disease and AIDS has - and will have - in our history,'' said Merson, noting past scourges like the bubonic plague struck only certain geographic areas and occurred when world population was much smaller.

Merson repeated past WHO projections that 15 million to 20 million people worldwide likely will be infected with the AIDS-causing human immunodeficiency virus, or HIV, by the turn of the century.

But those figures probably will be revised ''significantly upward'' later this year after WHO determines how quickly HIV is spreading in Asia, Eastern Europe, parts of South America and rural Africa - regions that had few reported AIDS cases in the early years of the AIDS epidemic but are now experiencing an upswing, he said.

In 1985, it was estimated about half of the HIV-infected people lived in the United States and other developed countries. However, it appears the Third World will soon bear the brunt of the problem.

Currently, African nations south of the Sahara Desert appear hardest hit. About one of every 50 men and women are currently infected there, and the rate of infection - spread mainly by heterosexual contact - continues to rise, WHO said. In some cities in central and eastern Africa, up to 20 percent of young adults are infected.

About one of 75 men in North America are infected with the AIDS virus, while the infection rate is one in 125 men in South America and one in 200 men in Western Europe, WHO said.

Furthermore, WHO estimates one in 500 women in South America are infected, one in 700 women in North America, one in 1,400 women in Western Europe and one in 20,000 in Eastern Europe, Asia and the Pacific region.

The WHO official attributed a decline in the rate of new HIV infection among homosexual men for the recent leveling-off trend in the United States and Western Europe, where the majority of AIDS cases have been homosexual men.

However, he emphasized: ''AIDS is not going to go away in the United States or any other developed country. Twenty percent of 20 million is still a lot of infections. It's still 4 million people.''

''I would be very concerned if industrial or developed countries lost interest in AIDS research because more infections were occurring in developing countries,'' Merson added. ''After all, people are people wherever they are.''

Wider use of condoms and better screening of blood used for transfusions are two steps that might help curb the tide of HIV infection in the Third World, Merson said.

Merson recently replaced another American and former Centers for Disease Control official, Dr. Johnathan Mann, as head of WHO's $100-million-a-year AIDS effort. Mann resigned abruptly in March in a policy dispute with WHO Director-General Hiroshi Nakajima of Japan.

SRINAGAR, INDIA (JUNE 12) UPI - The political party headed by the assassinated chief Moslem cleric of Kashmir filed a complaint with police Tuesday accusing the former state governor of ''hatching a criminal conspiracy'' that led to the slaying.

The Awami Action Committee filed the eight-page complaint with police blaming the central government, state government and former state governor Jagmohan for the assassination last month of Mirwaiz Moulvi Mohammed Farooq, the area's chief Moslem cleric.

Farooq, widely perceived to be a moderate on the issue of Kashmiri independence, was assassinated by three gunmen who came to his home seeking a meeting.

The killing triggered one of the worst days of violence in the state since a simmering 2-year-old independence movement flared into a full-fledged uprising against Indian rule in mid-January.

Following the assassination, Indian security forces opened fire on a crowd of angry mourners carrying Farooq's body through the streets of Srinagar. At least 65 people were killed in the incident.

The government blamed Kashmiri militants, who have been fighting for independence from India, for the assassination of the cleric, but the militants blamed the government. Jagmoham was recalled by New Delhi following the slaying.

In a complaint signed by party press secretary Mohammad Yaqoob, the Awami Action Committee accused the central government, state government and former state Gov. Jagmohan of ''hatching a criminal conspiracy resulting in the killing of Moulvi Farooq.''

The document urged police to investigate ''the criminal conspiracy hatched by the then-governor, Mr. Jagmohan, his administration and the central government about the assassination of (the) mirwaiz (preacher).''

The complaint asked for the truth to ''be unearthed and those responsible for such criminal conspiracy and the resultant assassination of Mirwaiz Moulvi Farooq to be traced and brought to book.''

The complaint came amid reports security forces killed two Kashmiri militants and arrested 20 others in two incidents Monday night, All India Radio and government sources said Tuesday.

At least 17 of those detained were arrested while trying to cross the border from Azzad, or Free, Kashmir in Pakistan to Jammu and Kashmir state in India.

State government sources said the 17 youths were carrying arms and ammunition and had received military training in Pakistan. Pakistan has repeatedly denied arming and training the militants but acknowledges its moral support for the uprising in Kashmir.

Also Tuesday, the outlawed Hizb ul Mujahideen organization appealed to residents not to travel in buses, saying they were planning attacks on public transportation in Srinagar and rural towns in the region.

In Srinagar, the summer capital of Jammu and Kashmir state, the security forces imposed a curfew in the old city to prevent a recurrence of Monday's violence in which a dozen clashes were reported in the city.

Witnesses said the army cordoned off areas under curfew in the old city and conducted house-to-house searches in about 20 different localities.

(JUNE 12) UPI - Firefighters are gearing up to spray foam on the Mega Borg today. Experts boarded the burning ship off Galveston, Texas, this morning for a closer look and found that fires are diminishing and the ship's temperature is dropping... possibly enough to use foam. Experts were holding off on the foam operation because they feared the chemicals and heat would combine to produce more explosions.

A fireworks factory in Colombus, Ohio, was rocked by a huge explosion today that reportedly was felt as far as eight miles away. Fire officials say they felt the blast across town. A second smaller blast occurred as they arrived to fight flames at the Mid South Fireworks plant. NO injuries or deaths are reported. All available fire crews... including volunteers... were called to the scene.

The Senate Select Committee on Ethics has begun its probe into alleged ethics violations by G-O-P Senator David Durenberger from Minnesota. The hearings will examine whether Durenberger used a book-publishing deal to sidestep limits on the amount of outside income that senators can earn. The committee's chairman said at the meeting's start that ''appropriate sanctions'' would be taken if Durenberger is found guilty.

Crews shoveled up globs of heavy fuel oil from the beaches of a Cape Cod island in a clean-up effort after a 617-foot cruise ship ran aground in heavy fog on Sunday. The Coast Guard found a three and one-half-mile-long band of oil along the shores of Naushon Island, Massachusetts. Coast Guard officials say divers will attempt to fix damaged tanks on the Bermuda Star today before removing the heavy grade oil from the vessel.

#90163u1373 06/12/1990 ~United Press International

KHARTOUM, SUDAN (JUNE 12) UPI - A senior official in the ruling military council warned citizens they might have to sacrifice food and health to further the war effort against southern rebels, the official Al Engaz Al Watani daily newspaper reported Tuesday.

A U.N. charitable organization, meanwhile, said a food distribution program to Sudan would be cut off next year.

Military Council deputy chairman Maj. Gen. Al Zubair Mohamed Salih said assistance had to be sent to armed forces units stationed in the south even as the government's quest for an end to the seven-year civil war continued.

''We might be forced to deprive our citizens of food, educational and health services ... because peace is a basic goal for which the revolution has erupted,'' the Al Engaz Al Watani newspaper quoted Salih as saying.

The statement seemed to point to a ''fight to the finish'' attitude and rule out an early peaceful solution to the bloody war which has pitted the largely Christian, black south against the Moslem north.

Sudan, among the most heavily-indebted and poorest African nations, officially spends about $1 million a day on the war effort.

The U.N. World Food Program organization announced in Khartoum Tuesday it planned to phase out its general food distribution to refugees in Sudan by the end of next year, when they are targeted to have reached food self-sufficiency.

The WFP has spent $364.5 million in Sudan since 1984 helping Ethiopian and Chadian refugees with emergency relief operations, settlement programs and income-generating projects.

#90163u1376 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - Richard Perle, a former assistant secretary of

defense in the Reagan administration, told a House panel Tuesday that President Bush displayed ''misplaced priorities and maladroit tactics'' at his recent summit with Soviet President Mikhail Gorbachev.

Perle, who is known for his hawkish views, said Bush erred by not coming away with deeper reductions in strategic arms or any cuts in conventional forces in Europe at a time when the Warsaw Pact is in a state of collapse.

The superpower leaders signed a statement nailing down the major elements of a strategic arms reduction treaty, known as START, which would lead to cuts of up to a third in the strategic nuclear stockpiles of both countries. The two sides also pledged to agree to a final treaty by year's end.

Perle told two subcommittees of the House Foreign Affairs Committee that the basic elements of the START treaty were proposed by Reagan in 1982 and added, ''Surely President Bush and President Gorbachev can do better in 1990 than it was possible for President Reagan even to imagine in 1982.''

''In this case, better means deeper cuts in strategic inventories,'' Perle said, calling Bush's agreement to the START statement and on a separate trade treaty ''a worrisome sign of misplaced priorities and maladroit tactics.''

Perle also faulted Bush for not getting results on ''key elements'' of the U.S. agenda - ''Soviet withdrawal of occupying troops from Eastern Europe, agreement to a unified Germany within NATO, an end to the suffocating blockade of Lithuania, movement toward a sharp reduction in conventional military forces and a start on the demilitarization of the Soviet economy.''

''The West would benefit from an agreement sharply reducing Soviet conventional military forces and military budgets. But Mr. Gorbachev would benefit more,'' said Perle, who is now a resident fellow at the American Enterprise Institute.

''Seldom have the interests of the East and West converged as clearly as they do now in bringing to fruition an agreement on cutting conventional forces and military budgets,'' he said.

#90163u1379 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - Congress will have to cut crop subsidy rates and look for other ways to save money, such as limiting the acreage eligible for subsidies, because of the worsening federal deficit, Agriculture Secretary Clayton Yeutter said Tuesday.

It was the first time since Congress began writing the new farm policy law that Yeutter suggested what should be done on sensitive issues such as the crop target prices. In the past, the administration only pointed to areas for Congress to consider in order to reduce the cost of the farm program.

''My hope was that we could freeze target prices over the life of the 1990 farm bill, as the House (Agriculture) Committee has proposed,'' Yeutter said in a letter to senators. ''However, the federal budget deficit has worsened.''

Two unpalatable choices are emerging, Yeutter said. The budget summit could mandate additional cuts in spending or the Gramm-Rudman balanced-budget law might impose a budget cut of 20 percent to 40 percent on the farm program, which ''would devastate many of our programs.''

The House Agriculture Committee has proposed a freeze on target prices with an eye to writing a farm bill that would cost about $53 billion, the amount of money that would be spent if there were no change in current law.

Yeutter's letter arrived on the day the Senate Agriculture Committee planned to begin work on crop support programs for the farm bill. The letter spoke strongly against higher loan rates. Midwestern Democrats on the panel have argued for higher loan rates and target prices as a way to protect farm income.

''It would seem desirable for the Congress and the administration to face the budget situation head on,'' Yeutter said.

''In agriculture, it would seem prudent to do so by adjusting both target prices and (acreage) payment bases, and-or targeting farm subsidies, rather than either triggering a sequester or placing the entire adjustment burden on payment acres as the House bill would do.''

At present, the House version of the farm bill includes a ''planting flexibility'' option in which farmers could give up crop support payments on up to 25 percent of their wheat, feed grains, cotton, rice and soybean land. In exchange, they could vary their mix of crops or experiment with new crops but would retain eligibility for payments in the future.

Some farm-state congressmen have said budget cuts could be accommodated by making ''flexibility'' mandatory but they expected only a small percentage of land would be ineligible for payments. Yeutter's letter hinted it could be a sizable percentage.

The Senate committee has been deadlocked for three weeks by a partisan disagreement over loan rates and target prices.

Chairman Patrick Leahy, D-Vt., tried to resolve it by suggesting a freeze

on wheat target prices and a system in which two loan rates would be offered. The higher one, however, would have to be paid off in cash while the lower - a continuation of current policy and the current rate - could be paid in cash or through forfeiture of the grain pledged as collateral.

WASHINGTON (JUNE 12) UPI - The White House refused comment Tuesday on a report of CIA involvement in the 1962 arrest of South African black nationalist Nelson Mandela, insisting his upcoming visit should focus on the future and not the past.

''We find no value in reviewing the 30-year-old history in this case,'' White House press secretary Marlin Fitzwater told reporters when asked about reports of a U.S. role in Mandela's arrest.

A testy and unusually defensive Fitzwater bristled at questions about whether the United States owes Mandela an explanation or apology and whether the issue will be raised when the recently released black leader arrives later this month for a U.S. tour.

''If you want to know what happened, ask Pierre Salinger, Ted Sorenson or Ted Kennedy,'' Fitzwater said later, ''but don't beat me up for what the Kennedy administration did.''

The Atlanta Journal-Constitution reported Sunday that the CIA provided South African aurthorities with the information used to locate and capture Mandela on April 5, 1962. He was tried on charges of sabotage and conspiracy to overthrow the government and kept in prison for 27 years.

South African President Frederik de Klerk ordered Mandela freed in February in what was welcomed by the United States as a step toward political reform and possible black-white conciliation in South Africa.

Mandela is scheduled to meet June 25 with President Bush as part of a hero's welcome to the United States. Fitzwater indicated the White House wants nothing to detract from the main purpose of honoring Mandela for his contribution to the fight against racism and apartheid.

''What Mr. Mandela is due is respect for the outstanding work that he has done, for his time and his service as a leader of the anti-apartheid movement and against racial prejudice in that country,'' Fitzwater said. ''And we intend to see that he is given all that credit that we possibly can.''

#90163u1426 06/12/1990 ~United Press International

CASSELBERRY, FLA. (JUNE 12) UPI - Kittens and bunnies beware: Gizzard the lizard, a rare, 3 1/2-foot South American lizard, has escaped from its cage and is on the loose.

The brown, black and gold lizard was last seen Saturday, the day after it escaped from its cage at the home of owner Gary Locker.

''He is kind of a grump,'' Locker said. ''If somebody sticks their fingers in his face, he'll bite. He'll definitely put a hurting on somebody.''

A police officer writing a traffic citation spotted Gizzard strolling down a street Saturday.

''He was walking very slowly. If a car had come, it would have been a dead lizard,'' said officer John Holton.

Locker said the 2-year-old lizard normally eats three rats a day.

''Right now, he's probably out eating rabbits, kittens if he can get them '' he said. ''He can take a kitten easy. The more he eats, the bigger he gets, and he won't stop eating.''

Vicky Hilburn, city animal control director, said Tuesday that there had been no reports of missing pets.

However, she said the city would investigate Locker after he told an officer he was trying to lure Gizzard home by putting a caged cat in his backyard.

Locker said the cat was Sabrina, his family's 5-year-old pet and that the lizard would not have been able to get to it inside the cage.

''It's too big for him anyway. That's a 28-pound cat,'' said Locker, 21.

Locker said he bought the golden tegu lizard for $300 from an Orlando pet store about two years ago.

#90163u1430 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - Increased loan loss provisions to cover domestic credit losses and soured Northeast real estate loans trimmed first-quarter bank profits by $1.1 billion from year-ago levels to $6.2 billion, the Federal Deposit Insurance Corp. reported Tuesday.

Banks set aside $2.2 billion during the quarter in the form of loan loss reserves. Nearly all of the increase, $1.7 billion, was reported by banks in the Northeast region, said FDIC Chairman L. William Seidman.

Loan charge offs - payments made against reserves - were about twice as high as year-ago levels, Seidman indicated.

Banks charged off about $2 billion more against reserves during the quarter than the year-earlier period to cover bad domestic real estate loans and losses from the Mexican debt restructing agreement reached through the Brady Plan to help ease the debt crisis facing third world nations.

''Foreign loans were the largest charge offs and that related substantially to the Mexican agreement,'' Seidman said.

For the first time in several years, the percentage of banks posting losses increased from year-earlier levels. Much of the decreased profitability was reported by banks in the Northest.

In the year-earlier quarter, banks earned a record $7.3 billion. This year's first quarter earnings performance of $6.2 billion follows earnings of $2.1 billion during the fourth quarter of 1989.

Seidman said the first quarter banking performance would resemble the record-setting year-earlier earnings if loan-loss provisions of $5.76 billion were not factored.

Assets growth remained slow during the quarter as total assets were reduced by $38 billion. For the 12-month period ended March 31, bank assets grew only 3.5 percent, the FDIC said.

Delinquent loan payments increased during the quarter from year-ago levels but showed improvement from the fourth quarter. Net interest income remained flat even though earning assets increased 3.7 percent.

Banks also reported sluggish demands for loans, other than for real estate. Real estate accounted for $75.5 billion, or 94 percent, of the net increase of $80.5 billion in first quarter loans.

Seidman said there is no evidence of a credit crunch in the commercial real estate industry overall, although there has been a decrease in development loans.

Banks in the Southeast region posted the highest growth rate in the nation during the quarter. Real estate lending there was second-highest behind only the West.

Arizona banks reported the highest concentration of non-current real estate loans at 11.18 percent, followed by Massachusetts, 9.22 percent; Connecticut, 7.04 percent; Texas, 6.76 percent and Rhode Island, 6.46 percent.

Continuing industy consolidation decreased the number of FDIC-insured

banks to less than 12,600 from 12,707. Thirty-six banks failed during the three-month period, compared to 64 failures in the year-earlier quarter.

Seidman said the industry's outlook remains mixed for the remainder of the year. Small banks are expected to show improvement, especially in the Midwest and Southwest, but without government assistance, there is no evidence of any strength among Texas banks.

Banks in the Northeast, though, are expected to continue to suffer problems with real estate lending.

-30- 3524

#90163u1433 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The Senate opened debate Tuesday on a bill to impose new logging restrictions and repeal costly federal timber subsidies in America's largest national forest - the rainy Tongass in Alaska.

The legislation grew out of criticism that special management mandated 10 years ago for the 16.7-million-acre forest has enriched the timber industry while placing an undue burden on taxpayers and the environment.

The bill before the Senate marks a compromise fashioned to win the grudging support of Alaska Sens. Ted Stevens and Frank Murkowski, both Republicans, who have resisted attempts to reform Tongass management for four years.

''I support this bill, but I do not like it,'' Murkowski told his colleagues on the Senate floor Tuesday.

Conservation groups prefer a much stronger House-passed version of the measure, which bars all commercial activity, including logging, on 1.8 million acres by designating that land as wilderness. About a third of the Tongass - or 5.4 million acres - already has been set aside as wilderness.

The Senate bill, by comparison, places just 673,000 additional acres of the forest off limits to timber harvesting, while allowing mining, hydropower developments and motorized recreation in those areas.

Stevens warned that if the more drastic House provisions prevail over the Senate in negotiations to reconcile differing versions of the legislation, ''I will be back on this floor to oppose this bill with every bit of my strength.''

Resolving the biggest point of contention facing the bill on the floor, the Senate agreed to strengthen a provision establishing logging-free buffer zones around rivers and streams in the Tongass to protect salmon runs and other fisheries.

The amendment, offered by Senate Energy Committee Chairman Bennett Johnston, D-La., would place buffer zones of 100 feet on either side of fish-spawning streams and their major tributaries. The House bill calls for buffer zones around virtually any stream in the forest.

The Tongass, covering most of Alaska's southeastern panhandle, is the largest of the nation's 155 national forests and the only temperate rain forest left nearly intact in the Northern Hemisphere.

A centerpiece of both the House and Senate bills is the repeal of a statutory requirement that the U.S. Forest Service make at least 450 million board feet of Tongass timber available for sale each year.

The measure also eliminates an automatic appropriation of $40 million to finance the construction of logging roads and other activities aimed at meeting the timber sale quota.

Both the automatic appropriation and the quota were established in 1980 with the intent of bolstering the economy of southeastern Alaska.

But critics have charged they amount to a forced-feeding of federal subsidies to cut far more timber than the government could reasonably expect to sell. Opponents of those subsidies say the government has lost $50 million a year on the Tongass.

The bill also directs the Forest Service to make specific unilateral changes to two 50-year logging contracts the government has awarded to companies that operate giant pulp mills in the forest. Those changes are aimed at protecting old-growth tree stands and keeping timber harvests at sustainable levels.

The House bill would terminate both 50-year contracts outright.

#90163u1449 06/12/1990 ~United Press International

HOUSTON (JUNE 12) UPI - A suspected burglar's alibi collapsed when he was confronted by something he left behind at the scene of the crime: a lock of hair blown from his scalp by the homeowner's 12-gauge shotgun.

Robert Jones, 26, pleaded guilty Monday to burglary and, as a repeat offender, was sentenced to 35 years in prison.

Prosecutor Suzanne Stanley said Jones crawled through a window at a woman's house on March 28, then let his two confederates inside.

The 45-year-old woman's dogs began barking and she called the 911 police

emergency number. She had her shotgun ready when Jones crept upstairs toward her bedroom.

''As the door opened, she fired through the door and hit him on the left side of the head,'' Stanley said.

The load of birdshot blasted away skin and hair from Jones's head, leaving the telltale curl stuck to a wall behind him. He and the confederates fled but were arrested soon after.

Jones insisted he had been shot in a park until police confronted him with the 3-inch curl.

#90163u1451 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The workers who helped build America's military might deserve more from the new peace than lost jobs and economically depressed communities, lawmakers said Tuesday.

''To the extent our country is successful in achieving reductions in the defense budget, there will be victims of this success among the communities, businesses, workers and professionals that worked in and supported our military establishment and our defense industrial base,'' said Rep. Mary Oakar, D-Ohio.

''They deserve more than being thrown out of work as the first consequence of a more peaceful world,'' Oakar said.

Oakar chairs the economic stabilization panel of the House Banking Finance and Urban Affairs Committee that is considering legislation to mitigate the economic repercussions of anticipated defense cuts in the wake of the Cold War meltdown.

''Not many generations are in a position to help in the realization of mankind's ancient dream that swords be beaten into plowshares,'' Oakar said. ''This subcommittee has such an opportunity.''

Legislation before the panel would provide about $200 million to assist communities, businesses and workers affected by base closings or lost defense contracts. The president's Economic Stabilization and Adjustment Council would direct the program, focusing on efforts such as employee retraining and plant transition to non-defense business.

Oakar cited reports showing that currently about 25 percent of all U.S. spending is related to national defense, but with anticipated cutbacks nearly 20,000 jobs already have been terminated or are threatened.

A study of the re-use of 100 Defense Department facilities between 1961 and 1986 showed employment rose an average of 48 percent after the transition to non-military use, she said.

''It is vital that we provide business with incentives and assistance to make the transition from defense to commercial, civilian production,'' said Rep. Sam Gejdenson, D-Conn., a co-sponsor of the bill whose district expects to be hard hit by defense cuts.

''Right now, all the incentives favor laying off the workers, selling the capital equipment, physical plant and valuable real estate and providing golden parachutes to the management,'' Gejdenson said.

#90163u1454 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - It's been open season on parking spaces in the Bronx since police officers in six precincts reportedly stopped writing parking tickets to protest an anti-corruption raid at one stationhouse.

''Tell anyone who wants to park to come up to the Bronx: If their car isn't stolen, they can park anywhere they want,'' one officer told the New York Post.

The six precincts began the protest last weekend in response to a May 7 anti-corruption sweep at one precinct headquarters, the Post said.

During the sweep, investigating officers reportedly pulled a gun on a desk lieutenant but uncovered no corruption, the Post said. A total of 69 officers were cited for minor rules infractions, such as failing to wear hats while on duty, the newspaper said.

The precincts involved generally account for more than half the 3,000 to 4,000 tickets issued in the Bronx on an average weekend.

The angry officers reportedly are also ''going by the book,'' taking only one radio-car assignment at a time, thus increasing backlogs and paperwork for precinct officials.

#90163u1478 06/12/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JUNE 12) UPI - Police in the nominally self-governing KwaZulu black homeland Tuesday shot and killed four youths they claimed attacked them in a district of strife-torn Natal province.

In a separate incident, police said they fatally shot a man in a Cape township during overnight rioting while dispersing a group stoning a

township official's house.

Factional violence has claimed four other lives in Natal's virtual Zulu civil war since Monday. Police said a church minister was shot in the head by an unknown attacker at Nhlalkhahle township and three civilians were stabbed by ''a group'' at Imbali.

KwaZulu police spokesman Capt. Kwaze Nene, describing the death of the four youths, said a patrol was fired on by a group of young protesters near Umlazi, just south of the Indian Ocean port city of Durban, while investigating the shooting death of a policeman at his home Friday.

The police, unscathed, retaliated by shooting the four but made no arrests the spokesman said.

Battles in Natal between Zulu supporters of the African National Congress and the conservative Inkatha movement have claimed more than 3,000 lives since 1987, and South African police and their homeland affiliates have conceded they are helpless to stop the turmoil.

ANC supporters say KwaZulu police discriminate against them and last month called for the force to be disbanded.

Troops have occupied the troubled areas, but anti-apartheid activists say their presence exacerbates tension.

The Zulu fighting is centered on the KwaZulu homeland, one of 10 regions nationwide where Pretoria has given the residents a mild form of self-government as part of its ''grand apartheid'' plan to segregate black tribes as well as blacks from whites.

The ANC accuses Chief of KwaZulu and Inkatha President Mangosuthu Buthelezi of being a government mouthpiece by resisting trade sanctions aimed at ending white minority rule, and charges he foments the Natal violence to consolidate his position.

Buthelezi denies the allegations and accuses black nationalist leader Nelson Mandela of stirring up resentment against him as a perceived rival for power.

WASHINGTON (JUNE 12) UPI - More Americans repaid their debts on time during the first quarter as the nation's banks posted the second consecutive quarterly decline in consumer credit delinquencies, the American Bankers Association said Tuesday.

The association's delinquency ratio on seven types of closed-end installment loans was 2.46 percent at the end of the quarter, an improvement from 2.64 percent at the end of the fourth quarter of 1989 but slightly higher than year-ago levels.

Robert Dugger, the association's economist, said consumers appear to be ''holding their own'' despite the softening economy.

''Overall, they've become cautious about new spending, and have strived to catch up with their current obligations,'' Dugger said.

According to the Federal Reserve, outstanding consumer credit totaled $716 billion at the end of April.

Delinquencies on home equity loans, which the association uses as a measure of consumer financial health, inched upward slightly during the quarter to .79 percent from 0.78 percent in the fourth quarter.

Home equity loans had the lowest delinquency ratio while personal loans had the highest at 3.37 percent.

A loan is considered overdue if a payment is 30 days late.

On a state-by-state basis, the lowest delinquency ratios were reported by Nebraska, 1.15 percent; Wisconsin, 1.23 percent; and Arizona, 1.26 percent.

#90163u1503 06/12/1990 ~United Press International

LONDON (JUNE 12) UPI - Stock prices closed broadly higher Tuesday on the London International stock exchange amid speculation that Britain plans to fully join the exchange-rate mechanism of the European Monetary System.

The broad-based Financial Times 100-stock index, which fell 17.8 points Monday, closed up 21.9 points to 2,370.7. The narrower top 30 industrial average gained 23.1 points to 1,901.0.

An estimated 430 million shares were traded, well above the 375 million shares that changed hands on Monday.

Analysts said prices were boosted by reports the government was proposing to join the exchange-rate mechanism in the fourth quarter.

According to a report in Tuesday's edition of the Financial Times, British treasury officials decided recently that, despite the current climb in the country's retail price index, underlying inflation will be low enough later this year to allow the pound to become part of the EMS exchange-rate mechanism.

An inflation level at roughly a comparable level to the European Community average is the last remaining condition set out by Prime Minister Margaret Thatcher for entry into the mechanism, analysts said.

Analysts said the market ignored announcements by government officials that the report was pure speculation and remained convinced the link-up would take place before the end of the year.

In Britain, it is hoped that full membership in the exchange-rate mechanism will stabilize the British pound and bring down inflation and cut interest rates.

On the trading floor, hopes of interest rate cuts stimulated the construction sector.

Mowlem gained 11 cents to $5.28, and Tilbury jumped 43 cents to $9.60 in response to the taking of a 14 percent stake in the company by Philip Holzman.

In the electricals sector, Cable & Wireless, which is expected to report higher earnings Wednesday, gained 19 cents to $8.91.

Cambridge Electronics advanced 17 cents to $2.83 after announcing the company gained $59.5 million from a series of disposals.

Among some of the day's other highlights, Fison slipped 17 cents to $5.69 after Tilade, its respiratory drug, was given a rough ride by an advisory committee to the Food and Drug Administration in the United States.

Elsewhere in Europe, stock prices on the Frankfurt Stock Exchange closed lower in light trading.

The closely watched German Stock Index, which lost 12.51 points on Monday, retreated 9.30 points to 1,800.36, its lowest close since the last day of trading of 1989.

#90163u1507 06/12/1990 ~United Press International

GENEVA (JUNE 12) UPI - Poland appealed Tuesday for international aid in fighting industrial pollution, saying it had reached ''the highest levels of ecological danger'' and was impossible to handle on its own.

''Degradation of the environment has reached dramatic proportions,'' Premier Tadeusz Mazowiecki told the annual assembly of the International Labor Organization.

''The Polish government is doing what it can but any significant improvement is far beyond Poland's current capabilities,'' he told the 2,000 delegates at the U.N. agency meeting.

Poland, along with its neighbors Czechoslovakia and East Germany, has one of the world's ''highest levels of ecological danger'' with poisoned air and waters, Mazowiecki conceded.

His country also urgently needs aid in overcoming ''the painful consequences'' of restructuring, he said, with unemployment likely to rise from the current three percent to 10 percent by year's end.

#90163u1518 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - The CBS News program ''48 Hours'' made the top 10 for the first time last week - one of two CBS News shows in that elite group - as NBC won the ratings race but CBS edged out ABC for No. 2, it was reported Tuesday.

Missing from the top 10 was ABC's ''America's Funniest Home Videos,'' which was in a four-way tie for 15th place. The show was competing against regular programming and did win its time period.

Fox's ''The Simpsons'' also dropped out of the top 10, after becoming the first Fox show ever to earn that distinction the previous week. ''The Simpsons'' has been said to benefit from an audience switchover from ''Home Videos,'' but last week it outranked the earlier show, finishing in 13th place.

The winning ''48 Hours,'' which ranked 10th, joined ''60 Minutes,'' tied for seventh on the Nielsen list. It was a special outing for the show - at 10-11 p.m. Eastern time on Wednesday - and it told the moving story of a missing child in ''The Search for Matthew.''

The big difference for ''48 Hours'' was not having to compete against ''The Cosby Show'' and ''A Different World'' on NBC. The regular ''48 Hours'' program on Thursday night finished in a tie for 58th.

The best ''48 Hours'' has done in the past is rank 12th with its program on Hurricane Gilbert in September 1988 - but it still was second in its time period against ''Cosby.''

In the fall, the show will move to a new time period, away from Big Bill, but the competition won't exactly be chopped liver. ''48 Hours'' is scheduled to move to Saturday nights at 10, where it will compete with ''Twin Peaks'' on ABC and ''Carol & Company'' and Robert Urich's new ''American Dreamer'' on NBC.

It was a pretty good week for ABC News shows, too, with ''20/20'' in 14th place and ''PrimeTime Live'' tied for 28th.

The Sunday movie contest went to CBS, which tied for 15th with ''Trouble in Paradise.'' NBC's showing of ''Gremlins'' tied for 33rd, while ABC's ''Prizzi's Honor'' tied for 63rd.

On a night-by-night basis, NBC took Wednesday, Thursday and Saturday, CBS was champ on Monday and Sunday and ABC held Tuesday and Friday.

NBC won the week ending June 10 with a 10.8 rating and a 20 share. CBS edged out ABC for second with a 9.8 rating and a 19 share, while ABC had a 9.7 rating and an 18 share.

The official 30-week prime time season ended Sunday, April 15, but working on a 52-week season, as of the week ending June 10 NBC had a year-to-date rating of 14.0 and a 23 share. ABC was second with a 12.5 rating and a 21 share and CBS third, with an 11.8 rating and a 20 share.

In the evening news race, ABC's ''World News Tonight'' with Peter Jennings remained a dominant No. 1 with a 9.5 rating and a 21 share. ''CBS Evening News'' with Dan Rather held second with a 7.7 rating and a 17 share, while ''NBC Nightly News'' with Tom Brokaw with third with a 7.4 rating and a 17 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 programs for the week ending Sunday, June 10, according to the A.C. Nielsen Co., were:

1. Roseanne (ABC)
2. Cheers (NBC)
3. (tie) The Cosby Show (NBC)
   Designing Women (CBS)
5. Unsolved Mysteries (NBC)
6. A Different World (NBC)
7. (tie) 60 Minutes (CBS)
   Seinfeld (NBC)
9. Coach (ABC)
10. 48 Hours: The Search for Matthew (CBS)

#90163u1520 06/12/1990 ~United Press International

PITTSBURGH (JUNE 12) UPI - Bob Johnson, the former college coach who led the Calgary Flames to the Stanley Cup finals in 1986, Tuesday was named

coach of the Pittsburgh Penguins.

The Penguins, who failed to reach the playoffs last season, also appointed Scotty Bowman, the NHL's winningest coach, as director of player development and recruitment.

The moves come four days before Saturday's NHL draft in Vancouver, British Columbia, in which the Penguins will have the fifth selection.

Johnson takes over for Craig Patrick, who acted as coach and general manager after last season's firing of Coach Gene Ubriaco and General Manager Tony Esposito. Patrick remains as general manager.

Johnson, 59, won three NCAA championships at Wisconsin before guiding the Flames to the Stanley Cup finals against Montreal four years ago. Since 1987 he has been executive director of USA Hockey, which runs the U.S. Olympic hockey program.

Bowman, 56, earned a reputation as one of hockey's finest talent evaluators of while general manager of the Buffalo Sabres. He was fired during the 1986-87 season and has spent the last three years as a hockey commentator.

#90163u1521 06/12/1990 ~United Press International

SOFIA, BULGARIA (JUNE 12) UPI - Opposition supporters occupied a university building and called for new protests Tuesday as official election results confirmed a communist victory in Bulgaria's first free balloting in four decades.

Repeating charges that the vote was manipulated, the Union of Democratic Forces vowed to wage a tough fight for at least 63 parliamentary seats that will be decided in a run-off election Sunday.

''For 45 years Bulgarians have been waiting ... for democracy,'' said Cristo Petrov, spokesman for a group of about 300 students who occupied a building at Sofia's main university campus in the early morning hours.

Petrov said student activists were planning to form a human chain around the National Assembly building later in the day. He said protests would continue until the government addresses opposition concerns about the fairness of the elections.

International observers have pronounced Sunday's balloting fair, although some said elderly and rural voters may have been influenced by an atmosphere of fear after more than 40 years of totalitarian rule.

Two days after computer projections pointed to a decisive victory for the ruling Bulgarian Socialist Party, election officials released the first official results showing the communists won more than half the 116 seats allocated so far in individual constituency races.

Election Commission President Dimiter Popov said the BSP captured 72 seats, or 61 percent, compared with 32 seats, or 29 percent, for the opposition.

Twelve seats were won by smaller parties, and the results in 73 other individual races were declared inconclusive and will be decided in a runoff election Sunday, Popov said. The results in the five remaining constituencies were not clear.

Popov did not release results for 200 other seats that are allocated on a proportional basis. But computer projections by INFAS, a polling organization, indicated the communists would win 99 of those seats.

The official results indicated Bulgaria was on its way to becoming the only Eastern European country to return a ruling communist party to power since democracy swept the region last year.

Election officials said the opposition won all 18 parliamentary seats up for election Sunday in Sofia. The communists and UDF will compete for the eight remaining districts in the capital in next week's runoff.

Among several prominent communists who will be forced to compete in the runoff is Prime Minister Andrei Lukanov, Popov said.

Bulgarian voters Sunday cast two ballots - one for individual candidates in local constituency races and the other for party preference. A runoff between the two leading candidates will be held in districts where no one won an absolute majority in the first round.

Election officials said the opposition won all 18 parliamentary seats allocated by party preference in Sofia.

The UDF, which has vowed to be a strong contender in at least 63 districts where it will compete on Sunday, won a key endorsement Tuesday with a declaration of support from the Bulgarian Agrarian Party. The former communist ally won about 8 percent of the overall vote in the first round, according to computer projections.

''As an independent opposition party that has decisively declared itself for democratization of the life of the country, the Agrarian Party appeals to all its members ... to support the candidate of the UDF,'' the Agrarians said in a statement.

The release of computer projections suggesting a communist victory sparked

demonstrations Monday by tens of thousands of people in Sofia, where the UDF is strongest.

Fired up by opposition allegations that the vote was manipulated, about 15,000 demonstrators besieged the sprawling Palace of Culture building where the results were being processed.

''New elections,'' and ''The Communist Party is mafia,'' the crowds chanted.

UDF leader Zhelyu Zhelev, implicitly accepting the projections as valid, told demonstrators his party would be a ''strong opposition'' and would never join a coalition government with the communists.

The ruling party dropped the name ''communist'' in April and recast itself as Social Democrats in an effort to distance the party from 44 years of totalitarianism.

#90163u1525 06/12/1990 ~United Press International

BRUSSELS (JUNE 12) UPI - The European Community on Wednesday will adopt strict consumer-protection rules on travel packages to prevent heartbreaking holiday surprises, officials said.

The regulations will be adopted in the form of a directive, which requires all 12 EC countries to adopt enabling legislation.

In addition to protecting EC citizens, officials said, the new rules will ''attract tourists from outside the Community seeking the advantages of guaranteed standards in packages.''

''Tour operators must make sure tourists are not dumped into some unfinished hotel in Spain,'' said one EC diplomat.

The rules will be adopted, probably without further debate, by the EC Consumer Affairs Council at its meeting Wednesday in Luxembourg, EC officials said.

Issues such as a traveler's rights to cancel a tour contract and an operator's right to alter terms were resolved earlier this year in EC bargaining sessions.

The new rules require package-travel brochures to indicate in a ''legible, comprehensive and accurate manner'' the price, itinerary, meal plan and type of accomodation, including the ''category or degree of comfort.''

Consumers unable to take a holiday they have already booked with a tour

operator are granted the right to transfer their bookings to someone else after notifying the tour operator.

Prices in the tour agreement cannot be revised unless the contract specifically provides for adjustment due to changes in exchange rates, taxes or transportation costs, including fuel. No price increases are allowed within 20 days of departure. Travelers can cancel without penalty if the tour operator ''significantly'' alters any of the essential terms, including price.

If the operator cancels the package before the departure date, the consumer can either take a substitute package or ''be repaid as soon as possible all sums paid.''

The consumer is also entitled to compensation, unless the minimum number required for the tour is not reached or cancellation is due to ''unusual and unforeseeable circumstances beyond the (operator's) control.''

The rules apply only to package travel, and do not include a travel agent's joint booking of airfare and a hotel room if not part of a prearranged package.

#90163u1566 06/12/1990 ~United Press International

CAIRO (JUNE 12) UPI - The United Arab Emirates has kept its promise to cut daily oil output by 200,000 barrels as part of an effort by the OPEC cartel to firm up world prices, the nation's oil minister said Tuesday.

Oil minister Mena Saeed Otaiba said his country had reduced output from 2.1 million barrels a day to 1.9 million barrels a day since May.

The UAE had promised such a cutback during an emergency meeting of the 13-member Organization of Petroleum Exporting Countries in Geneva early last month, but U.S. industry sources said it had failed to make good on the promise in May.

Overproduction in particular by the UAE and Kuwait beyond their OPEC limits has led to the current world glut of world crude oil and a concurrent decline of world oil prices.

OPEC pumps more than a third of the world's crude oil and attempts to support prices by limiting the cartel's output.

Otaiba's remarks followed reports that Saudi Arabia, the world's largest crude exporter, had reduced prices to Far East clients in order to regain OPEC market share from other cartel members, such as the UAE and Kuwait.

The reports said the Saudis had also turned on the taps as a way of putting pressure on overproducers to stick by their quotas. Saudi Arabia denied it had raised production above its daily quota of 5.38 million barrels.

''OPEC members should abide by their individual quotas. ... The United Arab Emirates for its part has reduced output from 2.1 million barrels a day to 1.9 million barrels a day since OPEC's May 4 accord in Geneva,'' Otaiba told reporters after talks with his Egyptian counterpart, Abdel Hadi Qandil.

The UAE refused to accept a quota at OPEC's last regularly scheduled meeting of oil ministers in November.

As a result, the cartel set its daily quota at 1.09 million barrels, virtually the same as its June limit of 1.04 million barrels.

Qandil said Egypt, which is not a member of OPEC, also reduced crude output slightly.

''Egypt has reduced its crude production from 900,000 barrels a day to 870,000 barrels a day and at times over the past three years the level has dropped to 850,000 barrels a day,'' Qandil said.

Otaiba also blamed the worldwide glut of crude on a ''lack of far-sightedness'' on the part of consuming nations.

''The current surplus on the world market came as a result of both a lack of far-sightedness on the part of the consuming partners, and the non-implementation of accords reached in Geneva,'' he said.

The UAE oil minister, who said in a recently published bood that the OPEC quota system should be eventually abolished, also called for greater cooperation between cartel members and outside producers if prices are to be stabilized near the $18-a-barrel average target price for seven Mideast crudes.

#90163u1585 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - Ron Kaufman, an aide and campaign operative to President Bush, received a vote of confidence from the White House Tuesday in his defense against Democratic charges of political dirty tricks.

White House press secretary Marlin Fitzwater said administration oficials saw no need to look further into allegations by Massachusetts Democrats that Kaufman arranged a police picket that marred their June 2 state convention.

''He says there's nothing to it,'' Fitzwater told reporters. ''I don't think we have any other comment on it, but we take Ron's word on it.''

Kaufman, a longtime Masschusetts GOP operative and thorn in the side of Massachusetts Gov. Michael Dukakis, has denied having had anything to do with the June 2 picketing while saying the four-hour delay it caused ''was fun.''

Kaufman, who helps dole out administration political jobs as deputy director of the Office of Presidential Personnel, served as Northeast coordinator of the Bush campaign in 1988 and played a role in having two Massachusetts police unions endorse Bush over Dukakis in the 1988 presidential campaign.

#90163u1588 06/12/1990 ~United Press International

(JUNE 12) UPI - Authorities in Columbus, Mississippi, say at least two people were killed today when a series of explosions ripped through a rural fireworks factory. Captain Ricky Graves of the Columbus Fire Department says the first blast was follwed by several less-powerful explosions. The blast could be felt in downtown Columbus, 15 miles to the north. Emergency crews, fearing more explosions, evacuated a four-mile area around the factory.

Coast Guard officials in Galveston, Texas, say the fire in the pump room of the oil tanker Mega Borg is now out. Coast Guard Captain Thomas Greene says the ship's steel superstructure has been cooling, which means firefighters are closer to being able to use foam to contain the flames still burning in the ship's crew quarters. The tanker is 57 miles southeast of Galveston in the Gulf of Mexico, where it's been burning since an explosion Saturday killed two crew members and left two others missing.

Also today, legal experts are questioning who will be responsible for cleaning up the mess resulting from the tanker fires. There are a lot of factors in the equation- it's a Norwegian vessel carrying French oil in international waters from a port in Angola. Experts say assessing the blame for the disaster could take months.

There's new hope for a compromise on Baltic independence. Soviet President Gorbachev is meeting in Moscow today with leaders of rebellious Lithuania, Estonia and Latvia. New Russian Republic President Boris Yeltsin is also attending the session. Earlier today, the Russian republic's legislature passed a radical declaration of independence from Moscow.

#90163u1592 06/12/1990 ~United Press International
WASHINGTON (JUNE 12) UPI - Secretary of State James Baker, weighing a decision to end U.S. dialogue with the Palestine Liberation Organization, told a Senate committee Tuesday that an ''extraordinary number of friendly countries'' have urged him to avoid an abrupt end to the talks.

In testimony before the Senate Foreign Relations Committee, Baker said he was ''hopeful, but not optimistic'' that the PLO would come back with the right responses to permit the dialogue with the United States to continue.

Baker said the U.S. ambassador told the PLO representative in Tunis May 31 that the United States wants three things from the PLO in the wake of the abortive speedboat attack on a breachfront near Tel Aviv last month: a condemnation of the attack, a disassociation of the PLO leadership from the act and ''to begin to take steps'' to discipline Abul Abbas ''to show that the PLO doesn't countenance such acts.''

Abul Abbas, leader of a splinter Palestinian group, has claimed to have planned and ordered the carrying out of the attack. He is an elected member of the Palestine National Executive Council, one of the PLO's ruling bodies.

PLO Chairman Yasser Arafat made a general statement Monday, disapproving of attacks on civilians. The State Department and the White House described the statement, which made no specific reference to the Tel Aviv attack, as ''disappointing.''

Baker, reflecting the importance of the decision on the possibility of moving foward with the Middle East peace process, carefully read a prepared answer from a sheet of paper when he was asked about the PLO matter.

He said ''an extraordinary number of friendly countries and allies,'' including European countries, said ''they were concerned about the peace process'' and the negative effect that breaking off the PLO dialogue would have.

Baker said, ''The issue is very serious and important'' and he wanted to weigh the decision ''carefully without artificial deadlines.'' Baker has come under pressure from Israel and members of the Senate to break off the PLO dialogue on grounds that the Tel Aviv attack represented a breaking of the 1988 PLO pledge to abstain from terrorism.

He continued, ''I will not allow our devotion to the peace process to undercut our commitment to the fight against terrorism.''

The committee appearance was designed to give Baker a chance to review the

results of the May 30-June 3 superpower summit.

The administration was uniformly praised by Democratic members of the committee for its accomplishments, including progress on a strategic arms reduction treaty.

The harshest criticism of the summit results came from Sen. Jesse Helms, R-N.C., who cast doubt on Soviet President Mikhail Gorbachev's image as ''a man of peace.''

Helms pointed out that Gorbachev ordered major attacks on Afghanistan and on Angola, continues to sell arms to Cuba, including advanced fighter-bombers, and ordered the building of new types of strategic weapons in the last five years.

Baker, without responding directly to Helms, said that the dramatic shifts toward democracy in Eastern Europe could not have taken place without the tacit permission of the Soviet Union. And, he said, that Soviet policy would not have taken place without Gorbachev.

He described Gorbachev as a political leader with great political and economic difficulties, but he said he thought the decisions at the Washington summit may have strengthened Gorbachev's position within the Kremlin.

#90163u1599 06/12/1990 ~United Press International

(JUNE 12) UPI - Diplomats say peace talks began today between Liberia's government and rebel leaders, with both sides rejecting the other's conditions for a truce. A rebel delegation arrived in Freetown, Sierra Leone , demanding immediate resignations from Liberian President Samuel Doe and his government. The talks aimed at ending a six-month civil war in Liberia are being held in the neighboring African nation of Sierra Leone as a neutral site.

Voters in Algeria went to the polls today in municipal and provincial elections... the first multi-party contest since the North African nation won independence from France in 1962. The ruling National Liberation Front newspaper urged voters to cast what it called ''a responsible vote against adventurism,'' apparently referring to policies of the opposition fundamentalist Islamic Salvation Front.

An Oklahoma woman wants the man who attacked her to know that she tested positive for AIDS. The 22-year-old woman says she told Tulsa police the name of a man who attacked her April 19th, but he has NOT been arrested, charged or informed that he might have been exposed to the deadly illness. Police say they can NOT legally inform the man that he might have been

exposed to AIDS without first seeing the victim's medical records.

-30- 1448

#90163u1602 06/12/1990 ~United Press International

GALVESTON, TEXAS (JUNE 12) UPI - Fire aboard the tanker Mega Borg dwindled Tuesday, raising hopes it can be extinguished with chemical foam, preventing a spill of the vessel's cargo of 38 million barrels of light crude oil into the Gulf of Mexico.

Coast Guard Capt. Thomas Greene told a midday news briefing the fire had gone out in the ship's pump room and on the waters surrounding the giant tanker 57 miles southeast of Galveston, aiding efforts by six fireboats and dozens of firefighters.

Fire was still burning in the below-decks engine room and in the crew quarters in the superstructure that rises above the stern deck, and a steady plume of black smoke poured into the air. Greene said, however, that the smoke was not as black as it as been since the fire started with an explosion in the Norwegian vessel's engine room at 1 a.m. Saturday.

''The fire in the pump room is out,'' Greene said. ''It has been since at least 6 a.m. The steel of the superstructure is cooler. They're getting closer to the point where they can use foam.''

Greene said the flow of flaming crude oil over the ship's stern and into the water had ended, and that the oil still on the water had stopped burning. ''But that's also bad news because that increases the amount of pollution,'' he added.

Four of the fireboats kept steady streams of water flowing onto 200 feet of the stern of the 853-foot ship to suppress the flames and help keep the steel plates cool. Coast Guard Petty Officer Gene Maestas said the hull of the tanker was intact, though a few plates on the deck had warped from the heat.

''There's no evidence at all of any buckling or any structural damage at this time,'' Maestas said.

Greene said eight oil skimmers working on patches of crude oil that have drifted downwind from the boat in a westerly and northwesterly direction toward the Texas coast have recovered about 13,000 gallons. No pollution has reached the coast, and officials said they believe they can extinguish the fire and stop the crude oil leaks before any does.

An estimated 100,000 gallons of crude have leaked since the tanker caught fire, but much of that has burned and much of it has evaporated on its own.

Another dose of chemical dispersants was dropped on the oil slicks Tuesday morning, assisting the oil to break up and evaporate. Some 50 percent of the light crude oil, as opposed to heavy crude oil, evaporates away in the sun and heat in 24 hours.

''At this point I'm encouraged by the progress that has been made, but we're still not out of the woods,'' Greene said. ''There's still potential for a major problem, a major release (of oil). We're still not completely safe from a major release until the fire is out.''

Greene said he was hopeful the 100 tons of chemical foam stockpiled on fireboats around the tanker will be applied Tuesday. He said the foam would be the final snuffing agent for the flames and allow crews to enter the tanker, find the crude oil leaks and plug them.

Two crewmen were killed and two were missing and presumed dead following the explosion early Saturday. Seventeen of the 41 crewmen aboard suffered non-serious injuries, but there have been no injuries since.

Once the fire has been put out, Greene said, workers from Smit American Salvage Inc. - the private firefighting and salvage firm the ship's Norwegian owners hired - will redistribute the crude oil and water ballast among the tanker's 16 cargo storage compartments to bring the tanker back on an even keel. It will be then, he said, that the cargo will be pumped into smaller tankers pulled alongside for transport up the Galveston Ship Channel.

The ship currently is listing slightly to port, with its bow up and its stern awash.

Greene said the chances that one of the 16 cargo compartments was punctured grew slimmer Tuesday. Salvage experts now believe, he said, that the crude oil leak may be coming from damaged piping or from open or damaged valves that could not be closed because of the proximity to the fire.

If the fire is not extinguished, Greene said, it ''could burn for months '' similar to the tanker Burmah Agate, which collided with a freighter 4 1/2 miles offshore in Galveston Bay in 1979.

Thirty-two people died in that accident and an estimated 10.7 million gallons of oil spilled or were consumed in a fire that burned for 69 days.

If the Mega Borg were to sink or break apart it could create a catastrophic oil spill, said Texas Land Commissioner Garry Mauro.

''This is our worst nightmare,'' he said. ''We're not ready to deal with a catastrophic oil spill off the coast.''

-30- 4894
#90163u1625 06/12/1990 ~United Press International
ALGIERS, ALGERIA (JUNE 12) UPI - Algerians voted Tuesday in municipal and provincial elections that marked the first multi-party political contest in the North African nation since it won independence from France in 1962.

The Interior Ministry said 23.1 percent of the electorate of 12.9 million voters - a little more than half the population - had cast their votes by noon.

Political observers said they expected the ruling National Liberation Front to finish first with 40 percent of the vote, followed closely by the Islamic Salvation Front, which was expected to get up to 35 percent.

First results were expected late Tuesday.

Green trucks provided by the government ferried voters to polling booths and riot police stood by at strategic points, but no incidents were reported.

The atmosphere at several polling stations in the capital was festive.

''I am voting for the good Lord,'' an elderly woman supporting the Moslem fundamentalist Islamic Salvation Front said at a polling station in the teeming working class district of Bab el Oued.

A fundamentalist militant wearing white robes and dark glasses and sporting a bushy beard said there had been no evidence of irregularities at Bab el Oued, where tens of thousands live in corrugated iron structures or dilapidated tenement buildings and youth unemployment is as high as 50 percent.

''Everything is beautiful,'' he said.

On a nearby street, a green Islamic Salvation banner hanging between lamp posts declared: ''Our only wealth is our faith in God.''

The ruling Front newspaper ''El Moudjahid,'' The Guerrilla, called for ''a responsible vote against adventurism'' in an evident reference to the fundamentalist movement, which wants Algeria to become an Islamic state.

Several parties are boycotting the elections on grounds they are weighted too heavily in favor of the National Liberation Front and the Islamic Salvation Front.

''The National Liberation Front are vampires sucking the blood of the

nation,'' said a young militant of the Front of Socialist Forces, a leading opposition group that decided to boycott the contest.

''In this neighborhood, there is only a choice between the Islamic Salvation Front and the National Liberation Front. We would contest presidential elections but these polls will not change anything. The FLN will remain in power.''

The elections for the municipal and provincial councils Tuesday was seen as an important test for national legislative elections scheduled for 1992.

Political experts said fears of a fundamentalist victory that would challenge the authority of President Chadli Bendjedid's government evidently receded in the final days of campaigning that officially ended June 4.

Bendjedid pledged a multi-party system under reforms introduced after riots against government austerity measures erupted in Algiers and other cities in October 1988. Troops fired on the rioters and at least 200 people were killed.

Tuesday's elections constitute the first multi-party balloting since 1962, when the FLN finally wrested independence from France after a war of liberation that began in 1954.

The FLN has managed to stage street demonstrations at least as large as those of the fundamentalists. The marches were a litmus test in the fledgling Algerian political world where there are no opinion polls, the state controls the main newspapers and media, and only the two largest parties had sufficient funds to publish simple posters and pamphlets.

Algiers was quiet Monday. Streets were plastered with fundamentalist posters featuring the numeral ''6,'' the ruling party's slate number.

Nevertheless, Algeria watchers said street disturbances could break out in working-class neighborhoods of the city if the fundamentalists fare worse than they expect and think the outcome may have been rigged.

There has been some speculation in diplomatic circles that the Soviet-trained army officer corps might try to stage a takeover if the experiment in democracy leads to widespread unrest.

The last Algerian experience in multi-party voting was during elections before independence, when Algeria had the status of a metropolitan department of the French republic and elected deputies to the National Assembly in Paris.

SAO PAULO, BRAZIL (JUNE 12) UPI - More than 100,000 Sao Paulo workers and professionals struck for pay increases Tuesday, lashing out at an economic austerity plan that has brought layoffs and recession.

Though a general strike planned for Tuesday was called off, thousands of metalworkers, judges, policemen, bank tellers, professors, and electrical workers stayed out of work in what the Central Workers Union called the "National Day of Unions Fighting" against the official economic policy.

An anti-inflationary economic program ordered by President Fernando Collor de Mello March 16 included, among other measures, a freeze on wage increases. Since then, the cost of living has risen more than 12 percent.

A report released Monday by the powerful Federation of Industries of the State of Sao Paulo said industrial managers fired 47,447 workers in May, amounting to a 2.38 percent fall in the employment rate, the largest drop since the recession of 1981.

Industries have fired 107,243 workers since the economic plan was put in effect in March, representing a 5.22 percent drop in the employment level, the report said.

Among those striking Tuesday were 90,000 metal workers in seven cities around metropolitan Sao Paulo, 8,000 employees at the BiNational Itaipu Hydroelectric Plant on the Paraguayan border and 9,700 workers of the central electric company.

In the city of Sao Paulo, judges continued a 36-day-old strike, civil police agents extended a nearly week-old strike, private bank workers stayed out of work and government bankers called an hour-long halt in financial dealings.

#90163u1649 06/12/1990 ~United Press International

LUXEMBOURG (JUNE 12) UPI - If this is Wednesday, it must be Luxembourg, where the European Community is to pass consumer protection rules to protect unwary tourists from seedy European package tours.

The regulations are scheduled to be adopted Wednesday, probably without further debate, by the EC Consumer Affairs Council.

The aim is to safeguard tourists from disastrous trips to surprise destinations, from fifth-rate hotels and restaurants, and from running up costs they hadn't reckoned with when they made their reservations.

''Tour operators must make sure tourists are not dumped into some unfinished hotel in Spain,'' one EC diplomat said.

The new rules appear to apply to tour operators in Europe, and would not govern U.S. companies that arrange European tours.

The regulations require package-travel brochures to indicate in a ''legible, comprehensive and accurate manner'' the price, itinerary, meal plan and type of accommodation, including the ''category or degree of comfort,'' an EC official said.

Travelers will be able to cancel their trips without penalty if the tour operator ''significantly'' alters any of the essential terms, including price.

The rules say prices in tour agreements cannot be revised unless the contract specifically provides for adjustment due to changes in exchange rates, taxes or transportation costs, including fuel. No price increases will be allowed within 20 days of departure.

If the operator cancels the package before the departure date, the consumer can either take a substitute package or ''be repaid as soon as possible, all sums paid.''

The rules would also allow consumers to get their money back if the minimum number required for the tour is not reached or cancellation is due to ''unusual and unforeseeable circumstances beyond the (operator's) control.''

Consumers unable to take a holiday they have already booked with a tour operator are granted the right to transfer their bookings to another operator after notifying the tour operator.

The EC Consumer Affairs Council regulations are being adopted in the form of a directive, which requires all 12 EC countries to adopt enabling legislation.

In addition to protecting EC citizens, officials say, the new rules will ''attract tourists from outside the community seeking the advantages of guaranteed standards in packages.''

The rules apply only to package travel and do not include a travel agent's joint booking of airfare and a hotel room.

#90163u1678 06/12/1990 ~United Press International

TAMPA, FL (JUNE 12) UPI - An ex-sergeant accused of causing a serious

breach in U.S. and NATO security by videotaping military secrets for delivery to Eastern European countries was ordered held without bond Tuesday pending his espionage trial.

Roderick James Ramsay, 28, a former assistant documents custodian for the U.S. Army 8th Infantry Division in West Germany, said nothing during the five-minute detention hearing.

During an earlier, 1 1/2 hour hearing Friday, FBI Special Agent Joe Navarro testified that Ramsay acknowledged videotaping hundreds of sensitive documents in 1985 for Clyde Lee Conrad, a retired sergeant who was convicted last week of treason by a West German court.

''Based on the information and testimony presented last Friday, there is probable cause to hold the defendant. ... I order that he be detained until his trial,'' said U.S. Magistrate Elizabeth Jenkins.

No trial date has been set. If convicted, Ramsay would face a possible life sentence.

Ramsay was arrested without incident last Thursday on a downtown Tampa street not far from FBI offices. Assistant U.S. District Attorney Greg Kehoe would not say if the defendant had met with Navarro or other FBI agents that night.

Ramsay, who was seeking work as a taxi driver when arrested, was stationed in West Germany from 1983 to 1985 and worked under Conrad's immediate supervision, the FBI said.

The documents and videotapes Ramsay obtained were sent by Conrad to the Hungarian Intelligence Service and the Czechoslovakian Intelligence Service, federal agents say.

Ramsay told Navarro he was paid about $20,000 for the classified documents he taped and obtained for Conrad and others while stationed in West Germany.

Although federal officials say others were involved in the espionage, they have not identified the other alleged conspirators. The FBI has said its investigation is continuing.

A West German court sentenced Conrad, 42, to life in prison for selling military secrets to communist governments.

He was arrested in August 1988 and indicted one year later for selling top secret nuclear and other military plans to the Eastern European countries.

An Ohio native, Conrad was paid more than $1.3 million by Hungary and

Czechoslovakia officials between 1975 and 1985, according to West German authorities.

#90163u1700 06/12/1990 ~United Press International

(JUNE 12) UPI - An Arkansas runoff between a black businessman and a former Ku Klux Klan sympathizer for the Republican lieutenant governor nomination and a Democratic gubernatorial race in South Carolina were the top contests Tuesday in a light primary schedule.

In addition to those states, voters cast primary ballots in Maine, Virginia and North Dakota, bringing to 24 the number of states that have chosen candidates for the general election. An eight-week string of primaries in August and September will decide almost all the remaining nominations.

In none of the states holding primaries Tuesday were any incumbents facing serious challenges.

But in Arkansas, attention was focused on the runoff race for the GOP nomination for lieutenant governor featuring Ralph Forbes, a former member of the American Nazi Party and a Ku Klux Klan sympathizer, against Kenneth ''Muskie'' Harris, a black real estate agent and former Arkansas Razorback football player.

The two men finished first and second in a primary two weeks ago, with Forbes receiving 46 percent and Harris 36 percent.

Forbes's connections to the Nazi Party and the Ku Klux Klan were a focal point of the runoff contest and Harris, who has received considerable mainstream GOP support, argued Forbes wanted to ''make this race emotional and racial.''

But Forbes countered by contending he has been unfairly attacked by the media and argued ''the average Arkansan is going to see through all that.''

The winner, however, is certain to be a decided underdog in November against the Democratic nominee, former Rep. Jim Guy Tucker of Little Rock.

In South Carolina, Republican Gov. Carroll Campbell was unopposed for his second GOP nomination and is expected to be a heavy favorite against either Theo Mitchell or Ernie Passailaigue - two state senators who vied Tuesday for the Democratic nod.

Mitchell, attempting to become the first South Carolina black since the turn of the century to win a major party nomination to a high office, presented himself as a coalition builder who could cross racial, social

and economic lines to unite the state.

But Passailaigue, a certified public accountant and former owner of a minor-league baseball team, has a populist image and centered his campaign on a pledge to revamp a state tax system he considers unfair to working people and too generous to the wealthy.

In the state's Senate race, there was no opposition for Republican Sen. Strom Thurmond. Democrats do not have a candidate.

The South Carolina contest that attracted the most attention pit state Sen. Sherry Martschink against former U.S. attorney Henry McMaster for the Republican lieutenant governor's nomination.

McMaster portrayed himself as very conservative, while accusing Martschink of being too liberal, particularly on the issue of abortion rights.

Other highlights of the Tuesday voting included:

-Maine: The premier races were for nominations to the House seat being vacated by Rep. Joseph Brennan, a Democrat trying to regain his job as governor.

Five Democrats, led by state Attorney General James Tierney and former Maine House majority leader Elizabeth Mitchell, fought for that party's nod, while former Rep. David Emery was opposed by state lawmaker John McCormick Jr. on the GOP side.

McCormick, who opposes abortion, made that the main issue against Emery, who is a recent convert to the abortion-rights ranks.

There were no primaries in either party in the gubernatorial or Senate contests. In November, incumbent Republican Gov. John McKernan will face Brennan. In the Senate race, Republican incumbent William Cohen will face Democrat Neil Rolde.

-North Dakota: The main question facing voters was a measure to boost the state's sales tax rate from 5 percent to 6 percent, with most of the nearly $42 million in revenue to go to schools.

-Virginia: Republican Sen. John Warner has no primary opposition and no Democratic opponent.

#90163u1703 06/12/1990 ~United Press International

KUWAIT (JUNE 12) UPI - The government of Kuwaiti Premier Sheikh Saad al Abdullah al Sabah resigned Tuesday, one day after the election of a new

transitional national council that will pave the way for restoration of full democracy, an official statement said.

But Emir Sheikh Jaber al Ahmad al Sabah, who accepted Sheikh Saad's resignation, asked the Cabinet to carry on as a caretaker government until the formation of a new Cabinet.

The government expressed satisfaction at the turnout for Sunday's elections, the first since the disbanding of Parliament four years ago at the height of the Iran-Iraq war.

Pro-democracy activists had called for a boycott of the poll, arguing that the national council was unconstitutional and only a revived parliament had the right to pass legislation.

Only 62,000 Kuwaitis out of the total population of 800,000 were eligible to vote in the poll. Women, soldiers, policemen and Kuwaiti citizens whose families have not resided in the emirate for more than 30 years were not eligible to cast ballots.

Western diplomats said that even though the Emir retains the right to directly appoint 25 of the national council's 75 members and can also veto legislation, the Kuwaiti election marked a precedent for other Gulf Arab states such as Saudi Arabia, an absolutist monarchy.

Oil wealth has provided free medical care, education and housing grants, as well as fully-stocked shops, but ruling Gulf Arab families have devolved little if no power to organized popular representation.

In his letter of resignation Sheikh Saad, who in addition to serving as premier is also the conservative, oil-rich emirate's Crown Prince, said the newly-elected national council would prepare for democracy.

''The national council will carry out the task for which it has been entrusted by you, in preparation for the forthcoming phase of our democratic march,'' the outgoing premier said.

The outgoing Cabinet was formed following the dissolution of Parliament on July 3, 1986. The 22-member Cabinet had since carried out a dual role of legislative and executive duties in the absence of a parliament.

Interior ministry figures showed that some 62.3 percent of eligible Kuwaiti voters cast their ballots, despite opposition calls for a boycott.

#90163u1717 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - Drexel Burnham Lambert Group Inc. and its

creditors agreed Tuesday to work on a joint plan to reorganize the fallen investment firm in hopes of bringing Drexel out of bankruptcy by early 1991.

Under terms of the proposal, however, the firm's creditors may submit their own plans on how Drexel should repay its debts if they fail to agree with Drexel on a joint plan.

U.S. Bankruptcy Judge Howard Buschman III set Nov. 15 as the date after which Drexel and any of the creditors may file reorganization plans. All claims against the firm also must be submitted by then.

The judge said he hoped a reorganization plan for Drexel will be confirmed by February 1991 - one year after the investment firm filed for bankruptcy protection.

The agreement on the timetable was reached privately in talks between Drexel and its creditors and announced in federal bankruptcy court. The judge "banged heads together" to get Drexel and its creditors to agree, said one participant in the talks.

The creditors considered the agreement on allowing competing reorganization plans a victory, said Robert Ladd, executive vice president of First City Bancorporation of Texas, one of Drexel's creditors. But, he said, creditors aren't optimistic that they will reach a mutual agreement with Drexel on how to pay off its debts.

"We'll work toward that, but based on the discussions that occurred before today, I don't believe there will be a consensual plan," Ladd said. "Our plans are very different."

Both Drexel and its creditors have drawn up outlines of reorganization plans but with key differences. Drexel's plan, which it claims would repay creditors 100 percent, calls for placing the firm's assets into a new business entity that would issue promissory notes to creditors, with values equal to creditors' claims.

Unanimously rejecting that plan, Drexel's creditors last week announced their own plan, under which Drexel would be run under new management. Unlike Drexel's plan, the creditors' proposal calls for the promissory notes to be more short term, bear interest and be publicly traded.

Deciding who will run Drexel during its reorganization could be a sticking point between the firm and creditors, said Barry Dichter, an attorney for Banco de Portugal, one of Drexel's largest creditors.

"I think the major issue separating Drexel and its creditors is the role of present management in administering the assets and managing the

business," he said.

"There is a general consensus on how the reorganization plan should work," he added. "The details will be hotly debated. The concepts will not be."

Agreement on the timetable for reorganizing Drexel was reached one day before the expiration date of the firm's so-called period of exclusivity, under which it had the sole right to submit a plan to emerge from Chapter 11 bankruptcy protection. The creditors had opposed any extension to Drexel's period of exclusivity so that they could submit their own proposal.

In bankruptcy court proceedings, a reorganization plan is incorporated into a larger and more detailed disclosure statement. That statement must be voted on by creditors and shareholders before it is submitted to the bankruptcy court for confirmation.

Objecting to the Nov. 15 deadline for filing claims against Drexel was an attorney for the Federal Deposit Insurance Corp. The FDIC needs more time to sort through the transactions between Drexel and scores of savings and loans institutions that have failed, the attorney argued.

Once a powerhouse and pioneer in the use of junk bonds that fueled the corproate takeovers of the 1980s, Drexel filed for Chapter 11 bankruptcy protection Feb. 13 after defaulting on more than $100 million in loans.

Members of the creditors committee are collectively owed more than $1 billion, while Drexel owes other creditors another $1 billion. Final settlement on the specific language of the agreement may be reached as early as Wednesday and no later than Friday, Buschman said.

#90163u1726 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - Debt-burdened Donald Trump's Taj Mahal casino had record May gambling winnings of $36.5 million, the New Jersey Casino Control Commission said Tuesday, but doubts hovered over his Atlantic City operations.

The Taj Mahal, opened April 2 at a staggering cost of $1.1 billion, had a daily average ''win'' of nearly $1.2 million - around the level financial analysts said was the operation's break-even point.

But ''people expected a little better than that,'' said analyst Larry Glatzkin of Shearson Lehman Hutton Inc., who follows the high-yield junk bonds issued to finance Trump's three Atlantic City casinos.

''The Taj was a little disappointing,'' he said, despite the record

established for the sum retained after paying off lucky gamblers.

Another Trump casino in Atlantic City, Trump Castle, showed a sharp drop to $17.9 million in May winnings from $21.7 million a year earlier. Trump Castle debt is a sore spot in the developer's financial picture.

The casino panel's announcement came on the heels of a deal cut between Trump and his bank creditors, from whom he is to get $60 million in new loans and a suspension of interest payments on about $2 billion in bank debt.

Once a swaggering symbol of Roaring Eighties confidence and excess, Trump in recent weeks has been scrambling to keep his real estate, airline and casino empire from being dismantled because of cash flow woes.

Trump's business revenues, slowed by a real estate downturn, failed to keep pace with interest costs of some $350 million on a mountain of debt estimated at $3.2 billion, including bank loans and bond issues.

In return for the banking bailout, Trump put up additional pieces of his real estate empire as collateral against his debt tower and, said banking sources, gave his creditors equity stakes in some holdings.

The deal gave the strapped speculator, who had vaunted his financial prowess in a book called ''The Art of the Deal,'' funds to meet critical payments this week on bonds financing his Trump Castle operation.

The New Jersey gaming panel, which audits casino winnings reports, said the Taj Mahal's gross revenues or winnings of $36,525,374 were ''the largest ever reported for a single month in New Jersey history.''

In second place for the month was the Trump Plaza casino, at $31,316,106 - up nearly 24 percent over the year-earlier period. The Trump Plaza is viewed as the most solid of the three Trump casinos.

The commission said the Trump Plaza posted two record daily win totals during May: $10.4 million on May 8 and $6.4 million on May 4.

A New York newspaper suggested, though, the Taj Mahal's revenues have not been maintaining the banner levels set in May.

The Daily News said the luxurious casino failed for the first time last week to make $1 million a day. The tabloid said the casino took in $6.6 million in the period, or just $943,000 a day, below projections.

The News noted it was the first week since the April 2 opening of the casino that the Taj grossed less than $7 million. It said revenues at Trump's other two casinos also slumped in the first full week in June.

Control Commission spokesman Thomas Flynn said his agency did not release any weekly figures. Without confirming the paper's figures, he questioned whether they meant the Taj Mahal would come up short.

Flynn said Trump ''certainly has other revenues available to him (from the casino), over and above what the gaming tables produce.'' The $1 million minimum figure might be reached from hotel, bar and other earnings.

#90163u1729 06/12/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (JUNE 12) UPI - President Vaclav Havel, fresh from a decisive election victory, Tuesday announced he will ask Prime Minister Marian Calfa, a former Communist Party leader, to form the next Czechoslovak government.

''The president today met with the leadership of Civic Forum and Public Against Violence, the two strongest parties in the recent elections and all agreed Calfa should be appointed the new prime minister,'' presidential spokesman Michael Zantovsky told United Press International.

Asked if Calfa had agreed, Zantovsky replied: ''He was there. He didn't say no.''

After the morning meeting with representatives of the two political movements, Havel and Calfa met by themselves for most of the afternoon.

Civic Forum and its sister movement Public Against Violence - the pro-democracy coalition that led the November revolution - were the clear winners in Czechoslovakia's first free elections in 44 years.

They took more than 50 percent of the vote and secured an overwhelming majority of the seats in Parliament.

Havel will officially ask Calfa to form the new government after the present government resigns.

The Slovak-born Calfa, who became prime minister last December, was a top Communist Party member and an advisor to the present Communist Party Chairman Ladislav Adamec. Under the previous Communist regime, Calfa was a leader of the 1989 crackdown on dissident underground publications.

Calfa left the Party last January, and by all accounts has become a model prime minister. He has maintained a difficult consensus among a fractious government, and managed to push the major elements of a free market economic reform through the government.

He has Havel's full confidence and consistently rates among the three most popular Slovak politicians, alongside the 1968 Prague Spring leader Alexander Dubcek.

Havel has said he considered the formation of the new government the greatest task of his career as president, which began with his inauguration Dec. 29.

Deputy Prime Minister Jan Carnogursky, a leader of the Slovak Christian Democratic Movement, had been tipped for the prime minister's post until the end of May, when the pro-democracy movements began outstripping the Christian Democrats in the polls.

But Carnogursky's coalition, which suffered a last-minute scandal in which one of its three party leaders was revealed to be a secret police collaborator, finished a distant third in the elections behind the Communists.

On Wednesday, Havel is scheduled to meet with Carnogursky to discuss the shape of Christian Democratic participation in the government.

Getting Carnogursky's support will be crucial for the new government. The deputy premier has said he would not participate in the new government because of his movement's poor showing, but some analysts attribute this to political posturing.

''If his decision (not to join the government) is final, then we are in trouble,'' a senior Forum source said. ''Then the danger of the nationalistic feeling in Slovakia, being supported by both the Christian Democrats and the nationalist movements, will be greater.''

Civic Forum and Havel are in agreement on the basic composition of the government.

Most of the technical ministries such as foreign trade, power and agriculture are expected to remain unchanged. But it appears Finance Minister Vaclav Klaus has won a months-long battle within the Cabinet to quickly proceed to a market economy with the announcement that Valtr Komarek, the government's interventionist lead economist, will not serve in the new government.

Interior Minister Richard Sacher, a People's Party member who has been dogged by scandals and complaints about his handling of the secret police, is not expected to retain his post.

In other developments, the leadership of the embattled People's Party, a member of the Christian Democrat coalition, scheduled a meeting Wednesday to ask chairman Josef Bartoncik to resign. Bartoncik, who is deputy

president of Parliament, was accused of last week by the government of being a paid secret police informer for 17 years.

In Bratislava, former Slovak Prime Minister Petr Colotka, who stepped down in autumn 1988, was detained June 11 in an investigation of alleged criminal activity, the news agency CTK reported. The charges included abuse of power, embezzlement and larceny.

#90163u1741 06/12/1990 ~United Press International

SAN JOSE, COSTA RICA (JUNE 12) UPI - Costa Rican and foreign officials mourned three-time President Jose ''Pepe'' Figueres at his funeral Tuesday in San Jose's metropolitan cathedral.

Nicaraguan President Violeta Chamorro, former Nicaraguan President Daniel Ortega and former Costa Rican President and Nobel Peace Prize winner Oscar Arias attended the service that began nearly an hour behind schedule.

Figueres' body was brought to the cathedral with bells ringing behind a flower draped four-wheel drive vehicle in a procession from the national museum a few blocks away where Figueres lay in state since Saturday. The crowd waved handkerchiefs and sang the Costa Rican national anthem as the flag-draped casket was carried into the cathedral.

Figueres, who died Friday at age 83, launched the monthlong civil war in 1948 that toppled President Teodoro Picado and his communist allies and permanantly installed a democratic system in Costa Rica.

After the revolution, he took his place in the nation's history by abolishing the country's army and turning its barracks into schools and museums, arguing it was a threat to ''internal peace.''

Hundreds of Costa Ricans packed the cathedral and the central park in front where they listened to the service and the eulogy by Archbishop of San Jose Roman Arriega over loud speakers.

School children handed out posters of the historic photograph of Figueres using a mallet to break a rampart and an army barracks when he abolished the army on Dec. 1, 1948.

The crowd applauded and cheered past and present officials arriving for the service, especially Arias, as onlookers chanted, ''Oscar, Oscar.''

Chamorro and Ortega also received warm welcomes. Costa Rican President Rafael Calderon, the son of a former president who was Figueres' rival during the civil war, met earlier with Chamorro at the presidential house.

''The fact of having (Chamorro) here is an honor, even if it is at this painful time for the people of Costa Rica because of the death of former President Jose Figueres,'' Calderon said. ''Without doubt, we will take advantage of her time in the country to discuss the situation in the region and reinforce the excellent relationship between the two governments.''

Chamorro said she hoped to follow Figueres' formula for peace and democracy by completely disarming Nicaragua, including the army.

''In Nicaragua too I will totally disarm the government because I want it to be an example,'' Chamorro said. ''The example of Costa Rica and that of Don ''Pepe'' Figueres left an inheritance for you, and that is what I want for Nicaragua and Central America.''

She also said she was sure the Contras had now been demobilized.

''They demobilized June 9, I was there, it was an impressive thing, very touching. Cardenal Miguel Obando y Bravo also witnessed it,'' Chamorro said. ''We are ready to help all of the demobilized Contras.''

#90163u1744 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The House Judiciary Committee approved legislation Tuesday restricting the possession and sale of domestic assault weapons that have no sporting value.

Voting 21-15 largely along party lines, the Democratic-controlled panel passed a bill giving President Bush the same authority to ban possession and sale of domestic assault weapons that he used last year to ban the import and sale of foreign-made assault weapons.

Three Democrats broke party ranks and voted against the bill and two Republicans split with their ranks and backed the measure. The Bush administration has previously opposed similar measures and is expected to oppose this one as well.

If the bill becomes law, it would require that within 60 days of enactment the secretary of the Treasury publish a list of firearms models, both foreign and domestic, which fail to meet the established standard that the weapon must have a ''sporting purpose.''

''The guns that are on the list will be prohibited from possession or transfer,'' said Hayden Gregory, chief counsel of the Judiciary Committee's crime subcommittee, whose chairman, Rep. William Hughes, D-N.J., sponsored the measure.

However, he said, those who legally possess domestic assault weapons before the list of banned weapons is published will be allowed to keep the guns and transfer them, although transfers will be subject to some federal regulation.

The bill also bans ammunition magazines or other bullet-feeding devices with a capacity of more than seven rounds and would bar the manufacture of firearms to which silencers or bayonets can be directly attached.

It also provides a minimum 10-year jail term for using or carrying assault weapons during the commission of a violent crime or drug-related offense.

Assault weapons are military-style, semi-automatic rifles capable of firing bullets as rapidly as one can repeatedly pull the trigger. They have been used in recent years in some highly publicized and senseless crimes, such as the murder of several children at a California school.

A mostly Republican filibuster threat against an assault weapon ban that was part of a major anti-crime bill before the Senate last week prevented the measure from reaching a final vote but leaders were working on a compromise package.

#90163u1746 06/12/1990 ~United Press International

CHICAGO (JUNE 12) UPI - Aggressive buying supported corn futures Tuesday with December making a contract high on the Chicago Board of Trade.

Wheat generally followed corn, while soybeans were under pressure and were mostly lower at the final bell.

December corn rallied to a contract high of $2.86 per bushel early in the

session, gave up some of the gain and then recovered to close at the high.

Professionals and commission houses were featured buyers of corn. Some of the support came from the weekly crop report which indicated only 94 percent of the crop had been planted as of Sunday. That prompted one analyst to say there could be a problem with late pollination of corn and subject the crop to abnormal risk from the summer heat.

Soybeans were mostly lower in very choppy trading. The weakness in soybean oil pressured the beans, although losses were limited by planting delays. The USDA said only two-thirds of the soybeans had been planted compared with the normal 82 percent.

Nearby wheat closed with moderate gains on reports the soft red wheat had shown some deterioration in the past week and on harvest delays in the hard wheat region.

At the close, corn was up 2 1/2 to 4, soybeans down 1 to up 3, wheat up 2 1/2 to off 1 and oats unchanged to down 1 1/4.

#90163u1787 06/12/1990 ~United Press International
NEW YORK (JUNE 12) UPI - Attorneys general from seven states filed suit

Tuesday against Mobil Chemical Co. for allegedly making false environmental claims about its Hefty plastic trash bag line.

The suits, filed in seven state courts by members of a task force of attorneys general, seek a preliminary injunction barring the Mobil Corp. subsidiary from selling, distributing or marketing plastic products that make false claims about its degradability.

Mobil announced in March that it would delete the degradability label from the Hefty bags, but the attorneys general said they wanted the company to remove all bags with the claims from store shelves.

Before Mobil withdrew its claims, the Hefty package contained a label saying the plastic contained an additive that caused it to degrade after exposure to sun, wind, and rain.

The attorneys general charged the Hefty trash bags were sold with the "degradable" label even though the company knew the plastic would only decompose under certain laboratory conditions.

Mobil's withdrawal of the claim, the officials said, does not absolve it of liability for the time the allegedly false label was on the packages. Mobil Chemical officials would not immediately comment. The suits, which each seek separate damages, were filed in New York, California, Massachusetts, Minnesota, Texas, Washington, and Wisconsin.

"Degradable plastics are nothing but a snake oil cure for our solid-waste problems," said Robert Abrams, New York state's attorney general. "It's a myth that degradable products quickly disappear or provide any benefits to the environment in a landfill, and Mobil knew it."

Consumers believed the bags would dissolve quickly after they were thrown out, the attorneys general said. They said about 80 percent of the nation's annual output of 160 million tons of municipal solid waste is buried in landfills, where trash bags degrade extremely slowly because there is no sunlight and little moisture.

"Buried in landfills, the bags are not likely to degrade for decades. They don't offer any environmental benefit," said Minnesota Attorney General Hubert Humphrey III. "Unfortunately, Mobil's advertising claims break down faster than their garbage bags." Minnesota is seeking $250,000 in damages from Mobil for the misleading claim.

Edward Barbini, a spokesman for Abrams, said New York would seek "quite substantial" damages from Mobil, though he declined to specify an exact amount.

Wisconsin Attorney General Don Hanaway said Mobil was trying to market its

bags to people concerned about the environment. "These claims prey on people's desire to play a role in protecting the environment," Hanaway said.

#90163u1789 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - Cameras will be banned from the entire trial of three youths accused of gang-raping a woman jogger in Central Park, a Manhattan judge ruled Tuesday.

The day before jury selection was to begin, Justice Thomas Galligan ruled against television and still camera coverage of the rape and attempted murder trial at state Supreme Court.

Camera coverage of the jogger's testimony - if she is called as a witness - was never in question because state legislative rules prohibit audio-visual coverage of victims of sex crimes.

A spokesman for the New York Broadcasters Courtroom Pool said he would appeal the ruling to Administrative Judge Peter McQuillan.

''We will appeal anything short of the judge allowing full coverage except when he feels the testimony falls under the statutory definition of lewd and scandalous,'' said David Bookstaver, pool administrator.

Cameras have been allowed into over 200 court proceedings as part of a two-year experiment involving audio-visual coverage of courtrooms. Under the legislative rules governing the experiment, coverage of ''lewd and scandalous'' material is prohibited.

On Wednesday and Thursday, two pools of 250 potential jurors were slated to receive 13-page questionnaires. Lawyers for both sides will discuss the completed questionnaires Friday to winnow the jury pool.

On Monday, the remainder of the pool will undergo individual questioning to pick 12 jurors and as many as six alternates. If the jury is selected quickly, the trial could open as early as June 25.

During the trial, prosecutors expect to call 50 witnesses - one of whom may be the woman jogger, whose name has been withheld by the media because of the nature of the attack.

Six youths were indicted in the rape. The first three to go on trial are Antron McCray, 16, Yusef Salaam, 16, and Raymond Santana, 15.

The three are charged with being among a mob of youths on a ''wilding'' spree who gang-raped, bludgeoned and left for dead a 29-year-old

investment banker on a night jog in Central Park last April.

The jogger's brutal attack and miraculous recovery garnered nationwide attention.

Each youth is charged with second-degree attempted murder, first-degree rape, first-degree sodomy and first-degree sexual abuse in the attack on the woman.

Each also is charged with first-degree assault, first-degree robbery, second-degree robbery, second-degree assault and first-degree riot for attacks on two men joggers.

Because McCray, Salaam and Santana were under 16 when the crime occurred, they face a maximum of 4 to 10 years behind bars if convicted of the most serious charge - attempted murder.

If sentenced to jail, they would be held in a juvenile detention center until age 18, then transferred to an adult prison to finish the sentence.

Prosecutors say they were among 30 youths who entered the moonlit park on April 19, 1989, with plans to go ''wilding'' - randomly harassing and mugging passersby.

The gang attacked a homeless man eating his dinner near the roadway and two male joggers running around the reservoir. During the two-hour crime spree, a couple on a tandem bicycle and another male jogger managed to outrun them and get away.

But the woman investment banker jogging along the 102nd Street Transverse did not.

She was jumped by the pack, bashed in the head with a pipe and dragged into a muddy ditch. When she mustered the strength to scream for help, she was punched in the face into unconsciousness. She was gang-raped, sodomized and left for dead.

Before she was discovered by two men strolling through the park after midnight, she had lost three-quarters of her blood. Her white jogging shirt was so blood-soaked it looked scarlet, and friends who went to the hospital the following morning were able to identify her only by a tiny gold ring she often wore.

Doctors at first described her as hanging onto life ''by a thread.'' But as the days passed, the woman courageously fought the odds, and came through with a recovery described by doctors as ''miraculous.''

She has returned to her Wall Street job - and even earned a promotion to

vice president earlier this year. And, despite continuing bouts of double vision from her head injuries, she is running once again as part of her physical therapy.

The strongest evidence against her accused assailants are the incriminating statements the youths made to police. Salaam, McCray and Santana each placed themselves at the scene of the attack and admitted beating, fondling or raping the woman, police said.

Authorities were unable to link the youths to the crime through DNA evidence. In fact, the scientific tests suggested another suspect who has not been apprehended.

(JUNE 12) UPI - The Coast Guard says the blaze aboard a tanker in waters southeast of Galveston, Texas, dwindled considerably today, raising hopes that it can be put out with chemical foam. Officials say the fire in the ship's pump room has been put out, but flames continue in the engine room and crew quarters.

Opposition supporters in Bulgaria say results from Sunday's parliamentary elections are tainted. Official results today confirmed a communist victory, but the Union of Democratic Forces says the vote was manipulated. Opposition forces say they'll go all-out to win a run-off next week for at least 63 parliamentary seats. International observers say the election seemed fair.

Algeria says more than half of its population has already cast ballots in the North African nation's first multi-party political contest since 1962. NO incidents were reported as government trucks brought voters to the polls. Results in the municipal and provincial elections are expected later today.

Imelda Marcos returned to a New York courtroom today, 11 days after collapsing in court. The former Philippines first lady says she feels healthy and should be ''well enough'' to get through her federal racketeering trial. Doctors say Marcos suffered from a condition caused by acid in her stomach.

Eight passengers fishing off the coast of New Jersey had a close call today when a fire broke out on their boat. They managed to radio for help before jumping overboard. Within hours, Coast Guard helicopter rescuers arrived to pluck them from life rafts. The burning boat sank shortly after the rescue.

#90163u1820 06/12/1990 ~United Press International

AMMAN, JORDAN (JUNE 12) UPI - Soviet Deputy Foreign Minister Nikolai Petrovski called Tuesday for Arab unity as a prerequisite for a Middle East peace settlement, while Jordan's King Hussein said Israel's new hard-line government posed a threat to the region, Jordan's official Petra news agency reported.

''The unified Arab position is very important for achieving a just and comprehensive settlement to the Middle East conflict,'' said Petrovski, who held talks with Hussein Tuesday on Middle East issues.

A number of Arab states, including Syria, a key regional power broker and Soviet ally, stayed away from last month's Arab summit in Baghdad.

Syria's absence weakened the effect of the summit's final communique, which was delivered to U.S. and Soviet leaders before their Washington meetings earlier in the month.

''The Soviet Union is committed to the statements announced by President (Mikhail) Gorbachev at the end of the U.S.-Soviet summit, that it will review its position on Jewish immigration if Israel insists on settling them in the Arab occupied territories,'' Petrovksi told Petra.

The remarks were a reference to Moscow's long-standing position against the settlement of Jewish immigrants in the Israeli-occupied territories.

Hussein, who received Petrovski in the Royal Hashemite Court, denounced the new Israeli cabinet's rejection of peace talks with Palestinians.

''The formation of the new Israeli government represents a new threat to the stability of the region, because the foundations of this government make it the most extreme government of all Israeli past governments,'' Petra quoted the monarch as saying.

''This is because it clearly announced its rejection of talks with the Palestine Liberation Organization, as well as its refusal to withdraw from Arab occupied territories.''

Israeli Prime Minister Yitzhak Shamir's avowed aim of crushing the Palestinian uprising, settling as many Soviet Jews as possible and ignoring U.S.-mediated peace efforts have angered the PLO and Arab states such as Egypt, according to local Arab radio stations.

#90163u1824 06/12/1990 ~United Press International

NAIROBI, KENYA (JUNE 12) UPI - Kenya's only political party said Tuesday advocates of a multiparty system were traitors, and one party official said anyone flashing a two-finger salute supporting such a system should have their fingers cut off.

''As President Daniel arap Moi has often observed, wananchi (people) all over the country have said of their own volition that they have no room for these few traitors of their own motherland,'' a Kenya African National Union statement said.

Wilson Leitich, a KANU branch chairman, went one step further, instructing young party members to ''walk around carrying knives while in plain clothes and look out for those flashing the two-finger salute,'' the local Daily Nation newspaper reported.

Leitich accused bus drivers of being among the multi-party supporters

using the gesture, adding such people were ''tribalists'' who stood against Moi.

''We are not cowards for them to play around with us like that ... cut off the two fingers and take them to the Nakuru KANU office,'' the paper quoted Leitich, KANU chief in Nakuru, 100 miles northwest of Nairobi, as saying.

Although the party statement admitted it would be against the law to chop off fingers, ''the advocacy of multi-party system in Kenya is a self-defeating act being perpetrated by a few Kenyan opportunists at the behest of their foreign masters.''

The statements are part of a political crackdown sweeping the nation following a public uproar after the unsolved murder of former foreign Minister Robert Ouko last February.

A number of former politicians, churchmen and lawyers have been calling for the abolition of Kenya's single party system.

Moi, once in the opposition himself but now the ruling party leader, has said he was committed to the one-party state and warned those plotting against his government would be brought to task.

-30- 2081

#90163u1855 06/12/1990 ~United Press International

(JUNE 12) UPI - A series of explosions ripped apart a rural fireworks factory in Columbus, Mississipi, crammed with Fourth of July inventory today. The blasts killed at least two people, injured one, and shook buildings 15 miles away. The plant apparently was filled with with gunpowder and chemicals used to make fireworks, and had been gearing up for the Fourth of July holiday.

Soviet President Gorbachev today offered a few alternatives to the Germany-NATO question. He says he would agree to a united Germany's limited membership in the Western alliance... or perhaps a dual membership for Germany in both NATO and the Warsaw Pact. NATO members have rejected the proposals.

Liberian rebels and government officials did NOT get far in peace talks today. The two sides met in neighboring Sierra Leone , where each party rejected the other's proposal for a cease-fire to end the six-month-old civil war. Rebels say peace is possible only if President Samuel Doe and his government resign first.

A Kenyan newspaper quotes a political official as threatening to chop off the fingers of anyone flashing a two-finger salute in favor of a

multi-party system. The threat is part of a political crackdown that has swept the nation following a public uproar over the murder of a former foreign minister last February.

There's a small pet alert in Casselberry, Florida. Gizzard the lizard, a rare three-and-one-half foot South American lizard, has escaped from its cage and is on the loose. Owner Gary Locker says Gizzard is ''kind of a grump'' and eats kittens and rabbits if he can get them. There have been NO reports of missing pets so far.

#90163u1869 06/12/1990 ~United Press International

MOSCOW (JUNE 12) UPI - The Russian republic declared its sovereignty Tuesday just before its maverick leader, Boris Yeltsin, set off for a key meeting with President Mikhail Gorbachev and leaders of the rebellious Baltic republics.

By a 907-13 vote, the new Congress of People's Deputies proclaimed Russia a sovereign state and declared its laws the highest authority on the republic's territory, challenging the authority of Gorbachev's central government.

''The 12th (of June) will be Russia's independence day,'' Yeltsin said.

Passage of the declaration by the Russian republican legislature was a major victory for Yeltsin, who seeks to ''invert the pyramid'' of the Soviet Union and make the largest republic virtually autonomous from central control.

''This is a historic moment,'' said Vycheslav Polosin, a deputy and Russian Orthodox priest. ''We are beginning the real perestroika.''

Shortly after the vote on sovereignty, Yeltsin left for a meeting of Gorbachev's Federation Council, which groups the leaders of the 15 Soviet republics.

The leaders of the three Baltic republics also attended the meeting, which was scheduled to end Tuesday amid hope of a possible compromise on their independence drive.

Russia's declaration added more drama to the meeting, which is critical for Gorbachev's efforts to hold the Soviet Union's 15 republics together in the face of mounting nationalism.

Yeltsin has expressed sympathy for Lithuanian independence, and the measure passed Tuesday declared the Russian republic respects the sovereignty of the other Soviet republics.

In a television address Saturday night, Yeltsin told Russians he had a plan to shift to a market ecomony that would not lower living standards.

But Gorbachev Tuesday mocked Yeltsin's plan.

''It is nonsense,'' Gorbachev said, using a Ukrainian word, and then excusing himself, said, ''Excuse my using this Ukrainian word while making a speech in Russian.''

Gorbachev suggested it is not possible to introduce a market economy without any pain for the population.

''It has emerged again that someone is holding some secret talisman that in going over to the market economy, everything is going to be superb,'' Gorbachev said.

Gorbachev's own market transition plan has yet to be approved by Parliament.

''We must do our best to avoid difficulties and hurt for those who have low or fixed incomes,'' he said.

Though the Russian declaration's clause on the primacy of local laws echoed measures passed by the Baltic republics, Ruslan Khasbulatov, first deputy chairman of the legislature, its effective vice president, stressed that Russia's aims were less far-reaching.

''We did not declare ourselves a state free from the Soviet Union and consider that Russia's future is as part of the U.S.S.R.,'' Khasbulatov said.

Khasbulatov minimized possible conflicts with the central government, saying: ''We are not planning to try to play some sort of opposing and hindering role - that would be destructive for the implementation of our programs.''

But Khasbulatov, speaking at a news conference after the declaration, left no doubt that Russia plans to make its sovereignty count.

''Russia is not going to wait any more for wise decisions to trickle down from above,'' he said.

The measure said, ''Russia reserves the right to secede from the Soviet Union,'' recalling a Yeltsin warning that the central authorities should always keep this possibility in mind.

Deputies greeted the declaration's adoption with a standing ovation,

pleased to close a grueling point-by-point debate on each of its 15 clauses that has continued intermittently since the Congress opened May 15.

The measure laid the foundation for independent contacts with the Soviet Union's other republics, providing for Russian missions in each. Traditionally, the central government has served as an intermediary.

#90163u1876 06/12/1990 ~United Press International

MOSCOW (JUNE 12) UPI - Soviet President Mikhail Gorbachev said Tuesday he would agree to a unified Germany joining NATO if it also could have ''associated membership'' in the Warsaw Pact, but the proposal was rejected by the West.

Despite the opposition, Gorbachev's remarks were seen as something of a breakthrough because previously he had flatly rejected the prospect of a unified Germany in NATO, proposing the country instead be neutral.

In a report to the Supreme Soviet on his recent Washington summit, Gorbachev said he told President Bush there were other alternatives, including dual membership of the united Germany in both NATO and the Soviet-led Warsaw Pact.

He said the Soviet Union would agree to letting the combined Germany join NATO if the Western alliance reformed.

''We would agree to the entry of Germany into NATO providing the United States accepted its associated membership in both blocs (and) the principle of rapprochement of the military blocs,'' Gorbachev said.

He said German membership in NATO and the Warsaw Pact would be impossible, however, without the reform of both European alliances and progress in conventional forces talks in Vienna and the general European security process.

Bush said in Washington he wanted the combined Germany to become a full NATO member, which Gorbachev objects to on the grounds it would destabilize Europe.

''That matter was discussed here. ... And our position is well-known to him, which is that a unified Germany should be in NATO with no conditions '' Bush said before meeting with congressional leaders at the White House when asked if he were aware of Gorbachev's proposal.

''But the more talking we do the more convinced I am that they will see that what we're proposing is most stabilizing and is best for the Soviet Union as well as Western and Eastern Europe,'' Bush said. ''So we'll keep

on trying. But these ideas - let them float them out there and we'll listen and we'll discuss them without rancor.''

In Washington, visiting East German Prime Minister Lothar de Maiziere told reporters Gorbachev's proposal ''is not going to be the definite answer.''

Earlier, West German Chancellor Helmut Kohl called Gorbachev's suggestion ''not realistic and not acceptable.''

In London, British Prime Minister Margaret Thatcher, reporting to Parliament on her talks with the Soviet president last week, dismissed Gorbachev's plan as impractical.

''It is right for Germany and it is right for NATO'' that a united Germany remain in the Atlantic alliance, she said. ''I doubt very much whether one country can be a member of two pacts.''

In Brussels, Belgium, a NATO spokesman also rejected Gorbachev's suggestions.

''Some of his thoughts are interesting and we will study the speech. However, among other problems, the ideas of associated membership of a united Germany in both alliances, or of dual membership, do not seem promising to pursue,'' the spokesman said.

''A united Germany must have the right, recognized in the Helsinki Final Act, to choose to be party to a treaty of alliance, without the establishment of constraints on its sovereignty,'' he said.

(JUNE 12) UPI - Urban hospitals are reeling from the impact of a decaying social environment on their patients, becoming overwhelmed with victims of

AIDS, illegal drugs, gang violence and homelessness, hospital organizations nationwide said Tuesday.

The 35 member groups of the national Conference of Metropolitan Hospital Associations demanded that Congress adequately fund Medicare and Medicaid and increase support for trauma centers, AIDS treatment and health coverage for the uninsured.

Member groups also called for the creation of health care caucus to advise Congress on the plight of urban hospitals.

The CMHA released a report - ''The Health of 1990 Urban America'' - as the first step in an effort to persuade lawmakers that the nation's social ailments are being ''left on the doorsteps'' of urban hospitals.

''Society has turned its back on the health-care needs of our large cities '' said Paul L. Broughton, chairman of the Southeast Michigan Hospital Council's and president of Harper Grace Hospitals Inc. in Detroit.

''Rather than serving as health-care providers, many metropolitan hospitals have been forced into the role of catch-all neighborhood social-service agencies,'' he said. ''This has left a large number of our metropolitan hospitals on the brink of collapse.''

The report, based on data from hospitals in major cities such as Los Angeles, New York, Chicago, Washington, San Francisco, and San Diego, notes that new AIDS cases reported to the federal government have grown from 295 in 1981 to an expected 57,000 this year. Most cases are concentrated in urban areas.

It also details the impact on hospitals of caring for drug addicts, including expectant mothers, the victims of violent crime, the homeless and those too poor to pay hospital bills.

Caring for the poor and underinsured cost 57 Philadelphia-area acute care hospitals $526 million dollars in unreimbursed expenses last year, the Delaware Valley Hospital Council in Philadelphia reported.

DVHC officials said financial problems have cause three area hospitals to close recently, forced five others into bankruptcy and endangered another 11.

''People see the rising crime statistics. They hear about the problem of homelessness,'' Allan N. Johnson, an author of the report, told the Los Angeles Times. ''What they don't understand is the linkage between these social problems and increased health care costs for which no one around to pay.''

#90163u1896 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The Congressional Budget Office released new figures Tuesday showing the proposed 75 B-2 stealth bombers now will cost $860 million each - up $45 million from the Pentagon's estimate in late April.

The new numbers were released as a non-profit organization began a television advertising campaign against the B-2 and congressional opponents in the Senate and House launched a lobbying effort to kill the bomber program this year.

Defense Secretary Dick Cheney, on Capitol Hill to testify about his budget defended the B-2 but acknowledged the plane's radar-evading ability had not been tested yet against the Navy's sophisticated Aegis radar system.

''I think the jury's still out on exactly what the Aegis radar capability is against the B-2,'' Cheney said when asked about reports that Aegis could easily detect the new bomber, which the Air Force recently said would appear as small as an insect on most radar screens.

''I'm confident that the B-2 can do the mission that it's intended to do '' Cheney told members of the Senate Appropriation Committee's defense panel.

Sen. Dale Bumpers, D-Ark., noting that a future Soviet Aegis radar system could make the B-2 just another bomber, cautioned Cheney that ''we ought to look at that whole thing very carefully considering the staggering cost.''

The CBO said in a letter to Sen. Patrick Leahy, D-Vt., dated June 8 and publicly released Tuesday, that it estimates the Pentagon's request for 75 B-2 bombers would cost $64.9 billion - or $860 million per plane.

On April 26, Cheney announced that his major aircraft review had determined that the Air Force's original goal of 132 B-2 bombers could be reduced to 75, and that the program would cost about $61 billion or $815 million per plane.

The CBO used less-optimistic inflation estimates than Cheney had, but said that even if it used the Pentagon's inflation estimates the program still would cost $63.8 billion.

At the same time, the non-profit Union of Concerned Scientists began running TV commercials Tuesday against the B-2 in Washington, D.C., and in New Mexico, Louisiana and Nebraska - three states represented by influential members of appropriations and authorization committees.

In New Mexico, the commercial states that the cost of one bomber ''could pay the tuition for every student at the University of New Mexico for 36 years'' and that it is ''three times more than the federal government will spend altogether this year on New Mexico's schools, law enforcement, and roads and bridges.''

''The stealth bomber: a mistake we can't afford,'' the ad continues. ''Tell Congress. Stop the stealth bomber now.''

Newspaper advertisements will also run in those and other states, officials of the organization said at a Capitol Hill news conference attended by several members of Congress, including Leahy.

Congressional committees are expected to begin defense spending bill mark-ups in late June.

Rep. John Kasich, R-Ohio, said he and other conservative Republicans were joining Democratic liberals in the lobbying effort to kill the bomber, which he called ''a prescription for bankruptcy for this country.''

''We have momentum,'' Kasich said, noting that more than 140 House members had signed on this year as sponsors of a bill to terminate the B-2. ''I think we can win this fight in the House of Representatives.''

Cheney, during his appearance before the Senate subcommittee, also came under fire for canceling the V-22 Osprey tilt-rotor aircraft and said he would study a new report by the Institute for Defense Analysis that the V-22 would be more cost-effective than the helicopters that Cheney favors.

Cheney also warned that a House proposal on deep defense cuts could force him to lay off 140,000 to 150,000 military personnel.

#90163u1938 06/12/1990 ~United Press International

CHAPEL HILL, N.C. (JUNE 12) UPI - Children who are born prematurely and underweight can benefit significantly from special education and development programs early in life, researchers said Tuesday.

''This is the first conclusive evidence that an early, comprehensive intervention for low-birth-weight infants can reduce the high risk of developmental delay and behavior problems that arise because of their birth weight,'' said Dr. Craig T. Ramey, professor of pediatrics and psychology at the University of North Carolina at Chapel Hill.

In a four-year, $33 million study involving 985 babies from across the United States, Ramey and colleagues found that underweight babies weighing between 4.4 pounds and 5.5 pounds at birth who received special education - and whose parents underwent special training - scored 13 points higher on IQ tests than a group of comparable youngsters who did not receive the services.

The children in the comparison group who received medical care alone were almost three times more likely to have IQ scores in the mental retardation range, the study found.

In addition to the University of North Carolina, the research was conducted at Stanford University and eight other U.S. medical schools.

Underweight, premature babies comprise 7 percent of all infants in the United States. They are at increased risk of health and developmental problems, but can benefit from the programs administered between the time they leave the hospital and age 3, the researchers said in the Journal of the American Medical Association.

The study divided children into two groups - those weighing less than 4.4 pounds at birth and those in the 4.4 to 5.5-pound range. The lowest-weight infants who received the special attention averaged 6.6 points higher in IQ scores at age 3 than others of similar birth weight, it said.

David Scott, a faculty member at Yale University in New Haven, Conn., said the study was ''particularly well timed'' because a bill pending before Congress would make children eligible for special education services when they are born instead of waiting until they are 3 years old.

''This study will help to document that such services can be effective'' for babies as well as older children, Scott said.

Children in the intervention group in the study attended special child development centers between the ages of 1 and 3 and were visited at home weekly for the first year and biweekly thereafter.

Home visits and group meetings were used to train parents in learning and play activities to stimulate the children's development.

''From a public policy point of view, it seems much more cost-effective to intervene early rather than to continue to deal with the children's problems later in life,'' Bryant said.

Low birth weight is the most frequent biological indicator at birth that infants will have intellectual and developmental difficulties later in life, Sparling said.

''These interventions, while not inexpensive, would be an investment in the kids' futures,'' Sparling said.

Medical schools that participated in the research included those from Harvard and Yale universities, the universities of Arkansas, Miami, Pennsylvania, Texas and Washington and the Albert Einstein College of

Medicine.

#90163u1940 06/12/1990 ~United Press International
WASHINGTON (JUNE 12) UPI - Persistent rain is putting a slight dent in the winter wheat crop, the government said Tuesday, forecasting a crop of 2.09 billion bushels, down three million bushels from last month's estimate.

It would be the largest crop since 1981 and represent a stunning 44 percent gain in production from last year's freeze- and drought-damaged crop, the Agriculture Department said in its June crop report.

Farmers were forecast to reap 41.2 bushels an acre, up 0.1 bushel from the May estimate. It would be the second-highest yield on record. The wheat harvest is just getting under way, with five percent of the crop in the bin - three points less than normal for this point of the year.

"Wet conditions have caused yield declines in the (Mississippi) Delta area. Early harvested fields in Arkansas had low test weights and diseases are a problem," the report said.

However, this year's crop, for the most part, is in sterling condition. The Agriculture Department listed 17 percent in excellent condition, 52 percent fair and 24 percent good.

It was an impressive turnaround from one year ago, when 40 percent was listed as poor or very poor. The 1989 crop, at 1.45 billion bushels, was the smallest winter wheat crop since 1978.

Excessive rain has soaked areas, such as southern Illinois and Indiana, where soft red winter wheat is grown. The rain has encouraged the spread of plant diseases. In Illinois, 23 percent of the crop is listed in poor condition.

The department's forecast of a huge rebound in wheat production this year was based on a 22 percent increase in harvested acreage and a vast improvement in yields from last year's 35.1 bushels an acre.

Kansas, the No. 1 winter wheat state, was projected to harvest 460 million bushels - more than double last year's crop. Texas and Washington state also were projected to double their 1989 figures.

Oklahoma, usually No. 2 in production, was forecast to grow 204.6 million bushels, which would be 50.7 million bushels more than last year 1989 but 10 million bushels less than the May forecast.

Winter wheat accounts for three-fourths of U.S. wheat production. The crop

is planted in the fall, lies dormant during the winter and is harvested in the late spring and early summer.

Two years of bad weather in the Wheat Belt have drained U.S. warehouses, which held 452 million bushels before this year's harvest began. That was the lowest "carry-over" figure since 1975-1976.

If the government projections prove true, it will allow some rebuilding of U.S. reserves. The government said prices for this year's wheat crop were likely to range from $2.90 to $3.30 a bushel, vs. $3.71 for the 1989 crop.

Based on June 1 conditions, the department said wheat farmers would send combines across 50.7 million acres, compared to 41.5 million last year. The increase is due to a four percent upturn in planted acreage and to the fact that less land will be abandoned because of less winterkill and other damage.

#90163u1941 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - The oil industry Tuesday blamed congressional legislative delay for its failure to have established an initial capability to respond to oil spills.

After the March 1989 Alaska oil spill of the Exxon Valdez, the oil industry's American Petroleum Institute last year announced plans for a Petroleum Industry Response Organization.

It said, "A precise time frame is difficult to estimate, but it is expected that there will be an initial capability in one year and that it will take from one to three years for PIRO to become fully operational." It expected to "move quickly" on site selection, design and purchase of cleanup vessels and the staffing of 285 positions.

PIRO's five regional centers and teams were to be designed to deal with future oil spills such as the Norwegian tanker Mega Borg, which has dumped an estimated 100,000 gallons or more of crude into the Gulf of Mexico since an explosion racked the tanker's engine room Saturday.

But PIRO officials said none of its centers or teams as yet have any operational capability. They blamed an impasse in Congress that has prevented final approval of the 1989 oil spill and compensation act.

The House and Senate last year approved varying versions of the legislation but a House-Senate conference has not yet been able to iron out the differences.

PIRO officials said they would not know what kind of organization to set

up until the legislation settles such things as whether the Coast Guard would have competing government response teams and whether or not industry response teams would be liable for spill damage in legal suits.

"We need overarching legislation to know what kind of organization to establish," Stephen Duca, vice president of readiness and external affairs for the Washington-based PIRO, said in a telephone interview.

"The establishment (of PIRO) is waiting on federal legislation," said Lyn Arscott, Chevron Corp.'s general manager of health, environment and loss prevention and a member of the API committee establishing PIRO.

"We really expected the legislation by the first of the year," Arscott said. He said the bill is being held up mainly by issues not directly related to PIRO such as requirements for double-hulled tankers and U.S. adherence to international protocols governing spill liability.

Arscott said the intention is to ask the 20 oil-company members of PIRO "in the next few weeks to make some commitments even if there is no legislation."

If there was only the issue of duplication of government efforts, "there would be some way we could move forward," Arscott said. But the issue of limiting liability to PIRO or another group helping to clean up a spill is critical, he said. "It's important to be protected if you help someone else in trouble," the executive said.

The Senate version of the oil spill legislation doesn't give PIRO immunity to spill-damage liability, Duca said. In its July 3 statement following the June 20 PIRO announcement last year, the API said:

"The program will necessarily be consistent with government laws and regulations, but the PIRO program is being established and will move forward even without formal governmental approval. And its funding will be a company business expense, not dependent on government subsidy."

At the time of the PIRO announcement last year, it was estimated the organization would cost $275 million over five years, Duca said. This estimate has since grown to $500 million, he indicated.

NEW YORK (JUNE 12) UPI - Macmillan Inc. said Tuesday it has purchased a 51 percent stake in Keter Publishing House Ltd., a large Israeli publisher and book retailer, from Clal (Israel) Ltd. Financial terms were not disclosed.

The acquisition of Keter, which has 34 retail outlets and publishes works in Hebrew, is the cornerstone of a plan by British publishing magnate Robert Maxwell, who bought Macmillan in 1988, to become a "major publishing force" in Israel said Harry McQuillen, president of Macmillan. Maxwell has announced he is negotiating to buy Maariv, another large Israeli publisher.

In a news release, Maxwell said Keter's alliance with Macmillan will allow Keter, which has annual revenues of about $15 million, to reduce the price

of imported books and journals.

Plans also call for Keter to establish a division to translate scientific and technical publications, using the skills of Russian immigrants in such work.

McQuillen said Macmillan intends to take developing Israeli authors, translate their works from Hebrew to English and sell them under Macmillan imprints in the United States. The company also plans to sell some of its English language books in Keter stores. Clal Ltd., an Israeli conglomerate will retain a 24 percent position in Keter, the companies said.

#90163u1997 06/12/1990 ~United Press International

PIKEVILLE, KY (JUNE 12) UPI - A former FBI agent pleaded guilty Tuesday to manslaughter in the strangulation death of his pregnant, married girlfriend - a year to the day after she disappeared in what officials said was the first criminal killing by an agent.

Mark Putnam, 30, of Miami was sentenced in Pike County circuit court to 16 years in prison. The skeletal remains of Susan Daniels Smith, 27, of Freeburn were found June 4 in a ravine in Pike County.

Kentucky Commonwealth Attorney John Paul Runyon said Putnam confessed to the death and told authorities where to find the body. Putnam had been under investigation since Smith disappeared last June 12.

Terry O'Connor, the director of the FBI's Louisville bureau, said this was the first time an FBI agent had pleaded guilty to manslaughter committed while he was on the agency's payroll.

''This incident has damaged the FBI's reputation and its most valuable asset - that being the public trust,'' O'Connor said. ''We are following up on this and I would expect some administrative changes to result from it.''

O'Connor said Putnam was working in Pikeville in 1988, investigating a series of bank robberies in the area. Smith was an informant and worked closely with Putnam.

Putnam had returned to Pikeville in June 1989 for a pre-trial hearing in the bank robbery case following his transfer to Miami. Smith had told her sister she was going to force Putnam to divorce his wife and marry her.

O'Connor said situations like the relationship between Putnam and Smith are not strictly prohibited in the FBI, but agents know to avoid such entanglements with sources.

Both had two children in their respective marriages and Putnam strangled Smith, who claimed she was four months pregnant with his child, when she refused to have an abortion, said special agent Bill Cheek of the FBI in Kentucky.

In his confession, Putnam said he and Smith were traveling to the woman's house when an argument turned violent. He said attempts to revive her with cardiopulmonary resuscitation.

Runyon said Putnam contacted him by phone and confessed to the slaying several days after the former agent had failed a lie detector test in May. Runyon said the state did not pursue a murder charge because of a lack of evidence.

He said the state had no evidence linking Putnam to the body and had murder charges been pursued, Putnam likely would have walked away free.

Runyon said he doubted the remains every would have been found without Putnam's cooperation. The body was covered with heavy brush, and the ravine is in a remote section of the county.

''This is the first time in my 28-year career that I had a man on the

phone wanting to confess to murder and I could not charge him for it,'' Runyon said.

#90163u2002 06/12/1990 ~United Press International

MOSCOW (JUNE 12) UPI - The leaders of the Lithuanian, Latvian and Estonian republics met with President Mikhail Gorbachev Tuesday and said they were taking home compromise proposals to end the deadlock on Baltic independence.

The officials refused to give details of the proposals until they had been discussed by the Parliaments in the three republics, but the plan apparently involves freezing their declarations of independence at the same time as the Kremlin began talks on secession and ends a blockade of Lithuania.

''It might be possible to find a way out of today's situation so that a true political dialogue could begin between Lithuania and the Soviet Union with simultaneous ending of the blockade,'' Lithuanian President Vytautas Landsbergis said after meeting Gorbachev.

Gorbachev, who faced another challenge when the Russian republic announced its sovereignty earlier Tuesday, repeated his demand that Lithuania and the other Baltic republics suspend their declarations of independence, but softened his stand somewhat by saying the suspension could be temporary.

Landsbergis said he would bring Gorbachev's proposal back to the Parliament in Vilnius, but he refused to give details of the compromise plan or say whether he would support a temporary freeze of the independence proclamation.

Latvian President Anatoljs Gorbunovs said if his republic's Parliament reacts positively to the compromise proposal to freeze the Latvian declaration of independence, negotiations could begin on a transition period to secession.

''We proposed very concrete negotiations to conclude a treaty on the legal status of the transition period,'' Gorbunovs said. ''If we talk about a transition period, we're talking about the implementation of state

sovereignty. Thus this is full 'de jure' (legal) recognition of our declaration.''

Gorbunovs and Landsbergis made the comments after an hourlong meeting with Gorbachev that followed a session of the Federation Council that groups leaders of all 15 Soviet republics. Estonian President Arnold Ruutel attended the meetings, but flew back home and was unable to attend a news conference.

Hours before the meetings Tuesday, Gorbachev softened his stand on Lithuania's declaration of independence, telling the Supreme Soviet even a temporary suspension of the March 11 proclamation would be sufficient for the Kremlin to agree to negotiations on secession.

Lithuania had previously refused to suspend the declaration of independence but has offered to suspend all laws implementing it.

Also attending the Federation Council meeting was Russian republic president Boris Yeltsin, fresh from a legislature session that declared sovereignty for the Soviet Union's largest republic.

The vote by the Russian legislature does not indicate the republic is ready to withdraw but it does represent a serious challenge to Gorbachev's central government because the declaration decreed that Russian laws supercede Soviet laws in the republic.

According to Landsbergis, Yeltsin repeated his offer to sign direct trade and political agreements with the Baltic republics.

The Baltic presidents had refused to attend previous Federation Council meetings on the grounds that since their declarations of independence they were not part of the Soviet Union.

Gorbachev told the Supreme Soviet Tuesday morning he was now willing to interpret ''in a wide sense'' the need for Lithuania to rescind its declaration of independence before talks.

''If there would be a suspension of those actions taken and a return to the situation of March 10, even only for the time discussions are going on ... then we shall be able to start negotiations,'' Gorbachev said.

The call for a temporary suspension of the independence declaration was a softening of Gorbachev's earlier demands that the actual declaration be rescinded or suspended indefinitely.

Gorbachev cut off oil, most natural gas and other supplies to Lithuania in an effort to force the republic to back off its declaration of independence.

He threatened similar sanctions against the other two Baltic republics, which passed less radical declarations of independence. All three republics have elected nationalist governments and declared their intention to split from Moscow.

AUSTIN, TX (JUNE 12) UPI - An earthenware bowl excavated from an Indian burial ground in New Mexico could be one of the few historic references to the exploding star that gave birth to the Crab Nebula almost 1,000 years ago, astronomers said Tuesday.

The black and white, 7-inch bowl was unearthed at Galaz, N.M., in the mid-1930s, but Ralph Robbins and Russell Westmoreland of the University of Texas astronomy department said they recently discovered compelling evidence images painted on the artifact represent an astronomical record.

One of the painted black images is a rabbit curled into a crescent shape to symbolize the moon. At one of its feet is a small sunburst with 23 lines, apparently representing the 23 days the Crab Nebula was clearly visible in daylight hours.

According to a computer analysis, the sunburst appears in relation to the rabbit in the general location that the supernova appeared in relation to the crescent moon on the morning of July 5, 1054.

''The bowl provides us with the best supported historic record from the western hemisphere of the supernova that created the Crab Nebula, and it goes far in telling us about the sophistication of a group of Southwestern Indians,'' Robbins said.

''In fact, the bowl is the most certain record of the supernova that has ever been discovered outside China and Japan,'' he said.

The supernova, or exploding star, that created the Crab Nebula was first seen from Earth in 1054. The event was observed in the Far East but is not mentioned in European documents of that era. Historians know from Chinese documents that the supernova was visible in daylight for 23 days because court astrologers made careful observations for the emperor's benefit.

Today, the nebula is invisible to the naked eye but appears through a telescope as a milky, globular mass of light in the eastern area of the constellation Taurus near the star Zeta Tauri.

A supernova is the explosion of star that ejects matter in all directions. If one occurs close enough to Earth, the light can be seen for days or even weeks during the daytime. Through a telescope, the remnants of the explosion appear as huge clouds a few light years across.

At the annual meeting of the American Astronomical Society, Robbins and Westmoreland explained the astronomical and archeological importance of the earthenware bowl and other bowls painted by the Mimbres Indians of southwestern New Mexico.

Robbins said the rabbit was a well-known lunar deity in Mesoamerican folklore and a common representation of the moon in artwork by many Indian cultures of the New World. In other bowls discovered at Galaz, markings on the rabbits prove that the Mimbres people clearly understood the phases of the moon.

''The bowls show that the Mimbres people were certainly consistent observers of the moon,'' Robbins said. ''Some bowls apparently have eclipse representations as well, so we can theorize that they possessed a systematized knowledge of naked-eye astronomy.''

Archeologists dated the Galaz finds to the 11th century. The village seems to have been abandoned in about 1130 A.D., most likely because of economic competition from the Casas Grandes Indians of Mexico.

(JUNE 12) UPI - Fire dwindles aboard a tanker burning in the Gulf of Mexico... two people die in explosions at a Mississippi fireworks factory... and the Russian republic challenges Moscow. Those and other top stories, next, from U-P-I.

Firefighters are into a third day of battling a blaze aboard a Norweigan tanker in the Gulf of Mexico 57 miles shoutheast of Galveston, Texas.

Six fireboats and dozens of firefighters are at the scene, hoping to prevent a spill of the Mega Borg's cargo of 38-Million barrels of crude oil.

The Coast Guard had good and bad news to report on the situation today. Coast Guard Captain Thomas Greene says the fire has been doused in the ship's pump room and on the waters surrounding the giant tanker.

But flames are still roaring in the below-decks engine room and in the crew quarters... with a steady plume of black smoke pouring into the air.

Greene says the steel of the superstructure is cooler and firefighters are getting closer to the point where they can use chemical foam against the remaining flames.

Greene says the flow of flaming oil over the ship's stern and into the water has ended, and the oil already in the water has stopped burning. But he adds that's bad news as well, since it increases the amount of pollution.

The tanker has been on fire since an explosion Saturday that killed two crew members and left two others missing.

#90163u2038 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The House voted Tuesday to create a $10 million fund for research into aviation catastrophes, such as the jet that lost its roof near Hawaii and the jumbo jet that crash-landed in Iowa.

If the measure is approved by the Senate and a subsequent appropriations bill is passed, the Federal Aviation Adminsitration would get the money for research on ways to detect potentially catastrophic design or manufacturing flaws in aircraft.

The bill, prompted by the two dramatic accidents, was adopted on a voice vote.

In the first accident, in April 1988 a forward portion of the roof of an older Boeing 737 operated by Aloha Airlines peeled off in flight. A flight attendent was pulled from the plane in flight and vanished, but the cockpit crew successfully landed the damaged aircraft.

The failure was blamed on fatigue caused by repeated flexing of the aircraft skin from pressurization and corrosion from being operated in a salt air environment.

In the July 1989 Sioux City crash, involving a United Airlines DC-10, there was a fan disk in the tail-mounted engine disintegrated, spewing

shrapnel that severed hydraulic lines that operate the plane's control surfaces. A crack in the disk had gone undetected.

The flight crew manipulated the throttles on the engines mounted on each wing to maintain some control over the plane, The crippled jet carthweeled into flames as it landed, killing 112 passengers and crew members. However 184 survived.

The manufacturer and FAA later recommended that a check valve be installed in one of the hydraulic lines on similar planes to keep some hydraulic fluid from draining in case all the lines were cut.

Rep. Richard Roe, D-N.J., chairman of the Public Works and Transportation Committee, argued the legislation ''could significantly improve aviation safety in the future.''

Rep. Tom Lewis, R-Fla., the senior Republican on the panel, said both accidents could have been prevented, but FAA inspection efforts had failed to detect the problems.

#90163u2042 06/12/1990 ~United Press International

SEATTLE (JUNE 12) UPI - The Boeing Co. said Tuesday one its new 767s flying from Seattle to Nairobi set a world distance record for a twin-engine commercial jet.

The 767-200ER, or ''extended range,'' airliner was flown 9,253 statute miles between the two cities in 18 hours, 29 minutes. The aircraft averaged 518 mph during the trip, Boeing said.

The plane arrived Sunday for delivery to Royal Brunei Airlines, national carrier of Brunei Darussalam.

The plane, carrying a crew of four and 20 passengers, also set twin-engine records between Seattle and several fly-over locations, including Amsterdam and Munich. It was powered by Pratt & Whitney PW4056 engines.

Pending final verification, the National Aeronautic Association established the flight as a world distance record for twin-engine commercial airliners, surpassing the previous record of 8,893 statute miles, also set by a Boeing 767.

(JUNE 12) UPI - Firefighters say they have controlled a blaze at a rural Mississippi fireworks factory. The fire was touched off by explosions that killed at least two people.

Emergency crews evacuated a four-mile area around the plant 15 miles south of Columbus after today's blasts that shook buildings 15 miles away.

Fearing the flames would touch off more explosions, crews carted away some of the volatile materials used to make the Fourth of July pyrotechnics.

One woman living about two miles from the factory says at first she thought a train had derailed from a nearby track... and then she felt her house move.

Firefighters at the scene reported two dead and one injured. Officials believe 10 people were inside the plant when the explosion occurred... and some have NOT been accounted for.

The blast caused extensive damage to the brick factory building... which was apparently filled with gunpowder and chemicals used to make fireworks.

Federal agents were sent to the scene to investigate.

#90163u2060 06/12/1990 ~United Press International
PENSACOLA, FL (JUNE 12) UPI - A model flying saucer that cast doubts on a man's claim he photographed UFOs two years ago has been tested and is being returned to the man who found it, a newspaper editor said Tuesday.

Ken Fortenberry, managing editor of the Pensacola News Journal, said results of the tests would not be known for a couple of weeks. He declined to say what tests were performed.

The discovery of the 9-inch model was the latest twist on a story that began in 1987, when contractor Ed Walters took photos of objects that appeared to be flying saucers near his home in Gulf Breeze, a suburb of Pensacola.

The photographs prompted a wave of sightings from other residents that continue to this day. Walters claimed he had dozens of additional

encounters, including a face-to-face confrontation with a 4-foot alien.

His book about the encounters is selling well.

A private group that investigates UFO sightings calls the Gulf Breeze flurry among the most notable sightings in U.S. history. Skeptics have long claimed the pictures were faked, but offered no proof.

Then came the model.

It was found in April by a man who moved into a house once owned by Walters. The newspaper got possession of the model, and on Sunday printed pictures by staff photographers using the model.

They look similar to Walters' pictures.

''This is a very critical piece of evidence and a very controversial story '' said Fortenberry, who said the newspaper was besieged with calls Monday from the media asking about the model.

Meanwhile, a UFO investigator claims his analysis of the pictures published by the newspaper indicates it is not the same object as the ones Walters photographed.

Bruce Maccabee, an optical physicist at a Navy lab in the Washington area, said he has not seen the model or the photos published by the newspaper. But he said he had Walters take some measurements of the picture.

Maccabee said the model has different proportions from Walters' photos.

''What this means is that whatever Ed's UFO pictures show, they don't show that model,'' said Maccabee.

The model was to be returned to the owners Tuesday.

The man, who wished not to be identified, said he was installing an ice-maker in his home and had gone to the attic to trace some pipes when he found the model under some insulation.

''It was not a shock or startling or anything,'' said the resident, a scientist. He knew of Walters' involvement in sightings and figured the model was one that Walters may have built for a reenactment. ''I thought nothing more about it.''

Later, he saw a diagram of the Walters' UFO.

''I recall thinking to myself, that model looks a lot like this diagram,'' he said. Last week he received a visit from a reporter from the newspaper.

''This, frankly, I find a little suspicious,'' said the resident, who said the reporter showed up at the door and asked whether he had found any photographs or models. That's when he told him.

''I wish I had lied,'' he said.

Walters insists there was ample opportunity for someone to plant the model.

''The house was on the market for 10 months, during which time it was opened during the day and sometimes closed up and locked up at night,'' said Walters. ''Sometime, somebody planted this model.''

''The way I see it is this: It's very suspicious that three weeks before the big international symposium, suddenly this model pops into the act,'' said Walters.

#90163u2067 06/12/1990 ~United Press International

TRENTON, NJ (JUNE 12) UPI - The 91-year-old widow of Bruno Richard Hauptmann, who was executed in 1936 for the kidnap-murder of Charles Lindbergh, Jr., said Tuesday she wants Gov. Jim Florio to declare her husband innocent of a crime that shocked the world.

Anna Hauptmann, white-haired and frail, said in a strong German-accented voice that her only wish was to meet with Florio before her death and have him clear her husband's name.

The murder of aviation hero Charles Lindbergh's 20-month-old son, committed despite the payment of a $50,000 ransom, seemed to be history after Bruno Richard Hauptmann was electrocuted for the crime.

For more than 50 years, Mrs. Hauptmann declared her husband's innocence but few listened until she met San Francisco attorney Robert Bryan in 1981.

Bryan successfully sued the New Jersey State Police to obtain 100,000 pages of documents on the case, and pored over another 100,000 pages unearthed from the files of Harold Hoffman, who was the governor at the time of the trial.

Bryan found evidence he believed shattered the state's case against Hauptmann but a series of court decisions refused to reopen the case. Both state and federal courts ruled that the statute of limitations had run out in the case, and that prosecutors in the case were protected from prosecution in connection with actions undertaken in the course of their official duties.

''Our ultimate goal is the recognition that the 'Trial of the Century' was unfair and that Richard Hauptmann was innocent,'' Bryan said.

Bryan and Mrs. Hauptmann now pin their hopes on appealing directly to Florio to review the evidence the courts have refused to consider. Bryan said he does not want the case reopened but a statement from Florio declaring Hauptmann innocent.

He cited long-sealed FBI records of fingerprints lifted from the ransom letters which did not match Hauptmann's, shoddy handling of evidence from the scene, and documents showing that both Lindbergh and Dr. Charles Condon, who delivered the ransom money, expressed doubt in their identification of Hauptmann.

''We have tried to work through the judicial branch and the legislative branch, now we must try to work with the executive branch,'' Bryan said.

In a May 21 letter to Florio, Mrs. Hauptmann wrote: ''Dear sir: I am the widow of Richard Hauptmann, who was killed in 1936 by the State of New Jersey. I am 91 years old and haven't much time left on this earth... I want to have my husband's name cleared... I do not want any money. All I ask is to talk to you and show you the truth... Please do not turn me down I want to talk to you. Please, sir, see me,''

A letter of reply said the state attorney general had advised Florio that there was no basis to reopen the case, and declined Mrs. Hauptmann's request for an appointment.

But questioned at a news conference later, Florio did not rule out a meeting with Mrs. Hauptmann, saying, ''to make a determination of whether a trial was fair or not is something for which there are legal remedies.

''I have no reason to believe one way or another'' whether the trial was fair, Florio said.

If Mrs. Hauptmann and her attorney present specific legal arguments in favor of an action that is within his authority as governor, Florio said he would be willing to consider them.

In the meantime, ''I'm at a loss because no specific proposal has been offered,'' he said.

Bryan believes that the half-century-old case still holds political risks in New Jersey.

''Though (prosecutor David) Wilentz is no longer with us, his spirit lives on,'' he said, ''And his son Robert is the chief justice of the State Supreme Court.''

Mrs. Hauptmann is undiscouraged. She told reporters again how she drove home with her husband at the time police say he was committing the kidnapping and murder.

''Some of my friends have seen him (Florio) and they tell me this man looks like he will do the right thing,'' Mrs. Hauptmann said.

She lives in a quiet suburb outside Philadelphia, where she mops the floors herself and insists on taking the bus to a senior citizens' center each day.

Mrs Hauptmann said she believes she can convince Florio of her husband's innocence if she could just met with him. ''I believe I can, because I don't lie. I will tell him what happened.''

#90163u2102 06/12/1990 ~United Press International

(JUNE 12) UPI - Yet another challenge for Mikhail Gorbachev.

Russia intensified the drama in today's meeting between the Soviet President and the leaders of the nation's republics, including the rebellious Baltic ones.

The Russian republic, the largest of the 15, declared its sovereignty today... just before maverick leader Boris Yeltsin set off for the meeting in Moscow.

Russia's new Congress of People's Deputies voted 907-13 in challenging the authority of Gorbachev's central government... prompting Yeltsin to predict that the date will be remembered as Russian independence day.

In Moscow, Gorbachev met with the presidents of Lithuania, Latvia, Estonia and the other republics. It's his first meeting with the Baltic chiefs since their rebellion against Soviet rule.

The meeting came amid a softening stance by the Kremlin leader. Gorbachev said even a temporary suspension of Lithuania's independence declaration would be enough to begin negotiations on its secession.

On another controversy, Gorbachev said today he would agree to a unified Germany's joining NATO... but there is a condition.

Gorbachev says he'd go along with the idea if a unified Germany could also have an ''associated membership'' in the Warsaw Pact.

President Bush rejected the proposal.

#90163u2131 06/12/1990 ~United Press International
WASHINGTON (JUNE 12) UPI - Ignoring threats of a veto, the House gave final congressional approval Tuesday to a bill that would lift the half-century Hatch Act ban on partisan political activity by federal employees.

The bill would allow some 3 million federal workers to take part in virtually all political activities, except running for public office on a partisan ticket.

The Senate passed the bill May 10, by a 67-30 vote, and the House agreed to accept the Senate measure without amendment on a 334-87 vote. It now goes to the White House - and a likely veto from President Bush.

The Hatch Act was passed by Congress in 1939 in response to numerous scandals involving political patronage and efforts to solicit campaign contributions from federal workers.

In recent years, critics have argued the law has become outdated by the expanded civil service system and they have tried several times to revise it. President Ford vetoed a 1976 bill that would have eased the restrictions and administration officials say Bush will veto the current version.

Rep. William Clay, D-Mo., arguing for the bill, said federal employees ''should no longer suffer under an antiquated, unnecessary law that abridges their First Amendment rights.''

Rep. William Ford, D-Mich., said the bill represents ''the political emancipation of 3 million federal workers.''

''We are going to give them - after 50 years - the same political rights as their counterparts in the newly formed democracies of Eastern Europe,'' Ford said.

Rep. Frank Wolf, R-Va., whose suburban Washington district includes a large number of federal workers, said most federal employees do not support the bill and want the Hatch Act left in place to protect them from pressure to get involved in politics.

Wolf said the law is still needed. ''Human nature has not changed. It has not been repealed by Congress, and the abuses that prompted passage of the Hatch Act in 1939 are still possible and with us today,'' he said.

The bill would allow federal employees, on their own time, to take part in political activities, such as working in campaigns or voter registration drives, or serving as delegates to nominating conventions. They would be allowed to hold office in a political party, but they could not run in a partisan election for public office.

The bill would restrict fund-raising efforts by allowing federal workers to solicit contributions only from members of their own unions, and not from workers in other government agencies or from the general public.

It would specifically prohibit employees from using their official positions to influence an election outcome.

Following passage of the bill, Vincent Sombrotto, president of the National Association of Letter Carriers, urged Bush to sign the measure. ''It is time now for President Bush to join in ending a half century of political discrimination,'' he said.

#90163u2136 06/12/1990 ~United Press International

(JUNE 12) UPI - The Senate Ethics Committee today began a rare public investigation of one of its own members.

The panel is trying to determine if G-O-P Senator David Durenberger of Minnesota violated ethics regulations by scheming to exceed limits on outside income.

The panel's special counsel, Robert Bennett, opened the meeting by laying out the case against the three-term senator.

He charged that Durenberger- ''knowingly and actively participated in an arrangement'' for the purpose of circumventing limitations on outside income.

At the heart of the proceeding is a charge that Durenberger used two of his books and a Minneapolis-based book publisher, Piranha Press, to exceed limits on outside income by about 100-thousand dollars.

Under the alleged arrangement, the senator sidestepped the limits by calling his speeches ''book promotions'' and having the money paid to the publisher, which then turned it over to him.

The clash over a proposed constitutional amendment to ban flag desecration is heating up in Washington.

President Bush discussed the issue during a meeting with G-O-P congressional leaders today. Senate Republican leader Robert Dole emerged from the meeting waving a small U-S flag... but the Kansas lawmaker denies Republicans are manipulating the issue.

Dole yesterday declared that a vote against the amendment would make ''a pretty good'' campaign spot, drawing an angry response from Democrats.

But Washington Democrat Thomas Foley says he doubts the public is going to react to what he called ''the honest judgment of members about protecting the Bill of Rights.''

A House vote on an amendment could come late next week. It must be approved by two-thirds of both the House and Senate... and then win ratification by at least 38 states.

#90163u2137 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - The dollar finished mixed in New York trading Tuesday as the foreign exchange market remained in the doldrums with the exception of a rally by the British pound on European Monetary System news.

Sterling's rally began in the Asian and European sessions after the Financial Times newspaper of London said the British government would put its currency into the EMS's exchange rate mechanism by September or October.

The British unit climbed despite a government disclaimer calling the report "unfounded." Financial markets believe full EMS membership will stabilize the pound, bringing down high British interest rates and inflation.

"It has been denied, but the market doesn't feel it was a total denial," said Terry Reid, a Harris Trust & Savings Bank currency vice president in Chicago. She said most of sterling's move was in European trading. Britain's currency finished in New York at $1.7030, up from $1.6860 Monday.

Otherwise, said Mark Morris of National Westminster Bank in New York, it was a "dull, monotonous, ho-hum day" without much inspiration for trading of the dollar against the mark, yen and other units.

In late New York trading, the dollar was quoted at 1.6960 West German marks, up from 1.6925 marks Monday, and 154.59 Japanese yen, down from 154.75.

But Reid of Harris Trust said the dollar nonetheless seemed "well bid," firm against most major world currencies.

Inhibiting trading, most participants had taken up positions in advance of U.S. data on retail sales, due Wednesday, and later releases of wholesale and retail price figures, along with April trade numbers.

In the meantime they have limited themselves to trading in narrow ranges that leave little margin for profit. "It's been kind of a tough day to make money," Morris lamented.

Other dollar rates: 1.4375 Swiss francs, off from 1.4410; 5.7075 French francs, up from 5.6960; and 1,244 Italian lire, up from 1,243.

In Europe, the dollar closed mostly lower against the main currencies as

the pound sterling dominated trading on the Financial Times report.

"The dollar had a fairly steady performance but most action was on sterling, especially on the EMS," said Klaus Elsner of Deutsche Bank in Frankfurt.

The markets largely ignored a statement by government officials later in the morning that the report had been pure speculation. Sterling finished almost two cents higher at $1.7055 against $1.6860.

The U.S. currency edged back from its day highs against the mark on news that the West German opposition won't block German monetary union.

In Frankfurt, the dollar declined to 1.6910 deutsche marks from 1.6925 Monday and also fell in Zurich to 1.4350 Swiss francs from 1.4395.

It slipped in Paris and Milan to 5.6940 French francs against 5.6975 and to 1,242.15 lire from 1,243. It held in Brussels at 34.75 Belgian francs.

Earlier in Tokyo, the U.S. dollar climbed against the yen as the beneficiary of busy yen trading against European units. It ended at 154.40 yen, up 0.3 yen from Monday's closing rate of 154.10 yen.

Gold rose in Zurich to $356 an ounce from $355 Monday. It moved up similarly in London to $356 an ounce from $355.

Republic National Bank in New York closed cash gold at $355.25 an ounce, off from $355.75 Monday. The New York Commodity Exchange settled gold at $355.70 an ounce, down from $356.40.

Silver was higher in Zurich at $5.05 an ounce, compared with $5.00. London silver also advanced, to $5.05 an ounce from $5.01.

Republic closed cash silver at $5.035 an ounce, up from $5.02, while Comex spot silver finished at $5.018 an ounce, up from $5.012.

(JUNE 12) UPI - NASA technicians performed a shuttle shuffle today.

They hauled the crippled shuttle Columbia off its launch pad to make room for the healthy shuttle Atlantis, which is scheduled to take off next month on a secret military mission.

Columbia was brought back to the Vehicle Assembly Building... three-and-ond-half miles away.

Engineers plan to remove the shuttle from its external tank so it can be moved into a ground processing hangar Friday for repairs.

Technicians need to fix a hydrogen fuel leak that has delayed the ship's 10-day astronomy mission until mid-August at the earliest.

With Columbia out of the way, engineers are proceeding with plans to haul the shuttle Atlantis to the launch pad for blastoff next month.

Details about the flight are classified, but sources say the mission is scheduled to last about four days.

Peace talks today between Liberian rebels and government negotiators were short, but far from sweet.

The two sides met for the first time at the U-S embassy in neighboring Sierra Leone, where each party rejected the other's proposal for a cease-fire to end the six-month-old civil war.

The four members of the rebel delegation say they'll call a cease-fire only after President Samuel Doe and his government resign.

Government representatives say Doe has NO intention of stepping aside.

The break comes amid reports that troops loyal to rebel leader Charles Taylor have pushed to within 40 miles of the Liberian capital of Monrovia in their drive to oust Doe.

In separate interviews yesterday, both Doe and Taylor made it clear they were NOT ready to move from their previously established positions.

Taylor says he only agreed to peace talks to prevent what would otherwise be a bloodbath.

#90163u2182 06/12/1990 ~United Press International

(JUNE 12) UPI - Some opposition supporters in Bulgaria's capital of Sofia say Sunday's elections were rigged.

Official returns today confirmed a communist victory... making Bulgaria the only former communist East European country to return ruling communists to power.

Results show that the old communist party won more than half the 116 seats up for grabs so far in individual constituency races.

And while international observers say elections seemed fair, the Union of Democratic Forces says the vote was manipulated in the nation's rural areas.

Projections of a communist victory sparked demonstrations yesterday by tens of thousands of people in Sofia, where the opposition is the strongest.

One student leader says the demonstrations will continue until the government addresses concerns of a vote fraud.

LOS ANGELES (JUNE 12) UPI - Actress Theresa Saldana began sobbing Tuesday after taking the witness stand to testify against a deranged drifter convicted of stabbing her in 1982 and who now faces charges of threatening to kill her once he is freed.

''I'm afraid to talk in front of him,'' Saldana - dabbing tears from her eyes, her voice cracking with emotion - told Deputy District Attorney Sterling Norris before answering a single question.

Municipal Court Judge Elva Soper then ordered a short recess in the preliminary hearing for Saldana's attacker, Arthur Richard Jackson, 53, a Scottish drifter who is obsessed with the actress.

Saldana, 34, was ushered out of the courtroom to an anteroom, where she could be heard sobbing and repeating, ''I'm afraid to talk in front of him.''

A few minutes later, the actress, appearing composed, re-entered the courtroom and testified that she took seriously the written death threats allegedly mailed by Jackson.

''I considered the threats extremely credible, especially in light of the fact that he tried to murder me,'' Saldana, who avoiding looking at Jackson, testified.

The heavily shackled Jackson, who was seated at the defense table, kept his head down, with a blank expression on his face, during much of her testimony.

Jackson was convicted in October 1982 of attempted murder for stabbing Saldana 10 times outside her West Hollywood apartment in March of that year. He was sentenced to 12 years in state prison, but because of good behavior, his sentence was shortened and he was paroled earlier this year.

Jackson, however, remains in custody in County Jail on 16 new felony counts of repeatedly vowing to kill Saldana upon his release from prison.

He is also charged with threatening to kill Jeff Fenn, a former deliveryman who is now a sheriff's deputy. Fenn came to Saldana's rescue during the 1982 attack, pulling Jackson off the actress and saving her life.

The threats allegedly made by Jackson were contained in letters sent to the New York producer of Geraldo Rivera's talk show, on which Saldana had appeared.

In his letters, Jackson makes repeated references to his ''divine mission'' to kill ''assassination target Theresa Saldana.'' He writes that she and others will be ''focused on and their lives forfeited by terrorist hit squads.''

If convicted of the threat charges, Jackson could be sent back to state prison for up to seven years and eight months. He also faces deportation to England on murder charges for allegedly shooting a passer-by during a 1967 London bank robbery.

Saldana, who has appeared in such films as ''Raging Bull'' and a television movie based on her experience, testified she had recovered from the psychological effects of the stabbing before learning of the death threats.

''But when I read the letters, I developed a number of stress reactions and I had a very difficult time adjusting to them,'' she said.

Those reactions included insomnia and ''terrible nightmares of being murdered,'' she said. The actress said she also re-entered psychotherapy.

''I was living in such extreme fear because of the threats,'' she said. ''I made a number of adjustments in my personal life, like traveling under different names.''

Outside court, Saldana said she had tried to prepare emotionally for seeing Jackson again, but had obviously fallen short.

''He's a very scary-looking person,'' she said. ''It's very obvious he intends to harm me and other people. I'm really hoping the judge will put it (the case) over for trial. This is our hope, to keep him in custody.''

The hearing is scheduled to end Wednesday, at which time Soper will decide whether the evidence warrants holding Jackson for trial.

WASHINGTON (JUNE 12) UPI - A top United Nations official urged President Bush Tuesday to go beyond ''lip service'' to the environment and drop his opposition to a new global fund to help Third World nations cut use of ozone-depleting industrial chemicals.

In a speech at the National Press Club, Mostafa Tolba, executive director of the U.N. Environmental Program also said he believed the world could agree on international treaties to fight global warming and promote biological diversity in time for a 1992 world environmental conference.

In regard to both treaties, Tolba said: ''We will strive not for a paper tiger, but (treaties) with clout.''

He said that, despite Bush's repeated assertions that more scientific research was needed on global warming, he expected the United States to show leadership on a climate change treaty.

Tolba said there was growing international consensus that immediate action was needed on global warming and added: ''I'm sure the U.S. will not block that unanimity.''

However, Tolba said ''the first real test'' of Bush's environmental commitment was the creation of the Third World fund, which he termed essential to saving the Earth's eroding ozone layer and laying the foundation for future environmental treaties.

Tolba said the fund was the major issue to be resolved at an international conference in London June 20 to strengthen the Montreal Protocol, the treaty under which 57 nations have agreed to reduce use of chlorofluorocarbons, or CFCs, and other ozone-depleting chemicals.

''London will be the first real test of whether nations are truly prepared to make the required grand bargain or whether we are still in the lip service phase,'' Tolba added.

Scientists have verified CFC damage to the protective ozone layer, which screens out harmful levels of ultraviolet radiation from the sun. They say without elimination of CFC use by all countries, the world faces huge increases in skin cancer and cataracts and severe damage to plants and ocean ecosystems.

Despite the clear need for worldwide action, Tolba noted the United States - alone among the Western powers - opposed creation of the Third World

fund to help poor nations ''leapfrog'' CFC technologies and use environmentally preferable - but more costly - chemical substitutes now coming on the market.

Initial proposals called for a $100 million fund, with the U.S. share to be $25 million over three years.

At a meeting in Geneva last month, U.S. officials said the Bush administration supported such aid to Third World countries. But they contended that assistance should come from existing lending institutions, such as the World Bank, and that there was no need for a new fund.

However, Tolba said Third World countries needed outright grants - not loans - to make the expensive leap to new technologies replacing CFCs, which are used as refrigerants, cleaning solvents and in the manufacture of foam products.

''We need to agree that this (fund) will be additional to current development aid,'' Tolba said.

''I sincerely hope the U.S. will reconsider its position and come to London with a commitment to support the Third World over and above what the United States is doing today,'' he said. ''What I mean is, additional resources.''

Tolba said it was in the United States' self-interest to help Third World nations because only a concerted world effort could stop ozone depletion and global warming.

''Western nations cannot do it alone,'' he said. ''We move together as a world community or not at all.''

#90163u2284 06/12/1990 ~United Press International

SAN JOSE, COSTA RICA (JUNE 12) UPI - Costa Ricans and foreign officials mourned three-time President Jose ''Pepe'' Figueres at his funeral Tuesday recalling his historic decision to abolish Costa Rica's army.

Nicaraguan President Violeta Chamorro, her predecessor, Daniel Ortega, and former Costa Rican President Oscar Arias attended the service at San Jose's Metropolitan Cathedral, which began nearly an hour behind schedule.

Figueres, who died Friday at age 83, launched the month-long civil war in 1948 that toppled President Teodoro Picado and his communist allies and installed a democratic system in Costa Rica.

After the revolution, he took his place in the nation's history by

abolishing the country's army and turning its barracks into schools and museums, arguing the military was a threat to ''internal peace.''

As bells pealed, Figueres' body was carried to the cathedral in a green two-wheel cart behind a flower-draped vehicle from the National Museum a few blocks away.

The crowd waved handkerchiefs and sang the Costa Rican national anthem as the casket, draped with the red, white and blue-striped Costa Rican flag, was carried into the cathedral.

Schoolchildren handed out posters of the historic photograph of Figueres using a mallet to break a rampart and an army barracks when he abolished the nation's army Dec. 1, 1948.

The crowd applauded and cheered past and present officials arriving for the service, especially Arias, as onlookers chanted, ''Oscar, Oscar.''

After the service, dozens of pigeons were released from the Cathedral's front steps in a drizzling rain.

Figueres' body was returned to the cart for a procession through San Jose to his farm, called ''The Endless Fight,'' for burial Wednesday morning.

Hundreds of Costa Ricans packed the cathedral and the central park in front where they heard on loudspeakers the service and eulogy by San Jose Roman Catholic Archbishop Roman Arrieta.

Arrieta listed Figueres' accomplishments, emphasizing his decision to disband the army.

''Hopefully, the day will come soon that his decision to abolish the army will be followed in all of Central America,'' the archbishop said.

Ortega said he came to pay his respects and those of Nicaragua's Sandinista party because he was grateful for Figueres's support for the Sandinista revolution in 1979 against dictator Anastasio Somoza.

Figueres stirred controversy in the mid-1980s in Costa Rica during the administration of former President Luis Alberto Monge, continuing to voice support for the Sandinistas as the United States worked against them.

''It was a moral support, a political support, an integral support,'' Ortega said.

Costa Rican President Rafael Angel Calderon, whose father was Figueres' chief rival during the Costa Rican civil war of 1948, did not attend the funeral service. Calderon paid his respects Monday at the National Museum

where Figueres body lay in state.

Chamorro and Ortega also received warm welcomes. Calderon met earlier with Chamorro at the presidential house.

Chamorro said she hoped to follow Figueres' formula for peace and democracy by completely disarming Nicaragua, including the army.

''In Nicaragua, too, I will totally disarm the government because I want it to be an example,'' Chamorro said. ''The example of Costa Rica and that of Don 'Pepe' Figueres left an inheritance for you, and that is what I want for Nicaragua and Central America.''

She also said she was sure the Contras had now been demobilized.

''They demobilized June 9. I was there. It was an impressive thing, very touching. Cardinal Miguel Obando y Bravo also witnessed it,'' Chamorro said. ''We are ready to help all of the demobilized Contras.''

#90163u2285 06/12/1990 ~United Press International
(JUNE 12) UPI - There is hope that emergency workers will be able to put out a tanker fire with chemical foam. The Coast Guard says the blaze aboard the Mega Borg tanker off Texas dwindled somewhat today... three days after it began in the Gulf of Mexico.

The upcoming Fourth of July holiday is blamed in part for a tragedy today in rural Mississippi. Officials say at least two people were killed and another injured in a series of explosions at a fireworks factory near Columbus.

A judge in New York City has banned cameras from the trial of three youths accused of gang-raping a woman jogger in Central Park last year. Jury selection in the case begins tomorrow.

The killing of a Sandinista soldier in Nicaragua may snarl the final stages of disarmament. Witnesses have come forward to say a camouflage-clad Contra rebel gunned down a Sandinista lieutenant in a Managua area town on Sunday.

Proponents of gun control won a victory today. The House Judiciary Committee approved leglislation restricting the possession and sale of domestic assault weapons that have NO sporting value. President Bush, however, is expected to fight the measure.

Mikhail Gorbachev was asked today what he'd think of an exchange of U-S and Soviet presidents for a short time. The Soviet leader told Soviet

legislators- ''they probably want to see how George Bush would handle things.''

The federal judge in Washington D-C Mayor Marion Barry's drug and perjury trial began randomly picking potential jurors for questioning today. The move comes in an effort to finish jury selection by week's end.

Czechoslovakian President Vaclav Havel says he will ask Prime Minister Marian Calfa to form the next government. Havel and the former Communist Party chief are leaders of the pro-democracy coalition that led the November revolution.

A U-S magistrate in Tampa, Florida, today ordered Roderick Ramsay held without bond pending his trial on espionage charges. The ex-Army sergeant allegedly taped military secrets for delivery to Eastern European countries.

Rock-and-Roll star Chubby Checker today escaped injury in a traffic crash that sent six members of his group to hospitals near the Oklahoma-Texas border. Oklahoma police say the accident involved a car whose driver fell asleep at the wheel.

#90163u2312 06/12/1990 ~United Press International
A mood of uncertainty created by oil spilling from a Norwegian oil tanker that was afire for the third day in the Gulf of Mexico helped drive up oil prices Tuesday in a market that has been dominated by selling recently.

''Markets tend to go up during uncertain times, such as the fear of the Mega Borg tanker losing its 38 million gallons of crude oil if the fire can't be controlled,'' said Mary Haskins of Paine Webber Inc. in New York.

''It was enough to get the market moving and buy orders were triggered once crude broke through the $17.30-a-barrel level,'' she said.

There was profit taking on prior sell positions, placed in anticipation of the market's recent decline, ''against a backdrop of the potential loss of the tanker's cargo,'' said Randell Rothenberg of Dean Witter Reynolds'

International Energy Futures Group in New York.

The benchmark West Texas Intermediate for July delivery shot up 69 cents on the day in New York Mercantile Exchange trading to $17.51 a barrel after opening at its low of $17.02. Volume was a moderately heavy 93,998 contracts.

Unleaded gasoline for July delivery rocketed 2.62 cents to 58.50 cents a gallon on the Merc. It had fallen nearly 5 cents in the last six Merc trading sessions, largely because of oil-industry reports of rising inventories.

Released after the Merc's closing, the American Petroleum Institute's weekly survey found inventories of crude oil last week rose 1.2 million barrels and those of gasoline inched up 500,000 barrels.

The fire aboard the tanker Mega Borg was dwindling Tuesday, raising hopes it could be extinguished with chemical foam and prevent a spill of the vessel's cargo of 38 million gallons of light crude.

Coast Guard Capt. Thomas Greene told a midday news briefing six fireboats and dozens of firefighters had extinguished the fire in the ship's pump room and on the waters surrounding the giant tanker, 57 miles southeast of Galveston, Texas.

Greene also said the flow of flaming crude oil over the ship's stern into the water had ended.

Haskins said the market's upward move also was helped by the threat of a strike by Norwegian oil workers in the North Sea and by a statement by Mena Saeed Otaiba, oil minister of the United Arab Emirates.

In Cairo for a meeting with his Egyptian counterpart, Otaiba said the UAE had recently cut its daily output by 200,000 barrels to fulfill a promise made a month ago at an emergency meeting of the Organization of Petroleum Exporting Countries, called as a result of the current glut of crude on world markets.

On the U.S. Gulf Coast cash market, where prices had fallen 8.25 cents over the last six trading sessions, prompt delivery unleaded gasoline gained 1.75 cents to 60.25 cents a gallon.

On the New York Harbor spot market, prompt delivery unleaded gasoline shot up 2.85 cents to 64 cents a gallon.

On the U.S. Gulf Coast cash crude market, prompt delivery crude WTI zoomed 70 cents to $17.50 a barrel.

On the European spot market, Britain's widely traded North Sea Brent gained 46 cents to $15.98 a barrel.

The UAE's Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - rose 32 cents to $13.55 a barrel.

On the Merc, July-delivery heating oil finished the day at 48.29 cents a gallon, up 1.57 cents.

Sun Co. of Radnor, Pa., and Marathon Oil Co., the Findlay, Ohio, unit of USX Corp., raised the posted price they will pay for crude at the wellhead by 50 cents a barrel to $16.25 a barrel for WTI.

#90163u2343 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - The stock market closed sharply higher Tuesday in moderate trading, with the Dow industrials near their record high, after a late burst of program buying.

The Dow Jones industrial average, which jumped 30.19 Monday, surged 40.85 to close at 2933.42, just shy of the record close of 2935.19 set June 4.

Among broader market gauges, the New York Stock Exchange composite index rose 2.24 to 199.66 and Standard & Poor's 500-stock index added 4.62 to 366.25. The price of an average share jumped 40 cents.

Advances led declines 1,000-539 among the 2,006 issues crossing the NYSE tape. Big Board volume totaled 157,100,000 shares, compared with 119,550,000 shares traded Monday.

After opening higher, the market drifted aimlessly for much of the session as investors focused on economic reports due out later this week and on Friday's "triple-witching hour" expirations of stock-index futures, options and options on individual stocks. Prices hovered near Monday's closing levels.

But in the last hour of trading, waves of program buying, triggered by computers to profit on price spreads between stocks and stock-index futures, jolted the market out of its slumber and sent prices surging.

Analysts said the light trading meant there was little resistance to the computer-driven buying. "It was really all programs," said Larry Greenwald a trader at Sanford C. Bernstein & Co. "There was some institutional interest, but it was really the programs trading in a vacuum. The light volume made it easy to run the market up."

Greenwald said fears of the volatility that often accompany the

expirations kept many players out of action. He said the data on retail sales, producer prices and consumer prices for May due out Wednesday, Thursday and Friday kept many investors on the sidelines as well.

On the trading floor, Advanced Micro Devices was the most active issue, up 1/8 to 9 7/8. Semiconductor issues gained after news that a ratio used as the industry's leading indicator comparing new orders to products shipped rose last month.

Westinghouse followed, up 3/8 to 37 7/8. Boeing was third, up 3/8 to 58 7/8 after rising sharply Monday on news Korean Air Lines placed a $4.8 billion order for 23 747-400s. Boeing indicated it was one of the largest single orders ever placed with the company.

Wendy's International was also active, up 3/8 to 6 5/8. A "burger war" seemed to be shaping up as Hardee's unveiled a new "lite" hamburger, low in fat. After the market's close Wendy's claimed its burger was equally low in fat.

Among other blue chips, AT&T rose 5/8 to 43, IBM rose 3/8 to 120 1/4, Merck surged 2 5/8 to 83 3/8, General Electric jumped 1 3/8 to 70 1/4, General Motors rose 1 1/8 to 50 1/4, and Coca-Cola added 7/8 to 45 3/8. Procter & Gamble surged 3 1/4 to 84 1/4.

Elsewhere, Foxboro extended its rally, jumping 2 3/8 to 32 3/8 after saying Monday it was exploring a possible sale of the company or a stake in it. Foxboro said after the close it has received several takeover bids.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 187,358,520 shares, compared with 145,406,970 shares traded in the previous session.

Prices closed higher in moderate trading on the American Stock Exchange. The Amex Market Value index rose 1.99 to close at 364.31. Advances led declines 354-225 among the 831 issues traded. The price of an average share rose six cents. Composite volume totaled 14,452,000 shares, compared with 11,122,750 shares traded Monday. Hillhaven led the Amex issues, unchanged at 1 1/4.

The National Association of Securities Dealers composite index rose 3.76 to 466.55, a new high for the year.

THACKERVILLE, OK (JUNE 12) UPI - A tour bus carrying rock 'n' roll singer Chubby Checker rear-ended a truck Tuesday on an interstate near the Texas border, injuring six members of his band but leaving the singer unhurt.

Checker was asleep when his tour bus hit a truck that was pulling onto Interstate 35 from a rest area about 3.5 miles north of the Oklahoma-Texas state line at about 5:35 a.m., the Oklahoma Highway Patrol said.

He and his band were traveling from Chicago to San Antonio where they were scheduled to play Tuesday night as part of a current tour.

The patrol identified the bus driver as Elonzo Williams, 55, of Crum Lynne Pa., He was pinned in the wreckage for 30 minutes and later reported in fair condition with hip and leg injuries.

Bradley Wayne Haynes, 34, of Shakopee, Minn., was driving the 1972 Peterbilt tractor-trailer, the patrol said. He was not injured.

The injured were taken to hospitals in Ardmore and Marietta, Okla., and Gainesville, Texas. Three were treated and released.

Checker, 48, became known as ''king of the twist'' during the height of popularity enjoyed by that short-lived dance craze in the early days of rock 'n' roll.

Shortly after introducton of the twist as a dance, recording executives thought the tune would become a hit if Checker sang the words. ''The Twist'' sold more than 40 million copies.

Checker had several other hit songs, among them ''The Hucklebuck,'' ''Let's Twist Again,'' ''The Fly,'' ''Dancin' Party,'' and ''Popeye the Hitchhiker.'' He also recorded several albums.

#90163u2369 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - Sterling Drug. Inc., has agreed to pay $375,000 in civil penalties after being charged with making unsubstantiated claims about its Midol brand products, the Federal Trade Commission said Tuesday.

The Justice Department had filed a complaint for the FTC in U.S. District Court charging the company had ''made unsubstantiated therapeutic performance claims in advertising certain 'Midol' brand products,'' the FTC said in a statement.

The commission alleged the company had violated a 1985 order that ''prohibits the company from making therapeutic performance claims unless it has a reasonable basis to substantiate the claims,'' the statement said.

''Under a consent decree filed June 8 with the commission's new complaint, Sterling has agreed not to violate the order in the future,'' the statement said.

''This consent decree is for settlement purposes only and does not constitute admission of a law violation,'' the statement said.

The commission's complaint charged that from March 1985 until January 1986 and in April 1988 the company ran ads for ''Original Formula Midol'' and Maximum Strength Midol for Cramps'' that ''claimed or implied that one of the active ingredients in those products ... helps relieve muscle constractions fast and is a muscle relaxant for menstrual cramps,'' the statement said.

''The company did not have competent and reliable scientific evidence for those claims, the complain charges,'' according to the statement.

''The complaint also cites ads that ran from April 1986 until June 1986 for 'Maximum Strength Midol PMS.' Those ads ... claimed that the product provides 'total' or 'complete relief' for all symptoms of premenstrual syndrome,'' the statement said. ''But, according to the complaint, the company did not have competent and reliable scientific evidence for those claims.''

Since November 1988, the company has also run ads for ''Original Midol Multi-Symptom Formula'' and ''Maximum Strength Midol Multi-Symptom Formula'' ''which claim that the products have a combination of ingredients that relives menstrual bloating or water-weight gain,'' the statement said. ''The complaint charges the company did not have competent and reliable scientific evidence for making those claims.''

-30- 2501

#90163u2377 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - East German Prime Minister Lothar de Maiziere pressed his campaign to put his own government out of business Tuesday, saying the world has nothing to fear from a united Germany as long as it remains part of an alliance with other European nations.

''The primary objective of my government is to make ourselves unnecessary '' he said through a translator at the National Press Club. ''The more efficiently we do that, the sooner will all the wishes of our people come true.''

A day after becoming the first and likely the last East German leader to meet with a U.S. president, de Maiziere said in his speech, as he had with President Bush, that a united Germany should be part of NATO.

But he said the Western alliance must change to reflect the new political realities in Europe, adding, ''It is our assumption that this (European) future should be determined by an all-European security structure.''

''A united Germany will be affiliated to an alliance,'' he said. ''I suppose the sinister past could be repeated, (but) only under conditions under which a united Germany would be isolated from the others.''

Asked about a proposal made earlier by Soviet President Mikhail Gorbachev that Germany belong to both NATO and the Warsaw Pact, de Maiziere said he thought the suggestion ''is not going to be the definitive answer.''

But he stressed that no European country, including the Soviet Union, should be ''marginalized'' during the process of German unification and said there was ''no doubt'' that Germany will remain within its current borders.

''The process of German unification ... must be a European, an all-European process that must not be allowed to cause any anxieties among our neighbors,'' de Maiziere said.

De Maiziere, who earlier in the day met with congressional leaders, discussed how to persuade the Soviet Union to accept a unified Germany in NATO in talks with Bush Monday at the White House, where no other East German leader had been invited in 40 years of Cold War.

White House press secretary Marlin Fitzwater said de Maiziere responded positively to U.S. proposals for allaying security concerns driving Soviet opposition to NATO membership for a united Germany.

De Maiziere's visit continued the hectic East-West diplomacy that Bush and Gorbachev set into motion at their Washington summit. Over the past week the ''German question'' remained unanswered at meetings of the 35-nation Conference on Security and Cooperation in Europe, NATO foreign ministers and Warsaw Pact leaders.

NATO foreign ministers endorsed a nine-point U.S. formula offering Moscow the prospect of a less threatening NATO military posture, an institutionalized role for the CSCE, guaranteed borders and constraints on German armed forces to win Soviet acceptance of a Germany in NATO.

#90163u2390 06/12/1990 ~United Press International

LONDON (JUNE 12) UPI - Libyan leader Col. Moammar Gadhafi ordered the formation Tuesday of a volunteer force to be known as the People's Guards, replacing the north African country's army.

Gadhafi was quoted by Libyan radio as saying the People's Guards will be formed from volunteers, according to a monitor by the British Broadcasting Corp.

Conditions for joining the People's Guards are ''ability to discharge the duty, acquiring the necessary combat training, showing discipline, cohesion and revolutionary commitment,'' he said.

The forces will be drawn from among those ''who have the desire and who always welcome sacrifice and are ready to give and offer, motivated by their profound faith and revolutionary duty, and seeking neither material grants nor gains nor titles nor posts, as they are distinguished from the traditional security apparatus,'' Gadhafi said.

Libyan radio broadcast what it said was a text of Gadhafi's order and recalled ''the historic proclamation of the establishment of the people's authority ... the creation of the armed people, and the abolishing of the traditional army.''

The order said volunteers will receive no material rewards and full-time service is not obligatory.

The secretary of the Ad-hoc General Committee for Defense will make the necessary decisions to appoint commanders of the People's Guards and to ensure efficient standards, the order said.

It takes immediate effect.

-30- 1633

#90163u2396 06/12/1990 ~United Press International
WASHINGTON (JUNE 12) UPI - The House Judiciary Committee Tuesday authorized $110 million for the Justice Department to investigate and prosecute owners and officers of savings and loans whose illegal activities led to the S&L crisis.

The money, double the amount sought by the Bush administration, was included in legislation authorizing $7.4 billion for the department for fiscal 1991.

The bill also increases the administration's request in other areas such as the FBI's National Crime Information Center, the Immigration and Naturalization Service's border patrol operations and the Antitrust Division's enforcement of federal antitrust statutes.

Of the money devoted to the S&L issue, $64 million is for the FBI, $32 million is for U.S. Attorney's offices, $10 million for the department's civil division, $3 million for the criminal division and $1 million for the tax division.

-30- 1088

#90163u2402 06/12/1990 ~United Press International
NEW YORK (JUNE 12) UPI - Citicorp Mortgage Inc. and the Federal Home Loan Mortgage Corp., better known as Freddie Mac, announced agreement Tuesday on issuance of $5 billion in mortgage-backed securities, the largest such issuance ever.

In the deal, St. Louis-based Citicorp Mortgage agreed to swap $5 billion of newly originated, single-family mortgages in exchange for Freddie Mac mortgage participation certificates, or PCs, and for new Gold PCs.

Freddie Mac unveiled Tuesday the Gold PCs, securities on which so-called pass-through payments - loan interest paid by homeowners and passed on to investors by banks and Freddie Mac - will be speeded up.

Gold PC buyers will receive first payments 45 days after issuance. Freddie Mac said this was the ''fastest payment to investors of any agency-issued, conventional mortgage pass-through currently available.''

Investors in Freddie Mac PCs receive payments within 75 days of issuance. The company said it will offer investors the option of converting existing PCs to Gold PCs once issuance of the enhanced security begins.

Under the Citicorp-Freddie Mac accord, the mortgage unit of the largest U.S. bank is to deliver $5 billion of 15- and 30-year single-family, fixed-rate mortgages and of 15-year tiered-payment mortgages.

Completion of the contract, which Freddie Mac said was the largest secondary mortgage deal ever, is expected some time in 1991.

''We are privileged to be engaging in this historic transaction that proves the value of our new Gold PC with Citicorp,'' said David Glenn, Freddie Mac's president and chief operating officer.

Citicorp mortgage executive Kim Rosenberg called the Gold PC ''an outstanding mortgage-backed security,'' adding that ''receiving payment 30 days earlier is very attractive from an investor's point of view.''

Freddie Mac securities, backed by private mortgage insurance, are considered safe investments. But unlike Ginnie Mae securities of the Government National Mortgage Association, they are not guaranteed by the U.S. government.

Because Freddie Mac PCs are issued in denominations of $25,000, most are purchased by institutional investors.

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a steady flow of funds to mortgage lenders in support of private home ownership and rental housing.

WASHINGTON (JUNE 12) UPI - The government said Tuesday it solved a plot in which $1 million worth of cheese was stolen from the nation's school lunch program.

The Justice Department said that Sabatasso Foods Inc. agreed to pay more than $2.2 million to settle charges that the cheese was ''diverted'' from pizzas and other foods sold to schools.

A federal investigation revealed that Sabatasso systematically reduced the amount of cheese in its products, the Justice Department said. The cheese plot occurred from September 1985 to November 1986, the Justice Department said.

The cheese had been given to Sabatasso by the Agriculture Department, for use on pizzas and other foods supplied as part of the federally subsidized school lunch program.

But the cheese was not included in the pre-packaged food sold by Sabatasso the Justice Department said, noting that ''the diversion'' occurred at the company's Florence, Ky., plant.

The Agriculture Department's inspector general determined that each pizza

- 4 inches by 6 inches - was ''shorted'' by 2/10ths of an ounce of cheese, said Justice Department spokesman Michael Robinson.

So what happened to the extra cheese?

''We don't know,'' Robinson said. ''We weren't able to track the additional cheese.''

Lawyers for Sabatasso were not available for comment.

''We will pursue any person or company that tries to make a profit by depriving students of a nutritious meal,'' said Stuart Gerson, an assistant attorney general who heads the Justice Department's civil division.

#90163u2426 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - Secretary of State James Baker said Tuesday the administration opposes forgiveness of Poland's external debt to the U.S. government because it would open a floodgate of other requests worldwide.

Testifying to the Senate Foreign Relations Committee, Baker was asked by Sen. Paul Simon, D-Ill., about the possibility of writing off Poland's $2.8 billion debt as a way of easing the crushing economic problems faced by the new Polish government.

Poland's total debt to all creditors is put by the U.S. Treasury at $40 billion.

''If you decide that you're going to go this direction, or if it ever should be decided that we're going to start the business of forgiving official debt, don't lose sight of the fact that you will not be able to restrict it to one country,'' Baker said.

He said the one exception that had been made by the past administration on debt relief was to forgive the debt owed by a series of sub-Saharan African countries, which Baker described as ''essentially basket cases.''

He added, '' But that's a little different, I think, Senator Simon, because the amounts involved are much, much smaller. The countries are in much, much worse shape.''

But he warned, ''If you get into a program of official debt forgiveness or debt reduction for larger countries ... I would ask you, 'Can you forgive Poland's debt and not forgive Israel's debt?'''

Simon, a strong supporter of Israel, did not respond to the question. Israel's current debt to the U.S. government is $4.5 billion. The Israeli Embassy puts Israel's total foreign debt to all creditors at $24 billion.

Baker added that an equally good case could be made for forgiving the external debt owed by emerging Central American democracies.

He said that a policy of debt forgiveness could then be translated into ''domestic interests'' within the United States. He cited no examples, but said that was another reason that the administration was reluctant to start forgiving foreign external debts, no matter how worthy the cause.

Simon suggested it would be a good topic for this year's Western Industrialized Nations Economic summit in Houston in early July.

''I wouldn't argue with that,'' Baker said.

#90163u2429 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - A New York Stock Exchange advisory panel Tuesday recommended the introduction of ''circuit breakers'' - automatic halts in trading triggered by sharp movements in stock prices - of to restore investors' confidence in the market.

The measure was one eight recommendations contained in a voluminous report prepared by the 18-member panel, which was set up to respond to investors' concerns following the October 1987 crash. The report was based on on a six-month-long survey.

''The panel recommends a four-tier circuit breaker to replace all other coordinated circuit breakers in U.S. markets,'' said General Motors Corp. Chairman Roger Smith, who headed the ''Market Volatility and Investor Confidence Panel.''

''The circuit breakers would be symmetric - triggered by large price increases as well as declines from the previous day's close,'' Smith said.

Circuit breakers would automatically come into effect whenever the Standard & Poor's 500 Composite Stock Price Index or the Dow Jones industrial average rises or falls by about 3.5 percent compared with the previous day's closing levels - or a difference of 12 points for the S&P 500 and a difference of 100 points for the Dow.

The fluctuations would halt trading for 60 minutes to give investors time to reassess their strategy.

The mandatory halt would be increased to 90 minutes if the S&P 500

fluctuates by 24 points or the Dow by 200 points. The halt would last 120 minutes if the S&P 500 fluctuates by between 36 and 48 points, or the Dow by between 300 and 400 points.

Each trading halt, which would apply to all domestic markets including future markets, would be triggered once a day, the first time a particular price level is reached, the report said.

According to the survey, if the circuit breakers had been in place between 1983 and 1989, they would have been activated on an average of three or four times a year, and only once a year if 1987 were excluded.

''No one really knows as an absolute certainty that circuit breakers can stop a decline,'' said NYSE Chairman John Phelan. ''We believe it can give the market a breather.''

As an additional means of stabilizing markets, the panel also recommended that index arbitrage - transactions based on differences in price between stocks and stock-index futures - be limited if the Dow fluctuates by 50 points compared with the previous day's close. When the market declines, index arbitrage sell orders could only be executed on the up trend. When the market rises too fast, index arbitrage buy orders could be executed only on the down trend.

The proposal to limit index arbitrage, adopted by a majority of the panel, was expected ''to have a positive impact on investor confidence,'' the report said. Several members, however, opposed the measure on the grounds it would set ''a bad precedent to single out a particular form of trading '' and ''would worsen rather than improve the situation'' in a period of market stress.

The panel urged the Securities and Exchange Commission to ease regulations regarding corporations' ability to repurchase their own common stock and suggested that companies should let investors know in advance the volume of shares they would be prepared to buy back when major fluctuations occur.

The panel also expressed concern that ''a large market decline could occur when U.S. banks are closed ... and markets are open.'' It recommended that credit arrangements be made during bank holidays to help sustain markets.

The report also called for the exchanges to educate investors, easily confused by complex trading practices.

#90163u2431 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - The nation's gasoline inventories inched up last week, marking the third straight weekly rise, the American Petroleum

Institute reported Tuesday.

The gain came despite the fact that gasoline stocks usually fall at this time of the year because of greater driving activity.

Crude stocks, although already well above maximum levels reached in recent years, also continued to rise.

For the week ended June 8, gasoline supplies increased to 217.1 million barrels from 216.6 million barrels in the prior week and moved closer to year-ago levels of 220.1 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, slipped to 165.2 million barrels from 165.7 million barrels a week earlier but remained higher than year-ago levels of 155.7 million barrels.

Gasoline production rose to 6.9 million barrels daily from 6.7 million barrels in the previous week but was less than year-ago output of 7.2 million barrels daily.

Daily gasoline imports dropped substantially to 273,000 barrels from 702,000 barrels in the previous week and were less than year-ago imports of 418,000 barrels.

U.S. refineries operated at 88.1 percent of capacity last week, compared with 88.2 percent a week earlier and 88.8 percent a year ago.

Crude oil inventories rose to 385.6 million barrels from 384.4 million in the prior week and remained significantly higher than year-ago levels of 341.5 million barrels.

The crude inventories also remain significantly above than the high end of stocks maintained in recent years, which the API has placed at between 365 million and 370 million barrels.

Crude oil imports remained steady with the previous week at 6.1 million barrels a day but were lower than year-ago imports of 6.2 million barrels a day.

Imports of refined products slipped to 2.0 million barrels daily from 2.5 million barrels daily in the preceding week and were equal with year-ago levels.

Inventories of distillate - used for home-heating oil and diesel fuel - rose to 104.5 million barrels from 104.0 million barrels a week earlier and were higher than year-ago levels of 98.9 million barrels.

Distillate production stayed the same as the previous week at 3.0 million

barrels daily but was higher than year-ago output of 2.7 million barrels daily.

Distillate imports fell to 159,000 barrels a day from 249,000 barrels a day in the previous week but were higher than year-ago imports of 142,000 barrels a day.

#90163u2441 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The District of Columbia City Council Tuesday approved a bill that effectively guts the city's landmark 1984 voter mandated right-to-shelter law, claiming the measure had proven too costly.

''This city is spending horrendous amounts of money in the name of the homeless,'' said David Clarke, council chairman.

The council voted unanimously to amend Initiative 17, which orders the city to provide emergency shelter to anyone requesting it, regardless of its budget constraints.

The city spent $10 million on its homeless program in 1985, compared to nearly $40 million in federal and local funds for homeless programs in 1989.

The amendment caps the amount of money the city would spend each year for emergency overnight shelter and homeless services. Once that limit has been reached, the mayor could shift budget priorities to continue funding homeless initiatives, but would not be obligated to do so.

The bill would also set a 30-day stay limit in shelters for individuals and a 90-day limit for families.

Mayor Marion Barry has 10 days to act on the law, but is expected to sign it.

Homeless advocates vowed to fight the amendment.

''We can go to court or put the question back on the ballot,'' said Mitch Snyder, who runs the Community for Creative Non-Violence and the city's largest privately run shelter. Snyder was instrumental in the initial passage of Initiative 17.

The amendment would also require homeless people who have jobs or receive public assistance to contribute 30 percent of their income to the city in return for shelter. Others without an income would be required to perform community service.

#90163u2453 06/12/1990 ~United Press International
WASHINGTON (JUNE 12) UPI - President Bush telephoned the Texas Rangers' Nolan Ryan Tuesday to congratulate the 43-year-old right-hander for throwing a record sixth no-hitter of his fabled career.

''Nolan Ryan! I just hung up talking with Nolan,'' a pumped-up Bush told reporters at the White House.

''What's Nolan, 43, and just the tops, a top human being and a top performer,'' Bush said. ''And it's a great symbol for the kids around this country that love baseball as much as I do.''

Ryan struck out 13 in tossing the no-hitter Monday night, a 5-0 win over the Oakland A's at the Oakland Coliseum.

''I was a wonderful moment, I tell you,'' said Bush, a former Yale first baseman. ''I wish I had been there.''

Bush's oldest son, George W. Bush, is part owner of the Texas Rangers.

#90163u2456 06/12/1990 ~United Press International
WASHINGTON (JUNE 12) UPI - The National Association of Securities Dealers said it has been providing technical assistance to communist and former communist countries that are trying to establish market-based economies.

China, Yugoslavia, Hungary, Poland, and the Soviet Union are among the nations who have recently sought advice from the NASD, a self regulatory organization for the NASDAQ and the over-the-counter stock markets.

NASD officals said representatives of these countries have sought out the association because of its experience in dealing with small firms and electronic trading.

One of the key issues raised by these nations in establishing a stock market for the first time, association officals said, is whether they should build a stock exchange floor or rely solely on electronic trading through computers and communications lines.

''We tell them if you are starting your stock market today, it is much less expensive, and much simpler, and you can tie in to future developments of markets worldwide by using a screen-based system rather than a floor-based system,'' said NASD President Joseph Hardiman.

Hardiman says foreign officials have also asked the NASD how to help small companies raise capital and become more entrepreneurial.

They also have asked the NASD to comment on the merits of establishing a self-regulatory organization, such as the NASD, versus a federal regulatory system, such as the Securities and Exchange Commission.

''At the outset they probably have a bias towards federal regulatory schemes, but when they learn about self regulation, they are ... infatuated with the concept because it ties in with a lot of the movements towards democracy they have,'' Hardiman said.

#90163u2487 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The Senate Public Works Committee approved a plan Tuesday to double federal aid to schools for removal of cancer-causing asbestos and backed legislation cracking down on U.S. coastal water pollution.

The asbestos measure, sent to the Senate floor, reauthorizes the 1984 Asbestos School Hazard Abatement Act and calls for an increase in federal funds to schools for cleanup from $125 million to $250 million per year.

The legislation was sponsored by Sen. Frank Lautenberg, D-N.J., who said as many as 15 million children and 1.5 million school employees are exposed to asbestos each school day. Exposure to asbestos, formerly used in the construction of thousands of buildings for insulation, can cause a variety of cancers, including lung cancer.

Since 1984, $200 million has been provided by the government for school asbestos cleanup, although Lautenberg said the Environmental Protection Agency estimates that $3 billion will be needed to remove asbestos from all the nation's schools.

#90163u2522 06/12/1990 ~United Press International

ROME (JUNE 12) UPI - First it was Cameroon, then Romania and Costa Rica. On Tuesday night, Egypt added its name to the list of conquering underdogs.

Magdy Abed El Ghani scored on a penalty kick with eight minutes remaining, lifting Egypt to a 1-1 draw against European champion Holland in Palermo, Sicily.

The result came on the heels of Cameroon's stunning victory over defending champion Argentina, Romania's 2-0 win over the Soviet Union and Costa Rica's 1-0 triumph over Scotland.

The equalizer was set up when Dutch defender Ronald Koeman pulled down Hossam Hassan on a breakaway inside the penalty area. El Ghani took the penalty kick, firing a low shot that beat a diving Hans Van Breukelen to his right.

After the goal, El Ghani prostrated himself for several seconds as if worshipping at Mecca.

''Until today, I've thought only of Holland,'' Egypt Coach Mahmoud El Gohary said. ''Tomorrow I will start thinking about the other teams.''

Holland, which boasts arguably the world's top attacking trio in Ruud Gullit, Marco Van Basten and Frank Rijkaard, did not play like one of the heavy World Cup favorites. The Dutch failed to control the game against an Egyptian team listed at 500-1 by London bookmakers.

''A team like theirs can play well when we play poorly,'' said Holland's Willem Kieft, whose goal in the 58th minute gave the Dutch a 1-0 lead. ''We were not aggressive enough.''

Egypt's previous World Cup game came in 1934, also in Italy - a 4-2 loss to Hungary.

Gullit, the dreadlocked striker who rivals Argentina's Diego Maradona as the best player in the world, said Holland lacks chemistry.

''We've been playing poorly as a team for two years and you saw the results tonight,'' said Gullit, who is returning from his third knee operation. ''The players have no faith in each other. With so many players playing out of the country, we don't get a chance to play together.''

In Tuesday's other game, Belgium, a 1986 semifinalist, defeated South Korea 2-0 in Verona behind second-half goals by Marc De Grijse and Michel De Wolf. Belgium showed discipline on defense and flair on attack in beating Asia's lone representative.

''Our victory was well-deserved,'' Belgium Coach Guy Thys said. ''We could have scored four goals, and if we had I would have been much happier.''

On Wednesday, Argentina plays the Soviet Union in Group B in Naples. Both teams were upset in the opening round and and neither can afford to lose because it will mean almost certain elimination.

Elimination would be particularly embarrassing for Argentina. The 1966 Brazil team is the only defending champion to be knocked out in the first round.

Also Wednesday, Uruguay faces Spain in Udine in Group E.

The United States, reeling from Czechoslovakia's 5-1 assault, plays World Cup favorite Italy in Rome Thursday.

The Americans, now rated at 5,000-1 by London bookmakers, are 50-1 to beat Italy in the Group A game. The odds on Italy are so uninviting that a winning bet on the Azzurri would cost you money in London.

The U.S. players and their families Tuesday visited the Leaning Tower of Pisa between two workouts.

''We tried to bring a little sunshine into their lives,'' U.S. Coach Bob Gansler said.

Gansler has not decided who will start in place of forward Eric Wynalda, who was ejected from Sunday's game and is ineligible to play Thursday. But one player is hardly the answer to his problems.

''I said before that Italy has the speed, intensity and technical perfection that one can only admire, and nothing has changed that opinion '' Gansler said. ''They are a fantastic team. We are going to have to be more careful and better in the way we do things.''

#90163u2524 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - Attorneys general from seven states filed suit Tuesday against Mobil Chemical Co. for allegedly making false environmental claims about its Hefty plastic trash bag line.

The suits, filed in seven state courts by members of a task force of attorneys general, seek a preliminary injuction barring Mobil, a subsidiary of Mobil Corp., from selling, distributing or marketing plastic products that make false claims about its degradability.

Mobil announced in March that it would delete the degradability label from the Hefty bags, but the attorneys general said they wanted the company to remove all bags with the claims from store shelves.

Before Mobil withdrew its claims, the Hefty package contained a label saying the plastic contained an additive that caused it to degrade after exposure to sun, wind and rain.

The attorneys general charged the Hefty trash bags were sold with the ''degradable'' label even though the company knew the plastic would only decompose under certain laboratory conditions.

Mobil's withdrawal of the claim, the officials said, does not absolve it of liability for the time the allegedly false label was on the packages.

Mobil spokesman Allen Gray said the company was refusing to remove Hefty bags from shelves because competitors' bags with similiar claims were still in stores.

Gray said Mobil withdrew the claims in March because it had been confronted by differing standards on degradability, depending on various state laws.

Mobil had agreed to cooperate with the task force of attorneys general and had offered to contribute money in an effort to develop guidelines for degradability, he said. ''If we could work together and get some standards established out of this morass, that would be a positive step,'' he said. ''I don't think litigation is.''

The suits, which each seek separate damages, were filed in New York, California, Massachusetts, Minnesota, Texas, Washington and Wisconsin.

''Degradable plastics are nothing but a snake oil cure for our solid waste problems,'' said New York State Attorney General Robert Abrams. ''It's a myth that degradable products quickly disappear or provide any benefits to the environment in a landfill, and Mobil knew it.''

Consumers believed the bags would dissolve quickly after they were thrown out, the attorneys general said.

They said about 80 percent of the nation's annual output of 160 million tons of municipal solid waste is buried in landfills, where trash bags degrade extremely slowly because there is no sunlight and little moisture.

''Buried in landfills, the bags are not likely to degrade for decades. They don't offer any environmental benefit,'' said Minnesota Attorney General Hubert Humphrey III. ''Unfortunately, Mobil's advertising claims break down faster than their garbage bags.''

Wisconsin Attorney General Don Hanaway said Mobil was trying to market its bags to people who were concerned about the environment.

''These claims prey on people's desire to play a role in protecting the environment,'' Hanaway said.

Minnesota is seeking $250,000 in damages from Mobil for the misleading claim.

Edward Barbini, a spokesman for Abrams, said New York would seek ''quite substantial'' damages from Mobil, though he declined to specify an exact

amount.

#90163u2538 06/12/1990 ~United Press International
WASHINGTON (JUNE 12) UPI - The Senate Ethics Committee, opening a rare public investigation, was told Tuesday that Sen. David Durenberger, R-Minn., should be denounced for scheming to avoid limits on outside income.

The recommendation for a formal denunciation - short of expulsion, the severest possible penalty - came from Robert Bennett, the special counsel hired by the six-member committee to conduct the Durenberger inquiry.

''Senator Durenberger's conduct was not inadvertant. It was not unintentional or based on ... negligence or misplaced reliance on others '' said Robert Bennett, a lawyer hired to conduct the Durenberger inquiry.

Bennett said Durenberger, who came to the Senate in November 1978 and is paid $98,500 a year, used an arrangement with a book publisher to disguise more than $100,000 in outside income to avoid limits imposed on members.

Durenberger ''knowingly and willfully engaged in conduct (that was) clearly and unequivocably unethical,'' Bennett said.

Bennett made his recommendation on the first day of the public, trial-like hearings convened by the Ethics Committee, the first for the panel in eight years. In addition to Durneberger's book deal, the committee also is investigating other aspects of Durenberger's personal finances.

Bennett, who made a three-hour presentation of evidence to the committee, said there was ''insufficient evidence'' to recommend expulsion. He said it did not appear that ''Durenberger acted with criminal intent, or that he acted with malice or that he acted with specific intent to break the law.''

Durenberger showed little emotion as Bennett made his recommendation to the committee and later issued a statement that said: ''While I have admitted mistakes and even some violations of rules, I feel the sanction of denouncement ... is harsher than warranted.''

Any punishment decided by the committee - evenly balanced, with three Democrats and three Republicans - must also be approved by the full Senate.

The major issue before the ethics panel is a charge that Durenberger used two of his books and a Minneapolis-based book publisher, Piranha Press, to exceed limits on outside income in 1985 and 1986.

Under the alleged arrangement, the senator sidestepped the limits by calling his speeches ''book promotions'' and having the money paid to the publisher, which then turned it over to him.

Durenberger has admitted that he is guilty of poor judgment, but was never motivated by greed. In his statement Tuesday, the senator said he is ''deeply sorry'' for his actions and inactions that ''have hurt many among my family, friends, staff, supporters, the people of my state and the Senate.''

Rejecting Durenberger's argument that he ''acted ... with no intent whatsoever to violate the rules of the Senate,'' Bennett launched a blistering attack on the senator, charging the book deal was a ''gimmick'' to launder speech fees.

''This is the first major area where special counsel has found that Senator Durenberger engaged in significant and substantial wrongdoing,'' Bennett said.

The committee members, who all said they found their duty distasteful, can reject Bennett's recommendation, and either find Durenberger innocent of any wrongdoing or impose other sanctions ranging from reprimand to expulsion.

However, the committee followed the advice of Bennett in its last public ethics inquiry eight years ago.

In that case, Sen. Harrison Williams, D-N.J., resigned his seat in 1982 while facing probable Senate expulsion for his conviction in the Abscam bribery scandal. Williams' later served two years in prison.

The last senator to be denounced was Sen. Herman Talmadge, D-Ga., in 1979 for his mishandling of government funds.

Opening the proceeding, the committee members stressed that even though they were taking the unusual step of public hearings, they had not made up thier minds.

''If the evidence does not show improper actions by Senator Durenberger, then I will vote to clear him,'' said Chairman Howell Heflin, D-Ala., a former chief justice of the Alabama state Supreme Court.

''But ... if the evidence clearly and convincingly leads me to the conclusion that (Durenberger) violated the public trust, I will not hesitate to recommend appropriate sanctions,'' Heflin said.

Other questions before the panel include whether Durenberger intentionally failed to report reimbursement for travel expenses, whether he improperly

used Senate space for commercial purposes, whether he steered funds to his campaign committee through Piranha Press, and whether he violated Senate rules by receiving reimbursements for use of a Minneapolis condominium he owned.

#90163u2547 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The Democratic campaign group accused Sen. Mark Hatfield, R-Ore., Tuesday of improperly reporting about $4,600 in campaign contributions, but an aide to the senator called the charge ''nit-picking.''

Robert Bauer, general counsel of the Democratic Senatorial Campaign Committee, wrote to the Federal Election Commission asking for an investigation of the complaint, which stems from money Hatfield received in April from a fund-raiser in The Dalles, Ore.

A spokesman for Hatfield dismissed Democrats' complaint and said, ''If there is a problem, we will take care of it.''

In his pre-primary finance summary filed with the FEC for the month of April, Hatfield reported he received $4,625.15 from an ''unregistered conduit committee,'' an unnamed group that collected the money from other sources and passed it on to his campaign.

FEC rules require conduit committee contributions to be itemized by individual donors rather than be ''bundled'' together as one aggregate figure, as they were in Hatfield's report, Bauer said.

In addition, if the conduit committee is a political organization, it is limited to an overall contribution of $1,000, he said.

Bill Calder, a spokesman for Hatfield, acknowledged an error apparently was made in reporting the money and said an amended disclosure report itemizing the contributions would likely be filed with the FEC.

He said such an omission amounts to a ''technical error'' and was unintentional.

''This is clearly an example of nit-picking and also an example that (the Democratic) campaign is in trouble,'' Calder said. ''They can't talk about the issues - they've got to go after this stuff.''

However, Bauer said, the issue of ''disclosure is not technical,'' and he asserted the reporting flaw appeared to be deliberate.

''I doubt very seriously it's a mistake,'' Bauer said.

Hatfield's Democratic challenger, Harry Lonsdale, had no immediate comment on the complaint, but press secretary Dan Walter said, ''Errors of this kind point up the need for campaign finance reform.''

#90163u2554 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The Senate refused Tuesday to crack a filibuster blocking action on a bill prohibiting commercial airlines from discriminating against blind persons in seating assignments, leaving the future of the legislation in doubt.

The Senate voted 56-44, four short of the needed 60, to end the impasse that has stymied the bill.

The filibuster was aimed at an amendment offered to the bill by Sen. Nancy Kassebaum, R-Kan., which would set national standards for liability of private plane manufacturers, clearing them of resposibility 20 years after the plane was built.

The Kassebaum amendment prompted opponents to launch delaying tactics to prevent a vote and forced Senate Demorcratic leader George Mitchell to hold the debate-limiting vote.

One section of the gallery was filled with blind persons holding tall, white canes.

The bill is designed to stop a practice by commercial airliners that bars blind persons from getting exit-row seats. The Federal Aviation Administration recently issued a ruling denying those seats to any passenger who could not work the escape door mechanism in the event of an emergency.

The White House opposes the bill, claiming that new FAA regulation means the airliners are no longer discriminating just against blind persons.

The Senate last week adopted by voice vote an amendment that would require airliners to install small child safety systems.

#90163u2570 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - Environmentalists filed suit Tuesday to block restart of a weapons reactor at the federal Savannah River Plant in South Carolina, charging discharges of scalding hot water from the facility violate the Clean Water Act.

The Natural Resources Defense Council and Energy Research Foundation said the discharges would damage environmentally valuable wetlands and tributaries of the Savannah River.

In addition, the lawsuit claims the discharges from the K reactor would exceed federal clean water limits by dumping 180,000 gallons per minute of water at temperatures up to 180 degrees Fahrenheit.

The lawsuit, filed in U.S. District Court in Columbia, S.C., said past discharges from the reactor already had damaged 600 acres of wetlands, including habitat for endangered species.

The groups noted the Energy Department, the operator of Savannah River, had been granted a number of exemptions from the Clean Water Act by the South Carolina Department of Health and Environmental Control, but they said those exemptions were illegal.

The K reactor is one of three weapons reactors at Savannah River used to produce tritium, a radioactive gas that is essential for the government's atomic bomb program. Tritium is incorporated in nuclear warheads to boost their explosive yield.

The three reactors have been shut down since April 1988 due to safety and operational problems, but the Energy Department has proposed restarting the K reactor later this year following completion of safety improvements. The two other reactors are slated for restart in 1991.

However, the lawsuit claims the K reactor cannot be restarted until the Energy Department completes construction of a cooling tower needed to reduce the temperature of its water discharges. The cooling tower is supposed to be completed by 1992.

''For almost 10 years, the Energy Department has has refused to bring this reactor into compliance with the Clean Water Act,'' said James Simon, attorney for the Natural Resources Defense Council.

''The law is clear that neither industry nor the government can engage in this type of environmental destruction,'' Simon added. ''The Energy Department has not faced up to its legal obligations and therefore we are compelled to ask a court to force the department to do so.''

The only alternative to waiting for completion of the cooling tower, the environmentalists said, was for President Bush to grant a special national security exemption from the Clean Water Act for the K reactor.

Energy Department officials say restart of the reactors is vital to assure the government can continue producing nuclear weapons needed for deterrence.

But the environmentalists argued there was no national security need for Bush to grant a clean water exemption for the K reactor because tritium could be obtained from other sources, such as retired nuclear warheads or the other two Savannah River reactors, which the groups said meet Clean Water Act standards.

#90163u2571 06/12/1990 ~United Press International

NEWARK, NJ (JUNE 12) UPI - A federal judge issued a warrant Tuesday allowing the ''arrest'' of the British-owned vessel that dumped 260,000 gallons of heavy fuel oil into New York Harbor last week.

Lawyers for New York City and the states of New York and New Jersey said they had no immediate plans to seize the BT Nautilus but wanted to make sure the tanker could not leave port without permission once repairs are completed.

''It's not always necessary to use all the power we can get,'' said Nancy Stearns, a New York assistant attorney general.

The three governments filed suit against Bulk Tanker Management Ltd., the vessel's owner, as the Coast Guard continued to supervise a cleanup of congealed oil from the shores of the Kill Van Kull. On Tuesday, tarballs fouled 5 miles of Atlantic shoreline at Sandy Hook.

A Coast Guard spokesman said little visible oil remained in the water and that most appeared to have drifted to the shore.

A committee headed by Coast Guard Rear Adm. Gene Henn surveyed the area. The panel is investigating the series of spills this year that have dumped more than 1 million gallons of oil into the Arthur Kill and Kill Van Kull.

About 260,000 gallons of No. 6 oil, a type used to fuel power plants, spilled from the Nautilus early Thursday. The vessel grounded while it was approaching a dock at the Coastal Terminal in Bayonne.

The complaint filed in U.S. District Court in Newark charges that the spill endangered marine wildlife in New York Harbor and that the owner may face heavy damages for violations of environmental laws.

The tanker's first mate, Geoffrey Gregory of Mersey, England, was charged with operating a boat while drunk and illegal dumping of pollutants, but Coast Guard officers say the Nautilus was not under his control at the time of the accident.

U.S. District Judge Nicholas Politan signed a warrant allowing the

Nautilus to be detained pending further hearings.

Oil from the spill has been reported from Nassau County in New York to Sandy Hook. Although some oil hit the beaches at Sandy Hook a day after the spill, the area about 12 miles from the spill site was relatively untouched until Tuesday, said Manny Strumpf, a spokesman for the National Park Service.

The stretch of beach hit by the tarballs included 3 miles of bathing beach and 2 of natural area.

''We got them in on our morning tide,'' said Chief Ranger Frank Mills, who described the tarballs as ''flat pancake-looking things'' varying from the size of a silver dollar to the size of a frisbee.

Investigators from the New Jersey Department of Environmental Protection and the National Fish and Wildlife Service were checking for damage to fish or birds. The area's wildlife appeared unharmed.

The national seashore remained open to visitors but the $4 parking fee was waived. By midafternoon, most of the oil had been picked up, Strumpf said.

''There were about a thousand people on beach,'' Strumpf said. ''Usually, on a nice day like this, we could expect 5,000.''

During the weekend, oil washed up at Great Kills in Staten Island and one tarball was found on Nassau Beach on Long Island's south shore.

In the Kill Van Kull, which separates Bayonne from Staten Island, the cleanup appeared to be about 50 percent done, said Coast Guard spokesman Jim McGranachan. The heavy oil is difficult to deal with because it congeals and can't be picked up with skimmers and vacuums.

''It's labor intensive,'' McGranachan added. ''You have to pick it up with shovels and pitchforks.''

Henn's committee, which includes representatives from the Army Corps of Engineers and other federal agencies, was formed to take a look at procedures used by the oil terminals and refineries that line the New Jersey side of the Arthur Kill and Kill Van Kull. The area is one of the busiest oil ports and waterways in the world.

The group toured the area in a Coast Guard cutter Tuesday morning, McGranachan said.

Thursday's spill was the third this year to be classified as major with more than 100,000 gallons being dumped. The year began with a New Year's Day leak of 567,000 gallons from an Exxon pipeline, while a barge

explosion in March released more than 200,000 gallons.

Two smaller spills have dumped significant amounts of oil.

#90163u2588 06/12/1990 ~United Press International

(JUNE 12) UPI - The leaders of the three Baltic republics say they're returning to their homelands today with compromise proposals to end a deadlock with Moscow on their independence. The officials are NOT giving details of the proposals... saying they want to discuss them first with legislators in Lithuania, Latvia and Estonia. The proposals came at a meeting in Moscow with Soviet President Gorbachev.

It appears that the Pentagon's proposed 75 B-2 stealth bombers will cost Millions more than originally estimated. The Congressional Budget Office says the bombers now will run 860-Million dollars each... up 45-Million from the military's estimate in late April. The figures were released as congressional opponents of the bomber program began lobbying against it on Capitol Hill.

An Indian communications satellite was boosted into orbit today by a Delta rocket. The Delta blasted off early this morning from the Cape Canaveral Air Force Station, and two hours later successfully ejected the satellite into a preliminary, elliptical orbit. Engineers plan to make the orbit more circular during the next 10 days. The satellite was originally set to be launched one year ago, but it was damaged in a launch pad mishap.

The death toll continues to rise in the troubled South African province of Natal. Police say they were forced to shoot and kill four youths who attacked them in the KwaZulu homeland. More than three-thousand people have died since 1987 in battles in Natal between supporters of the African National Congress and the conservative Inkatha movement.

Kuwait is preparing to usher in a new government. Kuwaiti Premier Sheikh Saad resigned today, one day after the election of a new transitional national council that will pave the way for restoration of full democracy. The Cabinet has been asked to stay on for the time being as a caretaker government.

#90163u2605 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The Senate upheld Tuesday President Bush's veto of a three-year, $2 billion authorization for Amtrak - the country's rail network - preserving Bush's unblemished record of winning veto fights.

The Senate voted 64-36 to override the veto, three shy of the two-thirds

majority required. The House voted last week to override the veto 294-193.

Senate Democratic leader George Mitchell immediately requested the Senate to reconsider the vote but did not schedule a time for a second attempt.

In 11 attempts since Bush took office 17 months ago, Congress has failed to override a veto. The House vote last week was the first time that even one chamber refused to sustain the president.

White House press secretary Marlin Fitzwater said: ''We're pleased that the veto was sustained and we now urge a fast reconsideration without the objectional provision.''

Bush vetoed the bill on the basis of one provision that requries the Interstate Commerce Commission to review the purchase of major freight railroads by non-rail businesses. The ICC already has the power to review buying of railroads by other railroads.

In his veto message, Bush said, ''This requirement is an unwarranted regulatory roadblock to financial restructuring of the railroad industry.''

Democrats, fighting the veto, expressed fears that it was only a cover for the White House to stop federal financing for Amtrak. Bush did not seek any money for the railroad system in his fiscal 1991 budget.

Republican leaders promised that a new bill, dropping the provision which provoked the veto, would be introduced shortly and cited letters from Bush and to White House advisers that it would be signed.

The Senate was originally expected to vote last week but was blocked by Senate GOP leader Robert Dole of Kansas, who said that there were too many Republican absentees.

Sen. James Exon, D-Neb., floor manager for the Democrats, said, ''On Thursday last, we indeed had the votes to override. I can only hope that today the same senators will vote for the public interest.''

But Exon said, ''I am fearful. A great deal has gone on since last Thursday. The White House and its operatives have been very busy.''

Exon said there has been ''some talk'' by senators working to sustain the veto that it would be ''the good and kind thing to do'' on Bush's 66th birthday.

Sen. Bob Kasten, R-Wis., the Republican floor manager, insisted that Bush, despite his refusal to ask for any funds for Amtrak, said the veto ''was not over funding. the president agrees on that portion of the bill.''

Republicans insisted that the provision ordering the ICC to screen railroad acquisition by non-railroad organizations would be a step backward from railroad reorganization for which they credited a revival of the railroad system in the United States.

Dole said that 10 years ago the nation's railroad system was in ''sad shape'' but that today it was fast progressing in ridership and revenues and headed for success.

''In my view this one provision is a roadblock to successful deregulation '' Dole said. ''The gains achieved during the past decade could disappear in the next decade.''

Sen. Paul Simon, D-Ill., however, said that without the provision the railroads could wind up in a ''mess worse than the savings and loans'' institutions.

Sens. John Warner, R-Va., and Chuck Robb, D-Va., strongly supported the attempt to override the veto. The bill eliminates the last roadblock to a commuter rail line in northern Virginia.

#90163u2636 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The federal judge presiding over the drug and perjury trial of Mayor Marion Barry began randomly selecting potential jurors for questioning Tuesday in an effort to complete jury selection by week's end.

He said later he expects to have a jury seated next Monday and opening arguments on Tuesday.

At the outset of the trial June 4, U.S. District Judge Thomas Penfield Jackson had hoped to question all 250 potential jurors within two weeks before seating 12 jurors and six alternates.

But selection was slow - only about 100 potential jurors had been interviewed by Tuesday morning - so Jackson abandoned calling the panelists in alphabetical order, acknowledging he would not get through the alphabet and meet his self-imposed deadline.

Jackson called attorneys into his chambers after the questioning process ended Tuesday.

Defense lawyer Robert Mance said Jackson will announce a trial schedule on Wednesday, adding that he thinks a jury will be seated by ''the first of next week'' and that opening statements will ''probably'' be heard next Tuesday.

Potential jurors questioned Tuesday were asked about preconceptions they have involving Barry and the trial.

''He's probably been treated, as a public figure, fairly; as a private figure, unfairly,'' said one prospective juror, a lawyer, who added: ''I believe he probably did take drugs.''

Another said she had no opinion about the case because she has ignored media reports. ''I think the news media to a great extent is more entertainment,'' she said. ''In terms of entertainment, I prefer 'Dallas' and 'Falcon Crest.'''

Both potential jurors were kept in the pool.

Another potential juror said she has prayed for Barry, prompting prosecutors to try to remove her from the jury pool.

''She was praying for (what she believed was) a sinner,'' Jackson said, glancing over at Barry. The government's motion was denied.

In court, Barry was observed playing tic-tac-toe with Anita Bonds, his campaign manager, who is also helping out with his defense.

Barry and his lawyers remained tight-lipped about persistent reports that the mayor would publicly abandon plans for a fourth term in an effort to hasten a plea agreement with U.S. Attorney Jay Stephens.

But Barry met with about a dozen ministers Tuesday morning, and told the long-time supporters about his political plans, the ministers said at a news conference.

''He did make mention to the fact that he's made some decisions,'' said Rev. Robert Hamilton. ''He shared those decisions with us, and he does plan on making those announcements shortly.

''The announcement is whether he is going to run or not,'' said Hamilton, who refused to disclose what Barry said. ''I think it's a positive move. And there's no plea bargaining that's going on. We're happy about that and the mayor is not going to resign.''

Barry has denied reports he is seeking a plea agreement. He told reporters Tuesday to ''stay tuned.''

Stephens has said a Barry resignation or announcement that he will not run for office in this fall's elections is ''irrelevant'' to the charges or to plea negotiations.

Barry, 54, could face 26 years in prison and $1.85 million in fines if convicted on all 14 counts against him.

He was arrested Jan. 18 at the Vista International Hotel in downtown Washington, where he was videotaped allegedly smoking crack cocaine in a sting operation run by the FBI and Washington police.

He was later indicted on three felony perjury counts, 10 misdemeanor counts of cocaine possession and a single misdemeanor count of conspiracy to possess cocaine.

Prosecutors Tuesday filed a response to a motion filed last earlier by Barry's defense team questioning the government's conduct in the sting operation.

Defense lawyers said the government violated Barry's rights by luring him to the hotel with a former model, priming him with cognac and offering him crack cocaine.

In response to defense contentions that Barry's Fifth Amendment rights were violated, Stephens wrote: ''The defendant's Fifth Amendment rights did not protect him from incriminating himself by voluntarily smoking crack on Jan. 18.''

Mance said the defense has not decided whether to call Barry as a witness in his own defense.

#90163u2659 06/12/1990 ~United Press International

WASHINGTON (JUNE 13) UPI - Black leaders expressed bitter disappointment Tuesday after meeting with House Democrats to seek an end to U.S. covert aid to rebels in Angola, accusing the Democrats of a ''failure of character and leadership.''

Black leaders, including Jesse Jackson and Randall Robinson, executive director of the TransAfrica lobbying group, met with House Speaker Thomas Foley, D-Wash., and Reps. Steny Hoyer, D-Md., and David Bonior, D-Mich.

Robinson, who led U.S. protests against racial separation in South Africa, theatened a campaign of civil disobedience over Angola unless Democratic leaders in Congress speak out forcefully against continuing the covert aid.

''We were not pleased with what we heard. We didn't hear rejection. But we heard the typical meeting management answers,'' Robinson said. ''I was not impressed that Mr. Foley understood that time is life, and life is being lost and we have no time to waste.''

A Foley spokesman said the speaker would support a House rule allowing an Angola amendment to be attached to legislation authorizing 1991 intelligence spending. The spokesman expected such action could occur within the month.

The United States provides covert aid to Jonas Savimbi's Total Union for the Independence of Angola, or UNITA, because it is fighting a leftist government supported by Cuban troops and Soviet money.

But black leaders argue that support for the rebels can no longer be justified on the basis of the superpower conflict and have accused UNITA of human rights violations in war that Robinson said has left 500,000 dead.

Robinson and other black leaders have met with Secretary of State James Baker and Senate leaders on the issue and have threatened to make Angola an issue for Democrats seeking black support at the polls this November.

''Half of this meeting (which lasted an hour and 15 minutes) focused on the major responsibility of the Democratic leadership for this aid and what an affront it is to African-Americans,'' Robinson said.

''It is just a sad story of Democratic failure of character and leadership. The Democratic party is the leadership in the House and Senate and the Democratic members of the House and Senate ought to be broadly ashamed of themselves. But this issue will no longer be pursued in quiet.''

Robinson estimated the United States gives UNITA $50 million to $80 million in covert aid each year. The actual figure is classified.

#90163u2665 06/12/1990 ~United Press International

NEW YORK (JUNE 12) UPI - A day after two Brooklyn men were dealt long prison terms for the mob killing of a black teen in Bensonhurst, the first jurors were picked Tuesday to hear murder charges against another suspect charged in the slaying.

By midday Tuesday, a Bushwick accountant had been picked to be the foreman of the jury that will hear the case against John Vento, 21, who prosecutors claim ''helped round up the troops'' on the night Yusuf Hawkins, 16, was shot on a Bensonhurst street.

By the end of the day, four more jurors had been chosen, including the manager of a Queens sports complex, a hospital blood technician, a Transit Authority worker and a schoolteacher.

Vento was charged with murder after he backed out of an agreement to testify against Keith Mondello and Joseph Fama, both 19.

On Monday, state Supreme Court justice Thaddeus Owens sentenced Fama, convicted of murder, and Mondello, convicted of a series of lesser charges to the maximum prison terms allowable under the law.

Fama was sentenced to the maximum term of 32 years and eight months to life in prison. Mondello who was cleared of murder and manslaughter but convicted of riot and four other charges was given a maximum term of 5 1/3 to 16 years in prison.

The intense publicity surrounding the case hampered efforts to find jurors to hear the charges against Vento, as all but one of a 14 prosepective jurors were dismissed from the pool of potential panelists.

Many of those questioned said they assumed Vento was guilty after learning from news accounts that Vento fled the state after the crime and broken an agreement with prosecutors to testify.

Mondello and Fama were the first of eight young men to be tried in the killing of Hawkins, who had ventured into the predominantly white Bensonhurst neighborhood of Brooklyn to look at a used car and was surrounded by a gang of bat-wielding white youths.

The slaying of Hawkins sparked months of protest marches and vigils, splitting the city along racial lines.

#90163u2707 06/12/1990 ~United Press International

WOODS HOLE, MA (JUNE 12) UPI - Cleanup crews removed globs of heavy fuel oil from the shore of an island off Cape Cod Tuesday while rough seas hampered efforts to repair the crippled cruiseship Bermuda Star that caused the spill.

Clean Harbors Inc., an environmental firm, sent crews to clean the oil from Naushon Island, spokeswoman Karen Clancy said.

''This is a heavy thick tar. It is being picked up, shoveled up, boomed up '' she said.

The Coast Guard discovered oil along a 3 1/2-mile stretch of the island Monday, one day after the 617-foot cruise ship ran aground in heavy fog Monday, 2 miles off Cape Cod in Buzzards Bay.

Coast Guard officers said oil deposits were also spotted on the tiny Weepocket Islands off Naushon and Uncatena Island to the north. It was unclear when they would be cleaned up.

Efforts to repair an estimated 90-foot-long gash in the hull of the Bermuda Star were hampered for a second day by high seas, said Cmdr. Larry Doyle of the Coast Guard Office of Marine Safety in Providence.

The Coast Guard said work crews would begin repairing the hull Wednesday afternoon. After the repair work, which was expected to take about 30 hours, the vessel will be towed to a drydock in New York, a Coast Guard spokeswoman said.

Although none of the oil had reached any environmentally sensitive areas, environmentalists were watching carefully for any impact on birds and sea life in Buzzards Bay.

Some 60 percent of the world's population of the white and pink turns inhabit tiny Bird Island in Marion Harbor, across the bay from Naushon Island.

''These turns are basically an ariel-plunge fisher, which means they dive from wing to the water seeking small bait fish in the top meter or so,'' said Wayne Petersen, a field ornithologist for the Massachusetts Audobon Society.

''If in fact they are feeding over the shoal near the island, it will not require a large amount of oil on the plumage for the bird to lose its ability to waterproof itself,'' Petersen said.

Small amounts of oil reaching shore also could foul scallop and clam stocks, tangle sea grass, and kill lobster larvae that develop on the ocean's surface, said Les Kaufman, chief scientist for the Edgerton Research Laboratory at the New England Aquarium.

The cruise liner is anchored in Buzzards Bay, about 2 miles from where it ran aground in foggy weather Sunday morning. It has more than 100,000 gallons of fuel oil on board, but the Coast Guard saw little danger of further leaking.

''Our position is to do repairs and do the underwater survey without putting personnel in any danger,'' Doyle said.

Doyle did not expect the Coast Guard to publish its final report on the cause of the accident for ''several months,'' but said there appeared to be no equipment failure involved.

Chief Warrant Officer Thomas Blair said the Coast Guard was still investigating whether the captain of the ship, Hans Lewing, or the local pilot aboard, Capt. John Neary, was in control when the accident occurred.

''Weather conditions had a great deal to do with (the accident). There was

zero visibility with the fog,'' he said.

Blood and urine samples of the captain, local pilot, and other crewmembers responsible for navigating the ship were sent to a lab in Philadelphia for analysis. Results will not be ready for several days, Doyle said.

Dolye confirmed that Neary was the local pilot aboard the Norwegian freighter Hual Ingrita when it slammed into a pier in Jamestown, R.I., on Feb. 8. The Coast Guard determined a steering system failure caused the accident.

The Bermuda Star spilled an estimated 7,500 gallons of fuel oil after it grounded. Doyle said about 1,000 gallons turned up along beaches but the rest was unaccounted for.

The Bermuda Star ran aground as it waited to enter the Cape Cod Canal en route to Nova Scotia with 1,067 people aboard.

The gleaming white ship was headed from New York to Provincetown, Mass., on the tip of Cape Cod when it ran aground. The passengers and most crew members were ferried to shore later Sunday and no injuries were reported.

#90163u2765 06/12/1990 ~United Press International

PITTSBURGH (JUNE 12) UPI - Negative work events seem to have a significant effect on either triggering major depression or contributing to it, a researcher said Tuesday.

Dr. E. Carroll Curtis, corporate medical director of Westinghouse Electric Corp., presented results of a study during a conference on ''Depression in the Workplace: Issues and Answers.'' The study was funded by the National Institute of Mental Health and concerned the incidents of depression and stress in managers and professionals.

''Such things as difficulties with a supervisor, disappointment about pay increase or promotion or lack thereof and concerns about too much work'' can trigger depression, said Curtis. ''This is a key issue in the sense that interventions say to us we must do a better job of helping supervisors to be sensitive to these kinds of issues.''

Curtis conducted the study done by Westinghouse in conjunction with the University of Pittsburgh with some researchers at the State University of New York. They studied 1,870 randomly selected managers and professionals of Westinghouse in Pittsburgh.

''Another thing we found is that many people who become seriously depressed do not seek help,'' Curtis said. ''This is not an

inconsequential issue - 10 to 15 percent of the people who are hospitalized for major depression attempt or commit suicide.''

Researchers conducted two-hour semi-structured, strictly confidential interviews mostly in the worker's homes, Curtis said. The interviews were performed by qualified, experienced mental health professionals. Most other mental health studies have been done by lay interviewers who do not know how to follow up on sensitive issues that may be important, he said.

''What we tried to determine was the prevalence of and the contributors to stress,'' Curtis said. ''We looked at the major mental health disorders in this country among this population. They include major depression and alcoholism.''

Curtis said among the conclusions of the study were:

- Mental health is a big ticket item for business that includes about $1 in every $5 of health-care cost.

- Major depression is more common than thought but is a treatable disease.

- Meeting the challenges posed requires several measures, including a creative approach to benefit design, the training of supervisors and managers, and a long-term goal must include changes in culture.

The conference was sponsored by Pitt, where Curtis is an adjunct assistant professor of occupational and environmental health.

#90163u2814 06/12/1990 ~United Press International

(JUNE 12) UPI - Lithuania's president says it may be possible to find a way out of the standoff between the rebellious republic and Moscow. Vytautas Landsbergis voiced optimism today after a Moscow meeting with Soviet President Gorbachev and the leaders of Latvia and Estonia. But Landsbergis is NOT detailing the compromise proposal to end the deadlock on Baltic independence that came as the republic of Russia declared sovereignty in yet another challenge to Gorbachev.

Secretary of State Baker describes himself as ''hopeful, but NOT optimistic'' that the United States will continue a dialogue with the Palestine Liberation Organization. Baker says a ''number of friendly countries'' are urging the United States NOT to end the talks. The Bush administration is considering halting the discussions in the wake of a failed speedboat attack against Israel by a radicial Palestinian group.

Firefighters hope they've gained the upper hand in battling an oil-fed three-day-old blaze aboard the Norwegian tanker Mega Borg in the Gulf of

Mexico. The Coast Guard says it may be possible to extinguish the fire with chemical foam... now that the flames are out in the ship's pump room and on the waters surrounding the tanker, 57 miles southeast of Galveston, Texas.

Federal authorities say for the first time... a man has been charged with a committing a criminal murder while an F-B-I agent. Mark Putnam pleaded guilty today in Pikeville, Kentucky, to manslaughter in the strangulation death of his pregnant, married girlfriend. The woman disappeared one year ago on this date. Putnam had worked with the woman, who was an informant in the investigation of a series of bank robberies.

#90163u2839 06/12/1990 ~United Press International

(JUNE 12) UPI - Federal investigators are on the scene of a series of explosions at a fireworks plant that killed at least two people today in rural Mississippi. Firefighters had a difficult time bringing a blaze sparked by the blasts under control because NO water mains are near the factory south of Columbus. One other person was hurt in the explosions that shook buildings 15 miles away.

The widow of the man convicted of killing Charles Lindbergh's son wants New Jersey Governor Jim Florio to declare her husband innocent. 91-year-old Anna Hauptmann said in Trenton today that her only wish is to meet Florio and convince him to clear her husband's name. Bruno Hauptmann was executed in 1936 after being convicted of kidnapping and murdering the aviator's son. Governor Florio said he would consider any legal arguments from Anna Hauptmann.

The White House says there's NO point going over the 30-year-old history of the arrest of Nelson Mandela, following a report of C-I-A involvement. White House spokesman Marlin Fitzwater said- quote- ''doN'T beat me up for what the Kennedy administration did.'' The Atlanta Journal-Constitution reported yesterday that the C-I-A provided South African authorities the information used to locate and capture Mandela in 1962.

A special counsel today charged that Minnesota Senator David Durenberger knowingly got around congressional limits on outside income. A rare Senate hearing in Washington is investigating whether Durenberger got around limits on payments by calling his speeches ''book promotions.'' Durenberger has admitted that he is guilty of poor judgment, but NOT greed. But the special counsel charged Durenberger used a ''gimmick'' to launder speech fees.

#90163u2851 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - President Bush, feeling ''like a spring colt '' marked his 66th birthday Tuesday by tossing a few horseshoes, seeking protection for the flag and attending a GOP dinner that raised $6 million in his honor.

''This has been a happy birthday'' even though ''I started off kind of regretting it,'' Bush quipped. ''It's been a good birthday ... good cake, good cards.''

Bush had a birthday lunch with an American hero, former test pilot Chuck Yeager, and made a telephone call of congratulations to Texas Ranger pitcher Nolan Ryan, who tossed a record sixth career no-hitter Monday night. Ryan, 43,Bush said, is another example of a veteran in top form.

At a Rose Garden ceremony, Bush received a replica of the Iwo Jima Memorial, which depicts soldiers raising Old Glory, and urged Congress to pass a constitutional amendment prohibiting flag desecration by the Fourth of July.

Bush turned the Rose Garden ceremony into a mini-news conference where he fielded a half dozen questions, including one asking: ''How does it feel to be 66?''

''Slightly worse than being 65. But not bad, not bad,'' said Bush, one of the most vigorous presidents in U.S. history, as well as the eighth oldest. ''It's been a very good one (birthday). I feel like a spring colt.''

Later Tuesday, about 4,000 Republicans, including several members of Congress and the Cabinet, attended $1,500 per-plate birthday dinner for the popular 41st president, whose wife, Barbara, turned 65 on Friday.

Proceeds from the black-tie gala will go to Republican candidates in this fall's congressional races, where a third of the Senate and the entire House will be up for grabs.

The Republican National Senatorial Committee and the Republican National congressional Committee annually sponsor the President's Dinner, but this year they scheduled the bash to coincide with Bush's birthday.

''This is a celebration of Bush's birthday, and his successful presidency '' a spokeswoman said.

Bush, in his prepared remarks, touted ''the Republican record ... the longest peacetime economic expansion in history ... the lowest unemployment rate in 16 years.''

He also declared, ''This year's election ... presents an opportunity for us to regain a majority in the Senate,'' where Democrats now hold a 55-45 margin. ''We can end the Democratic stronghold on the U.S. Congress.''

Earlier Tuesday, congressional leaders sang ''Happy Birthday'' at the start of a White House meeting with Bush, who began the day by tossing a few horseshoes on the way to the Oval Office.

Senior aides surprised Bush with a gift, a brown leather briefcase to replace his old tattered one. ''It's just what I need,'' White House press secretary Marlin Fitzwater quoted him as saying.

Bush also got a birthday laugh when a group of reporters donned pointed party hats for a picture-taking session at the start of his meeting with congressional leaders.

''It's a vast improvement,'' the president said.

-30- 3218

#90163u2869 06/12/1990 ~United Press International

WASHINGTON (JUNE 12) UPI - The oil industry and the administration's insistence on overriding state oil spill liability laws is the main obstacle to quick enactment of comprehensive oil spill legislation, Senate Democratic leader George Mitchell of Maine said Tuesday.

Mitchell said congressional negotiators are close to reconciling most of the major differences between the House and Senate versions of the oil spill bill, but the issue of pre-empting state liability is holding up a final agreement.

Mitchell's remarks on the Senate floor appeared to respond to criticism from oil industry officials who blamed slow action by Congress for the industry's failure to carry out its new oil spill response strategy.

The latest round of fingerpointing followed an oil spill last week in the Kill Van Kull of New York Harbor and the fiery explosions aboard an oil tanker in the Gulf of Mexico this week.

Both the House and Senate approved bills that would limit the liability of oil spillers for cleanup and compensation payments and would establish a $1 billion trust fund to pay for costs exceeding those limits. The new trust fund would be financed by a 5-cents-a-gallon tax on oil.

In addition, Mitchell said, House and Senate negotiators are expected to ''shortly reach accord'' on provisions requiring new tankers to be equipped with double hulls and to mandate a phase-out of the existing single-hulled fleet.

Such an agreement would essentially mark Senate acceptance of the House position on the controversial issue of mandatory double hulls, which has been opposed by the oil industry.

The Maine Democrat also said the negotiators are close to agreement on an array of provisions aimed at improving the ability of the government and industry to contain and clean up major spills.

''The major problem preventing quick enactment (of the bill) has been the insistence by the oil shipping industry, the administration and others on adopting House bill provisions'' that would carry out an international treaty setting up worldwide rules limiting the liability of oil spillers, Mitchell said.

The House and Senate bills both endorse the position that federal liability laws should not override state laws, which may be more stringent.

However, House language adopting the unratified treaty constitutes an ''attempt to establish a liability regime that contradicts the one established elswehere in the House bill,'' Mitchell said.

Mitchell said the 1984 treaty goes too easy on polluters. Had it been in effect last year, Exxon would have been liable for only $60 million of the estimated 2 billion cleanup costs stemming from the oil spill in Alaska's Prince William Sound, he said.

Mitchell said it was inappropriate for the House to act on the treaty because constitutional authority to ratify such agreements rests soley with the Senate, which for years has refused to accept the international accord.

#90163u3021 06/12/1990 ~United Press International

(JUNE 12) UPI - President Bush today called on Congress to pass a constitutional amendment against flag desecration by the Fourth of July. Bush says patriotic Americans may differ on the issue... but he feels flag-burning- quote- ''endangers the fabric of our country.'' Senate Republicans suggest they'll make flag-burning a campaign issue this fall. But House Speaker Tom Foley, a Democrat, says he doesN'T think voters will hold it against lawmakers who try to protect the Bill of Rights and oppose an anti-flag burning amendment.

Bush is calling a meeting in Moscow today ''a heartening development.'' Bush says he hopes talks involving Soviet President Gorbachev and the leaders of the Lithuania, Latvia and Estonia will lead to- quote- ''self-determination for the Baltics.'' The meeting ended in compromise

proposals to end the deadlock on Baltic independence. The plan apparently involves freezing the republics' declarations of independence... while beginning talks on secession and an end to the blockade of Lithuania.

Military sources say an Israeli soldier chasing stone-throwers threw a tear gas canister inside a crowded U-N clinic in the Gaza Strip today... causing 68 children to be overcome by fumes. At least 17 youngsters were hospitalized. An Israeli military source says the soldier will be disciplined.

The Coast Guard says much of the fire is out aboard that Norwegian oil tanker, 57 miles off the Texas Gulf Coast. Chemical foam may soon be used to try to smother the rest of the flames. The Norwegian consul general announced today the ship's crew will testify at an inquiry tomorrow in Galveston, Texas. Also today, Texas gubernatorial candidate Clayton Williams called for a summit of Gulf Coast governors to discuss the slow arrival of emergency equipment to the ship fire.

(JUNE 12) UPI - Cleanup crews today began picking up globs of oil from an island off Cape Cod, Massachusetts. But rough seas are holding up efforts to repair the cruise ship Bermuda Star that caused the spill. The liner ran aground Sunday in heavy fog off Cape Cod. The Coast Guard says work crews will begin fixing its hull tomorrow. After a day of repairs, the vessel will be towed to a drydock in New York.

An appeals court in Columbus, Ohio, has upheld the conviction of Donald Lukens on charges of contributing to the deliquincy of a minor for having sex with a 16-year-old girl in 1988. An attorney says the western Ohio congressman will appeal today's ruling to the state Supreme Court. The Republican lawmaker has already been defeated for renomination for his congressional seat.

Chubby Checker will still be able to live up to his title as the ''king of the twist'' after escaping injury in a traffic accident today in Oklahoma. However, six members of the rock 'n' roll singer's group were hurt in the crash involving a semi-trailer truck and a bus carrying the band. The Oklahoma Highway Patrol says Checker was asleep at the time of the accident.

#90163u3099 06/12/1990 ~United Press International

LOS ANGELES (JUNE 13) UPI - Peter Tormey has been named Utah state editor and Salt Lake City bureau manager for United Press International, UPI Pacific Region Editor Jacques Clafin announced Tuesday.

Tormey, who had been UPI Idaho state editor and Boise bureau manager since Jannuary 1988, succeeds Ralph Wakley, who steps down at his own request after a 5-year stint in the job in order to concentrate again on reporting.

''Ralph enjoys the respect of his colleagues because of his professionalism and the high level of leadership that he has provided,'' Clafin said. ''We respect his decision to return to reporting full time, and we are fortunate to be able to continue to rely on his experience in Utah.

''We are also fortunate to be able to turn to someone of Pete Tormey's caliber,'' Clafin added. ''Pete brings to his new assignment energy, enthusiasm, a great deal of reporting skill and an unwavering dedication to serving the needs of UPI's clients.''

Tormey, 32, joined UPI in September 1987 as a reporter at the Boise, Idaho bureau after working as a newspaper reporter for the Idaho Mountain Express in Ketchum, Idaho.

He also has been a copy editor for the Murray Publishing Co. in Seattle, a reporter for Argus Magazine in Seattle, associate editor for Husky Sports magazine in Seattle and editor of The Sandpointer at the Sandpoint Naval Station in Seattle.

Tormey, who became UPI state editor in Idaho in January 1988, covered the state Legislature for the past three years, including this year's passage of a bill that would have given Idaho the nation's most restrictive state abortion statute. Gov. Cecil Andrus vetoed the bill.

Reared in Spokane, Wash., Tormey graduated from the University of Washington with a bachelor's degree in English literature.

He was a three-year letterman linebacker on the UW Huskies' fooball team that defeated Michigan in the 1978 Rose Bowl and beat Texas in the 1979 Sun Bowl.

#90163u3196 06/12/1990 ~United Press International

(JUNE 12) UPI - The Senate fails to override Amtrak veto... Firefighters make progress at burning tanker... Soviet President Gorbachev meets with leaders of three Baltic republics. And Florida draws the line on beach attire. U-P-I has it all, next:

The Senate tonight voted 64-36 in upholding President Bush's veto of a three-year, two-BILLION-dollar authorization for Amtrak, the nation's passenger rail system.

The vote... three short of the two-thirds required for an override... came as a birthday present of sorts for Bush, who turned 66 today. It also preserves the president's UNblemished record of winning veto fights with the Congress.

The House last week voted to override the veto.

Senate Democratic leader George Mitchell is requesting the Senate vote again... but did NOT schedule another override attempt.

Bush rejected the bill providing funds for the nation's rail network on the basis of one provision that requires the Interstate Commerce Commission to review the purchase of major freight railroads by NON-rail businesses. Bush describes the provision as an ''UNwarranted regulatory roadblock.''

The White House responded to the Senate action, saying it is pleased the veto was sustained... and hopes lawmakers will quickly work out a revised bill.

Democrats say they're worried the veto is a White House cover to stop federal financing of Amtrak. But Republicans say Bush is willing to sign a funding bill without the objectionable provision.

The dwindling fire aboard that Norwegian oil tanker in the Gulf of Mexico today is raising hopes of averting a huge oil spill.

The Coast Guard says the fire is out in the ship's pump room and in surrounding waters, 57 miles southeast of Galveston, Texas.

Fire is still burning below decks, but the tanker Mega Borg has cooled down.

Coast Guard Captain Thomas Green says he hopes 100 tons of chemical foam on fireboats around the tanker can be applied today. But he cautioned firefighters are ''still NOT out of the woods.''

An estimated 100-thousand gallons of crude oil has leaked since an explosion on the tanker Saturday killed two crewmen and left two missing. But 38-Million gallons of oil remain inside the leaking ship.

Norway's consul general in Houston says he will question the Mega Borg's crew tomorrow in Galveston.

Because the accident occured in international waters, Norway is in charge of the investigation.

#90163u3209 06/12/1990 ~United Press International
(JUNE 12) UPI - A summit of sorts between Baltic leaders and Soviet President Gorbachev may have produced a compromise today.

The leaders of Lithuania, Latvia and Estonia say they will take to their parliaments a compromise proposal to end the deadlock on Baltic independence.

The plan apparently involves freezing their declarations of independence while the Kremlin ends a blockade of Lithuania and begins talks on secession.

Gorbachev repeated his demand that the Baltic republics suspend their declarations of independence, but softened his stand by saying the suspension could be temporary.

In Washington, President Bush welcomed the meeting as ''a heartening development.''

Gorbachev faced another challenge today when the parliament of the Russian Republic announced its sovereignty.

Gorbachev later met in Moscow with the leaders of all 15 Soviet republics. The president of Latvia says Gorbachev proposed that the Soviet Union become ''a union of sovereign states.''

A special counsel to the Senate Ethics Committee is recommending the panel denounce Minnesota Republican David Durenberger for scheming to avoid limits on outside income.

Robert Bennett made his recommendation as the six-member committee opened a rare public investigation today.

The lawyer hired to conduct the inquiry described Durenberger's conduct as ''NOT inadvertant.'' But Bennett says there is insufficent evidence to recommend expulsion- the severest possible penalty. He says it does NOT appear the Minnesota lawmaker acted with criminal intent.

Durenberger showed little emotion as Bennett issued his advice, but later said he would view a denouncement as ''harsher than warranted.''

The major issue before the panel is a charge that Durenberger used two of his books and a publisher to exceed limits on outside income in 1985 and 1986.

Any punishment decreed by the panel must be approved by the full Senate.

-30- 2112
#90163u3223 06/12/1990 ~United Press International
(JUNE 12) UPI - Results are expected later tonight from primary elections in five states.

In Arkansas, voters are chosing between a black businessman and a former Ku Klux Klan sympathizer in a runoff for the G-O-P lieutenant governor nomination.

The race pits Ralph Forbes against Kenneth ''Muskie'' Harris. Forbes is a former member of the American Nazi Party and a K-K-K sympathizer... while Harris is a black real estate agent and former college football player.

Whoever wins will be viewed as the underdog in November against the Democratic nominee, former Representative Jim Guy Tucker of Little Rock.

In South Carolina, Republican Governor Carroll Campbell is running UNopposed for his second G-O-P nomination. He's expected to be a heavy favorite against either of two state senators vying for the Democratic nod.

In addition, voters cast primary ballots today in Maine, Virginia and North Dakota.

A former F-B-I agent faces 16 years in prison after pleading guilty to manslaughter charges today in Pikeville, Kentucky.

Officials say the case involving Mark Putnam is the first criminal homocide by an agent... and the F-B-I's reputation has suffered as a result.

Putman's plea comes one year to the day after Susan Daniels Smith disappeared. The woman's remains were found in a ravine earlier this month.

Officials say Putman strangled Smith after she refused to have an abortion. Smith was four months pregnant when she died, allegedly with Putman's child.

The F-B-I says their relationship began when Putnam was investigating a series of bank robberies in Kentucky in 1988... and Smith was an informant.

Kentucky Commonwealth Attorney John Paul Runyon says Putnam confessed to the death and even told authorities where to find the body.

But Runyon says the state had NO evidence linking Putnam to the body and had murder charges been pursued, Putnam probably would have walked away scott free.

#90163u3229 06/12/1990 ~United Press International
(JUNE 12) UPI - The World Health Organization says the AIDS epidemic is shifting largely to poor, underdeveloped countries.

Experts say Third World nations currently account for about 66 percent of H-I-V-infected people. But new estimates are that the Third World will make up nearly 80 percent of the cases by the year 2000, and a staggering 90 percent by 2010.

But the World Health Organization says AIDS appears to be leveling off in the United States. The W-H-O attributes the drop to the decline of infection among homosexual men, who make up the majority of AIDS cases in the United States and Western Europe.

The health organization's new AIDS director... Dr. Michael Merson... says he would be very concerned if industrial countries lost interest in AIDS research because more infections were occurring in developing countries. Merson said- quote- ''people are people wherever they are.''

Merson said wider use of condoms and better screening of blood for transfusions might help curb the tide of H-I-V infection in the Third World.

Florida officials want sunbathers in the state to keep some clothes on.

Governor Bob Martinez and his Cabinet today approved new rules that clearly define what parts of the human body must be kept under wraps at state parks and beaches.

The rules ban exposure of the buttocks, the genitals, and the female breast below the top of the nipple. The policy effectively bans wearing of thong-type bathing suits, which reveal almost all of the buttocks.

State recreational parks director Fran Mainella said she doesN'T want children exposed to experiences their parents may NOT want them exposed to.

But nudists are asking that Florida establish clothing-optional beaches, as California and Oregon have done.

#90163u3345 06/12/1990 ~United Press International
(JUNE 12) UPI - Voters in Atlantic City, New Jersey, have rejected incumbant Mayor James Usry in today's runoff mayoral elections. UNofficial results show Usry... who is under indictment for alleged corruption in

office... being soundly defeated by two-term city councilman James Whelan.

The fire aboard the Norwegian tanker Mega Borg has been brought under control off the Texas Gulf Coast. Coast Guard officials say firefighters will continue to pour water over the hull during the night, and say it's possible the fire could be put out tomorrow.

Authorities who flew over the tanker late today saw NO flames, only white smoke. The Coast Guard says a team of firefighters boarded the vessel to search for hot spots on which they'll apply fire-quenching chemical foam.

The White House says it's ''pleased'' the Senate failed today to override President Bush's veto of a three-year, two-BILLION-dollar authorization for Amtrak. But Senate Democratic leader George Mitchell has requested the Senate reconsider the vote.

Senator David Durenberger says he feels a recommendation that he be denounced is ''harsher than warranted.'' A special counsel today recommended the Minnesota Republican be denounced by the Senate Ethics Committee for scheming to avoid limits on outside income.

A swiftly moving storm system spawned several tornadoes and high winds late this afternoon in southwestern Iowa. Several communities and farms report storm damage. However, there are NO reports of any injuries.

Federal authorities are investigating today's explosions that ripped apart a fireworks factory 15 miles south of Columbus, Mississippi. At least two people were killed. The plant was crammed with the makings of Fourth of July pyrotechnics when it blew up.

#90163u3378 06/12/1990 ~United Press International

(JUNE 12) UPI - Jury selection began today in a New York City courtroom in the trial of a third man charged in last August's racial slaying of a black teen-ager in the mostly white Bensonhurst neighborhood. Prosecutors say 21-year-old John Vento ''helped round up the troops'' the night Yusuf Hawkins was fatally shot.

The trial begins one day after two Brooklyn men were given the maximum prison terms allowable under the law in the killing that sparked months of protests and split the city along racial lines.

The federal judge presiding over the drug and perjury trial of Washington, D-C, Mayor Marion Barry admits he may NOT meet his self-imposed deadline of seating a jury by week's end. The judge now says he's aiming for next Monday and opening arguments on Tuesday.

Diplomats in the West African nation of Sierra Leone say peace talks opened today between Liberian government officials and rebel leaders. But chances of ending the six-month-old civil war doN'T look promising, with both sides rejecting the other's conditions for a cease-fire.

Despite cancellation a planned general strike, more than 100-thousand workers and professionals in and around Sao Paulo, Brazil, stayed off the job today. They're protesting a government austerity plan that has brought layoffs and recession to the South American nation.

Here's the latest in the marital troubles of Argentina's president. An aide says Carlos Menem's estranged wife has been evicted from the president's official residence in Buenos Aires. Today, Mrs. Menem threatened legal action if she's NOT allowed to recover her furniture and other personal belongings.

#90163u3503 06/12/1990 ~United Press International

(JUNE 12) UPI - The Coast Guard says the fire aboard a Norwegian oil tanker in the Gulf of Mexico is now under control. The blaze is still burning below decks of the Mega Borg, but the ship is almost cool enough to douse with chemical foam. Coast Guard Petty Officer Rich Muller says a team of firefighters boarded the ship to pinpoint where the foam should go. He added that the fire might be out by tomorrow. That might help avert a spill of 38-Million gallons of oil.

Nicaraguan government officials say a Contra rebel is suspected of gunning down a Sandinista army lieutenant Sunday night in a rural province. The official Sandinista newspaper says a camouflage-clad rebel shot his victim as he lay sleeping at a home in Santo Tomas. The shooting took place near a main security zone where the Contras are disarming.

Protesters are vowing to fight for remaining parliamentary seats in Bulgaria. Officials today announced election results give the majority of the seats to communists. 200 students began a three-day sit-in strike at Sofia University to protest what they say was a rigged election. International observers, however, pronounced Sunday's balloting basically fair. 63 parliamentary seats are to be decided in a run-off election Sunday.

The Soviet Parliament today declared censorship of the mass media against the law. The official Tass news agency described the measure as the first legal act in Soviet history that details freedom of the press. The law also allows reporters to refuse to write stories that violate their convictions. Publishers of underground publications say the laws will help them challenge dominant official newspapers.

#90164b0003 06/13/1990 ~Business Wire
PASADENA, CA (JUNE 13) BUSINESS WIRE - Countrywide Credit Industries Inc. (NYSE:CCR) Wednesday announced that unaudited net earnings for the first quarter ended May 31, 1990, were $4,313,000, or 25 cents per primary share and 24 cents per fully diluted share.

Net earnings for the comparable year-ago quarter were $2,497,000, or 15 cents per primary share and 14 cents per fully diluted share.

The company's board of directors declared a cash dividend of 7 cents per share for the quarter, payable on July 16, 1990, to shareholders of record on June 22, 1990.

''Countrywide Credit's substantially improved performance vs. the comparable year-ago quarter reflects higher loan production, greater net interest income, the growth of the loan servicing portfolio and the growing contribution of the company's other operations,'' noted David S. Loeb, Countrywide's chairman. ''The improved results vs. the immediately preceding quarter are attributable to higher loan production, increased margins on loan production and the improved performance of the company's other operations,'' added Loeb.

Countrywide Credit Industries is engaged primarily in the mortgage lending business, originating, selling and servicing residential mortgage loans. Countrywide operates through a nationwide network of approximately 100 offices serving real estate brokers and homebuyers, as well as mortgage brokers.

Countrywide also operates through a correspondent loan program serving financial institutions in all 50 states and through a newly formed consumer division serving individual homebuyers and howeowners directly.

#90164b0017 06/13/1990 ~Business Wire
NEWPORT BEACH, CALIF. (JUNE 13) BUSINESS WIRE - A new product is available for use in home refrigerators that is proven to increase the shelf life of fruit, vegetables, meat and other perishables, cut food and energy costs, eliminate odors and reduce maintenance expenditures.

The compact Stay Fresh refrigerator filter (5 inches by 7 inches by 1/2 inches) attaches to the inside ceiling of a refrigerator with the accompanying adhesive. It uses sorbite, a mineral found in the desert southwest that naturally regulates humidity and temperature in the refrigerator. The sorbite is encased in a waterproof container and cloth housing.

Stay Fresh is approved by the U.S. Department of Agriculture and the Occupational Safety and Health Administration as non-toxic and has gained endorsement from Rockwell International's Science Center in independent tests. It has no adverse environmental effects.

''We have something here that's an anomaly in today's world,'' said Stay Fresh President Seth Schiller. ''In a high-tech age, we've got a product which is completely natural, cost-saving and benefits both the consumer and the environment. In today's world, that combination is not only rare but exciting.''

When humidity levels inside a refrigerator rise, Stay Fresh naturally absorbs excess moisture from the air, releasing it later as the air dries, extending the shelf life of foods by up to 100 percent. Odors are absorbed along with the moisture and are trapped inside the unit.

Excess humidity causes food spoilage, while not enough humidity causes produce and meat to darken and spoil. By reducing excess humidity, Stay Fresh also prevents buildup of frost on refrigerator cooling units and freezer walls.

The process reduces the amount of time the refrigerator works, resulting in reduced energy costs and less escape of ozone-damaging freon into the atmosphere.

Stay Fresh recharges itself in the sun and carries a four-year, money-back guarantee. Retail cost is $12.95, with discounts to charitable organizations.

#90164b0022 06/13/1990 ~Business Wire

SHEPHERD, MN (JUNE 13) BUSINESS WIRE - United Tote Inc. (NASDAQ:TOTE), a leading, worldwide supplier of wagering systems, reported a loss of $634,295 for the second quarter of fiscal 1990 on record revenues.

The company lost 11 cents per share for the quarter ended April 30 on revenues of $17.4 million from service contracts with the company's 318

wagering system customers, equipment sales and racetrack operations.

Chairman of the Board Lloyd Shelhamer said revenues were up 145 percent, or $10.3 million from the second quarter of fiscal 1989. Most of the increase was provided by Autotote Systems Inc., (Autotote), an international supplier of wagering systems which the company acquired in December 1989.

He noted, however, that the revenue gain by the company during the quarter did not offset increases in depreciation, amortization and interest expenses resulting from the Autotote acquisition and seasonal factors associated with the industry.

The second quarter results compare with a loss of $280,620, or 9 cents per share on revenues of $7.1 million for the same three months of last year.

For the six-month period, United Tote reported a loss of $1,325,846, or 26 cents per share, on revenues of $28.3 million. This compares with a loss of $468,181, or 15 cents per share on revenues of $13.8 million for the same period of fiscal 1989.

Shelhamer said the increase in outstanding shares since the second quarter of last year reflects stockholder approval of a recapitalization plan associated with the Autotote acquisition and a May 1989 stock split.

James H. Pierce, president and chief executive officer, said the company's performance in the second quarter was also influenced by costs associated with an antitrust action brought by the U.S. Department of Justice after United Tote purchased Autotote.

Pierce said United Tote produced solid marketing results in the second quarter, completing $2.6 million in equipment sales and signing long-term service contracts with five new racetrack customers.

United CBS Inc., United Tote's sports wagering system subsidiary, added five customers during the quarter including The Excalibur, a new 4,000-room facility reportedly the world's largest hotel/casino/resort. The $290 million complex on the Las Vegas Strip is scheduled to open June 19.

SAN JOSE, CA (JUNE 13) BUSINESS WIRE - Scorpion Technologies, (NASDAQ:SCPNA), announced Wednesday they will formally unveil the SRV 386 drawing conversion system at the (A/E/C) show in Atlanta; June 13 - June 15.

SRV 386 is the latest product offering in Scorpion's SRV Family of Raster to Vector Systems. SRV 386 was developed specifically for the Intel 80386 processor.

SRV 386 converts 4 megabyte raster files to vector in as little as nine minutes. By providing performance matching midrange and mini-computers, SRV 386 makes it affordable for companies of all sizes to have in-house drawing conversion capabilities.

In addition, in an effort to streamline the company in order to better allow it to focus on its advanced computer electronic's technology, Scorpion has recently sold its telephone systems division, ''Network Computer Support'' to On-Target Sports of Las Vegas for an undisclosed amount.

Scorpion Technologies is a high technology developer and marketer of advanced image processing systems and semiconductors serving Fortune 1000, government agencies and resellers throughout the world.

#90164b0040 06/13/1990 ~Business Wire

CLEVELAND (JUNE 13) BUSINESS WIRE - Workers and managers must learn to rethink their jobs to achieve total quality if U.S. industry is to stay competitive, Goodyear Chairman Tom H. Barrett told a business meeting in Cleveland Wednesday.

Speaking at the McDonald & Co. symposium on competitiveness, Barrett said that quality has become the driving force in Goodyear's leadership strategy.

''We must start asking ourselves the right question about competitiveness '' he said. ''How can we be the best?''

Getting better is not good enough anymore, he said.

The past five turbulent years of consolidation left three companies with almost 60 percent of the world's tire business, Barrett said. ''This is global change of the highest order.''

A great many American industries face similar challenges, he said. ''What we must do as manufacturers...is produce quality goods with value to the consumer.''

The kind of rethinking needed was illustrated with the Goodyear decision in the late '70s to eliminate second class tires, called ''blemished,'' from the line.

The wrong question was. ''How do we reduce our percentage of blems?'' The right question, he said, is ''How do you eliminate the problem, not just make improvements?''

Changing the question, he said, increased employee involvement, improved product quality, lowered costs and eliminated steps and space in the manufacturing process.

''That 'complete rethink' is the key to our competitive future,'' Barrett said.

Modern manufacturing facilities are basic to competitive success, according to Barrett. The state-of-the-art plant now coming on stream in Napanee, Ontario, Canada, will be Goodyear's lead tire facility in the decade of the '90s.

''The Napanee plant uses our extensive global product experience to achieve economies of scale in a small, local facility,'' he said. ''This plant is close to our customers and gives us the flexibility to offer the right products in the right quantities at the right time.'' A one-day shipping radius from the plant covers a population of 93.3 million people and reaches 99 percent of Canada's auto production and 60 percent of U.S. auto production.

Napanee technologies and efficiencies also will be transplanted to appropriate older plants, Barrett said.

Since the late 1970s, Goodyear has closed or sold 28 plants worldwide, modernized 12 and converted 11 boosting production totals and productivity he said.

''Total radial tire production in our North American plants increased more than 60 percent in the 1980s,'' Barrett said, ''and tires-per-employee per year increased more than 40 percent.''

In addition to the changes in manufacturing, Goodyear is engaged in a major realignment of its North American field sales and support organization.

Barrett said details of the impact of the restructuring would be made

available soon.

MENLO PARK, CA (JUNE 13) BUSINESS WIRE - McCown De Leeuw & Co., a private venture banking firm with offices in Menlo Park, New York City, and Ann Arbor, Mich., announced its acquisition of Century Fasteners Inc., a Los Angeles-based distributor of industrial fasteners.

McCown De Leeuw & Co., who negotiated the transaction and arranged the financing for the deal, acquired CFI in conjunction with management for approximately $15 million.

''This is the first step in the firm's plan to invest in other regional specialty distributors,'' said George McCown, managing partner of the Menlo Park office.

CFI was purchased from Leo Krashen, who co-founded the company in 1972 with Ted Green. Green retains his position as president of the company along with Ralph Schack, Century Fastener's chief executive officer. As is the case with all of McCown De Leeuw's transactions, company management invested a significant amount of equity in the newly acquired company.

''For eighteen years, Century Fasteners has built a reputation for dependability and customer service,'' states Gary Schoenfeld, an associate at McCown De Leeuw. ''We are delighted to be partners with such an outstanding management team.''

McCown De Leeuw manages over $200 million in equity capital in six funds. Since its founding in 1984, the firm has invested over $35 million in fifteen companies and raised four new funds.

The twelve companies currently in its portfolio operate in a variety of industries, including building materials, restaurants, canvas shoes, specialty paper, office supplies and commercial airlines, and generate over $1.5 billion in annual sales.

McCown De Leeuw has been successful by making strategic acquisitions in specifically targeted industries. The investment in Century Fasteners Inc. is consistent with this strategy.

KANSAS CITY, MO (JUNE 13) BUSINESS WIRE - W. Thomas Grant II, president and chief executive officer of BMA Corp. indicated Wednesday that approval has been received from the director of the Missouri Division of Insurance for the previously announced sale of BMA Corp.'s wholly-owned insurance subsidiary, Business Men's Assurance Company of America to Generali-Assicurazioni Generali S.p.A.

The director of Insurance also approved the use of an extraordinary dividend as a means of facilitating the transfer of Excluded Assets to BMA Corp.

Grant said that all required Federal filings have been made pertaining to the sale of insurance operations. Approval is also required from shareholders owning at least two-thirds of the outstanding shares of BMA Corp. stock.

The BMA board of directors has called the annual meeting of shareholders for 10 a.m., June 27, 1990 at the company's offices, BMA Tower, One Penn Valley Park, Kansas City, Mo.

Grant, speaking on behalf of the board of directors, said, ''Proxy Statements and proxy cards have been distributed to all shareholders of record at the close of business on April 18, 1990. We urge all shareholders to carefully read the proxy material and vote their shares by mailing the proxy card or by being represented in person at this very important meeting.''

#90164b0081 06/13/1990 ~Business Wire
SUNNYVALE, CA (JUNE 13) BUSINESS WIRE - Silicon Valley telecommunications company First Pacific Networks has announced the formation of a joint task force with Optical Networks International (ONI), a subsidiary of Anixter Cable TV, to evaluate the use of First Pacific Networks' breakthrough technology for the cable TV industry in the United Kingdom.

First Pacific Networks manufactures the Personal Xchange system for integrated voice, data and video networking. According to First Pacific Networks President James Gibby, the First Pacific Networks technology has

the potential to give Anixter a clear lead in the substantial United Kingdom market.

"The major U.S. cable television companies have won franchises to install and operate cable TV networks in the U.K.," said Gibby. "Under the terms, the holder is awarded a 15-year franchise if it supplies television services, or a 22-year franchise if the holder supplies voice services in addition to television.

"Because of the phenomenally high costs of trenching and excavation in Britain, there is a compelling incentive to provide voice services with high quality CATV programming. Our system operates over standard CATV coaxial cable and, integrated with a cable service, would be simple to install and expand. Only a single cable is needed to provide both conventional telephone and CATV services.

"Moreover, the Personal Xchange system's media-independent architecture permits its use in hybrid fiber optic/broadband coax networks, such as the ones planned for many of the UK franchises."

According to the U.K. Cable Television Association, new CATV installations in the United Kingdom are expected to pass ten to 13.7 million homes by the end of 1995 and the market for combined CATV and voice services may well exceed a half million customers. "With a population of over 57 million, 22 million television households and 20 million telephones, the UK is an extremely promising market," said Gibby.

Gibby said he was confident that within approximately four months the joint task force will have resolved current logistical issues such as pricing, specific equipment needs and marketing strategy. He believed that shipment to the U.K. could proceed soon after.

Optical Networks International of Englewood, Colo., provides optical products and design and development services for complete fiber networks in cable TV, data, telephone and cellular applications. Anixter Cable TV, based in Skokie, Ill., is one of the nation's leading suppliers of equipment and components to the cable TV industry. ONI and Anixter are businesses of Itel Holdings Inc.

#90164b0082 06/13/1990 ~Business Wire

ISSAQUAH, WA (JUNE 13) BUSINESS WIRE - Personal computer software reseller Egghead Discount Software (NASDAQ: EGGS) announced Wednesday the company earned $1.1 million, or $.07 per share, on net sales of $119.3

million in its fourth quarter fiscal 1990.

Net sales increased 23 percent over fourth quarter 1989 sales when the company lost $12.9 million, or $.80 per share, on sales of $97.1 million.

Posting back-to-back profits in the third and fourth quarters of fiscal 1990, Egghead ended the year with a loss of $7.7 million, or $.47 per share, an improvement over fiscal 1989's $12.1 million or $.80 per share loss. The company's sales reached a record $456.3 million in fiscal 1990, a 33 percent gain over fiscal year 1989 sales of $342.4 million.

''From the officer level to middle management, and throughout the company, our people's focus on cutting costs, reducing inventory shrinkage, and operating more efficiently is beginning to pay off on the cost side,'' said Stuart M. Sloan, Egghead chairman and chief executive officer. ''The sales increases in both the fourth quarter and for the fiscal year reflect our direct and retail sales force's knowledge, training and committment to customer service, and our stronger marketing and merchandising efforts,'' he continued.

Egghead's fiscal year 1990 results include $3.1 million in litigation expenses incurred or expected to be incurred in association with the previously-announced shareholder class action lawsuits and Securities and Exchange Commission inquiry; $2.8 million for costs incurred or expected to be incurred to close a total of 24 stores and to relocate another five during fiscal 1990 and 1991; a $900,000 writedown of store cash registers in anticipation of their replacement during fiscal 1991; and approximately $1.3 million in operating losses from the company's Egghead University software training service subsidiary, which the company sold in April 1990. Egghead will recognize a gain of approximately $500,000 from the sale in fiscal 1991.

According to Matt Griffin, Egghead executive vice president of operations, the legal reserve is intended to cover expenses through the June 1991 trial date. ''We continue to believe the case to be without merit, and we intend to devote the resources necessary to pursue it vigorously,'' he said. Regarding the store closure reserve, Griffin said, ''Comparable retail store sales have benefitted from the adjustments we've made over the year to our retail network.''

During fiscal 1990, Egghead opened 19 new stores, closed 15, and operated 200 stores at year-end; the company's direct sales force decreased by 27 to 151 from the fiscal 1989 year-end total of 178. During fiscal 1989, the company opened 93 stores, closed nine, and operated 196 at year-end.

Egghead Discount Software provides personal computer software, peripherals and accessories to consumers and businesses in the U.S. and Canada. The company currently operates 192 retail stores and fields a 146-person

direct sales force.

#90164b0090 06/13/1990 ~Business Wire

ATLANTA (JUNE 13) BUSINESS WIRE - Precision Image introduces the 624 D size and 636 E size electrostatic plotters addressing customer needs for a better capability to network in multivendor CAD environments and greater operational reliability in electrostatic plotting, all at a greater value.

The Precision Image 624 Power Plotter priced at $43,900 and the 636 Power Plotter priced at $53,900 are designed to compete in price-sensitive markets while delivering capabilities exceeding Precision Image's established plotter product line.

"Essentially we are talking about delivering a better quality product at a 15 percent lower price," stated Gary Hughes, president of Precision Image. He continued, "Design improvements have allowed us to deliver the reliability and network capability and still remain very price competitive on the street."

The new plotters highlight: less than half the toner consumption; .005 percent accuracy with an improved drive system; a paper loading system that handles a variety of papers and films; a reduced number of parts, increasing reliability; lower power requirements, saving on utility costs; and networking capabilities, for the increased market demands for linking different vendor's products.

Orders for the new 624 and 636 will be shipped the beginning of July. Precision Image products are available directly from the manufacturer through local sales representatives.

This introduction extends Precision Image's total product line of electrostatic plotters to six; the 624 Power Plotter, and 636 Power Plotter, both color products join the existing C4836 and C2536 color plotters and the M4836 and M2536 monochrome plotters.

Precision Image plotters are well known for their use of proprietary drum-based technology to eliminate the media shrinkage, stretching and poor color registration normally associated with roll-fed web plotters. The material is held tightly in place on the drum via a vacuum seal, preventing shrinkage and stretching caused by humidity or tension changes.

Precision Image plotters run from any mainframe, mini or micro computer

using any standard hardware and software. They support most hardware interfaces including RS-232, Centronics, IBM 3211 Printer emulation, SNA and Ethernet. The plotters are also software compatible with Versaplot, Calcomp (ISDP), HPGL, CGI and CGM (ANSI/ISO).

Founded in 1985, Precision Image is a technology-leading manufacturer of large-format E and D size color and monochrome electrostatic plotters. With headquarters in Redwood City, Calif., the company has an extensive installed base of customers in the United States, Canada, Europe, Pacific Rim and Australia. Precision Image has sales and service offices worldwide.

SAN FRANCISCO (JUNE 13) BUSINESS WIRE - PC World, the leading magazine for management PC users, announced Wednesday it has acquired PC Resource magazine and will merge its circulation into PC World.

Beginning with its October 1990 issue, PC World will increase its circulation rate base from 500,000 to 550,000. PC Resource will publish its last issue in August.

According to a 1989 study conducted by MRI Inc., an independent market research company, PC World reaches the highest number of managers who both use and purchase PC computer systems. Since 1987, PC World's circulation has increased nearly 50 percent.

Prior to the PC Resource acquisition, PC World also announced that for the six month period ending June 1990, it will deliver an average of 25,000 bonus circulation over its 500,000 overall circulation rate base.

This marks the second consecutive six month period where PC World has delivered a bonus circulation. (The bonus circulation does not reflect the additional circulation rate base PC World will gain from its acquisition of PC Resource.)

PC World is a subsidiary of IDG Communications, the world's leading publisher of computer-related newspapers and magazines with more than 135 publications in 44 countries. IDG Communications is part of International Data Group, the world's leader in providing information services on information technology.

LOS ANGELES (JUNE 13) BUSINESS WIRE - The Interactive Media Systems (IMS) Division of Philips Consumer Electronics Co., headquartered in Knoxville, Tenn., has formed a new division charged with the worldwide development, sales and marketing of multimedia authoring software and systems for the CD-I (Compact Disc Interactive) standard.

The new Philips IMS Authoring Group will focus its activity on developers, designers and producers in the multimedia industry, prior to the official launch of CD-I players and titles in consumer markets in 1991.

Philips has named Dr. Jean-Pierre Isbouts to head the group as director, CD-I Authoring Systems, with home offices in Los Angeles. Previously, Isbouts served as director of marketing and sales for IMS.

''The formation of this new IMS division is a direct result of the growing interest and demand within the multimedia community,'' said Gaston Bastiaens, director of Philips IMS in Eindhoven, The Netherlands. ''CD-I players, titles and even full-motion video are realities, and the time has come to nurture market growth with affordable, high-level design and production tools.''

Isbouts, who brings 10 years of experience in interactive products for the American market, is poised to meet the multimedia challenge to make good on the long-held promise of interactive communications tools.

''Everybody is excited about multimedia, but the problem has long been that the machines are too expensive and that there are simply no tools for designers other than experienced engineers,'' Isbouts said.

''We intend to fill that gap with the CD-I format, because it's the only product whose cost curve will be driven by consumer mass marketing.''

The majority of IMS Authoring Group engineers and sales professionals originated from the authoring tool group of American Interactive Media, a Philips/Polygram Corp. ''Their talent was developed through direct experience during actual title production,'' said Robert Schaulis, director of operations and training of the Los Angeles group.

Schaulis was previously in charge of A.I.M.'s external engineering program.

For readers seeking more information about CD-I authoring tools, contact Schaulis at Philips IMS Authoring Group, 11040 Santa Monica Blvd., Los Angeles, Calif. 90025. Telephone: 213/445-5700 or Fax: 213/479-7135. Developer support is now available by calling 1-800/CDI-5484.

LOS ANGELES (JUNE 13) BUSINESS WIRE - Medco Research Inc. (the ''company'') (NASDAQ:MEDR, Boston Stock Exchange:MRE.B) Wednesday announced that it has commenced a study of tissue-type plasminogen activator (t-PA) in combination with MEDR 640 as part of a clinical testing program to evaluate MEDR 640 for the treatment of ''reperfusion injury'' in patients suffering from acute myocardial infarction.

Intravenous thrombolytic therapy, with agents such as streptokinase, urokinase and t-PA, is widely accepted as the emergency treatment of choice in patients with acute myocardial infarction. Dissolution of the blood clot with these agents and restoration of blood flow has proven to limit infarct size, preserve heart function and reduce mortality rates.

However, numerous animal studies indicate that the amount of heart muscle salvaged by this technique may be limited by a phenomenon known as ''reperfusion injury.''

In a series of studies using dogs and rabbits, investigators at Vanderbilt University have previously demonstrated that MEDR 640 administered at the time of reperfusion significantly reduces infarct size and preserves heart function.

Subsequently, the company initiated and recently concluded tolerance testing in healthy volunteers. These studies identified an intravenous dose of MEDR 640 which was well tolerated for up to three hours and within the therapeutic range predicted by the animal studies.

The present study in healthy volunteers being conducted by the investigators at Vanderbilt is designed to evaluate the safety of intravenous MEDR 640 in combination with t-PA. Assuming these agents can be safely infused simultaneously, the company plans to initiate a placebo-controlled study in patients with acute myocardial infarction who are being treated with intravenous t-PA.

The company is primarily involved in the research and development of new cardiovascular diagnostic and therapeutic products. Its product, Adenocard, was recently approved by the FDA for the treatment of paroxysmal supraventricular tachycardia and is being marketed in the United States by Fujisawa Pharmaceutical Co.

Another company product, Adenoscan, is currently under review by the FDA for use as a adjunct to thallium myocardial perfusion scintigraphy in patients unable to exercise adequately. Thallium scintigraphy is widely used for the detection and evaluation of coronary artery disease. The company is also developing a number of other new compounds for various diagnostic and therapeutic indications.

TORONTO (JUNE 13) BUSINESS WIRE - David Patterson, president of Steelhawk Resources Ltd. (COATS: STLH), announced the addition of Donald C. Klosterman to the board of directors of the company.

Klosterman is presently a member of the board for both Nucell Inc. and Peripheral Systems Inc. In addition, Klosterman is chairman of the board of NTN Communications Inc. and interactive television company.

Further, the company announces the granting of incentive stock options for 300,000 common shares of Steelhawk Resources with certain individuals at a price of 70 cents per share, to expire June 13, 1992.

The incentive stock option agreements are subject to regular acceptance and the approval of the company's shareholders. The option price calculation was based on the last trade of the company's shares.

Nucell Inc. is owned as to 49 percent by Steelhawk Resources Ltd. and as to 51 percent by Peripheral Systems Inc. (NASDAQ: PSIX), an Oregon corporation. Steelhawk's shares are quoted on the Canadian Over-The-Counter Automated Trading System (COATS).

DALLAS (JUNE 13) BUSINESS WIRE - Comstock Resources Inc. (NASDAQ/NMS:CMRE) Wednesday entered into a letter of intent to acquire for cash a 100 percent working interest in oil and casinghead gas leases containing approximately 40,000 acres in the Panhandle field located in northwestern Texas.

The acquisition is subject to the negotiation of a definitive purchase agreement, obtaining requisite financing and certain other conditions. The company intends to use third-party financing to purchase these leases and anticipates closing on or before Aug. 1, 1990.

The company believes the acquisition of these leases will complement its completion and development drilling activities on the Bivins Ranch Lease.

Comstock Resources Inc. owns and manages income-producing assets in oil, casinghead and natural gas, precious metals and real estate, with subsidiary operations since 1865. Additional information about the company may be obtained by contacting M. Jay Allison, president and chief executive officer, at 5005 LBJ Freeway, Suite 1150, Dallas, TX 75244, telephone 214/701-2100.

PORTLAND, ORE (JUNE 13) BUSINESS WIRE - Judicial Arbitration & Mediation Services Inc. (J.A.M.S.), an Alternative Dispute Resolution (ADR) firm providing resolution options to litigants, has opened an office in Portland, according to J.A.M.S. Chairman, The Hon. H. Warren Knight, with the first case to be heard this week.

The office is located at 1001 Southwest Fifth Ave., Suite 1000, Portland.

ADR offers parties a forum for resolving disputes without going to court, using retired justices and judges. Seven distinguished justices and judges from Oregon have become J.A.M.S. panelists. The seven have served on Superior Courts, Courts of Appeal and the Supreme Court of Oregon.

They are: The Hon. John C. Beatty Jr., The Hon. Charles S. Crookham, The Hon. Arno Denecke, The Hon. Clifford Olsen, The Hon. Betty Roberts, The Hon. Herbert M. Schwab and The Hon. Alfred T. Sulmonetti.

J.A.M.S. panelists are available to handle mediation, arbitration and trials by reference. The judges will be conducting hearings in all types of civil cases, including personal injury, commercial cases, contract disputes, family law, real estate, employment matters, insurance and environmental issues. In addition, they will handle discovery management in complex lawsuits.

They will be traveling throughout Oregon to hear cases in virtually any geographical area.

As the largest provider of judicial ADR services in the nation, J.A.M.S. has over 120 retired justices and judges on its panels, with offices in 13 locations throughout California, Oregon and Washington. Approximately 750 cases are heard each month in J.A.M.S. facilities. J.A.M.S.' corporate headquarters is in Orange County, Calif.

LOS ANGELES (JUNE 14) BUSINESS WIRE - Security Pacific President and Chief Executive Officer Robert H. Smith said that Moody's ratings adjustment of its debt is unjustified.

''We strongly disagree with Moody's adjustment of our ratings based on our California real estate and HLT holdings. We have maintained a well-balanced loan portfolio consistent with the demands of the marketplace and with adequate and appropriate levels of reserves,'' Smith said.

''As the rating agency itself points out in its announcement, Security Pacific has a strong West Coast banking franchise, diverse earnings sources and a strong capital formation rate,'' Smith said.

''With our $4.7 billion equity capital base, the fifth largest in the United States, we have been very successful in safely handling the banking and financial needs of our customers in the business, real estate and consumer markets of California and the west. Security Pacific has a reputation and a track record as one of the best-managed banks in the country,'' Smith said.

LOS ANGELES (JUNE 14) BUSINESS WIRE - San Diego-based DAROX Corp. has promoted L. Scott Lane to the position of executive vice president for its DAROX Interactive (DI) unit effective June 1, 1990.

Lane will continue in his role as DIs Production and Creative director, as well as function as president and chief executive officer of his privately held video production company West Coast East Television.

In making the announcement Robert L. Abrams, M.D., president and chief executive officer of DAROX stated that: ''Scott Lane continues to

demonstrate his ability to take this young, successful unit forward into a highly competitive marketplace. Utilizing innovative and creative leadership, Scott heads an operation which is on the cutting edge of interactive technology and we are delighted with his efforts.''

Sales for DAROX Interactive have exceeded $5 million since the third quarter of 1989 and Abrams said he anticipates continued growth for fiscal 1990.

Lane's primary responsibility at DAROX Interactive is overseeing the creation, design, implementation and completion of 36 interactive videodiscs that are currently in various stages of production at the Burbank, Calif.-based facility.

A specialist in film, video and interactive videodisc production, marketing strategies, advertising and corporate communications, Lane is also an accomplished writer, director and producer who is as comfortable in front of the camera as he is behind the scenes.

Since founding his own production company, West Coast East (WCE) Television in 1985, Lane has overseen the rapid expansion of WCE into a million-dollar operation that today includes a newly constructed 15,000 square-foot state-of-the-art studio/post-production facility in Burbank which was completed in December 1989.

GREENWICH, CT (JUNE 13) BUSINESS WIRE - Stolt Tankers and Terminals (Holdings) S.A. (NASDAQ:STLTF) has announced the order of two more 5,000 deadweight ton parcel tankers through Sumitomo Corp., acting on behalf of Fukuoka Shipbuilding Co. Ltd., of Fukuoka, Japan.

This order is in addition to the two similar ships previously announced in March. The third and fourth ships will be delivered October and December 1992, for operation by the Stolt-Nielsen Inter Europe Service (SNIES), which serves Europe, including North Sea, United Kingdom and Mediterranean ports.

The SNIES fleet is marketed and operated within the United Kingdom from Stolt-Nielsen's Romford Office.

The new ships will be double hulled, with double bottom and double skin, and will have 16 cargo tanks of the highest grade solid stainless steel, each served by an individual deepwell pump. These features will afford

maximum safety and environmental protection and will equip the new tankers to carry the full range of bulk liquid cargoes required by the company's European customers.

This is the third move Stolt-Nielsen has taken to strengthen its position in the European regional distribution trade since its purchase of the Interchem fleet last year.

The building of these four ships, combined with the recent time-charter of several additional newly-built coastal tankers, will provide the Stolt-Nielsen Inter Europe Service with one of the most modern coastal parcel tanker fleets in Europe.

Fukuoka Shipbuilding Co. Ltd. is well qualified for this project because it has developed a high degree of expertise in building small chemical tankers and a variety of other specialized ships of this size.

Stolt Tankers and Terminals (Holdings) S.A. is an international transportation company specializing in the distribution of bulk liquids both by land and sea. The company operates worldwide, with 21 offices in 12 countries. Stolt-Nielsen provides total distribution services with its combination of more than 55 transoceanic and 30 coastal parcel tankers, totalling about 1.7 million deadweight tons; 2,600 intermodal tank containers in door-to-door service; five regional storage and distribution tank terminals in the United States, Northwest Europe and Brazil; as well as barges, railcars and tank trucks.

MINNEAPOLIS, MN (JUNE 13) BUSINESS WIRE - Speaking here Wednesday before analysts and investors at the Piper, Jaffray & Hopwood Food Conference, Ron E. Doggett, chairman and chief executive officer of GoodMark Foods Inc. (NASDAQ/NMS:GDMK) announced that preliminary revenues for the fiscal year ended May 27, 1990, should reach approximately $136 million, up about 5 percent over fiscal 1989 net sales of $129.1 million.

He also indicated that net income for fiscal 1990 would be in the range of 80 cents to 85 cents per share compared with $1.10 per share earned in fiscal 1989.

Doggett said, ''Although high meat costs prevented the year-end numbers from reaching our original budget expectations, we were pleased that the fourth quarter figures showed signs of improving trends. Both revenues

and earnings increased over the third quarter results and we are entering fiscal 1990-1991 with improving volumes, particularly from our snack business.''

Doggett added that final numbers for fiscal 1990 are expected to be reported in early July.

GoodMark Foods is the nation's leading producer and marketer of meat snacks. The company is also a regional producer of packaged meat products cookies, crackers, brownies and other snacks. Its principal brands include Slim Jim, Penrose, and Pemmican meat snacks; Jesse Jones packaged meats; A Whale Of A Snack cookies and crackers; Rachel's Brownies; and Andy Capp's snacks. The company's common stock is traded on the NASDAQ National Market System with the symbol GDMK.

#90164b0627 06/13/1990 ~Business Wire

SAN FRANCISCO (JUNE 13) BUSINESS WIRE - HQ Network Systems, the leader in the executive suite industry, won a first-round legal battle in Canada to protect its registered trademarks, ''HQ'' and ''Headquarters Companies'' against HQ Office Supplies Warehouse Inc. and certain of its affiliated companies (HQ Office) both nationally and internationally (units)/HQOIA (class A common stock)/HQOIW (class A warrants)3/8.

In response to a statement of claim filed by HQ on Feb. 22, the Honorable Justice Reed of the Federal Court of Canada signed an order on May 31 that prevents HQ Office International Inc. and HQ Office International (Canada) Ltd. from using the following:

-- a trademark or trade name which includes the words HQ, Headquarters, or HeadQuarters or any trademark or trade name confusingly similar thereto;

-- the names HQ Office International Inc. or HQ Office International (Canada) Ltd. as trademarks or trade names, and

-- the words HeadQuarters Office Supplies Warehouse as a trademark or trade name.

HQ has filed a similar complaint in the Federal District Court in Los Angeles. HQ is eagerly awaiting trial, which is expected to begin on or about June 19 and is also aimed at defending the quality of the reputation embodied by the HQ trademarks. One of the reasons the trial has been delayed is that certain attorneys representing HQ Office have been involved in other litigation and have asked the court to delay the start

of the HQ trial until this other litigation could be completed.

HQ has used their HQ and Headquarters Companies trademarks for over 10 years throughout the United States, Canada and Europe. The company provides complete office support to businesses of all sizes including office and conference space, secretarial and reception services, copying and facsimile transmission services. HQ business centers also offer office furniture, supplies and equipment.

Since HQ Office opened its first stores and began advertising, the use of the HQ trademark has caused considerable confusion, including misdirected phone calls and mail as well as erroneous use of HQ's toll free 800 number. HQ believes that if HQ Office is allowed to continue using its mark, both the corporation and its licensees will continue to suffer injury.

Additionally, the value of its HQ trademarks will be diluted and substantially impaired.

ALBANY, NY (JUNE 13) BUSINESS WIRE - The board of directors of National Savings BAnk of Albany (NASDAQ:NSBA) yesterday declared a regular quarterly cash dividend of 30 cents per share, doubling its prior dividend of 15 cents per sahre.

The dividend is payable on July 16, to shareholders of record on July 2.

In making the announcement of this action, George O. Pfaff, chairman and chief executive officer, stated: ''This action reflects our positive outlook for the future prospects of the bank. Normalized earnings are currently over $1 million per quarter and, with the board's action today, a larger portion of these earnings will be passed through to shareholders.

''Management expects retained earnings to continue to increase at a level sufficient to support a prudent growth rate and to maintain a comfortable margin over the regulatory capital requirements.''

Pfaff also stated that the bank normally would have considered taking action in March of this year with respect to its dividend policy, but at that time was restrained from doing so under the terms of a merger agreement that was subsequently terminated.

In a separate action, the board of directors unanimously rejected as

inadequate a proposal from TrustCo Bank Corp NY, a bank holding company located in Schenectady, N.Y., for a possible business combination with the bank in a stock for stock transaction in which National's shareholders would receive 1.20 shares of TrustCo common stock for each share of National common stock.

The terms and conditions of the proposal were similar to the terms and conditions of a proposal made by TrustCo in February, except that the new proposal offered less consideration to National's shareholders.

Commenting on the action, Pfaff indictated that the board did not foreclose the possibility of future discussions with TrustCo or others regarding a possible business combination, but only on terms and conditions deemed by the board to be fair and in the best interests of all National's shareholders.

PALO ALTO, CA (JUNE 13) BUSINESS WIRE - CF Motor Freight, one of the nation's largest trucking companies, has been recognized by the 3M Corp. with a special award for ''exceptional'' long-haul transportation services.

3M presented CF Motor Freight with its Transportation Quality Achievement Award, an honor given annually to selected service providers for exemplary performance. The award is part of 3M's ''Partners in Quality'' process, a company-wide program that brings vendor organizations into 3M quality processes in a cooperative effort to improve customer service.

''We're proud to be a recipient of this prestigious award,'' said Robert J. Morrey, vice president of sales for CF Motor Freight. ''CF Motor Freight has many of the same quality goals as 3M. Together, we are committed to complete customer satisfaction and service performance that provides great value to our customers.''

Established in 1986, the Transportation Quality Achievement Award recognizes carriers who exceed 3M's rigorous transportation delivery standards. Of the 150 transportation companies most frequently used by 3M CF Motor Freight was among 15 trucking companies singled out to receive this honor.

In selecting award winners, 3M evaluated on-time transit and delivery schedule performance, claims handling, billing and shipment rating accurancy, as well as flexibility of service.

''As a 'Partner in Quality,' CF Motor Freight is an extension of 3M,'' said Peter Skeffington, 3M quality manager. ''The relationships formed through the quality process provide an ongoing exchange of innovative ideas and creativity necessary to keep 3M at the leading edge of productivity, quality and service.''

Through its freight-flow system of 680 terminals and 20,000 employees, Palo Alto-based CF Motor Freight serves virtually every business address in the United States and Canada, including Alaska and Puerto Rico.

CF Motor Freight is the largest subsidiary of Consolidated Freightways Inc. of Menlo Park, Calif., a $4 billion transportation company, which in addition to intermediate and long-haul trucking, has businesses in regional next-day trucking, worldwide air freight, intermodal truckload, customs brokerage and ocean freight services.

MOUNTAIN VIEW, CA (JUNE 13) BUSINESS WIRE - National Football League Properties Inc., Interactive Network Inc. and NTN Communications Inc. jointly announced Wednesday that an agreement has been signed making NTN's QB1, the popular interactive football game currently found in sports bars, taverns and hotels, available to home television viewers subscribing to Interactive Network's service.

Interactive Network's patented technology permits interactive game play with live-action sporting events and other television programming. QB1 will offer home television viewers an exiting new level of involvement in network-broadcast NFL games as well as the ability to compete simultaneously against other players around the country for prizes.

NTN President Patrick J. Downs said: ''Through our network of fine hotels restaurants and bars, NTN has developed a QB1 customer base of more than 1 million participants. We have broadcast QB1 in conjunction with NFL televised games for four years under an exclusive license with the NFL as well as a license under Interactive Network's patent.

The QB1 football contest involves viewers in NFL games by challenging them to predict what play will be run by the offense, based upon the offensive and defensive formations on the field, the down and distance and their knowledge of their favorite teams' offensive strategies.

In addition to providing exciting new home entertainment, interactive NFL football creates new marketing and promotional opportunities previously unavailable to local and national advertisers.

By licensing QB1 for Interactive Network, NFL Properties now joins Major League Baseball Properties Inc. in its association with Interactive Network. Interactive Network holds the patent on the only practical working technology that permits home competition and scoring without engaging the telephone line throughout the contest.

In less than a minute, the unit's built-in modem will transfer each player's score to Interactive Network's central computer, record it, and compare it to those of other players. In fact, Interactive Network's patented system will permit all home television viewers of a Super Bowl game to participate against one another on a national basis and find out their standings.

Based in Mountain View, Interactive Network is a privately held company. Corporate investors in the firm include: NBC, United Artists Entertainment Company Inc., A.C. Nielsen Co., Le Groupe Videotron Ltd., Rainbow Program Enterprises, Granada Group plc, Apex Investment Fund L.P. (a venture arm of Ameritech), and Paul Kagan Venture Fund.

#90164b0642 06/13/1990 ~Business Wire

MAPLEWOOD, NJ (JUNE 13) BUSINESS WIRE - First World Cheese Inc. (NASDAQ:FWCH), a major producer and marketer of nutritional cheeses, Wednesday introduced a line of Alpine Lace brand fat-free cheeses, the first fat-free, low cholesterol cheeses to be marketed nationally.

The company predicts it will gain a significant market share of the current $550 million nutritional cheese market, which is expected to reach $4 billion by 1995.

The revolutionary technology for producing fat-free Alpine Lace Lean 'N Free low cholesterol cheese and three patents pending were recently acquired by First World Cheese from Gamay Foods Inc. and its developer Dr. Aly Gamay.

In making the announcement, Carl T. Wolf, president and chief executive officer of First World Cheese said, ''We are pleased to be a major producer of cheese to meet the consumer demand for a healthier cheese product. The phenomenal growth of Alpine Lace low sodium, low cholesterol

cheeses will be enhanced with the introduction of Alpine Lace fat-free cheeses, which are only 35 calories per ounce. Moreover, at 35 calories per ounce Lean 'N Free is the lowest calorie cheese per serving on the market today.''

Alpine Lace Fat-Free Low Cholesterol technology uses skim milk and natural enzymes and flavorings to produce the taste and texture lost when fat is removed. Initially these new cheeses will be marketed in three varieties: Cheddar, American and Mozzarella. The company has applied to use and expects to receive the American Dairy Association's ''Real'' seal which is used on dairy products.

''Today's consumer is more sophisticated about nutrition and diet,'' Wolf noted. ''The development of fat-free cheese that tastes good and has fewer calories was driven by the consumer. With our new Lean 'N Free fat-free low cholesterol cheese, the health conscious consumer will enjoy major health benefits and superior taste at only 35 calories per ounce.''

Wolf predicts that this breakthrough in technology will revolutionize the kind of cheese people eat and add to the company's sales and earnings growth.

First World Cheese Inc. is a developer and marketer of a growing line of low cholesterol cheeses sold under the PreMonde Alpine Lace label. The company's primary product lines are designed to meet consumer taste expectations while providing the dietary benefits of lower fat and cholesterol. Through its Mountain Farms Inc. and Marolf Dakota Farms Cheese Inc. subsidiaries, the company also packages and converts bulk cheeses into consumer retail packages and manufactures a small portion of the cheeses sold under the company's brand names. In addition, the company engages in the cheese commodity trading business.

TACOMA, WASH. (JUNE 13) BUSINESS WIRE - Weyerhaeuser Co. announced Wednesday that, beginning on Sept. 15, 1990, it will exchange a new issue of $200 million principal amount of its 5-1/4 percent convertible subordinated debentures due in 2017 for its outstanding $2.625 convertible exchangeable preference shares.

Preference share holders of record Aug. 10, 1990, will receive $1,000

principal amount of the debentures in exchange for 20 preference shares held, and an amount equal to the dividend of $.65625 per share accruing to Sept. 15, 1990.

The preference shares may alternatively be converted into common at a conversion rate of 1.0416 common shares per preference share, the company said.

The company said it will also redeem its $150 million principal value Market Auction Preferred shares, Series A and B. Holders will receive $100,000 per share plus accrued dividends to the date of redemption. The redemption date for the Series A shares is July 24, 1990, and for the Series B shares, July 31, 1990.

ORLANDO, FL (JUNE 13) BUSINESS WIRE - Laser Photonics Inc. (NASDAQ:LAZR) announced Wednesday that it has entered into a joint technology licensing agreement with General Motors.

This agreement gives Laser Photonics the right to manufacture and market products under patents owned by General Motors and developed by General Motors Research Laboratories. This agreement will enable Laser Photonics to develop new tunable infrared diode laser spectrometers for medical diagnostic applications.

Under the terms of the licensing agreement, General Motors was also granted rights to certain patents pertaining to tunable diode laser technology developed by Laser Photonics, Analytics Division.

Commenting on this agreement Mark Fukuhara, president and chief executive officer of Laser Photonics stated ''this is a key agreement enabling the company to position itself for future growth through alignment with significantly larger and more stable markets. The company estimates that the potential market for laser-based medical diagnostic spectrometer products is betwwen $300-$500 million.

''Laser Photonics is one of only two commercial manufacturers of tunable infrared diode laser spectrometers in the world and should capture a significant portion of this market within the next three to five years.''

New medical diagnostic products incorporating this technology will take advantage of the unique trace gas analysis capabilities of tunable infrared diode laser spectrometers.

These products will be used in breath gas analysis to diagnose a variety of common illnesses and conditions such as diabetes, cirrhosis of the liver, ulcers, small intestinal bacterial growth, ileal dysfunction, fat malabsorption, and liver and lung function.

As a result, clinical laboratories will be able to replace a number of slower, blood-based diagnostic procedures with faster, non-invasive procedures at a fraction of the cost of equipment currently available.

Laser Photonics designs, manufactures, and markets solid state and gas laser systems, components, and other peripheral equipment for medical and scientific applications.

TRENTON, NJ (JUNE 13) BUSINESS WIRE - Versus Technology, Inc. (NASDAQ:VSTI) Wednesday announced the receipt of a purchase order from Pacific Gas & Electric (PG&E) to provide the communications network equipment for the initial phase of an automatic meter reading (AMR) and energy management trial to be conducted jointly by PG&E, Pacific Bell, and the City of Fresno (Water Department).

The trial will be conducted at 250 customer sites in the San Joaquin Valley, representing a broad customer mix. Data from electric, gas and water meters will be gathered by PG&E and the City of Fresno over the Versus telemetry network deployed by Pacific Bell. The trial is expected run for approximately one year, with a final report issued by PG&E in August, 1991.

Versus will provide the equipment for Phase 1 of the trial, which focuses on customer based automation including AMR, load profile and load survey, demand-side management and load control, alarm functions, basic bi-directional data transfer, data handling and manipulation, and unobtrusive operation.

Phase II will focus on bi-directional communications with more sophisticated end devices such as smart electronic meters, smart thermostats, remote terminal units, fault locators and power distribution equipment.

Pacific Gas & Electric is the nation's largest utility, with total revenues of more than $8.5 billion in 1989. PG&E serves 11.5 million people with more than 7,000,000 meters in Northern and Central California.

Pacific Bell is a subsidiary of Pacific Telesis Group, a diversified telecommunications corporation based in San Francisco.

Versus Technology, Inc. designs, manufactures and markets data transport networks that allow telephone companies to offer such new services as automatic meter reading, energy management and alarm reporting. These services can be carried over existing telephone lines without interrupting other uses of the line.

Versus is the world leader in this innovative technology, with networks deployed on three continents (North America, Europe and Australia) and over 40 major cities worldwide. Versus equipment is used by more than 100,000 end users who are connected to networks providing automatic meter reading or alarm transport services.

WESTLAKE VILLAGE, CA (JUNE 13) BUSINESS WIRE - Incomnet Inc. (NASDAQ:ICNT) of Westlake Village Wednesday announced that its board of directors has authorized the repurchase of a maximum of 500,000 shares of its common stock.

The board authorized the president of Incomnet to purchase such shares at any time or from time to time within the next 12 months. The board authorized such purchases because the board believes that Incomnet's common stock is undervalued at the present time and represents a good investment.

Separately, the company announced the establishment of a $1.2 million credit line with City National Bank to be used for corporate acquisitions purposes and for share repurchases.

Incomnet operates autoNETWORK, the largest computerized auto parts electronic trading network in the Western United States, as well as a software division which designs and markets business software.

#90164b0657 06/13/1990 ~Business Wire
WINTER PARK, FLA. BUSINESS WIRE - Southern Starr Broadcasting Group Inc. (NASDAQ:SSBG) reported net income of $4,266,391 for the fiscal year ended March 31, or $3.10 per share, compared to a net loss of $1,149,539, or 84 cents per share, for the prior year.

A $7,900,475 gain on the sale of a radio station was reported, as well as a $1,161,000 extraordinary item resulting from the tax benefit from utilization of net operating loss carryforward.

Revenues decreased five percent, from $8,978,646 for fiscal 1989 to $8,357,459 for fiscal 1990. The decrease resulted entirely from a decline in revenues at the Leesburg/Orlando station, as well as the fact that the station was owned for only eight months of the year before being sold.

The sale of the Leesburg/Orlando station in December, 1989, for $12 million enabled the company to pay down its bank debt, retire a $1 million subordinated note and pay a dividend of $1 per share on the company's common stock ($1.34 million).

As a result, the company has eliminated a significant portion of its interest burden, which, when combined with the growth being achieved in revenues and income from operations at the company's remaining stations, should result in continued profitability from existing operations.

BIRMINGHAM, AL (JUNE 13) BUSINESS WIRE - Matthew L. Gold, chairman and chief executive officer of Precision Standard Inc. (NASDAQ:PCSN) announced Wednesday that the company had settled a lawsuit between it and World Color Press Inc., Printing Holdings L.P. and Banker's Trust (Delaware) arising from the acquisition by Precision Standard of Hayes International Corp. (since renamed Pemco Aeroplex Inc.).

Gold indicated that, under the terms of the settlement, the company received $400,000 in cash and the return of 337,260 shares of the company's common stock issued as part of the purchase consideration in connection with the Hayes acquisiton.

The settlement resulted in the discontinuance of the lawsuit and the termination of all disputes between Precision and the other parties to the Hayes transaction.

Gold said, ''This agreement was deemed to be an equitable way to close the book on the Hayes transaction and to permit management to rededicate its efforts to the company's continuing success.''

Walter M. Moede, executive vice president and chief financial officer of Precision, said that the settlement, net of associated costs, is expected to be accounted for as a reduction of the Hayes acquisition price and, accordingly, that there would be no material impact on current income.

He added that the stock received, which constitutes 2.67 percent of the company's shares outstanding, most likely would be cancelled. Moede said that a more detailed explanation of the accounting for the settlement would be provided in the company's next quarterly report.

Precision Standard, with facilities in Alabama, California, Colorado and Florida and offices, in Denver, Boston and London performs maintenance and modification of aircraft for the U.S. government and foreign and domestic commercial customers.

The company also manufactures aircraft cargo systems, aerial targets for military customers, precision springs and components, and rocket vehicles and control systems.

BOSTON (JUNE 12) BUSINESS WIRE - Lifetime Corp. (NYSE:LFT), one of the nation's largest providers of home health care personnel and services, announced Wednesday the acquisition of Markka Healthcare Inc., an Atlanta-based infusion therapy company.

Markka Healthcare Inc., with five offices and 132 employees in the Southeast, was formed in 1985, and presently provides infusion and respiratory services in Atlanta and Savannah, Georgia; Tampa/St. Petersburg, Florida, and Birmingham, Alabama.

''The primary focus of this acquisition is to build a foundation for enhancing and expanding our infusion therapy business,'' said Anthony H. Reeves, president and chief executive officer of Lifetime. ''This acquisition fills in a geographic niche to our strategic plan of expanding

our clinical specialities product line,'' continued Reeves.

The purchase price is approximately $12 million including a $1.1 million maximum earn-out on infusion therapy revenues for the 12 months following closing. The earn-out is based on a formula of a percentage of revenues between $6.5 million and $8.7 million. Approximately $4 million of the total purchase price including the earn-out can be settled in Lifetime Corp. stock.

Lifetime Corp., through its Kimberly Quality Care, ASB Meditest, and Office Angels divisions, is one of the nation's largest providers of home health care personnel and services and supplemental staffing for home care institutions, a leading provider of paramedical examinations to insurance companies, schools, and businesses, and is a provider of temporary and permanent office personnel.

HOUSTON (JUNE 13) BUSINESS WIRE - Synercom (R) Technology Inc. (NASDAQ:SYNR) has received an award from Digital Equipment Corp. to provide Synercom software as part of an integrated spatial systems solution for the Cincinnati Area Geographic Information System (CAGIS).

CAGIS is a multiparticipant, public and private consortium that will share a spatial database to support applications for use by the individual organizations in managing information related to services, assets, and facilities.

According to Robert W. Forsyth, president and chief executive officer of Synercom, ''The CAGIS consortium has been added to the roll-call of local governmental and private entities meeting the challenge of infrastructure management and growth through a mulitparticipant spatial systems solution. CAGIS represents the commitment being made today by metropolitan communities to maintaining their furute viability and quality of life.''

CAGIS participants include Cincinnati Gas & Electric Co., Cincinnati Bell Telephone Co., and numerous agencies under the jurisdiction of the City of Cincinnati and Hamilton County. The organizations in the consortium are responsible for the delivery of services to an aggregate 873,900 citizens in Hamilton County. The facilities managed by these organizations are dispersed over 414 square miles.

As currently contemplated, full implementation of the CAGIS plan calls for the installation of up to 150 workstations and multiple processing units

over the next few years and the implementation of Synercom spatial systems software across the network. Actual purchases will be make by purchase orders under the agreement; however, the agreement provides for no minimum levels of software licensing.

Synercom provides integrated spatial systems solutions for major commercial and governmental organizations worldwide. Synercom offices and distributors of Synercom products are located worldwide, and Synercom's common stock is traded on the NASDAQ National Market System under the symbol SYNR.

FORT LEE, NJ (JUNE 13) BUSINESS WIRE - On-Line Software International Inc. and Pansophic Systems Inc. have completed a purchase agreement in a strategic move by both companies to capitalize on each other's marketing and technical strengths.

On-Line Software acquired and will integrate Pansophic's XPF/COBOL technology into its release of InterTest/Batch, enabling users to debug and test batch COBOL and IMS programs. Pansophic acquired On-Line Software's IntelaGen source code generator. Pansophic is the industry leader in COBOL code generators, and On-Line Software is the industry leader in testing and debugging tools.

''Pansophic's impressive technology allows us to be responsive to our customers,'' said William Pollack, vice president at On-Line Software. ''The superiority of the batch software combined with our debugging strength will enable us to provide the most powerful tool set in the industry for CICS, batch and IMS debugging. Additionally, because Pansophic's TELON product owns such a large share of the code generation market, they are the perfect company to meet the future needs of our IntelaGen customers.''

Anthony Paoni, marketing vice president at Pansophic stated, ''We wanted to do business with the best in the industry and we are pleased to be working with On-Line Software. We are confident that On-Line Software will continue to enhance the product and create a tight interface with InterTest. We specifically looked for a company with dominance in the testing debugging area, and we found it in On-Line Software.

Pansophic Systems Inc. is a NYSE company (PNS) headquartered in Lisle, Il. with over 20 years of experience in the software industry. Pansophic has broadened its initial expertise in mainframe library management to include

solutions for information retrieval, application development and control, distribution and financial applications, and manufacturing. Pansophic is one of the world's largest packaged software companies with more than 75,000 installations of products at 18,000 mainframe, midrange, and micro computer sites.

On-Line Software International is a NYSE company (OSI) headquartered in Fort Lee. The 20 year-old firm combines consulting and educational services with CICS, DB2 productivity software and development systems products that enhance the productivity of IBM computer systems users.

BOSTON (JUNE 13) BUSINESS WIRE - The Kendall Co. announced a strategic plan Wednesday intended to focus resources and management on specialty institutional health care markets, including wound care, vascular compression, critical care, and urology.

The company said that it expects to divest non-core businesses, including its McGaw and Futuro business units and possibly its Polyken division, which market intravenous, home health care, and adhesive and tape products.

Proceeds from planned divestitures this year are expected to be used to reduce substantially or retire the company's bank debt. The company expects to retain and build as its core business its Kendall Healthcare Products Co. division, which markets a broad range of wound care, incontinence care, vascular compression and surgical care products, as well as the bulk of its international operations.

As part of the strategic realignment, the company's executive offices and international division will be consolidated in Mansfield, Mass., where Kendall Healthcare Products Co. is located.

The move will make the corporate structure more responsive to the marketplace and will not result in any material number of job losses. Aside from a few duplicative corporate staff positions, the affected Boston employees will be offered the opportunity to relocate to Mansfield. The company currently has approximately 600 employees in Massachusetts.

Further, William G. Little, formerly head of Kendall's International

division, will become president and chief operating officer of Kendall Healthcare Products Co.

Ervin R. Shames, who held the chief executive officer post at The Kendall Co. over the last several months while he directed an extensive strategic review of Kendall's businesses, will assume a senior position at another company within a few weeks.

Shames said, "My objectives at Kendall were to recruit a highly talented health care management team and to put in place a new strategy that would refocus Kendall's businesses and strengthen the company financially. These goals have been accomplished. I am leaving Kendall with the confidence that the right strategy and leadership are in place to make the company successful."

During the initial period of divestiture and refocusing, a principal from Clayton & Dubilier Inc., a private investment firm which organized the management buyout of The Kendsall Co. in 1988, will assume responsibility for management of the company.

PONCE, P.R. (JUNE 13) BUSINESS WIRE - Ponce Federal Bank, F.S.B. (NASDAQ:PFBS) announced Wednesday that a U.S. District Court of Puerto Rico has set aside a $2 million jury award and judgement against the bank, rendered on March 3 by the U.S. District Court Jury, and has ordered a new trial ''as to all issues.''

The jury verdict against the bank had resulted from a loan and contract dispute between Ponce Federal and a Puerto Rico housing development company. The new trial is set for October 29.

In the order setting aside the verdict, the U.S. District Court judge stated that the award, ''...is so excessive as to shock the conscience of the court.'' The order went on to state, ''The award so far exceeds fair and reasonable compensation as to compel the conclusion that the verdict reflects a prejudiced rather than a reasoned appraisal of the evidence.

''This court has great reluctance to interfere with a jury's judgement, but the total amount is so excessive and so far beyond fair and reasonable compensation for potential damages sustained that to permit it to stand would be a denial of justice.''

In its financial statements for the fourth quarter of 1989, Ponce Federal recorded a reserve provision of $2 million pending the resolution of the matter. No adjustment to the reserve provision will be made by the bank at this time.

Ponce Federal Bank F.S.B., the third largest thrift institution in the Commonwealth of Puerto Rico, is a federally chartered, full-service financial institution headquartered in the southern coastal city of Ponce. The bank maintains an Island-wide network of 25 branches and executive offices in Ponce as well as Hato Rey, the financial center of metropolitan San Juan.

WASHINGTON (JUNE 13) BUSINESS WIRE - Today, the Business Software Alliance (BSA) and the Software Publishers Association (SPA) announced a merger of their organizations that will bolster the software industry's efforts to combat software piracy.

BSA will become the arm of SPA responsible for international anti-piracy and public policy activities, and it will retain its name and board of directors on which SPA will have direct representation.

''We are very enthusiastic about the merger of BSA and SPA,'' said Tom Lemberg, general counsel of Lotus Development and chairman of the BSA board of directors. ''The merger of BSA and SPA consolidates the strength of the software industry and reaffirms our commitment to join together to fight worldwide software piracy with litigation against copyright infringers and public awareness programs to promote the benefits of original software use.'' Tom Lemberg is also chairman of the SPA Government Relations Committee.

''BSA has demonstrated remarkable capabilities in fighting piracy in Europe and in the Pacific Rim,'' said Ken Wasch, executive director of the Software Publishers Association. ''This merger will further strengthen our common efforts toward increasing the growth of the global software market.''

The Business Software Alliance, established in 1988 by six leading worldwide business software producers, will be devoted to continuing its mission to advance free and open world trade in legitimate software. BSA will direct its work toward combatting international piracy with litigation and public awareness programs and representing the software industry on other issues affecting international trade, such as those which arise with respect to the European Community and the General Agreement of Tariffs and Trade.

The Software Publishers Association, which represents more than 650 leading publishers of business, consumer, and education software, serves the industry throughout North America and Europe with its broad range of membership services. Through its Copyright Protection Fund, the SPA will continue to expand its work to fight software piracy in the United States and Canada.

The Business Software Alliance and the Software Publishers Association are headquartered in Washington, D.C.

SYDNEY, AUSTRALIA (JUNE 13) BUSINESS WIRE - The latest leading indicators in the Westpac-Melbourne Institute Indexes of economic activity, released this week by Westpac Banking Corp. (NYSE:WBK) and the Melbourne Institute of Applied Economic and Social Research, continue to signal a lengthy slowdown in the Australian economy.

While the inclusion of the March quarter National Accounts has slightly raised the levels of the indexes, the general message remains unchanged.

The leading index (showing where the Australian economy is headed) has proven a reliable and established indicator of economic activity and has foreshadowed every major turning point in the Australian economy since the early 1950s.

The leading index rose marginally by 0.2 points in April. At 127.8, the leading index is almost 5 points (3.7 percent) below its peak reached in May last year. On an annual basis, the leading index contracted 4 percent, compared with growth of 3 percent at the same time last year.

The coincident index (where the Australian economy is now), although following the leading index down, remained relatively flat in March when it fell for the third consecutive month, and is almost one point below its December peak of 150.6 points.

According to Dr. Dennis Mahoney, Westpac's Economist, Financial Markets, ''There is no doubt that the Australian economy has eased with certain sectors being hit severely. However, the fact that the rate of decline in the leading index has moderated adds more weight to the softer landing scenario.''

''In addition,'' Dr. Mahoney said, ''The growing importance of the service industries means that Australia's business cycle is no longer as heavily dependent on the goods-producing sector.''

''The greater stability of the service sector leading and coincident indicators relative to the total economy provides strong evidence for this

observation,'' Dr. Mahoney added.

Westpac Banking Corp. is an international financial services group headquartered in Australia, with operations extending offshore to 29 countries. Westpac ranks among the top 100 banks worldwide in terms of assets. In its home markets of Australia, New Zealand, Papua New Guinea and the South West Pacific, Westpac offers a full range of banking and financial serivces. Specialized services are provided through the Westpac offices in Asia, Europe and the United States.

MOONACHIE, NJ (JUNE 13) BUSINESS WIRE - AEP Industries Inc. (NASDAQ:AEPI), reports sales for the quarter ended April 30, 1990, of $27,412,000, a decline of $3,399,000 or 11 percent from the $30,811,000 reported for the same quarter of 1989.

Net income for the quarter increased 4 percent to $1,336,000 or, 28 cents per share, from $1,238,000, or 28 cents per share for the corresponding quarter in 1989. The weighted average number of shares outstanding for the 1990 second quarter was 4,762,000, compared to 4,605,000 for the same quarter in 1989.

The decrease in sales resulted from an 18 percent decrease in average sales prices partially offset by an 8 percent increase in volume. Sales volume of specialty products increased 41 percent over the same quarter last year. This increase in specialty sales is primarily attributed to sales of stretch film.

AEP increased its total manufacturing capacity by 9 percent over he same period last year. During the second quarter, AEP operated at approximately 79 percent of plant capacity, as compared to 82 percent for the same period in 1989.

AEP Industries Inc. manufactures, markets, and distributes an extensive range of polyethylene film products nationally which includes shrink bundle film, agricultural row covers, mulch films, and stretch films. The company also offers a complete line of converted products and film for the converting industry.

AEP operates four manufacturing plants located in Moonachie; Waxahachie, Texas; Matthews, N.C. and Los Angeles.

AEP Industries Inc.

HOUSTON (JUNE 13) BUSINESS WIRE - Shell Oil Co. announced Wednesday it is dispensing M85 fuel from a service station in Valencia, Calif.

The station, situated at 24301 Valencia Blvd., is the first of four California Shell stations to participate in a l0-year public/private partnership with the California Energy Commission.

Shell will market M85, a blend of 85 percent methanol and l5 percent unleaded gasoline, at four service stations in areas where flexible fuel vehicle fleets are present. Approximately 500 flexible fuel vehicles are on California's highways, and some 5,000 are forecast to be in use by l992. Many of these vehicles are in governmental and company car fleets.

A dispenser featuring the Energy Commission's M85 logo was installed on the service station pump island in Valencia, about 30 miles northwest of Los Angeles. To obtain the M85 fuel, drivers of flexible fuel vehicles must use a cardlock, similar to a credit card, to activate the electronic dispenser and charge the transaction. The M85 is being purchased from the Energy Commission.

''We are pleased to begin a program that should give us hands-on experience in marketing an alternative fuel,'' said J. W. Schutzenhofer, vice president, marketing, Shell Oil Company. ''By joining with the Energy Commission, we believe we can answer many of the economic, logistical, technical, environmental, health, safety and consumer acceptance questions associated with methanol fuel.''

#90164b0722 06/13/1990 ~Business Wire
AMSTELVEEN, THE NETHERLANDS (JUNE 13) BUSINESS WIRE - Net income for fiscal 1989/90 is NLG 340 million compared to NLG 374 million for 1988/89.

The balance of operating revenues and expenses before interest amounts to NLG 310 million, as compared to NLG 390 million the previous year.

Operating revenues increased 8 percent for a traffic growth of 5 percent.

Operating expenses rose 10 percent due, among other factors, to:

- A considerable increase (+16 pct.) in aircraft fuel prices.

- Extra expenses incurred due to delays in delivery and during the introduction of Boeing 747-400 aircraft.

- The rising cost of delays caused by increasing air traffic congestion.

- Currency rate fluctuations on balance sheet items which led on balance to a negative NLG 30 million compared to the break-even balance the previous year.

- Sharp increases in depreciations as new aircraft became operational.

Financial gains and losses includes an unrealized decline in value of the debenture portfolio resulting from lower stock market levels on NLG 44 million at March 31, (previous year-end NLG 48 million). The interest paid on balance increased by NLG 38 million.

The NLG 72 million profit achieved on sales of tangible fixed assets, is mainly the result of book profits on the sale of two Boeing 747-200 and one DC-9 aircraft and a book loss on the sale of six Fokker-100 aircraft.

The drop in results of holdings can mainly be attributed to the inclusion from acquisition date of the results of the new holdings in Northwest Airlines and Sabena World Airlines. The winter season consequently exerted a once-only large negative influence on the KLM annual figures. Tax liability has increased compared to 1988/89 mainly due to fewer investment tax credit opportunities in 1989/90.

Accounting procedure for currency rate fluctuations related to long-term debt and financial fixed assets has been adjusted to conform with international practice. This has consequently created an extraordinary gain of NLG 47 million after tax. A further amount included in the item extraordinary gains is the NLG 137 million profit resulting from the sale

of some holdings.

A proposal will be put to the general meeting of shareholders on Thursday, Aug. 30, that, of the NLG 340 million net income, NLG 230 million be allocated to retained earnings and NLG 105 million be allocated for payment of a cash dividend: 5 percent to priority and preference shareholders; 9 percent to common shareholders.

NLG 4.7 million has been set aside for the statutory distribution of profit to personnel.

#90164b0724 06/13/1990 ~Business Wire
HUNT VALLEY, MD (JUNE 13) BUSINESS WIRE - McCormick & Co. Incorporated (NASDAQ: MCCR), Wednesday reported earnings increases from continuing operations for both the second quarter and first half of fiscal 1990 ended May. 31.

Second quarter net income of $16 million (38 cents per share) increased from the $8 million (19 cents per share) reported for the same period last year. Second quarter results included 15 cents per share from the sale of surplus land in the United Kingdom.

Sales for the quarter of $302 million were three percent ahead of the second quarter of 1989 while sales for the first six months rose six percent to $602 million from $570 million. Sales comparisons were adversely affected by the 1989 divestitures of portion control and food color businesses as well as operations in Brazil and Germany and lower currency conversion rates in the United Kingdom.

Without the sales from these divestitures, sales for the second quarter and first half of 1989 would have been $288 million and $557 million, respectively. Therefore, sales from ongoing operations in 1990 increased five percent and eight percent respectively.

First half earnings per share from continuing operations rose 69 percent to 61 cents from 36 cents in 1989. Total first half income in 1989 of $2.20 per share included $1.84 per share from the sale of real estate operations.

Charles P. McCormick Jr., chairman of the board and chief executive officer noted, "Overall results for the second quarter and first half exceeded our expectations. For the first half, profits in the Consumer and Industrial areas improved nicely. International also showed continued improvement.

"We remain committed to achieving improved returns from our international operations. Proceeds from the U.K. land sale were used to repay debt and will support future international growth. We are confident that 1990 will be another good year for the company."

EAST HARTFORD, CT (JUNE 13) BUSINESS WIRE - Vincent A. Rocco, chairman and chief executive officer of TRC Cos. Inc. (AMEX:TRR) announces that on June 12, 1990, the board of directors of the company elected Edward W. Large to the board of TRC Companies Inc.

Recently retired from United Technologies Corp. (UTC), Large brings a wealth of experience in corporate management to TRC. Throughout a 30 year career at UTC, Large has held executive positions including executive vice president, legal and corporate affairs, and general counsel. He previously had been associated with the New York law firm of Shearman & Sterling.

Currently, Large is affiliated with the law firms of Crowell & Moring in Washington and Day, Berry & Howard in Connecticut. He is on the board of directors for Society for Savings.

Large is enthusiastic about his new association with TRC.

''TRC was highly recommended to me, primarily for the quality people. The strong management team and highly skilled technical staff are impressive. With my belief in the future and growth of the environmental industry, I am especially pleased to become a part of this forward thinking company.''

Large graduated from Marshall University in Huntington, W.Va., and received his law degree from the University of Virginia Law School. He holds memberships in the American and Connecticut Bar Associations and is a member of the Connecticut, New York, and Virginia bars.

TRC Companies Inc. and its engineering, laboratory and instrument subsidiaries services clients from offices across the country.

FAIRFIELD, NJ (JUNE 13) BUSINESS WIRE - Prime Motor Inns, Inc. (NYSE:PDQ) and Blackstone Capital Partners L.P. Wednesday announced that they have amended their definitive agreement which will result in Prime realizing $170 million in cash in exchange for 100 percent ownership of the Howard Johnson and Ramada franchise systems rather than the previously-reported sale to Blackstone of 65 percent interest in a joint venture to own the franchise system.

In addition, the purchaser will assume approximately $15 million of annual royalty obligations due to New World Development Co. which obligations would previously have been the responsibility of the joint venture. Consistent with the previously announced joint venture, Prime retains the AmeriSuites and Wellesley Inns divisions as well as the Rodeway Inns International franchise system and a $58 million note receivable from New World.

Peter E. Simon, chairman of Prime, stated, ''Consistent with our objective of monetizing assets to strengthen our balance sheet, this finalized agreement achieves for Prime a significantly larger cash realization and results in a substantial reduction in fixed charges. ''This increased cash resulting from the new Blackstone agreement will enable Prime to significantly reduce its debt and to invest in its AmeriSuites and Wellesley Inns limited service products, which are experiencing higher occupancy rates and have operating cost structures substantially lower than many other hotel products.''

NEW YORK (JUNE 13) BUSINESS WIRE - American International Petroleum Corp. (NASDAQ:AIPN) announced Wednesday that it has signed a Letter of Intent with Quest Energy Company (''Quest'') of Houston, to process for Quest 20,000 barrels/day of crude oil for one year with an option to extend for another year.

The Letter of Intent calls for the parties to use their best efforts to negotiate and execute the final processing agreement by June 25, 1990.

Quest is expected to supply crude at the rate of 600,000 barrels per month to the 30,000 barrels/day Lake Charles, La. Refinery as early as Aug. 1, 1990.

Should the processing agreement be executed as contemplated by the Letter of Intent, the refinery will be required to supply Quest up to 7 million

barrels per year of petroleum products such as naphtha, Jet fuel/kerosene, diesel fuel, and residual fuel valued in excess of $140 million at current market prices.

American International Petroleum Corp. is engaged in refining, oil and natural gas exploration, production, transportation, and marketing activities in Louisiana, and Kentucky, as well as Colombia, South America.

#90164b0739 06/13/1990 ~Business Wire

MADISON, WI (JUNE 13) BUSINESS WIRE - Lunar Corp. filed a registration statement Tuesday with the Securities and Exchange Commission covering a proposed initial public offering.

Of the 1,475,000 shares of common stock, 1 million shares are being sold by the company and 475,000 by shareholders. It is anticipated the offering will occur in July and the price will be $14 - $16 per share. Smith Barney, Harris Upham & Co. Inc.; Volpe, Welty & Co.; and Robert W. Baird & Co. Inc. will manage the underwriting syndicate.

Net proceeds to Lunar Corp. will be used to repay long-term debt and added to working capital for general corporate purposes.

Lunar Corp. develops products for the diagnosis, monitoring and treatment of osteoporosis and other metabolic bone diseases. The company believes it is a world leader in the development and sales of bone densitometers, which are specialized scanning systems used to aid in the diagnosis of bone disease by measuring the density of bone.

The company is developing a drug for the treatment of osteoporosis and is currently conducting a double-blind placebo-controlled clinical trial on osteoporotic patients.

Lunar's founder and President, Dr. Richard B. Mazess, together with other researchers at the University of Wisconsin-Madison, pioneered the development of the first commercial bone densitometer in 1972. From its inception through May 31, the company shipped approximately 1,300 bone densitometers worldwide including approximately 425 of its advanced DPX dual energy X-ray systems, introduced in June 1988.

The DPX product line is sold to leading medical institutions, hospitals, pharmaceutical companies active in the field of bone mineral metabolism, and radiological and other specialty group practices.

Lunar's DPX and its enhanced version, the DPX-L, introduced in March 1990, perform conventional spine or femur scans, lateral spine scans and total body scans. The DPX provides users with high precision, rapid scan times and low operating costs. Existing DPX users can upgrade readily to the DPX-L by adding software and making minor hardware changes. The DPX-L reduces scan times without loss of precision.

In the area of osteoporosis treatment, Lunar is developing a Vitamin D compound, 1-alpha-hydroxyvitamin D2 (''one-Alpha D2''), which the company believes may reverse the effects of osteoporosis. While the two drugs currently approved for use in the United States to treat osteoporosis slow the effects of the disease, they may not reverse those effects.

One-alpha D2 was invented by Dr. Hector DeLuca, a recognized leader in Vitamin D research at the University of Wisconsin-Madison, and is licensed exclusively to the company. The company has conducted Phase 1 studies in humans which have shown that one-alpha D2 is non-toxic at dosage levels which the company believes will prove therapeutic.

In addition, animal studies have shown that one-alpha D2 has lower toxicity and similar metabolic activity as compared to another Vitamin D compound, laD3, which is widely used in Japan for the treatment of osteoporosis. The company is currently conducting a Phase 1 clinical trial on a target-group of 60 osteoporotic women, and expects to complete this double-blind placebo-controlled trial by mid-1991.

In connection with the offering, a registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

This press release shall not constitute an offer to sell or solicitation of an offer to buy nor shall there by any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

A written prospectus meeting the requirements of Section 10 of the Securities Act of 1933 may be obtained from Smith Barney, Harris Upham & Co. Inc., 1345 Avenue of the Americas, New York, NY 10105 or Volpe, Welty & Co., One Maritime Plaza, Suite 1100, San Francisco, CA 94111 or Robert W. Baird & Co. Inc., 777 East Wisconsin Ave., Milwaukee, WI 53202.

#90164b0742 06/13/1990 ~Business Wire

NEW YORK (JUNE 13) BUSINESS WIRE - The Singapore International Monetary Exchange (SIMEX) and The International Petroleum Exchange (IPE) announced that they have reached agreement to cooperate on the development of their Dubai crude oil futures contracts.

SIMEX will be listing the world's first sour crude oil futures contract based on Dubai crude on June 21, with September 1990 as the first contract month while IPE will be trading a similar contract on July 19, with October 1990 as the first contract month.

Both Exchanges have been discussing on how best they could cooperate on their Dubai contracts for some time as they recognize that it would be in the interests of the international oil trade for the same contract to be traded in their respective time zone.

The specifications of the Dubai contracts to be traded in both Exchanges will be identical. The contracts will be for 1000 barrels of sour crude basis Dubai delivered FOB at the Fateh terminal.

Both contracts will be delivered on a cash settled basis. To enhance the attraction of the contracts and to better serve the needs of the international oil community, SIMEX and IPE have concluded that both their contracts should cease trading at the same time on the same day with a common final settlement price in respect of any expiring contract month.

To further facilitate inter-exchange trading in their Dubai contracts, SIMEX and IPE have also agreed to work towards introducing lower margin requirements for such inter-exchange spread positions.

Peter Wildblood, IPE's Chief Executive said, ''This arrangement responds to the needs of the international oil industry, many sectors of which have expressed the desire to see the Exchanges develop a contract which would be traded in each time zone.

It will facilitate the widest participation not only in trading terms but also achieve the objective of having a pricing panel representative of the oil industry which is both wide geographically and with depth of activity.''

Ang Swee Tian, president of SIMEX, added, ''We have been working closely with the oil industry for some time to develop a soundly based sour crude oil contract. We are delighted that we have been able to find a solution to those aspects of the contract which will enable the contract to be traded in London and Singapore on a global basis to fulfill the requirements of the international oil industry.''

The depth of IPE's Brent crude oil contract increases and on June 12,

traded six months forward for the first time.

#90164b0750 06/13/1990 ~Business Wire

NASHVILLE, TN (JUNE 13) BUSINESS WIRE - The Bank of Nashville (NASDAQ:TBON) released May's earnings, reporting a profit of $10,856 for the month.

The bank, open since November of 1989, had optimistically predicted a profit in the first year although banks normally don't become profitable until their second year of operations according to Richard Chambers, president and chief executive officer of The Bank of Nashville.

''Our early profits are due to several factors including focused management of equity capital, strong asset and account growth, and the enthusiastic acceptance by the Nashville public,'' said Chambers.

''Many area bank's equity capital ratio is 6 - 8 percent (the measure of equity to assets) and our ratio is over 22 percent,'' said Chambers. Banking regulators frequently use the equity capital ratio as a measure of the soundness of a financial institution. The financial strength of a bank is reflected in two areas; equity capital and loan loss reserves.

The bank has also set aside 1.5 percent of outstanding loans as a reserve against possible loan losses. This amount, while constantly growing, is currently $787,000. This reserve is in excess of that maintained by many newer banks.

According to the Dec. 31, 1989, FDIC Call Reports the other 17 new banks formed in Tennessee in the last three years have loan loss reserves of 1 percent.

In May, deposits, the number of accounts and the loan portfolio continued to grow, further establishing Nashville's confidence in the bank. ''The continued support and interest shown by the community has helped the bank become profitable in record time. After all, people realize we are The Bank of Nashville.''

The community's initial response made The Bank of Nashville the largest capitalized new bank in the history of the Atlanta District of The Federal Reserve. Their continued support has helped The Bank of Nashville turn a profit early in its first full year of operations and earned recognition

for The Bank of Nashville as a member of Nashville's financial community.

The bank is located in the L & C Tower at 401 Church Street and the phone number is 615/271-2000.

#90164b0751 06/13/1990 ~Business Wire

BOSTON (JUNE 13) BUSINESS WIRE - The Massachusetts Water Resources Authority Wednesday awarded the largest contract in its history to a team of engineering and professional firms headed by ICF Kaiser Engineers.

Stone and Webster of Boston has been designated as chief consultant to Kaiser and will receive approximately $28 million of the $119.4 million contract. Other local firms will also participate in the contract.

The five and one-half year contract is for construction management services for the $6.1 billion harbor cleanup project now underway at Deer Island and Nut Island in Boston Harbor and Fore River Staging Area in Quincy. The first phase of the cleanup, requiring the contruction of piers, transportation facilities and utilities is nearly complete. Construction has also begun on a $70 million sludge fertilizer facility. MWRA has already completed $100 million in improvements to the existing sewage treatment plants and construction of scum removal facilities.

''ICF Kaiser submitted an impressive proposal that will provide the talent and experience needed to manage day-to-day activities on a highly technical, difficult construction project,'' said Richard D. Fox, who directs the authority's harbor construction program. ''We are especially pleased that Boston-based Stone & Webster will be major player on the Kaiser team and that 17 percent of the work on the construction manager contract will be performed by firms owned and controlled by minorities and women,''

The Kaiser team will manage and direct construction of a 1.3 billion gallon a day wastewater treatment plant, a nine and one-half mile long undersea discharge tunnel, a five-mile long tunnel connecting Deer Island and Nut Island and dozens of related sewerage facilities.

ICF Kaiser is well known locally, having succesfully completed the $700 million Southwest Corridor Orange Line Project for the Massachusetts Bay Transportation Authority on time and on budget in 1987.

ICF Kaiser, with its permanent district office in Boston, is headquartered

in Oakland, Calif. and is a subsidiary of American Capital and Research Corp, (NASDAQ: ACRCA) of Fairfax, Virg.

#90164b0752 06/13/1990 ~Business Wire

COLUMBUS, OH (JUNE 13) BUSINESS WIRE - Meret Inc. (NASDAQ:MRET) reported net income of $99,797, or 1 cent per share, for its third quarter ended April 30, 1990, compared to net income of $145,291, or 2 cents per share, for the same quarter last year.

Total revenues for the April 30, 1990 quarter were $3,229,859 compared to $2,704,141 for the third quarter last year. For the first nine months of fiscal 1990, net income was $190,196, or 2 cents per share, on revenues of $8,949,417, compared to net income of $305,154, or 4 cents per share, on revenues of $7,622,233 for the nine-month period ended April 30, 1989.

The 19 percent and 17 percent increase in revenues for the most recent quarterly and nine-month periods, respectively, compared to the same periods last year are due to the expanded offering of client services, principally the design production and implementation business. This service was not offered by the company during the first half of fiscal 1989.

However, net income levels were lower for both the current quarter and nine-month periods due to the costs associated with the company's geographic expansion through the opening of marketing and sales offices in New York and London, and a full service office in Seattle.

In addition, the company has incurred start-up expenses in its College Convenience Inc. (''CCI'') subsidiary during the first nine months of fiscal 1990. Through an agreement with The Southland Corp., CCI owns the exclusive rights to franchise 7-Eleven convenience stores on college campuses. CCI is currently marketing these franchises to a number of universities in the United States.

Meret operates Retail Planning Associates, one of the world's largest retail consulting and design firms.

PISCATAWAY, NJ (JUNE 13) BUSINESS WIRE - Unitronix Corp. (NMS:UTRX) announced Wednesday that it has retained various parties to assist management in a corporate wide restructuring of the company.

Frank Zimmer, president and CEO stated, ''PRAXA revenues have grown from $3.4 million in 1987 to over $10.7 million in fiscal 1989, with revenues for the year ended December 31, 1989 at record levels. This reflects the broad applicability of PRAXA and the company's ability to gain an increasing share in the multi-million dollar market for manufacturing applications software and related turnkey products and services.

''Our leading market indicators, which include customer inquiries and quotations, are excellent. We believe that our plans to increase our PRAXA direct sales force must be accelerated to prepare for our next fiscal year beginning July 1, 1990.''

Accordingly, Zimmer noted, ''Our decision to retain outside parties to assist in a restructuring program should allow us to more clearly focus on the opportunities present in the PRAXA marketplace. We hope to have something more definitive to report before our June 30 year end results are announced.''

Unitronix Corp. markets, develops, and supports PRAXA, a proprietary manufacturing resource planning system (MRPII), for use on Digital Equipment Corp.'s line of VAX computers, throughout the United States.

HOPKINTON, MA (JUNE 13) BUSINESS WIRE - EMC Corp. Wednesday announced the signing of a co-marketing agreement with Intelogic Trace, headquartered in San Antonio, Texas.

The agreement brings together the service depth of Intelogic Trace and EMC storage products to offer Wang end-users the combined strengths of both companies.

The contract calls for Intelogic Trace to sell all EMC Wang-compatible storage products, including main memory and high-speed disk subsystems for Wang VS computers. Intelogic Trace is a $150 million diversified third party maintenance company with over 200 locations throughout the United States. The company has more than 650 customer engineers and a national salesforce of over 80 professionals.

''This agreement allows us to expand the scope of our product offerings to the Wang market,'' said Ken Driscoll, Intelogic Trace Wang Product Manager. ''With the addition of EMC storage products to our product lineup, Intelogic Trace is able to expand our offerings to our customers.''

EMC Corp. will continue to market its storage products to the Wang marketplace as well. EMC Corp. is a leading independent manufacturer of system enhancement products for midrange and mainframe computers.

''EMC is pleased to have the opportunity to market our Wang-compatible products to a wider base of Wang users,'' said Ross Lashway, Distribution Manager at EMC. ''Intelogic Trace is a strong company with an excellent reputation for service and customer satisfaction. We believe that this relationship will combine the strengths of our two companies to offer more Wang end-users the best possible combination of reliable, high performance products and excellent support.''

WEST PALM BEACH, FL (JUNE 13) BUSINESS WIRE - VHC Ltd. (NASDAQ:VHCL) of West Palm Beach, Wednesday announced that the letter of intent which it previously entered into on March 15, 1990, with Joseph F. Bradway Jr., president and chief executive officer of the company, whereby a company formed by Bradway would acquire all the outstanding common stock of the company other than the stock held by Bradway for a net cash price of $5.75 per share, has been extended to June 22, 1990.

A number of conditions regarding the transaction were to have been met by June 13, 1990. The board of directors of the company has extended the date by which these conditions must be met to June 22, 1990.

Bradway and his family members currently own approximately 30 percent of the outstanding VHC stock.

VHC Ltd. is a holding company and parent of Maul Technology Co., which manufactures machinery for the production of glass containers and A.K. Robins & Company Inc., which manufactures food processing machinery.

NEW YORK (JUNE 13) BUSINESS WIRE - NYNEX Computer Services Co. (NCS), a world leader in information management, Wednesday announced that it has formed an alliance with Contingency Trading Facility Inc. (CTF; New York).

The agreement calls for NCS to provide comprehensive business resumption planning and for CTF to provide physical backup trading room facilities to financial trading organizations.

The service will allow financial institutions to protect their revenue flow while maintaining a continuity of trading operations, communications and office operations should a disaster strike their primary trading facilities.

NYNEX will offer management consulting, concentrating on business resumption planning. The business resumption plan encompasses real-time information data feeds, communication support and logistical organization; and the degree of off-site backup facility needs.

CTF's 12,000 square foot facility located in Brooklyn, N.Y. can immediately provide one hundred fully equipped trading stations, including turret, phone, furniture and other equipment.

''We are offering much more than the traditional back office contingency plans,'' said Harry Wagowski, NCS' director of marketing. ''Many companies already have contingency plans in place to insure the continuous operation of critical revenue-generating automated trading systems.

''While these plans may include action items that will ensure continued sophisticated microcomputer based decision support systems for trading room personnel, they do not address the continued operation of the trading room itself. CTF has the ability to put the trader back into the market and continue trading.''

The NYNEX Corp. is a leader in the information industry, providing information and communications systems to a diverse base of customers nationwide and internationally.

WAYNE, NJ (JUNE 13) BUSINESS WIRE - American Cyanamid Co. announced Wednesday that it has entered into a definitive agreement with The Procter & Gamble Co. concerning the sale of the toiletries and fragrances portion of its Shulton Group, excluding the line of Pierre Cardin fine fragrances.

Under the agreement, Procter & Gamble will acquire the majority of Shulton's men's toiletries and fragrances business worldwide. Cyanamid will sell Shulton's line of Breck hair care products and Lady's Choice personal care products to other parties. The total value of the combined transactions to Cyanamid will be $370 million. The final cost to Procter & Gamble will be adjusted, depending on the proceeds to Cyanamid from the sale of the Breck and Lady's Choice product lines.

Cyanamid also indicated that it is in advanced negotiations with another party condering the sale of its household products business, the other major component of the Shulton Group.

The agreement with Procter & Gamble is subject to the normal Hart-Scott-Rodino review by the Federal government.

#90164b0808 06/13/1990 ~Business Wire
AUSTIN, TX (JUNE 13) BUSINESS WIRE - HealthVest (ASE:HVT) Wednesday announced a loss of $4.2 million, or 39 cents per share for the first quarter ended March 31, 1990, compared with net income in the like period last year of $5.5 million, or 48 cents per share.

Funds available for distribution or reinvestment for the first quarter was a negative $2.6 million vs. a positive $7.5 million in the year-earlier period.

HealthVest's first quarter results reflected the reduced revenues provided for under standstill agreements with its principal operator, Healthcare International Inc.

The Trust incurred generally higher expenses in the first quarter of 1990 compared with the same period last year. In particular, interest costs increased to $7.5 million from $6.0 million in the year-earlier quarter due primarily to increased outstanding indebtedness and default interest relating to the Trust's senior debt agreements.

Also, other expenses increased to $3.1 million from $414,000 in the first quarter of 1989, reflecting primarily legal and financial consulting fees associated with litigation and negotiations with the Trust's lenders and Healthcare. The Trust's recorded no expense for advisory fees because of its self- advised status since September 1989.

HealthVest is a self-administered Real Estate Investment Trust (REIT) that invests in income-producing health care-related properties including psychiatric, general health and rehabilitation hospitals, skilled nursing facilities, retirement centers, medical office buildings, medically oriented fitness centers, and facilities offering other related health care products and services. HealthVest is listed on the American Stock Exchange under the symbol HVT.

#90164b0817 06/13/1990 ~Business Wire
RENO, NE (JUNE 13) BUSINESS WIRE - FirstMiss Gold Inc. (NASDAQ:FRMG) announced Wednesday that its board of directors adopted a stockholder rights plan in which common stock purchase rights will be distributed as a dividend at the rate of one Right for each share of common stock held as

of the close of business on June 25, 1990.

Each right has a 10-year term and will entitle stockholders to buy one share of common stock of the company at an initial exercise price of $40.

However, if any person becomes the beneficial owner of 15 percent or more of the company's outstanding common stock without the board's approval, then each right not owned by such person generally will entitle its holder to purchase, at the right's then-current exercise price, shares of the common stock of the company having twice the market value of such exercise price.

If the company, without the board's approval, is acquired in a merger or other business combination transaction with another person, or sells 50 percent or more of its assets or earning power to another person, each right not owned by such other person generally will entitle its holder to purchase, at the right's then-current exercise price, shares of common stock of such other person having twice the market value of such exercise price.

The rights plan is designed to protect against unsolicited and coercive attempts to acquire control of the company, and to encourage anyone who attempts to acquire the company to negotiate with the Board acting on behalf of all stockholders.

The company will be entitled to redeem the Rights at 1 cent per right at any time until the tenth day following public announcement that someone has acquired 15 percent or more of the company's common stock, unless such 10-day period is extended by the board.

FirstMiss Gold Inc. has headquarters in Reno. Its primary mining and production operations are at the Getchell Mine in north central Nevada.

WASHINGTON (JUNE 13) COMTEX - The 10-K report filed at the NASD shows Parkway Capital Corp. lost $61,333, or $0.00 per share, on interest income of $5,587 for the year ended Dec. 31, 1989.

This compares with a loss of $35,896, or $0.00 per share, on interest income of $2,401 in 1988.

Parkway was organized under the laws of the State of Colorado on Feb. 13,

1987 as a blind pool-blank check company.

On Jan. 26, 1990, Parkway entered into a merger agreement with Albuquerque Brewing & Bottling Co., a New Mexico corporation. The agreement provides for Albuquerque Brewing to be merged into Parkway in consideration for 174.64 million shares of Parkway's previously unissued common stock by the former Albuquerque Brewing shareholders. Albuquerque Brewing operates a micro-brewery in Albuquerque, New Mexico where it manufactures and distributes a beer under the brand name of Michael's Golden Ale.

In the event Parkway does not consummate its proposed merger with Albuquerque Brewing, it intends to commence evaluation of other acquisition candidates.

Parkway's executive office is located at 7345 East Peakview Ave., Englewood, Colorado 80111 and its telephone number is (303) 850-7611.

WASHINGTON (JUNE 13) COMTEX - The 8-K report filed at the SEC shows on

May 30, 1990, Interamerica Oil & Minerals Inc. purchased the Dilligas natural gas pipeline system from Spicer Oil Co. The line was bought from Spicer Oil Co. for a consideration of $425,000. Those funds were raised through a note for that amount with the Cornerstone Bank, N.A., Dallas, Texas.

The 14 mile long, eight inch and four inch pipeline system located in Parish, Louisiana, moves 5.2 MMCF per day, and is capable of moving 20.0 MMCF per day.

The executive office of Interamerica Oil & Minerals Inc. is located at 5950 Berkshire Lane, Suite 580, Dallas, Texas 75225, and its telephone number is (214) 369-9055.

WASHINGTON (JUNE 13) COMTEX - The 8-K report filed at the SEC shows as of May 18, 1990, three of the four directors of JRS Foods Inc., Stanley Maihiot, Joseph Esposito and Roger Voudouris, resigned from each their posistions as both an officer and a director of JRS. IN conjunction, they yielded two-year, irrevocable proxies over all of their held shares, totalling an aggregate 1.5 million common shares, to Santa Fe Development & Mortgage Corp. Those actions were directly related to the planned acquistion of JRS by Santa Fe, pending as of October of 1989, upon an agreement between the two corporations.

JRS announced that it expects to file an 8-K report disclosing the final terms of the merger restructuring and the capital position of Santa Fe in JRS. In the same report, three new replacement directors for JRS are to be announced. Santa Fe is a principal shareholder of JRS and has contibuted significant capital funds to the company. The only remaining director, as of the May 18 filing, was Fred L. Harris, CEO.

As of May 12, 1990, JRS was deliquent in filing financial details of the merger between JRS and Celebrity Foods Inc. Prior to that date, Celebrity had merged into JRS, with the name of the merged corporations changed to JRS Foods, Inc. The delays were pursuant to the pending acquisition by Santa Fe. However, JRS expects to file the requisite 8-K report by the last week in June or the first in July.

The executive office of JRS Foods is located at 110 Blue Ravine Road, Suite 162, Folsom, California, 95630.

#90164c0038 06/13/1990 ~Comtex

WASHINGTON (JUNE 13) COMTEX - The 8-K report filed at the SEC shows on

June 7, 1990, the board of Neoterik Health Technologies Inc. engaged the services of the independent auditors of Linton, Shafer & Co., P.A., to audit its accounts for its 1990 fiscal year. Those auditors replace the formerlyengaged auditors of Ernst & Young, who were terminated in that capacity.

For the previous two fiscal years, there were no disagreements between those former auditors and the company.

For the previous two years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles, with but one exception. The report filed by Ernst & Young for Neterik and subsidiary for the fiscal year ended May 31, 1989, contained opinions expressing considerable doubt as to the ability of the company to continue as a going concern.

WASHINGTON (JUNE 13) COMTEX - The 8-K report filed at the SEC shows the reporting by Lousiana-Pacific Resources, Inc.'s president, Richard A. Whittington, of the corporations majors developments in 1989:

The proposed offering by Morgan Gundy International, S.A., of the Republic of Panama, of preferred convertible stock paired with zero-coupon bonds was terminated.

The First Security Bank of Utah resigned as the company's transfer agent.

Trading of Louisiana-Pacific common shares was halted by NYASE.

Negotiations for an operations reorganization coupled with the infusion of new capital continue.

The executive office of Louisiana-Pacific Resources Inc. is located at 10203 Santa Monica Blvd., Suite 400, Los Angeles, California 90067, and its telephone number is (213) 277-3235.

#90164c0040 06/13/1990 ~Comtex

WASHINGTON (JUNE 13) COMTEX - The 8-K report filed at the SEC shows in a press release dated June 7, 1990, Star States Corp. announced the company's arrival at a number of broad-based management intiatives. These initiatives are meant to redirect the company to its core banking business and increase the company's worth, as the company perceives its stock to be undervalued.

The planned changes are part of a supervisory agreement reached between Star States and the Office of Thrift Supervision. As of March 31, 1990, capital for the banking corporation was $85.8 million, or 5.09% of average assets. The plans, as discussed with the OTS, were in large part described in the corporation's 1989 annual 10-K report. They include improvement of asset quality, sale Anderson Leasing Inc. (a fleet leasing subsidiary) and preservation of capital.

Chairman J. Walton St. Clair, Jr., stated, "We believe this kind of management strategy, now formalized by agreement with the OTS, points toward improving the value of our stockholders' investment." He cautioned, however, that, "If problem loans aren't reduced or capital growth is not achieved over certain periods, the regulatory agencies have the authority to limit some of our lending and investment activities."

#90164c0041 06/13/1990 ~Comtex

WASHINGTON (JUNE 13) COMTEX - The 8-K report filed at the SEC shows Sage Broadcasting Corp. and three of its officers have become defendants in a lawsuit brought by Legend Communications of Iowa, Limited Partnership, and by its general partner. The suit claims breach of contract, conversion, fraud and civil racketeering, and seeks approximately $1 million in damages, plus treble damages.

Sage believes that a claim for breach of warranty over certain financial representations in a sales agreement, for the purchase of certain Souix City radio stations by Legend from Sage, lies at the heart of the suit. Sage further believes the claims to be meritless, stemming merely from the wish by the Plaintiffs in the suit to avoid payment of promissory note obligations of $1.15 million related to that sale. As pointed out by Sage in the 8-K filing, the suit, brought within two weeks of the closing of that sale, had since sufficed to avoid both making such payments and fulfilling other obligations to Sage.

Sage intends to make counterclaims against the Plaintiffs for damages.

WASHINGTON (JUNE 13) COMTEX - The 8-K report filed at the SEC shows on June 8, 1990, Bethel Bancorp announced that the Office of Thrift Supervision had on that date approved an acquisition of Brunswick Federal Savings, F.A., by Bethel. A definitive agreement between Brunswick and the company was entered into on October 23, 1989, for that acquisition.

On April 27, 1990 and May 30, 1990, respectively, the Main Superintendent

of Banking and Brunswick's shareholders had already approved the merger. Subject to final closing conditions, the companies anticipate closure and payment of consideration to Brunswick shareholders early in the third quarter.

#90164c0044 06/13/1990 ~Comtex

FINGERMATRIX: SALE OF $1 MILLION NOTE, PRIVATE PLACEMENT OFFERING

WASHINGTON (JUNE 13) COMTEX - The 8-K report filed at the SEC shows on May 22, 1990, the City Pension Fund for Firefighters and Police Officers, of Tampa, Florida, purchased a $1 million convertible promissory note of Fingermatrix Inc. Proceeds from the sale were received on May 25, 1990.

The principal, which may be reduced from time to time pursuant to a right of conversion, is due and payable on May 21, 1995, along with interest in the amount of 7.25% per annum.

The City Pension Fund may, at any time prior to the closing of the business day of May 21, 1995, convert the whole or any part of the outstanding principal into fully-paid and non-assessable Fingermatrix common stock.

The conversion rate is $1.00 per share if the option is exercised on or before May 15, 1991. That rate changes to the lower of $2.00 per share or 70% of the average of quoted NASDQ trading prices for the ten days immediately prior to the date of receipt of such a conversion request by Fingermatrix, not to go below $1.00 per share, for the period from May 15, 1991 until May 15, 1992. After May 15, 1992 and through the maturity date, the conversion rate equals 70% of the market price of Fingermatrix per share, but less than $1.00 per share.

In other news, under the limited offering exemption via Regulation D of the Securities Act of 1933, Fingermatrix was offering to accredited investors (as defined by rule 501 of section D) up to a maximum of 30 units for an aggregate $3 price of million. Each unit consisted of 100,000 shares of Fingermatrix common stock.

As of May 22, 1990, ten of those units have been placed. The offering terminates of Sept. 30, 1990, and Fingermatrix intends to continue the offering until that date.

#90164c0045 06/13/1990 ~Comtex

WASHINGTON (JUNE 13) COMTEX - The 8-K report filed at the SEC shows on

May 24, 1990, L. Texas Petroleum Inc., entered into an agreement to acquire mineral interests, in addition to those already owned, in leases and wells in the Berry R. Cox Field area. The Cox Field area is located in Webb, Zapata and Jim Hogg Counties, Texas. L. Texas Petroleum is a wholly-owned subsidiary of The Exploration Company of Louisiana Inc.

The sellers include Berry R. Cox Inc., Edwin L. Cox Revocable Trust and Mashek Energy Corp. L. Texas currently owns interests in the property ranging from 9% to 27%. After closing, those interests will have climbed to between 50% and 75%. With the property acquisition, L. Texas is to acquire from the sellers, among other things, the sellers' interests in related minerals, production, royalties, surface rights, rights-of-way, information and contracts.

Closing, set for July 31, 1990, will require a compensation of $40 million, subject to adjustments. Part of that payment is to be paid in cash, part by way of a note issued by L. Texas, payable in the first quarter of 1991.

The board of Exploration believes the purchase of such high-quality, long-life gas reserves to be a sound investment at this juncture, and a serviceable complement to current resource holdings of L. Texas.

#90164c0049 06/13/1990 ~Comtex

WASHINGTON (JUNE 13) COMTEX - Foreign bankers said today the U.S. should

consider abolishing the Glass-Steagall Act and revamping its deposit insurance reform in order to become a more competitive player in the increasingly global marketplace.

"Giving U.S. banks the ability to go into new markets does not automatically mean they will make money," said Peter Leslie, deputy chairman of Barclays Bank plc, England's largest bank. "But if you allow banks to expand their business, this can prove desirable as long as the expansion is managed properly."

The Glass-Steagall Act generally bars banks from securities activities.

In West Germany, banks known as "universal banks" offer products both in commercial and investment banking and a prominent West German banker told the Senate Banking Committee this system provides numerous advantages.

"Universal banking permits banks to spread their risks and to operate on the basis of highly diversified balance sheets," said Ulrich Cartellieri, a Deutsche Bank A.G. official. "They can compensate low profits or losses in one sector with good profits in others. Such spreading of risks leads to an appreciable institutional stability, reduces the potential for claims on deposit insurance and stabilizes the financial industry as a whole."

The U.S. and Japan are the only major industrialized nations which prohibit banks from engaging in securities activities and the deputy president of Tokyo's Fuji Bank Ltd. says this has a major effect on competitiveness.

"Both Japanese and U.S. banks are experiencing a relative decline in competitiveness ... banks have been challenged by securities firms, insurance companies and other nonbank institutions while new powers enabling banks to respond to this competition, such as broad securities powers, have not yet been forthcoming in either Japan or the United States " said Toru Kusukawa.

Kusukawa said he expects a basic consensus will be reached later this month on allowing Japanese banks and securities companies to engage in each other's business. However, he said the necessary legislation will most likely not be drafted and implemented until 1992. This would coincide with the European Economic Community's scheduled implementation of a common banking system issuing licenses permitting banks to engage in a wide range of financial services in host nations.

Kusukawa said no Japanese bank has failed since the end of World War II and he credits this to a supervisory system which constantly monitors a bank's performance.

"We have a strong early warning supervisory system to find any deterioration in a bank's business performance at an early stage," said Kusukawa. We only have 150 banks to cope with, not the 13,000 you (U.S.) do."

Cartellieri advocates pegging insurance premiums to risk profiles. "Introducing risk-related deposit insurance premiums based on regular audits and rating of the asset and liability quality of a bank ... could stem the tide of too excessive and overly sophisticated rules in national and international banking supervision," he said.

The panelists unanimously agreed that the U.S. will remain an attractive investment for foreign banks regardless of whether it institutes banking deregulation.

"The U.S. is the most important market in the world and the U.S. dollar is a major world currency," said Cartellieri. "Leading international banks must be here."

SCHEDULE 14D1

SEC - AMENDMENT NUMBER: NONE

ANNOUNCEMENT:

Bradmar has commenced an offer to exchange shares of its common stock for

all of Petroleum Investments' (TICKER: PIL) outstanding depositary units at a rate of one common share for each ten units and for each $5.00 of exchange value assigned to the partnership interests of nine affiliated oil and gas drilling programs.

The exchange is part of a consolidation and liquidation plan through which Bradmar will acquire Petroleum Investments and the programs.

The offer is conditional upon the receipt of 8,382,641 units and the listing of Bradmar's stock on the AMEX.

The offer is set to expire on July 13, 1990.

Petroleum Investments has decided not to make a quarterly distribution during the offering period.

Petroleum' general partner is The Egolf Co. which is controlled by Brian and William Egolf, both executive officers and directors of Petroleum.

#90164c0385 06/13/1990 ~Comtex
STAMFORD, CT (JUNE 14) COMTEX - The Securities and Exchange Commission has initiated an informal inquiry into the financial disclosures concerning Great Western Financial Corp., the ailing Beverly Hills thrift.

The SEC notified Great Western June 8 that it will be requesting documents relating to the company's 1989 consolidated financial statements.

The commission said it has questions about Great Western's previously announced addition to loan loss reserves and a writedown recorded in the fourth quarter of 1989, according to an SEC filing.

Great Western said it believes its 1989 financial statements fairly represent its financial position and that its provision and writedown were properly recorded.

This 8-k Filing was submitted to the Securities and Exchange Commission on JUNE 13, 1990

HAMBURG (JUNE 13) - Trade representatives from the six industrial Southeast Asian democracies ended three days of talks with officials of the European Community here Wednesday with a call for increased European business investment in Southeast Asia.

The 40 delegates from Brunei, Malaysia, Indonesia, Philippines, Singapore and Thailand - grouped in the Association of South East Asian Nations (Asean) - urged Europeans to match their Japanese and American business counterparts in investing in what they termed a major growth opportunity.

''Let's look at Asean (the) as a profit centre,'' said Ngian Yet Chong, leader of the Asean delegation at the outset. Ngian Yet Chong said investments from E.C. countries in South East Asia were far behind those of Japan and the U.S.

E.C. representatives countered with calls for the six Asean nations to lower trade barriers. Juan Prat, director of the E.C. Commission's North-South Department, described the private sector as a key factor to intensify economic relations with the Asean countries.

The three-day conference meets every two years and was held in West Germany for the first time.

ALGIERS (JUNE 13) - The Islamic Salvation Front, surprise winner in Algerian local elections Tuesday, was set to win a comfortable majority of around 55 percent, well-informed sources in Algiers said Wednesday.

This backed earlier claims by the Front on Wednesday that it had won "more than 50 percent" of the vote.

The source said the ruling National Liberation Front won 30 to 35 percent backing, while the Rally for Culture and Democracy won 10 percent.

Some 60 percent of the electorate voted, another source said, abstentions due in part to a boycott ordered by the Socialist Forces' Front, which feared rigging by the FLN, and the Movement for Democracy.

Some of the abstainers went to the beach or fished instead, while others did not have polling cards or had not registered, the source suggested.

The Socialist Vanguard party, erstwhile Communist party formed pre-World War, made little impact at the polls.

HARARE (JUNE 13) - The Defence Ministry announced Wednesday that eight soldiers were killed when a Zimbabwe Air Force helicopter crashed Tuesday, the official Ziana news agency reported.

The agency had earlier reported that five people died and a number of soldiers on the ground were injured when the helicopter crash-landed at the Sanyati training camp in the west of the country.

A Defence Ministry spokesman gave no details of the cause of the crash.

MONROVIA (JUNE 13) - The second peace march in a week is expected to take place here Thursday under the auspicies of the Liberia Council of Churches (LCC), an announcement by the LCC said Wednesday.

"All those who want to see an end to the wanton killings and the conflict in Liberia should come out on Thursday for a peace march", the announcement said. It said the march would begin Thursday morning at the United methodist church through the major streets of Monrovia.

The national Moslem Council of Liberia is expected to join the LCC for the march. Last Monday a Christian group calling itself the United Christians for Peace organized a peace march through the principal streets of Monrovia under police escort.

The march was followed by a prayer service at the Providence Baptist church during which the LCC called on government troops and rebel forces fight to unseat President Doe to stop the wanton killing and begin peace talks to end the war.

Meanwhile, the oppostion Unity Party Wednesday condemned the brutal killing of the mayor of Clay-Ashland, R. Vanjah Richards and three others last monday by armed soldiers.

The party said the continuing murders of innocent and unarmed citizens by those "who should be protecting the citizenry is a clear manifestation of the government's inability to protect the citizens."

In a statement issued here Wednesday, the party said "the total breakdown of law and order is evident" in Liberia, and called on Liberians "who are still alive to rally to their own protection and safety" because "the next victims may be any group of citizens".

BRUSSELS (JUNE 13) - European vacationers will find it easier to claim compensation when their "dream holiday" turns into a nightmare of flight cancellations, hotel overbooking and brochure promises that are unfulfilled.

Under a law agreed Wednesday by European Economic Community ministers, holidaymakers will be entitled to claim redress directly from their tour operator, rather than from the airline or hotelier.

Travel firms will be able to set limits on the reimbursement, provided the ceilings are "reasonable," the ministers decided.

They also agreed that travel companies should set aside financial reserves to enable customers to be repaid or repatriated in the event of bankruptcy.

The law must enter the statute books of the 12 EEC members by January 1 1993, in time for the Community's great single market.

-30- 1026

#90164d0120 06/13/1990 ~French/German News Agency

STRASBOURG, FRANCE (JUNE 13) - The European Economic Community should give Colombia, Peru and Bolivia duty-free access to the EEC market to help wean their economies away from coca production, the European Commission proposed Wednesday.

It suggested that the farm produce and industrialised goods from the three South American countries escape EEC customs duties for four years, in "an exceptional case" that could not be extended to other countries.

Coca, the base substance for cocaine, is grown by thousands of Andean farmers, under pressure from drugs barons but also enticed by prices that outstrip the return on traditional cash crops such as coffee, tobacco and cut flowers.

The Commission's proposals must be approved by the Council of Ministers, and submitted to the European Parliament for its view, before becoming law.

In a parallel step, the Commission suggested allocating 60 million European Currency Units (ECUs) (72 million dollars) in aid to Colombia over the next four years to help economic diversification.

The EEC's current aid to Colombia is only two million ECUs (2.4 million dollars) per year.

The help is in response to an international appeal for 1.18 billion dollars in aid, launched by Colombia in April.

AREQUIPA, PERU (JUNE 13) - Rumblings within the Sabancaya volcano indicate an eruption is imminent, National Civil Defense chief Jorge Ferreyros said Wednesday.

The volcano, 900 kilometers (558 miles) south of Lima, was "very active and

we are awaiting an eruption at any minute," Mr. Ferreyros said.

Civil defense staff who surveyed the volcano by helicopter Tuesday reported that many of the houses in the area had been abandoned and were covered by a layer of volcanic ash, he said.

Two weeks ago the volcano began emitting smoke and belching ashes. A series of internal explosions triggered small tremors that frightened local residents.

More than 300 families living within 10 kilometers (six miles) of the volcano have left the area on foot, accompanied by their animals, according to reports Tuesday in the neighboring district of Chivay.

#90164d0330 06/13/1990 ~French/German News Agency

HARARE (JUNE 13) - Several thousand Zimbabwe teachers who defied an ultimatum to end their strike and go back to work by Friday last week have been sacked, the government announced Wednesday.

A statement issued by the Ministry of the Public Service said that the strikers, whose action closed most schools in the country for over two weeks, were being dismissed under terms of State of Emergency regulations invoked last week. The regulations classified teachers as ''essential services'' with no right to strike action.

It said those who had returned to work by friday would also be regarded as ''dismissed'' but would be allowed to reapply. Anyone who was not back by then could regard their services as ''dispensed with,'' the statement said.

The government did not say how many teachers were affected, but demonstrations in the country's major centres on Friday and Monday this week each featured over a thousand teachers, demanding a 33 per cent pay increase.

The government laid down its ultimatum on Tuesday last week, giving teachers until Wednesday to start work.

The wave of strikes, which iuncluded not only treachers but also several other smaller government departments, appeared to have fizzled out early this week. Last week police teargassed and baton-charged demonstrating teachers after President Robert Mugabe promised ''stern action.''

The expected shortage of teachers created by the dismissals is believed to be likely to be avoided by government moves to call on unemployed teachers who queued in their thousands to take over the jobs of their sacked colleagues.

#90164d0390 06/13/1990 ~French/German News Agency
HARARE (JUNE 13) - The first prospect in 15 years of direct formal negotiations between the Mozambique government and Renamo, the guerrilla movement opposing it, collapsed Wednesday in Malawi.

A statement issued Wednesday night jointly by the governments of Mozambique, Zimbabwe and Malawi - the latter negotiators for Mozambique in the dispute - in the southern Malawian city of Blantyre said it ''was not possible to initiate the process of direct talks'' because of ''difficulties experienced by the Renamo and Kenyan delegations.''

The kenyan government of President Daniel arap Moi, which has long been an ally of Renamo, is the movement's intermediary.

The statement did not elaborate on the ''difficulties'' with Kenya and Renamo. But earlier Wednesday Kenyan Foreign Ministry Permanent Secretary Bethwell Kiplagat told the German Press Agency dpa from his Nairobi office that ''informal talks'' in Blantyre were at odds over the choice of venue.

The Mozambique peace process began late 1988, when a group of Mozambican churchman established contact with Renamo - itself formed by Rhodesian security agents as a covert operation in 1975 - to negotiate for peace by proxy. In December last year Renamo leader Afonso Dhlakama announced he would meet face to face with a Mozambique government delegation.

Last month, according to independent Malawian and Mozambique sources, Dhalkama told intermediaries he would be happy for talks to take place in Malawi.

NAPLES (JUNE 13) - Argentina shrugged off the loss of goalkeeper Nery Pumpido, carried off with a suspected broken leg, to earn a 1-0 lead over the Soviet Union in their World Cup match here Wednesday.

Pedro Troglio, rose between two Soviet defenders, to head in Julio Olarticoechea's cross in the 27th minute.

Both men were among the five changes manager Carlos Bilardo made after the shock 1-0 defeat to Cameroon last Friday.

Pumpido was replaced by Sergio Goycoechea after 10 minutes when he dived at the feet of Oleg Protasov and was kicked on the shin bone.

The Soviets appealed for a penalty for hands at the corner immediately following that incident when Oleg Kuznetsov's shot at the near post bounced off an Argentine defender's chest.

Igor Dobrovolski and Alexander Zavarov both forced Argentina's substitue goalkeeper into fine saves at the end of a scrappy first 45 minutes.

Swedish referee Erik Frederiksson was the most prominent man on the pitch as he was forced to award a seemingly endless series of free-kicks for trips,
 shoves and holding.

Diego Maradona was kept in the shadows by the Soviet defence.

Soviet manager Valery Lobanovski had changed four men after the 2-0 defeat to Romania. Dropped for the first time was goalkeeper Rinat Dassaev. He was replaced by Alexander Uvarov.

Argentina: Pumpido, Basualdo, Monzon, Simon, Serrizuela, Olarticoechea, Batista, Burruchaga, Troglio, Caniggia, Maradona

USSR: Uvarov, Bessonov, Kouznetzov, Khidiatouline, Gorloukovitch, Aleinikov,
 Chalimov, Zygmantovitch, Zavarov, Dobrovolski, Protassov

Referee: Eric Fredriksson (Sweden)

WASHINGTON (JUNE 13) - The World Bank will discuss Thursday a possible 150-million-dollar loan to China for an agricultural project, bank officials said Wednesday.

The loan, which would be the fifth granted to China by the World Bank since the beginning of the year, would bring the total amount of World Bank loans to China so far during 1989-1990 to 590 million dollars.

But this still far below the 1.3 billion dollars the bank loaned to China in 1988-1989, although this figure includes 780 million dollars blocked following the military crackdown on pro-democracy demonstrators on June 3-4, 1989.

The United States also imposed economic sanctions following the military crackdown but the World Bank resumed loans to China early this year after the United States struck an agreement to sell oil to China.

The World Bank has said it would extend loans to China for humanitarian

purposes, for reconstruction following a natural disaster and for education. Loans have also been granted for infrastructure projects.

The bank also granted China 300 million dollars for a reforestation project on May 30, days before the first anniversary of the bloody military crackdown on pro-democracy demonstrators at Tiananmen Square.

The resumption of loans to China has drawn fire from some U.S. lawmakers.

MOSCOW (JUNE 13) - Yegor Ligachev, the leading hard-line conservative in the Soviet Communist Party, spoke out Wednesday against "concessions being made one after another" in the country, the Moscow Radio publication Interfax reported.

"We are going through a very dangerous period," said Mr. Ligachev, a member of the party politburo, in a closing speech to the founding congress of the Soviet farmers' union.

Mr. Ligachev is chairman of the Soviet central committee's commission on agriculture.

"Our party and the state are being threatened and the Soviet federation is in tatters," said Mr. Ligachev. "One concession is being made after the other. If we continue on like this, we are going to lose everything."

Mr. Ligachev, who declined the post of chairman of the farmer's union offered by delegates to the congress, stressed that his life "has not always been easy."

"I have found myself at the centre of a bitter political power struggle, and there has been a series of attacks on me," he said.

"I am convinced that I have adopted an honest position, however, and I intend to hold firm. I have never abandoned my principles."

Mr. Ligachev said he would speak his mind at a Russian party conference and the upcoming Soviet Communist Party's 28th congress.

NAPLES (JUNE 13) - Argentina revived their World Cup hopes by beating the Soviet Union 2-0 here on Wednesday despite losing goalkeeper Nery Pumpido after only 10 minutes with a broken right leg.

Pedro Troglio rose between two Soviet defenders to head in Julio Olarticoechea's cross in the 27th minute and Jorge Burruchaga rammed in the second 10 minutes from time when Soviet defender Oleg Kuznetsov knocked the ball into his path after Troglio lost possession.

Both Troglio and Olarticoechea were among the five changes manager Carlos Bilardo made after the shock 1-0 defeat to Cameroon last Friday.

Pumpido was carried off after Olarticoechea accidently kicked him on the leg when he dived at the feet of Oleg Protasov.

Defeat virtually means the Soviets, who made three (rpt three) changes after losing their opening match 2-0 to Romania, are out of the Cup.

ISLAMABAD (JUNE 14) - At least 12 Pakistani pilgrims were killed and 19 injured when a trailer ploughed into their bus in Saudi Arabia Tuesday, the religious affairs ministry said here Wednesday.

More than 50,000 Pakistanis have gone to Saudi Arabia's holy cities of Mecca and Medina for the annual Hajj pilgrimage.

The ministry said a group of 44 Pakistani pilgrims were returning to Mecca when a trailer dashed into their bus from the rear near Rabigh, about 200 kilometers (125 miles) from Medina.

It quoted reports from Saudi Arabia as saying 12 people died instantly while 19 were seriously injured and admitted to the hoispital.

JOHANNESBURG (JUNE 13) - Striking mixed-race teachers agreed Wednesday to go back to work when the new term starts on July 10, teachers' leaders said.

Representatives of 2,000 teachers from the area around here, some of whom went on strike five weeks ago, met at Johannesburg's mixed race township Eldorado Park to report that their colleagues were ready to return, following talks here Wednesday with a senior education official.

Around 120 teachers had begun a sit-in Tuesday at the offices of Transvaal's chief education inspector Johnny Francis.

Strikers wanted their salaries paid on time, extra textbooks and equipment and an end to sexual discrimination.

Leaders did not reveal what agreement they had reached with the segregated education department run by the mixed-race House of Representatives, but said a mass march to the offices of the House here would go ahead Thursday.

#90164d1490 06/13/1990 ~French/German News Agency

SAN SALVADOR (JUNE 13) - Urban guerrillas attacked army positions in the capital Wednesday while battles in eastern El Salvador left 11 dead and two wounded, sources said.

Rebels from the Farabundo Marti National Liberation Front (FMLN) claimed in a telephone call to a local radio station that they had destroyed an army tank in the southern suburb of Dolores.

The army denied that claim, said three soldiers had been wounded in the rebel attack.

The army statement also said 10 rebels and one soldier died in heavy battles near the town of Jocoaitique in the eastern department of Morazan.

Rebels also damaged a U.S.-made UH-1H helicopter, the army said.

Meanwhile Wednesday, rebels accused the rightist government of protecting the military officers accused of killing six Jesuit priests and two lay church workers last November.

The FMLN said in a statement that Salvadoran President Alfredo Cristiani and his National Republican (ARENA) party "are accomplices in the crimes committed by the army high command."

Four army officers -- including former military school director Colonel Alfredo Benavides -- and four enlisted men have been held in connection with the November 16 slayings.

"The main obstacle to peace and restoration of democracy in El Salvador consists of the armed forces," the FMLN statement said.

"And that is why the FMLN reiterates its complete determination to fight to achieve the purification, reduction, restructuring and subordination of the military state to a civil power freely elected by the people," the FMLN said.

The murders came at the height of a rebel offensive and were carried out by some 30 men wearing military uniforms, according to witnesses.

#90164d1540 06/13/1990 ~French/German News Agency
WASHINGTON (JUNE 13) - The International Monetary Fund (IMF) announced Wednesday a grant of 33.6 million dollars in standby credit to Madagascar.

The funds will come as the island nation off the east coast of Africa moves into its second year of restructuring its economy.

The country has worked to reduce its debts and curb inflation while keeping the country's gross national product growing at 4.5 per cent, the IMF said.

The IMF will make 16.8 million dollars immediately available to Madagascar, which has already received 141.2 million dollars in IMF funding.

#90164d5440 06/13/1990 ~French/German News Agency
PORT OF SPAIN (JUNE 13) - The oil-producing Caribbean state of Trinidad and Tobago is considering applying again for membership in the Organization of Petroleum Exporting Countries (OPEC), a newspaper reported Tuesday.

The Guardian quoted sources as saying an application might be made in the next few months.

Energy Minister Herbert Atwell could not be reached for comment.

In 1965, the twin-island state was admitted to OPEC, but it did not take up membership. At the time, a reduced membership fee was arranged for the country because of its relatively low level of oil production.

Last year it produced 49,731,000 barrels of oil.

Five companies operate in Trinidad, two of which are state-owned. The average daily production of the five is estimated at 152,000 barrels of oil, with the U.S. firm Amoco leading the pack at 78,000 barrels a day.

More than 90 percent of government revenues are obtained from taxes imposed on the five companies.

#90164d5640 06/13/1990 ~French/German News Agency
TOKYO (JUNE 13) - Hitachi Ltd., Japan's top computer maker, said Wednesday it would develop, manufacture and market RISC microprocessor chips jointly with the U.S. computer maker Hewlett-Packard Co.

The planned development of RISC (reduced instruction set computing)

microprocessor chips is based on Hewlett-Packard's Precision Architecture RISC (PA-RISC) technology, it said.

The new higher-speed RISC chip will be used in computer systems produced by both companies.

The tie-up is aimed to make PA-RISC commercialy available for the first time, with a product line ranging from several MIPS (million instructions per second) to 100 or more MIPS.

Hewlett-Packard's PA-RISC technology, which has proven successful for workstations and multiuser systems, also has powerful instructions for embedded-controller applications, Hitachi officials said.

#90164d5770 06/13/1990 ~French/German News Agency

MANILA (JUNE 13) - State-controlled Philippines Airlines (PAL) is considering taking on a foreign airline as a partner in its privatization, a spokesman for the airline said here Wednesday.

The partner would be allowed to own part of the 35 percent of PAL shares to be sold to a foreign consortium under a privatization study prepared by the International Finance Corp., PAL spokesman Rolando Estabillo said.

"Many airlines are interested to be our partner," he said, but declined to name any of them.

He said PAL is also considering selling off some of its aircraft and spare parts to cut down its 650 million dollar debt.

The Philippine government, under pressure to privatize assets because of a mounting budget deficit, is planning to sell off 51 percent of PAL to local and foreign investors.

The Government Service Insurance System (GSIS), a pension and welfare fund, currently owns more than 95 percent of PAL.

Manila newspapers quoted GSIS chairman Feliciano Belmonte as saying that PAL should be worth at least 300 million dollars once its debts are settled.

Part of the debts are to be written off through a debt-to-equity program, under which investors would buy back debt papers abroad at a discount and convert them to equity in Philippine firms at full face value.

#90164d6090 06/13/1990 ~French/German News Agency

HAVANA (JUNE 13) - Cuba is preparing to carry out all its foreign trade transactions in U.S. dollars rather than non-convertible currencies, as is currently the case with more than 85 per cent of its foreign trade, East European sources in Havana said.

Recent meetings held separately between Cuba and the Soviet Union, Romania and Czechoslovakia have persuaded trade officials from the East European countries that Cuba has now assessed the consequences of the break-up of the socialist community.

Secrets that have been closely held for 30 years are circulating in Havana diplomatic circles, revealing the size of Cuba's debt to East bloc nations and the favorable terms that in the past have characterized its trade with the East.

Cuba, for instance, currently sells sugar to the Soviet Union for 850 rubles a tonne (1,400 dollars) and to East European countries for between 450 to 470 rubles a ton. The price per ton on the world market is between 250 and 300 dollars.

Its Eastern European trading partners also have granted Cuba favorable credit terms - 10 to 20 years with interest rates of between two and five per cent.

The size of Cuba's ruble debt to Eastern Europe - never published before - has been also been disclosed - more than 900 million rubles (1.5 billion dollars). That includes a 460 million ruble debt with Czechoslovakia, 300 million rubles with Bulgaria, 170 million rubles with Hungary. Cuba's debt with East Germany is two billion East German marks (1.2 billion dollars).

Those debts are in addition to the 15 billion rubles Cuba owes the Soviet Union or its 6.5 billion dollars debt to the West. These figures do not take into account Cuba's commercial debt which with Bulgaria, for instance amounts to another 100 million rubles.

According to the East European sources, the question of setting prices and commercial payments in convertible currencies was at the focus of

conversations held last week here by Soviet International Economic Relations Minister Konstantin Katushev, who has begun negotiations on a new Soviet-Cuban economic agreement for 1991-1995.

No other East European country has renewed trade agreements due to expire at the end of the year. Only East European participation in large scale industrial projects, such as nickel mines, will continue as before.

#90164d6480 06/13/1990 ~French/German News Agency

LONDON (JUNE 13) - Cable and Wireless, the British electronics group with a 58.5 percent stake in Hong Kong Telecom, announced a 25 percent annual pre-tax profits increase here Tuesday, at the top end of market expectations.

Pre-tax profit for the year to end March 1990 was 527 million pounds, (898 million dollars), up from 420 million (716 million).

The profits upturn was derived from a 51 percent increase in annual turnover to 2.32 billion pounds (3.96 billion dollars).

Earnings per share increased from 27.9 pence to 31.3 pence, and final dividend was 6.9 pence making 10 pence for the year, up from 7.98 pence the previous year.

Cable and Wireless derived 72 percent of its improved pre-tax profit from its operations in the Asia Pacific region, up from 67 percent the previous year.

The company's Mercury telephone network, set up in Britain to compete with the privatised monopoly British Telecom, contributed 18 million pounds (31 million dollars) to pre-tax profit, a 172 percent improvement on the previous year.

Profit attributable to shareholders jumped 97 percent to 815 million pounds (1.39 billion dollars) thanks to an exceptional 487 million (830 million) receipt from the sale of Hong Hong Telecom shares to the Chinese government's investment arm CITIC Hong Kong (Holding) Ltd.

Simultaneously with the profits statement, Cable announced the appointment of former Trade and Industry Secretary Lord Young as its new Executive Chairman from October.

Lord Young, who resigned from the British Cabinet last year, chose Cable from a number of bidders for one of the government's licences to operate personal communications networks, the new generation of mobile telephones.

TOKYO (JUNE 13) - Japan's Nippon Life Insurance Co., the world's largest insurance firm, has agreed to acquire a 300 million dollar stake in American Express Co., a company spokesman said here Wednesday.

The acquisition, part of an offering of 27 million shares in July worth 825 million dollars at current market prices, is likely to make Nippon Life the company's biggest shareholder with about 2.2 percent of its capital, he said.

The spokesman said the purchase was a "pure investment decision" aimed at strengthening the ties Nippon Life already has with American Express and its troubled securities subsidiary, Shearson Lehman Hutton Inc.

Nippon Life acquired more than 10 percent of Shearson's preferred stock in 1987, and already holds about 100,000 shares in American Express.

The Japanese firm is expected to hold about 10.1 million shares upon the completion of the new offering, which is subject to regulatory approval, the spokesman said.

#90164d6680 06/13/1990 ~French/German News Agency
MOSCOW (JUNE 13) - The Soviet Government should go back to the drawing board and produce a more detailed version of its plan for economic reform, a parliamentary commission said here Wednesday.

The commission on economic reform, headed by Alexei Boiko, suggested that the government submit detailed proposals on transition to a market economy

by August 20 for parliamentary debate in early September.

In the meantime, President Mikhail Gorbachev should use his presidential powers, from July 1, to speed up implementation of legislation not yet adopted by parliament, including that on property, on banking activity and on insurance. This would facilitate the transition to a market economy.

Prime Minister Nikolai Ryzkhov had earlier called for introduction of the new reforms, which will entail drastic price increases, as of next January.

They have evoked widespread criticism and disagreements within the Soviet leadership since Mr. Ryzkhov unveiled the package last month, and a parliamentary decision on the issue has been postponed.

Mr. Ryzkhov told journalists after Mr. Boiko's comments on Wednesday however that he remained hopeful his economic reform package would be accepted by parliament.

Asked about rumours that he might resign, Mr. Ryzkhov responded "it's not a question of who works on this programme. I'm convinced this is the road we have to take whether it's Ryzkhov's government or another government."

"The people have started to realise we can't continue down a blind alley," he added.

Addressing parliament, Mr. Boiko suggested that a proposal to hold a referendum on transition to a market economy should be dumped and replaced by "discussions" at local assembly levels.

LISBON (JUNE 13) - Angola needs international aid for 2.6 million drought victims in southern and central regions where 400 people, 200 of them children, have died in the past four years, the state news agency ANGOP reported.

It said the appeal was made late Tuesday by the foreign ministry in Luanda.

The absence of rain has killed off 62, 000 head of livestock and caused the loss of 60 per cent of crops, including the whole of the harvests of the basic foodstuffs maize and sorghum.

The U.N. Food and Agriculture Organisation estimates Angola's needs at 200,000 tonnes of food aid, but only 29,000 tonnnes were delivered last month, the ministry said.

-30- 842
#90164d7040 06/13/1990 ~French/German News Agency
LONDON (JUNE 13) - The government said Wednesday that Britain's current balance of payments deficit for the first quarter of this year and the whole of 1989 was lower than previously announced, due to amendments in the invisibles balance.

The deficit for the first quarter of this year on a seasonally-adjusted basis was 4.74 billion pounds (7.9 billion dollars), against an earlier provisional estimate of 5.59 billion (9.3 billion dollars).

The Central Statistical Office also revised downwards its earlier estimate for the deficit in the final quarter of 1989, from 5.09 billion pounds (8.4 billion dollars) to 4.2 billion (seven billion dollars).

This gave a total current balance of payments deficit for last year of 19.1 billion pounds (31.8 billion dollars) against a previous estimate of 20.9 billion (34.8 billion dollars).

The increase in the deficit in the first quarter of this year over the last quarter of 1989 was due to an increase in the trade deficit from 4.38 billion pounds to 5.47 billion.

The Central Statistical Office said that the revisions were due to changes in the invisibles balance figures, which showed a 183 million pound surplus in the fourth quarter of last year against an earlier estimate of a 713 million pound deficit.

The invisibles balance showed a 728 million pound surplus in the first quarter of this year.

FRANKFURT, WEST GERMANY (JUNE 13) - The Bundesbank governing body decided at its regular fortnightly meeting on Wednesday not to modify its monetary policy, a spokesman for the West German central bank said.

The discount rate remains at six percent and the Lombard rate at eight percent, their levels since early October.

#90164d7310 06/13/1990 ~French/German News Agency
SYDNEY (JUNE 13) - Australian Ratings on Wednesday downgraded Westpac Banking Corp.'s medium-term credit rating due to its mounting bad debts and exposure to the country's struggling or failed entrepreneurs.

Australian Ratings, a subsidiary of Standard and Poor's Corp. of the United States, said in a report that it had trimmed the rating on Westpac, Australia's largest bank, from AA-plus to AA.

Another report out Wednesday showed Australian Ratings had reaffirmed the ratings of National Australia Bank Ltd. (NAB), the country's third largest commercial bank, which now has higher endorsement than Westpac.

Vern Harvey, Westpac's general manager strategic planning, said the bank still had the third highest rating out of 22 possible rankings.

Australian Ratings said: "Westpac had experienced a deterioration in asset quality with non-performing loans and bad and doubtful debts both rising significantly.

"Compared with its peers, Westpac has larger exposures to the commercial real estateproperty sector in Australia ... and to troubled Australian entrepreneurial and property companies."

Squeezed interest rate margins and the higher level of non-performing loans resulted in Westpac's profit slumping 59 per cent to 156 million Australian dollars (120 million U.S.) for the six months to March 31, it said.

"The expected continuation of these conditions will restrain Westpac's earnings performance in the short term," it said.

Westpac's Mr. Harvey said the credit downgrading was not unexpected.

"We get rated by five credit agencies around the world, and Australian Ratings was the last one to make a (downward) adjustment to the rating," he said, adding: "It's still a very high rating."

"What they do with the National Australia Bank is entirely up to them," he said.

NAB now has a higher medium term rating than Westpac after Australian Ratings reaffirmed its AA-plus status despite an adverse economic climate here and the high goodwill the NAB paid for Yorkshire Bank earlier this year.

HANOI (JUNE 13) - Australia's Industry, Technology and Commerce Minister John Button arrived here Wednesday on a week-long mission aimed at boosting bilateral trade, officials said.

Mr. Button and a delegation of 17 Australian businessmen and officials met

with Vietnam's Commerce Minister Hoang Minh Thang shortly after their arrival from Thailand.

Officials said that trade and investment agreements were likely to be signed during the visit. They did not elaborate.

Mr. Button, who will hold talks with several ministers including Mr. Thang before leaving here for the southern commercial centre of Ho Chi Minh City on Saturday, said his team included some of the biggest companies in Australia and represented a wide variety of interests.

The senator said there was "a sense of enthusiasm and excitement about this visit" among the Australian delegation, which is scheduled to leave Vietnam for Japan on Tuesday.

The two ministers noted that trade and investment ties between the two countries had been growing in recent years.

BRUSSELS (JUNE 13) - Unemployment in the European Economic Community (EEC) averaged 8.5 percent of the workforce in April, after 8.6 percent in March, the official statistics agency Eurostat reported Wednesday.

But it noted that a sharp fall in unemployment, seen in Britain, West Germany, Spain, Portugal and Belgium for the past 18 months, was beginning to slow.

Joblessness was stable in France, but accelerated slightly in the Netherlands and Ireland, it said.

Ireland and Spain have the highest unemployment rates in the Community, with 16.4 percent and 15.9 percent of the workforce on the dole, Eurostat said. The figures for Greece were not available.

On Monday, the EEC's executive Commission predicted that continuing growth in the Community would bring the overall rate down to 8.3 percent by the end of 1991.

NAIROBI (JUNE 13) - Kenya is to receive from Sweden a grant of 1.14 billion Kenyan shillings (49.09 million U.S. dollars) to finance various development projects under agreements signed here Tuesday, the official Kenya News Agency (KNA) said.

The grants would help finance national soil conservation, rural water supply, health sector support and access roads programmes, KNA said.

The new assistance brings total Swedish aid to Kenya since the two countries signed their first development cooperation agreement to more than seven billion shillings (301.46 million dollars), KNA said.

WEST BERLIN (JUNE 13) - Axel Springer Ag, West Germany's largest newspaper publisher, Wednesday announced its turnover in 1989 went up 5.8 percent to three billion marks (1.7 billion dollars), in comparison with the previous year.

Executive board member Claus Leisner said turnover during the first five months of this year rose 14 percent, compared with the same preriod in 1989.

Springer invested a record 394 million marks last year, 190 million more than the year before, he noted.

Profits last year were 92 million marks, slightly above the year before. Shareholders would receive for the second year in a row a 24 percent dividend,
Leisner said.

The head of Springer's executive bord, Peter Tamm, said his publishing house plans to enter the East German market. A businesman who does not grasp this chance ''should close his firm'', he added.

BERLIN (JUNE 13) - It is a sleepy villa surrounded by birch trees in an affluent suburb of West Berlin - but the small team working there is preparing for one of the most daring economic experiments ever attempted: the overnight merger of two totally different economic systems.

With just over two weeks to go to monetary union between East and West Germany and the introduction throughout the east of the Deutsche mark, the West German Bundesbank is apparently playing it cool.

The staff at Vogelsgang ("birdsong street") number nine consists of only four bank staff members, plus a driver.

"We've decentralised quite a lot," said Hans-Juergen Siegmund, the number-two employee at the villa.

The bank official explained that the key task when the monetary union treaty comes into force on July 1 will be to supply the cash and banknotes needed to exchange against East Germans' Ostmarks, which will cease to be legal tender.

"We don't foresee any major problems," Mr. Siegmund said calmly.

The Bundesbank, which under the treaty will take over responsibility for monetary affairs throughout East Germany, has set up branches in all 15 of the country's regional administrative capitals.

And each of the 11 regional banks which make up the bank in West Germany have been given responsibility for one or two of the East German branches.

The Hamburg central bank of which Mr. Siegmund is an employee, for example, will be in charge of supplying the new currency to the northern East German city of Rostock.

Last week banks and post-offices throughout East Germany started handing out the forms that citizens will have to fill in to change their money. To avoid problems with speculators, only money on bank accounts, and not cash will be changed.

Each East German will have the right to change up to 4,000 Ostmarks (2,400 dollars) against an equal number of Deutsche marks, although those over 60 will be able to change 6,000 Ostmarks.

#90164d8060 06/13/1990 ~French/German News Agency

CANNES, France (JUNE 13) - Satellite launches by the troubled Ariane space rocket are to be resumed in July leading to the launch of five Eutelsat-2 satellites providing services to East and West Europe, and parts of North Africa and the Middle East.

"There is enormous demand for telecommunications services for the whole of Europe whether for telephone or direct television," the director general of the European Organisation for Telecommunications by Satellite (Eutelsat) Jean Grenier said here.

Speaking on Tuesday, he added: "Eutelsat must spread itself even more broadly towards East Europe. That is why a sixth satellite could be ordered this autumn and two others could follow."

The French-led Ariane rocket experienced an unsuccessful launch on February 22. Subsequently some French press reports suggested that this, and earlier failures, might have been due to sabotage.

Mr. Grenier said that launches were due to be resumed during the last 10 days of July when a second French direct television satellite TDF-2, and a second West German telecommunications satellite DFS-2 Kopernicus, would be put into orbit.

The first of the Eutelsat-2 satellites, which were three times more powerful than their predecessors, was due to be launched on August 21 with a British military satellite Skynet-4C.

A second Eutelsat-2 satellite was due to go into orbit in January 1991. Successive satellite would be delivered every six months so that they would all be operational by the end of 1992.

Each of the satellites would have a life of eight to 10 years, and contained 16 channels enabling it to broadcast simultaneously up to 16 television channels or 17,000 telephone communications.

Mr. Grenier said that the satellits might be made available to some national television services. "Spain, Turkey, and Scandinavia have asked questions about this," he said.

The Europesat project, which was being studied at the request of 10 countries, was also intended to meet this demand. It would provide a series of spotlight services permitting television programmes to be transmitted according to language zones.

It should also permit the broadcasting of high definition television "which is part of its justification", Mr. Grenier said.

Eutelsat has 28 member countries.

#90164d8210 06/13/1990 ~French/German News Agency

PARIS (JUNE 13) - Inflation remained high in April in industrialised countries, with special factors accounting for a jump in British consumer prices and Japan recording a sharp seasonal increase, the OECD said Wednesday.

The monthly survey of the Organization for Economic Cooperation and Development said overall OECD consumer prices rose by 0.6 percent in April after a 0.7 percent increase in March.

Over twelve months, the OECD inflation rate declined slightly to 6.2 per cent compared with the March level of 6.5 percent and the 1989 figure of 6.0 percent.

The annual OECD ministerial meeting, held here two weeks ago, urged the need for member governments to show vigilance on inflation.

The OECD survey showed a sharp deceleration in consumer price rises in North America in April, and a slight acceleration in the European Economic Community (EEC).

The United States recorded a 0.2 percent rise after 0.5 percent in March, and Canada 0.1 percent after 0.3 percent. The U.S. rate over twelve months was reduced to 4.7 percent from 5.2 percent in March, and Canada's to 5.0 per cent from 5.3 percent.

The EEC's monthly increase was 0.9 percent, up from 0.5 percent in March, with its twelve-month gain rising to 5.5 percent from 5.4 percent.

In Japan, the monthly increase doubled to 0.8 percent from 0.4 percent in March, heavily influenced by seasonal factors.

But over twelve months Japan's inflation rate was sharply down, to 2.5 per cent from 3.5 percent in March, as the economy absorbed the impact of the general consumption tax introduced a year earlier.

#90164d8290 06/13/1990 ~French/German News Agency

AMMAN (JUNE 13) - Jordan has called for a meeting of Arab states following the installation of a new Israeli government that has vowed to strengthen its hold over the occupied territories, Foreign Minister Marwan al-Kassem said here Wednesday.

In Tunis, the Arab League warned that the hardline Israeli cabinet under Prime Minister Yitzhak Shamir was "a war cabinet targeting international law and the rights of the Palestinian people."

The Middle East is now confronting a "dark period," it said, stressing that the United States was obliged to re-examine both its "total support" for Israel and its "silence in the face of repeated Israeli violation of international law and... aggression against the Palestinians."

Mr. Kassem said the meeting proposed by Jordan would group officials from Arab countries "directly concerned by Israel's expansionist and aggressive policies."

He did not disclose which states would be invited to attend, but informed sources said representatives would come from Syria, Lebanon, Egypt and Jordan,
each of which borders Israel.

Palestinian representatives would also be asked to take part, they added.

In Dubai the newspaper Al-Bayan, citing Jordanian sources, reported that Egypt, Iraq and Jordan would meet "at the highest level" to consider ways of "reinforcing the Jordanian front against possible Israeli aggression."

Mr. Shamir's new government, dominated by the right-wing Likud bloc but also dependent on extreme-right and religious parties, has triggered deep foreboding in the Arab world.

Mr. Shamir said his cabinet was determined to snuff out a Palestinian uprising in the occupied West Bank and Gaza Strip and to expand Jewish settlements there.

Mr. Kassem on Wednesday told AFP that the avowed policies of the government amounted to a "test of Washington's real interest in the region and a moment of truth in Israeli-U.S. relations."

The United States opposes any expansion in Israeli settlements in the territories. In addition the U.S. administration has been irked by Mr. Shamir's repeated refusal to endorse a plan put forward by U.S. Secretary of State James Baker calling for an Israeli-Palestinian dialogue in Cairo.

#90164d8340 06/13/1990 ~French/German News Agency

LONDON, June 13 (AFP) - A three-day meeting of International Cocoa Organization (ICCO) members ended here Wednesday after routine discussions of internal financial matters.

Until February 1988 the organization used to intervene on the world cocoa market to regulate prices through a system of buffer stock buying, but it now exists only for purposes of statistical research and marketing promotion for the industry, and to oversee the management of the buffer stock it acquired in its market supporting days.

The OrganiZation is faced with the expiry of its London lease in 1991.

Committee chairman Moma Mohammed said the matter of the ICCO's future location would be dealt with in detail at the organization's next meeting in September.

SANTANDER, SPAIN (JUNE 13) - Sultan, one of the world's top five breeding bulls, was back home Wednesday after treatment to repair a ligament torn when he fell over while proving his sexual prowess.

Sultan spent two months at a veterinary clinic in Valencia where he was fitted with a carbon-fibre artificial ligament in the leg and treated with lasers and micro-waves.

The 1.1 ton bull, bought for one million U.S. dollars in Canada by the Cantabria autonomous government to improve local livestock, has been left with a lifelong limp but vets said he was good for reproduction for at leave five more years.

Aged nine, Sultan has already fathered 10,000 calves and 20,000 cows are currently in calf thanks to him. A further 50,000 doses of his sperm have been frozen away for future use.

#90164d8490 06/13/1990 ~French/German News Agency

ABU DHABI (JUNE 13) - Algerian Finance and Economy minister Ghazi Hadousi has urged Arab states to help finance a pipeline to transport Algerian natural gas to Europe.

Mr. Hadousi, in an interview with the United Arab Emirates journal Petroleum and Industry, said he expected world demand for natural gas to exceed that for oil during 1991-1992.

"If problems of finance and tranportation are overcome, gas will have a brighter future because it is more suited to policies in industralised countries to combat oil pollution, preserve the environment and develop gas-based technology," he said.

He said studies were being conducted on extending the pipeline to Europe through Morocco but gave no further details.

Algeria, one of the leading Arab gas producers, is having trouble implementing industrial projects due to a huge external debt of around 24 billion dollars, according to Mr. Hadousi.

He said the problem, aggravated by declines in world oil and gas prices since 1988, would improve with stability in the market.

"Oil price stability at around 18 dollars a barrel would indeed help Algeria overcome its current economic problems and continue development plans," Mr. Hadousi said.

#90164d8530 06/13/1990 ~French/German News Agency

KUALA LUMPUR (JUNE 13) - Malaysia's Red Crescent (Red Cross) Society was

preparing Wednesday to hand over to the U.S. embassy here the apparent remains of U.S. servicemen missing in action in Vietnam, found on a Vietnamese refugee boat.

At the embassy's request, arrangements were under way to transport the skeletons from a refugee camp in Mersing town, 353 kilometres (220 miles) southeast of here, said a Red Crescent official who asked not to be identified.

A U.S. embassy spokeswoman here confirmed that the remains would be turned over to the embassy.

"We do not know how soon this will occur but ... several times a year Vietnamese refugees come in with what they claim to be remains of U.S. servicemen and the U.S. embassy accepts them," she said.

Police said Wednesday that nine Vietnamese boat people, aged between 18 and 56, landed Tuesday on Tanjung Sedili beach south of Mersing with 28 sets of bones in several barrels after their boat began to leak.

The English-language daily New Straits Times said the boat people, who left Vietnam May 30, were en route to Singapore to hand the skeletons to the U.S. embassy there.

The sides of their 16-metre (-yard) craft bore the words "USA Remains In My Boat" and "This Boat Have USA Army Remains," the daily said.

Police said they found metallic tags on the skeletons with the names, unit numbers and addresses of servicemen believed to have died during the Vietnam war.

"We are investigating the reasons for the refugees bringing the skeletons with them ... we have not come across such cases before," district police chief Roslan Dollah was quoted as saying.

Western diplomats here cited earlier cases of Vietnamese boat people arriving in Malaysia with what they claim are the remains of U.S. servicemen, in hope of getting better treatment from the United States.

A representative of either the joint-casualty centre in Bangkok, which oversees the Missing In Action programme, or Defence Department forensic laboratory would come to claim the remains, the U.S. embassy spokewoman said.

PESHAWAR, PAKISTAN (JUNE 13) - Nasrullah Shariatyar, a top field

commander and a close associate of Afghan resistance leader Gulbuddin Hekmatyar was assassinated by unidentified gunmen here Monday, resistance sources said Wednesday.

Mr. Shariatyar was chief of the resistance's operation in northern Kunduz province. Operating from Khanabad district of Kunduz, the guerrilla commander had rendered "meritorious services during the Jihad (holy war)," the Afghan News Agency (ANA) reported.

The agency run by Mr. Hekmatyar's Hezb-i-Islami faction said unknown assassins attacked the guerrilla leader late Monday in front of his Afghan Colony house in this bordering Pakistani city. No arrests were made.

His funeral in suburban Shamshatu was attended by prominent resistance leaders.

Mr. Shariatyar was the fifth important Afghan murdered in Peshawar this month.

NIAMEY (JUNE 13) - Five hundred students demonstrated in the Niger capital Wednesday for the release of 40 classmates held in custody since late last week.

Several hundred riot police ringed the national assembly where the students gathered. There were no incidents and the students moved to a college for a general assembly which decided they would go to the municipal stadium on Thursday to boycott school-leaving exams due to open there then.

The school teachers' trade union is backing the boycott, because the school year had not been completed.

The demonstration coincided with the opening of the annual session of Niger's top ruling body, the council for national orientation. Its 70 members heard President Ali Saibou review the country's dire economic straits and insist on a package of financial cuts.

The measures have been rejected by the trade unions, which staged a widely followed general strike on Monday and Tuesday. They have threatened to repeat the protest next week if the authorities fail to open negotiations by then.

#90164d8580 06/13/1990 ~French/German News Agency

TEHERAN (JUNE 13) - Iran Wednesday hailed the surprise victory of Moslem

fundamentalists in Algeria's local elections, saying the event could speed the development of similar movements elsewhere in north Africa.

Official Teheran Radio said the victory of the Islamic Salvation Front (ISF) in Algeria's first ever multi-party elections Tuesday "could inspire other countries in the region."

"The great force represented by Islamic fundamentalists in Algeria is a key factor in the country's political life ... and this force is spreading to other countries in north Africa," the radio said.

"If the governments of these countries tolerate Islamic movements, these will develop very rapidly, as the field is favorable for them."

The radio called on the ISF, "with further consolidation, to strengthen their determinant role in the next elections, particularly to parliament."

The Algerian government conceded the victory of the ISF late Tuesday.

The group, founded after a popular uprising against economic hardships in October 1988, claimed Wednesday that it had won more than 50 per cent of the vote although final results have still to be published.

#90164d8600 06/13/1990 ~French/German News Agency

MOSCOW (JUNE 13) - Soviet leader Mikhail Gorbachev was forced to call off from a planned meeting Wednesday with Lithuanian Premier Kazimiera Prunskiene because he felt slightly unwell, Mrs. Prunskiene said.

Mrs. Prunskiene along with her deputy Algirdas Brazauskas met with Soviet Prime Minister Nikolai Ryzhkov and the President of the Supreme Soviet Anatoly Lukianov, the Radio Moscow publication Interfax said.

Mr. Gorbachev, had been due to take part in the meeting but he was forced to call off "because he felt slightly unwell", Mrs. Prunskiene said.

Mr. Gorbachev has maintained a punishing schedule in recent weeks including a summit with U.S. President George Bush in Washington and worsening economic and ethnic problems at home.

#90164d8610 06/13/1990 ~French/German News Agency

WASHINGTON (JUNE 13) - The president of Namibia, Sam Nujoma, will meet next Tuesday with President George Bush at the White House, a U.S. official said Wednesday.

This will be the first meeting between the two leaders since Mr. Nujoma became president of the newly independent African nation in March.

Washington opened diplomatic relations with Namibia as soon as it became independent on March 21, when Mr. Bush also announced the lifting of all U.S. sanctions -- imposed against Namibia's former ruler, South Africa -- that affected the new state.

The Nujoma visit will be six days ahead of a visit to the White House by South African black leader Nelson Mandela.

#90164d8620 06/13/1990 ~French/German News Agency

LONDON (JUNE 13) - London sugar prices fell to their lowest level in six months in the daily quote published in London on Wednesday, reflecting overnight falls on the futures market, brokers said.

The daily price for raw sugar stood at 316 dollars a ton, its lowest level since January and down from 333 dollars on Tuesday, while white sugar was down 12 dollars a ton at 411 dollars.

On the futures market, raw sugar was down 1.4 dollars a ton at 284.8 dollars after tumbling 11.6 dollars on Tuesday. White sugar was down 2.5 dollars a ton at 365.5 dollars after losing 11 dollars on Tuesday.

Market sources said that there were rumours that the Soviet Union would buy less Cuban sugar this year because of its shortage of hard currency, raising fears that Cuba, which traditionally sells the bulk of its seven to eight million ton harvest to Moscow, would instead offload it on the free market.

Speculation of increased Polish and Indonesian sales also pulled prices down, while the general mood was still dampened by West German firm F.O. Licht's forecast at the end of May that the world sugar market would show a surplus for 1989-90 after several years of deficit, brokers said.

#90164d8680 06/13/1990 ~French/German News Agency

DAR ES SALAAM (JUNE 13) - Visiting Kenyan Foreign Minister Wilson Ndolo Ayah said Tuesday that multi-party politics was unsuitable for his country and could disrupt peace and development there.

Speaking to newsmen upon his arrival, Mr Ayah said "It will not be possible to have diversified political parties and yet continue to have peace and development," and dubbed advocates of multi-party politics "agents of foreign powers."

Answering a question concerning the mysterious murder in February of his predecessor Robert Ouko, Mr. Ayah said he was optimistic that the culprits would be brought to book.

During the visit, Tanzanian Foreign Minister Ben Mkapa said economic cooperation between East African countries was the only viable solution to the current economic hardship.

He described existing Tanzanian-Kenyan relations on trade, culture, tourism, transport and communications as a source of pride for the two countries and praised Kenya's role in mitigating for peace in war-torn Mozambique.

#90164d8690 06/13/1990 ~French/German News Agency
CAPE TOWN (JUNE 13) - A six-man United Nations fact-finding team has been on the go virtually non-stop since it arrived here on Saturday, U.N. spokesman Michael Moller said Wednesday.

The team had fitted in an enormous number of appointments with members of the government, the African National Congress, political leaders, academics,
clerics and other interested parties, he said.

On Wednesday they held meetings with Planning Minister Hernus Kriel, Manpower Minister Eli Louw, anti-apartheid clerics Allan Boesak and Desmond Tutu as well as a number of academics before flying to the east coast city of Durban for talks with church leaders and a number of organisations there.

Headed by Under Secretary-General Abdulrahim Farah, the U.N. team is on a 10-day sweep through South Africa to gather factual information on recent reforms by President Frederik de Klerk.

#90164d8780 06/13/1990 ~French/German News Agency
JOHANNESBURG (JUNE 13) - Anti-apartheid rivals the ANC and the PAC will carry their differences into Soweto this weekend when they hold opposing rallies to commemorate the June 16, 1976 uprising in the black township.

At separate press conferences Wednesday, the African National Congress (ANC) and the Pan Africanist Congress (PAC), both of which were legalised in February after 30 years, were at pains to stress that they were committed to unity.

But representatives of the two movements privately admitted that Saturday would serve as the first real test of their respective strengths.

The hardline PAC, which split from the ANC in 1959, claims it has made major inroads into the ANC's support because of that organisation's preliminary talks with the white minority government in Cape Town on May 2-4.

The ANC vehemently disputes this. Clashes between the two organisations have seen dozens of people killed in black townships across the country.

In a flare-up on June 1 a 10-month-old-baby, her mother and a grandmother were killed when an armed gang went on the rampage in Vosloorus black township east of here.

On Tuesday the two organisations met to sign a "ceasefire" in Vosloorus and said they planned to enforce it countrywide.

But that the underlying tensions have yet to be resolved was clear from Wednesday's press conferences.

PAC spokesman Themba Hlatshwayo set the tone by claiming that his organisation was the prime mover behind the 1976 uprising, in which thousands of Soweto pupils marched in protest at the use of Afrikaans as a medium of instruction at school.

Police opened fire on the marchers, sparking two weeks of rioting which left 176 people dead.

Mr. Hlatshwayo said "that fateful day" should not be seen as an isolated event but as part of the PAC's "ongoing revolutionary struggle".

But Rapu Molekane, general secretary of the pro-ANC South African Youth Congress, told the media at a subsequent press conference that no one had the right to claim June 16 as "their day".

"June 16 is the day of the South African youth and came about because of the (educational) problems of the time," Mr. Molekane said.

#90164d8860 06/13/1990 ~French/German News Agency

LONDON (JUNE 13) - Penguin Books Ltd. has decided against publishing a paperback edition of Salman Rushdie's "The Satanic Verses" in order to boost chances of a release of British hostages in Lebanon, the Financial Times said Wednesday.

The business daily said the paperback edition was due out later this month

but publication was cancelled after pressure from Britain's Foreign Office.

A Penguin spokesman would not confirm the report, but he stressed that the firm had not relinquished its rights to publish "The Satanic Verses" in paperback and denied the existence of any government pressure on the issue.

Moslem activists have called for Penguin to cancel the mass-market, paperback edition of the book, first published in early 1989 and considered by many in the Moslem world to be blasphemous to Islam.

Mr. Rushdie has lived in hiding under police protection since a February 1989 decree from Iran's late spiritual leader Ayatollah Ruhollah Khomeini urging Moslems to kill the Indian-born British author.

Iran broke off diplomatic relations with Britain the following month after London refused to distance itself from the book.

Both sides have recently expressed their readiness to improve ties, although Iranian leaders last week reaffirmed the death sentence against Mr. Rushdie.

Iranian President Ali Akbar Hashemi Rafsanjani told a press conference on June 6 that relations could be normalised if British Prime Minister Margaret Thatcher condemned "The Satanic Verses."

Three days earlier, Mrs. Thatcher had welcomed what she said was a move by Iran to begin talks on re-establishing diplomatic relations, saying "any olive branch is very significant."

The Sunday Times newspaper reported over the weekend that four British MPs were planning to visit Iran at the invitation of parliament there to try to resolve the stalemate over "The Satanic Verses."

But the parliament in Teheran denied that any such invitations had been issued.

Britain hopes that improved ties with Iran will hasten the release of four British hostages in Lebanon. The four Britons are among 15 Westerners believed held in Lebanon, several of whom are reportedly in the hands of pro-Iranian Shiite factions.

RABAT (JUNE 13) - Morocco, under pressure from international finance institutes to reduce its foreign debt, passed a law here Wednesday which more than halves the budget deficit.

The legislation adopted by the parliament provides for spending cuts which will bring the budget deficit for this year down from 7.0 billion dirham to 3.1 billion (some 350 million U.S. dollars).

The North African country has a total foreign debt of roughly 23 billion dollars.

The spending cuts will mainly affect state investments as well as the education and health sectors. The opposition has protested loudly against these measures.

LONDON (JUNE 13) - Irish Prime Minister Charles Haughey voiced strong backing here Wednesday for British efforts to start talks on the political future of Northern Ireland but said Dublin wanted a full role in the process.

"The Irish government must be fully involved in the discussions" on any "new arrangements which would transcend the Anglo-Irish agreement," Mr. Haughey said.

Dublin was "anxious" for progress toward ending "the same old frustrating stalemate" in the British province, Mr. Haughey said, adding that any political progress would have an "enormous impact" on the situation in Northern Ireland.

Speaking to reporters after holding talks with British Prime Minister Margaret Thatcher, the Irish premier stopped short of denying rumors reported in the British press that Dublin was willing to forego direct involvement in an initial round of talks between the constitutional parties in Northern Ireland.

"There are lots of questions of format to be worked out," he said, adding: "Setbacks have occurred before and it has to be anticipated that they may occur again."

But he praised the "determined and sincere efforts" in the past six months by Northern Ireland Secretary Peter Brooke to break the political deadlock in Northern Ireland, saying Dublin would give "any assistance it can" in the process.

Mr. Haughey declined to say whether the details yet to be worked out were between the British and Irish governments or involved the parties in Northern Ireland, saying only that it was "very much a matter for the secretary of state."

He said he and Mrs. Thatcher had touched on Northern Ireland during their meeting and were both "very satisfied" with the current efforts to bring about talks.

BRASILIA (JUNE 13) - French automaker Peugeot will be the first foreign company to benefit from Brazil's opening up of the domestic auto market, a spokesman for the Economics Ministry said Wednesday.

Currently, the Brazilian automarket is listed as "reserved" with only four firms - Ford, Volkswagen, Chevrolet and Fiat - allowed to sell in the 700,000-vehicle a year market. These four firms, however, must have their vehicles built under license locally.

President Fernando Collor de Mello announced just over a month ago that the Brazilian auto market would be opened to more foreign competition.

Brazilian officials said Peugeot's entry into the Brazilian market would be a three-stage affair over two years.

Initially, Peugeot will be allowed to export its 505 models assembled in Argentina by the Argentine company Sevel, benefitting from an economic cooperation agreement between the two countries.

The second stage will involve Peugeot exporting kits for assembly in Brazil.

Peugeot will, according to Brazilian sources, begin full-scale construction of its 405-model range in Brazil in about two years.

Other foreign automakers to have expressed an interest in takin g advantage of the new liberalization include France's Renault, Japan's Nissan, West Germany's Mercedes and BMW, and General Motors of the United States.

LA PAZ (JUNE 13) - Police arrested three suspects in the kidnapping Monday of Jorge Lonsdale, president of the Bolivian bottling company of Coca Cola, who was still missing, Interior Minister Guillermo Capobianco said Wednesday.

The arrests were made in Oruro, 200 kilometers (125 miles) south of here, Mr. Capobianco told reporters.

Police officials said the suspects were identified from eyewitness descriptions of the four people seen bundling Mr. Lonsale into a car, one block from the Coca Cola plant in La Paz

One of those detained is thought to have driven the getaway car, they said.

Sources close to Mr. Lonsdale's family said they had not received any calls or ransom notes from the kidnappers.

ROME (JUNE 13) - An international agreement is needed to halt the rate of destruction of the world's tropical forests, which has grown from 11.3 million hectares in 1980 to a projected 17 million this year, the U.N. Food and Agriculture Organisation (FAO) said here on Wednesday.

The United Nations body called for the adoption next year of an international agreement to set guidelines for forest preservation in tropical countries, many of which depend heavily on their forestry industries.

Ola Ullsten, the Swedish ambassador to Italy and head of an independent team looking into the forest crisis, told reporters the FAO's Tropical Forest Action Plan must be reinforced with other measures.

"Tropical countries have every right to exploit their forest resources according to their own interests," said Mr. Ullsten, a former Swedish minister. "But they also have a duty as part of the international community to manage their forests so they do not disappear."

A senior U.N. official noted that for many tropical countries such as Brazil, Malaysia and Zaire, the forestry industry is the primary natural resource and essential for their balance of payments.

"Environmentalists should recognise this problem," said the U.N. official.

"Instead of always condemning, they should help come up with ways of assisting these countries better to manage forest-renewal programmes."

Mr. Ullsten cautioned that international forest-protection organisations should make sure they are not viewed as merely the spokesman for wealthy nations. "After all, automobile exhaust is more harmful to the environment than the felling of a tree," he said.

According to U.N. action plan recommendations, the U.N. should encourage joint action by developed countries, non-governmental organisations, and tropical nations to manage forest-protection schemes. Also, the U.N. plan called for the creation of an International Tropical Forest Fund.

BONN (JUNE 13) - Bonn's centre-right coalition government, seeking to out-manoeuvre leftwing Greens, proposed guidelines Wednesday that would make West Germany the first country to reduce carbon dioxide (Co-2) emissions by 25 percent by the year 2005.

The guidelines for a total cut of 217 million tons of emissions from industrial and consumer sources were adopted by Chancellor Helmut Kohl's cabinet after lengthy wrangling between Environment Minister Klaus Toepfer and Economics Minister Helmut Haussmann.

A working panel is to hammer out details of the legislative bill by November, Toepfer told newsmen. He said the bill would make West Germany a model country in seeking to combat the greenhouse effect, in which Co-2 emissions are thought to play a key role.

Opposition Social Democrats dismissed the bill as a sleight of hand trick which would do little to remedy pollution while making the coalition parties look good going into December's general elections. Kohl's Christian Democrats and their Bavarian sister party, the Christian Social Union, have suffered major election setbacks in recent state elections, while the Spd and environmental Greens have held their own or made gains.

Toepfer said reductions would be achieved primarily through conservation of fossil fuels such as petrol, heating oil and brown coal, which is still used widely in German home heating and in power plants.

More efficient household appliances and increased use of rail transport over trucking would also be encouraged, he said. Car owners would in addition face a Co-2 tax for inefficient autos.

Kohl is to present the proposals at the Western economic summit next month in Houston, Texas.

Moscow (JUNE 13) - Lithuanian Prime Minister Kazimiera Prunskiene said here Wednesday Moscow plans to lift its economic blockade of the Baltic state.

''There are no doubts about the lifting of the economic blockade. This was stated quite explicitly'', the Soviet news agency Tass quoted Mrs Prunskiene as saying after talks with Soviet Prime Minister Nikolai Ryzhkov.

At the meeting both sides agreed on a partial increase of Soviet natural gas supplies to Lithuania, she said. The Soviet government had also promised to consider resuming fuel supplies for Lithuanian agriculture.

The Soviet Union had imposed the blockade after Lithuania's declaration of independence on March 11. In talks here both sides are seeking a solution to the crisis. dpa pt 131901 jun 90

PESHAWAR, PAKISTAN (JUNE 13) - Mujahedin premier Abdul Rab Rasool Sayaf declared here Wednesday that unless ''a true Islamic government'' was established in Afghanistan, the five million Afghan refugees living in Pakistan and Iran would not return home.

"It is our right to remain in exile until the situation which caused us to leave our country is changed," he told graduating Afghan refugee teachers.

Sayaf ruled out any compromise with the existing Soviet-backed regime in Kabul. Even though supporters have suspended arms supplies, the mujahedin would continue fighting the regime, he said.

''Honest fighters for the cause of Islam do not worry about weapons,'' he said.

Meanwhile, a Pakistan government leader handed a cheque of two million dollars to the Shelter Now refugee aid agency in Peshawar which was looted by Afghan refugees in April.

Western aid agencies had threatened to abandon their work for the rehabilitation of Afghan refugees after the attack which resulted from an anti-West campaign by Islamic fundamentalists in the Afghan resistance.

ROME (JUNE 13) - Empty places in World Cup grounds have annoyed Italian football fans who were unable to buy tickets but an organising committee spokesman said 90 percent of the tickets had been sold.

The worst attended match was last Saturday's encounter between the Soviet Union and Romania in Bari. Only 25,000 fans turned up although organisers said 43,000 tickets had been sold.

"Many tickets were bought by foreign tour operators and companies as packages and there are always individual matches which do not interest visitors," said tournament director Luca di Montezemolo.

However, local fans feel frustrated at not being able to watch their World Cup.

"This is a tournament for VIPs not real football fans," said long-time Roma supporter Alberto Ferrajolo.

ISLAMABAD (JUNE 13) - Pakistan's Minister of State for Parliamentary Affairs Sher Afgan resigned Wednesday in a controversy over his law suit against the speaker (president) of the National Assembly.

Afgan does not belong to the ruling Pakistan People's Party (Ppp) but said he would continue to support Prime Minister Benazir Bhutto.

Respected as an upright politician, Afgan angered the elite in Ppp by

sueing Assembly President Mairaj Khalid for delaying action on his petitions against three opposition members.

Afgan contended that the three had lost their seats because of alleged unconstitutional practices.

Khalid had been sitting on his petition, and several others filed by irate opposition in retaliation against Bhutto and Afgan, apparently to strike a compromise.

RAPALLO, Italy (JUNE 13) - Angry Scotland supremo Andy Roxburgh hit back here on Wednesday at allegations that striker Mo Johnston and midfielder Jim Bett had broken a drinks ban and a curfew on Tuesday.

He announced that the two players had contacted their lawyers about a British tabloid newspaper report which also stated that Johnston had been abusive during a night out 24 hours after the Scots' 1-0 disaster against Costa Rica.

"The players are obviously distressed and annoyed about it," said Roxburgh. "They've taken legal advice immediately as the report appears to be actionable.

"First and foremost there was no ban so they didn't break any ban. Scottish journalists have that on tape so there are witnesses.

"The second point is that there was no curfew. The arrangement was that everyone had to be in their rooms by midnight and everyone was."

But Roxburgh did not deny claims that both players were drunk and that Johnston had made a sexist comment towards a newly-married Italian woman in nearby Portofino.

"These are wild allegations that you will have to take up with the people involved," he said. "I'm not my brother's keeper. But plain clothes security were with these people and they haven't reported anything back to us.

"As far as the Scottish Football Association are concerned, we've done everything by the book.

"It is very difficult to have normality here, but we're trying. A lot of the boys have their families here so we allowed them to have some freedom and a day off.

"It is a very dangerous assumption to say someone has had too much to drink. Some people who take medication look under the weather.

"But the timing of this report is very significant, particularly when it is based on an untruth. In my four years of working with these players we've had no incidents of this kind."

Bett and Johnston admitted they had had "one or two drinks" on Tuesday night, but denied that they were drunk. Johnston also denied that he had been abusive.

In addition to standing up for these two, the hard-pressed Roxburgh was called on to defend his decision to hold secret training sessions.

"It is very difficult for people to concentrate on their work if they're surrounded by a mob of people," said the Scottish boss.

"Our first training sessiom was incredible. There were over 1,000 people there. It was more like a match."

#90164d9680 06/13/1990 ~French/German News Agency
Bonn (JUNE 13) - Calling drug dependency a ''disease'', West German Chancellor Helmut Kohl unveiled a massive anti-drug crusade here Wednesday which critics say will be too harsh on the victims of drug abuse.

While providing additional funds for public education campaigns and therapy programmes, the main thrust of the legislative package will be a crackdown on organised crime and stiffer punishment for traffickers.

Kohl said 1,000 drug-related deaths were reported in West Germany last year, and the total was 476 so far this year. He said illicit drugs constitute an 800 billion-mark industry worldwide.

Legislation expected to be enacted by the end of the year would also allow courts to confiscate the illegally gained financial holdings of drug dealers.

Law enforcement agencies would also be given more leeway in conducting longterm undercover surveillance and planting bugs. An additional 400 federal agents are to be hired for the crackdown on organised crime.

In East Germany, where alcohol and nicotine abuse still are still the prime causes of substance dependency, East Berlin Health Minister Juergen Kleditzsch said a drug information campaign has been underway since January. Kleditzsch, sharing the podium with East German Interior Minister Peter-Michael Diestel, said the drug crisis would inundate East Germany

after implementation of the West German mark next month.

Opposition Social Democrats and Greens criticized the package for concentrating on law enforcement. They called for decriminalization of soft drugs and expansion of support organizations and half-way houses for drug abuse victims.

#90164d9730 06/13/1990 ~French/German News Agency

BUCHAREST (JUNE 13) - Running clashes erupted between demonstrators and security forces in Bucharest Wednesday after the authorities used force to expel anti-government protestors from a central square they have occupied for the last six weeks.

Hundreds of demonstrators using homemade petrol bombs or "molotov cocktails" made from bottles filled with gasoline regained control of University Square by the end of the afternoon, after special army and interior ministry units had seized it at dawn in a surprise operation.

Mid-afternoon, the demonstrators managed to break through barricades placed on the main access roads and surged back into the square, sending soldiers in battledress and helmets who were bearing large protective riot shields retreating in disarray.

By late afternoon, there were no more soldiers or policemen to be seen in the square, over which hung a pall of heavy black smoke from cars set on fire by the demonstrators, who sang and danced in the square despite a heavy rain falling.

In the reoccupied University Square, the crowd danced and chanted "Down with (President Ion) Iliescu" and "The NSF is the RCP (Romanian Communist Party)", after battling for much of the afternoon against the security forces, pelting them with stones and petrol bombs.

The crowd also demanded the released of 263 people the government said it had arrested.

The leader of the Romanian Students' League, Marian Munteanu, in an address to the crowd in the square from a university balcony, called for non-violence and warned against any "instigations of violence". He said the students should dissociate themselves from the "provocateurs".

However a large crowd of young people armed with clubs and molotov cocktails set fire to the municipal police station.

KUWAIT (JUNE 13) - Kuwaiti emir Sheikh Jaber al-Ahmad al-Jaber al-Sabah on Wednesday asked outgoing Prime Minister and Crown Prince Saad al-Abdallah al-Sabah to form a new government, official sources said.

The previous 22-man cabinet submitted its resignation Tuesday, two days after elections here to choose 50 members of a new national council.

The remaining 25 members of the council will be appointed by the emir and informed sources here said some members of the outgoing cabinet could be selected by Sheikh Jaber.

The council has a four-year mandate to prepare a return to parliamentary life in Kuwait but will also be empowered to discuss legislation.

Parliament was suspended by the emir in 1986 after MPs, who often opposed government legislation, were accused of having abused democracy.

Sunday's elections to the interim council were boycotted by 32 former deputies who have been demanding the reinstatement of an authentic parliament.

WASHINGTON (JUNE 13) - U.S. Trade Representative Carla Hills will not for the time being order trade sanctions against India in retaliation for its restrictive insurance and foreign investment policies, an senior aide in her office said Wednesday.

While reaffirming that India's regulations "are a burden and restrict U.S. commerce," the official told AFP that Mrs. Hills had decided to address the issue at the Uruguay Round of the multilateral trade talks under the General Agreement on Tariffs and Trade (GATT).

The official, who spoke on condition of anonymity, said the United States reserved the right to take unilateral action if India's trade barriers are not addressed in the GATT round, which is expected to conclude in December.

Because of the barriers to insurance firms and foreign investment, Washington in April listed India as an unfair trader under the so-called Super-301 provision of the 1988 trade act.

India was also cited on the first Super-301 hit list in April 1989 along with Brazil and Japan. But while the latter two settled their differences with Washington and were not included in this year's list, India has refused to negotiate, leaving it open to possible trade reprisals.

Some analysts said that retaliatory tariff hikes on Indian imports like tea and textiles would not be enough to press that country to change its trade practices.

Moreover, any trade sanctions at this stage would likely upset the current GATT talks prompting developing countries to muster round India, bolstering its influence and increasing ill feelings towards the United States, they said.

In the past few months, Washington has seemingly coaxed several developing countries into accepting its views on unrestricted trade in the service and investment sectors.

But many other nations, led by India, have argued that they are too vulnerable in this regard and complain that industrialized nations are reluctant at opening up their markets to more traditional Third World products, like textiles.

A U.S. show of force, according to observers, could lead developing nations to become even more recalcitrant.

GUATEMALA CITY (JUNE 13) EFE - Guatemalan President Vinicio Cerezo has expressed support for a team of Guatemalan and U.S. doctors in their controversial experiments involving a human blood substitute which they say could control the spread of AIDS and hepatitis.

+It would be really impressive to contribute a human blood substitute to medical science...I will support such investigations,+ said Cerezo, whose health minister has expressed serious reservations over the human testings.

Five Guatemalan doctors and one American are testing the substitute, made from calves blood extract combined with a chemical solution, on volunteers at the private Herrera Llerandi hospital which is owned by one of the researchers.

Meanwhile, Health Minister Carlos Gehlert Mata has complained that neither he nor the Panamerican Heath Office (OPS) have been officially notified of the experiments which he says are being carried out in an irregular way.

He said that an OPS commission would visit Guatemala to investigate the research project.

Gehlert Mata said the U.S. Food and Drug Administration, to whom the research results are being submitted, would probably not have allowed testing of the substance on human beings at such an early stage within the United States.

"We are not going to experiment with something which is totally prohibited in the United States," he said, adding that the the project had been ridiculed by the international news media.

Cerezo has described the project as very important both to Guatemala and to the medical world and said he is prepared to support any research which could have positive outcomes for humanity.

The serum was invented by Guatemalan doctor Rudolf Garcia-Gallup who tried it on himself and, after showing no side-effects, administered it to volunteer doctors from the United States, the Netherlands and Switzerland and then presented his findings to the United Nations.

Doctor Dagoberto Sosa, who works at the Herrera Llerandi clinic, has said that the volunteers who have been administered the transfusions "run no risk" of contracting hepatitis or AIDS, which can be transmitted through human blood.

He said the subjects of the experiment had not shown serious liver, heart or respiratory problems and pointed out that the blood substitute could be manufactured in large quantities and refrigerated for use in emergency

transfusions.

Results of the experiment are being sent to the Food and Drug Administration and other international medical organizations for analysis and commentary, said Sosa.

The research project is funded by the U.S. Biopure Corporation of Boston and the Guatemalan Biopur company and its parent company Hemo-Innovations.

#90164e0022 06/13/1990 ~Latin America New Agency

PRAGUE (JUNE 13) EFE - The Cuban government is to bring home all exchange students studying in Czechoslovakia and Hungary at the end of the academic year, authorities in both Eastern bloc countries reported Wednesday.

The academic board of Prague's Carolina University law school issued a statement expressing "surprise and indignation" at the decision.

"We interpret the Cuban government's decision as a desperate attempt to isolate the country from the world and postpone the social changes which are currently taking place in countries where real socialism has disappeared," the statement read.

The board suggested that Czech authorities should look into offering political asylum to those students who want it and who will thus be able to complete studies.

The Cuban government sent 214 students to study in Czechoslovakia on scholarship this year.

In a related development, Havana has told 70 Cubans currently studying in Hungary that they must return home next week when the university term ends the Hungarian news agency MTI said.

Cuban leader Fidel Castro has strongly condemned the political and economic changes taking place in the Marxist island nation's former allies in Eastern Europe.

North Korea and Vietnam also recalled students from Hungary in 1989, citing ideological differences between their communist countries and the increasingly democratic Hungary.

#90164e0027 06/13/1990 ~Latin America New Agency

BERLIN (JUNE 13) EFE - At the Berlin streetcorner where East German border guards once opened fire on refugees trying to flee to the West,

officials from East and West Berlin clambered onto a bulldozer Wednesday and began to tear down the wall that has divided their city for nearly three decades.

Hundreds of people looked on as West Berlin Public Works Commissioner Wolfgang Nagle and his East German counterpart Eckerhart Kraft presided at a ceremony kicking off the demolition project that will re-open 39 streets linking the two sectors by July 1st.

That will be one day before East Germans will be allowed to exchange limited amounts of their currency for West German deutschmarks, effectively bringing about the economic union of the two countries.

Following the overthrow of the hardline East German government last year, the first cracks in the wall appeared in November, leading to only nominal control on the flow between the two Berlins.

Another 33 holes in the wall are to be opened after that date, eliminating virtually all remaining traffic barriers, but some officials on both sides are unsure whether they want part of the wall to be left standing as a monument to those who lost their lives trying to escape.

On Thursday, the bulldozers are to level Checkpoint Charlie, the celebrated Cold War gateway through which carefully-controlled traffic between the two sectors was allowed to pass after the wall went up in 1961 at the orders of Soviet leader Nikita Khrushchev.

Although firms from both sides are taking part in the project, one West German firm awarded a contract for paving the reconnected streets has agreed to be paid in pieces of rubble from the wall, which are soaring in price to souvenir hunters as they become scarcer.

Many in the crowd at Wednesday's ceremony took home what will likely be their last +free+ piece of the Wall.

One elderly West Berlin Lady who turned out to watch the wall come down confessed she could not remember very well what it was like in the days before 1961 when the street was open.

"But I'll never forget the police dogs barking all through the night. That was terrible on one's nerves, you know. I hope that now there will be some peace and quiet for us," she added.

#90164e0029 06/13/1990 ~Latin America New Agency

MADRID (JUNE 13) EFE - With the arrest Wednesday of three men racing the wrong way down a main street in the Spanish capital, police were fearing a

possible reappearance of the city's most deadly summertime sport, kamikaze driving.

Police said the three men, aged between 23 and 36, were stopped by officers as they sped down the oncoming lane of a busy downtown street early Wednesday morning.

The three later admitted that they had placed bets before beginning their dangerous stunt, which the Spanish press has dubbed "kamikaze driving."

Over the past three summers, it has become a test of courage for many Spanish youths and a nightmare for unsuspecting drivers and the police.

Most kamikaze incidents occur on several highways leading out of Madrid towards the suburbs. Last year police arrested 13 kamikaze drivers on one highway alone.

Many place bets and, while the kamikazes speed along, his friends keep track of his progress from the other side of the highway.

#90164e0030 06/13/1990 ~Latin America New Agency

FREETOWN, Sierra Leone (JUNE 13) EFE - Liberian rebels, in their second day of peace talks in neighboring Sierra Leone, Wednesday stuck to demands that President Samuel Doe step down and leave the country.

National Patriotic Front (NPF) rebel representative Thomas Woewiyu said the resignation was FPN's only condition during the negotiations to hammer out a cease-fire in the nation's six-month-long civil war which has claimed more than a thousand lives.

Woewiyu added that negotiations, held in the U.S. embassy in Sierra Leone's coastal capital of Freetown, should center on the creation of a transitional government to hold the country over until free elections were held.

The FPN, led by former Doe minister Charles Taylor, has suggested that the transition government be headed by the current speaker of the Liberian House of Representatives, Samuel Hill.

Doe has said he was willing to make all sacrifices necessary to bring peace to the West African country, but that he would only leave if the people asked him to.

Government delegates, including Information Minister Emmanuel Bowier, said they were optimistic going into talks because, "Liberians are used to resolving problems through dialogue and compromise".

The U.S. embassy in Freetown was overrun with security forces during the talks, as several hundred Sierra Leonese gathered around the building in support of the rebels.

Taylor begain his rebellion last December after a failed coup attempt to oust Doe, who he accuses of corruption and human rights abuses during his 10 years in power.

Doe offered to open talks after rebels came within 16 km of the Liberian capital of Monrovia, and Taylor agreed to negotiate on Saturday.

CARACAS (JUNE 13) EFE - Venezuelan President Carlos Andres Perez has shelved plans to hike gasoline prices in the wake of 15 days of sporadic protests, a government spokesman said Wednesday.

Perez announced the decision during a meeting political circles said the move had caught them by suprise, and some called it a step backward in a series of price increases to take effect over the next several days which are part of an International Monetary Fund-backed austerity program to reform the debt-ridden economy.

"The president, in view of contrary reactions in most sectors of the country to possible increases in the price of gasoline, has made the decision to postpone any such measure," Energy and Mines Minister Celestino Armas said.

Some 50 people have been injured in protests throughout Venezuela since late May after the president announced hikes in gasoline and transport fares.

The decision also put an end to a crisis that pitted the president against Democratic Action party leaders who objected to the rises and pushed a motion through congress protesting the plan.

The price of a liter of super gasoline in Venezuela is U.S. cents six while other oil products cost around U.S. cents 50.

Nearly 300 people died last February as protests against other price hikes blew up into full-scale riots and looting.

Earlier this year, protests swept the country in response to rising prices and a Supreme Court decision to clear former government ministers of corruption charges.

#90164e0074 06/13/1990 ~Latin America New Agency
LIMA (JUNE 13) EFE - Heavy snows and rain have hit the south of Peru where families are continuing to flee the Sabancaya volcano which has been erupting for more than two weeks.

According to Peruvian press reports Wednesday 5,000 homes and thousands of head of livestock had been swamped by snow and torrential rains in the southern department of Tacna, on the Chilean frontier.

Eight villages had been buried in two metres of snow and temperatures had fallen to minus 15 Centigrade, with families struggling to the city of Tacna.

Some refugees said that half their livestock, mostly llamas, alpacas and vicunas, had been wiped out.

The unusually cold snap also hit the departments of Arequipa 1,000 km south of Lima, where people continue to flee Sabancaya, and Moquegua.

Three hundred schoolchildren escaping from the erupting volcano had reached the provincial capital of Chivay said the Lima daily El Comercio.

The newspaper described the exodus as disorganized with no transport and hampered by livestock taken with them by fleeing villagers.

The volcano has destroyed homes and crops and contaminated water supplies in a 20 km radius.

#90164h0019 06/13/1990 ~Chinese News Agency

HONG KONG (JUNE 13) XINHUA -- AVERAGE CONSUMER PRICE INDEX (CPI) IN MALAYSIA ROSE 2.3 PERCENT IN THE FIRST FOUR MONTHS OF THIS YEAR TO 135.9 FROM 132.8 IN THE CORRESPONDING PERIOD OF LAST YEAR, ACCORDING TO TUESDAY'S NEW STRAITS TIMES AVAILABLE HERE TODAY.

THE INDEX FOR FOOD ROSE 3.4 PERCENT, MEDICAL CARE AND HEALTH EXPENSES 2.4 PERCENT, TRANSPORT AND COMMUNICATION 4.4 PERCENT AND MISCELLANEOUS GOODS AND SERVICES 3.1 PERCENT.

FOR APRIL, THE CPI ROSE 0.7 PERCENT TO 136.6, COMPARED WITH 135.7 A MONTH EARLIER.

THE INDEX FOR BEVERAGES AND TOBACCO INCREASED BY 3.1 PERCENT AND THE FOOD INDEX BY 1.3 PERCENT.

THE INDEX FOR FOOD AT HOME INCREASED BY 1.5 PERCENT BECAUSE OF HIGHER INDICES SHOWN BY FRUITS AND VEGETABLES, MILK AND EGGS AND SUGAR.

THE INDICES FOR RICE, BREAD AND OTHER CEREALS, AND COFFEE AND TEA, REMAINED STABLE AT 114.8 AND 123.6 RESPECTIVELY.

#90164h0027 06/13/1990 ~Chinese News Agency

GUANGZHOU (JUNE 13) XINHUA -- IN THE PAST TEN YEARS SINCE ITS OPENING TO THE OUTSIDE WORLD, GUANGDONG PROVINCE HAS UTILIZED 10.38 BILLION U.S. DOLLARS OF OVERSEAS INVESTMENT, ACCORDING TO A RECENT PROVINCE-WIDE SURVEY.

THESE FOREIGN FUNDS HAVE HELPED SPEED UP THE CONSTRUCTION OF ENERGY, COMMUNICATIONS, TELECOMMUNICATIONS AND OTHER BASIC FACILITIES IN THE PROVINCE, AND RAISE THE TECHNOLOGICAL LEVEL OF THE PROVINCE'S ENTERPRISES.

AS A RESULT, GUANGDONG HAS LEAPED TO THE FIRST PLACE IN THE OUTPUT VALUE OF ITS ELECTRONICS, TEXTILES AND CHEMICAL FIBERS INDUSTRIES. IT HAS NOW MORE THAN 600 FOREIGN-FUNDED ENTERPRISES LISTED BY THE PROVINCIAL AUTHORITIES AS EXPORT-ORIENTED AND TECHNICALLY ADVANCED FIRMS.

MEANWHILE, THE PROVINCE HAS PROGRAM-CONTROLLED TELEPHONES IN MOST OF ITS CITIES AND COUNTIES LINKED DIRECTLY WITH 154 COUNTRIES AND REGIONS.

LAST YEAR THE INDUSTRIAL OUTPUT VALUE OF THE PROVINCE'S FOREIGN-FUNDED ENTERPRISES REACHED 13.5 BILLION YUAN (ABOUT 3.8 BILLION U.S. DOLLARS), WHICH ACCOUNTED FOR 8.4 PERCENT OF THE PROVINCE'S TOTAL INDUSTRIAL OUTPUT VALUE. THE EXPORT VOLUME OF THESE ENTERPRISES REACHED 2.87 BILLION U.S.

DOLLARS, WHICH ACCOUNTED FOR 35.2 PERCENT OF THE PROVINCE'S TOTAL EXPORT VOLUME. BESIDES, THESE ENTERPRISES HAVE PROVIDED MORE THAN TWO MILLION JOB OPPORTUNITIES.

ACCORDING TO STATISTICS FROM THE GUANGZHOU CITY ADMINISTRATION FOR INDUSTRY AND COMMERCE, 286 NEW OVERSEAS-FUNDED ENTERPRISES WERE REGISTERED LAST YEAR IN GUANGZHOU, CAPITAL OF THE PROVINCE. THE STATISTICS ALSO SHOW THAT OVER 90 PERCENT OF THE NEWLY REGISTERED ENTERPRISES ARE PRODUCTION PROJECTS.

DHAKA (JUNE 13) XINHUA -- BANGLADESH BANK, THE CENTRAL STATE BANK OF THE COUNTRY, HAS DECIDED TO INTRODUCE MORE FLEXIBLE RATES OF INTEREST ON DEPOSITS AND LENDING IN A BID TO ENCOURAGE MOBILIZATION OF DOMESTIC SAVINGS, ACCORDING TO A LOCAL PRESS REPORT TODAY.

BANK SOURCES WERE QUOTED AS SAYING THAT FOR BOTH URBAN AND RURAL SAVINGS, THE RATES OF INTEREST MAY BE FIXED FROM 8.5 PERCENT TO TWELVE PERCENT IN PLACE OF 8.25 PERCENT TO 11.75 PERCENT FIXED BY THE BANK A YEAR EARLIER.

MEANWHILE, THE NEW RATE OF INTEREST FOR FIXED DEPOSITS RANGING FROM THREE MONTHS TO THREE YEARS AND ABOVE HAS BEEN FIXED AT 10 PERCENT TO 14.25 PERCENT, THE SOURCES SAID.

THE RATES OF INTEREST ON LENDING HAS ALSO BEEN REVISED. FOR LARGE AND MEDIUM SCALE INDUSTRY, THE LENDING RATES HAVE BEEN MADE 12.5 PERCENT TO 16.5 PERCENT AGAINST 13 PERCENT TO 17.5 PERCENT. BUT THE LENDING RATES IN OTHER SECTORS HAVE BEEN RAISED.

FINANCIAL CIRCLES VIEW THAT UNDER THE NEW SYSTEM, SAVINGS WILL BE SUFFICIENTLY ENCOURAGED AND LENDING DISCOURAGED. THE GOVERNMENT'S EFFORTS TO MOBILIZE DOMESTIC RESOURCES ARE EXPECTED TO GET A BOOST.

THE ADJUSTMENT OF THE INTEREST RATES IS NEEDED FOR GETTING A CREDIT OF 175 MILLION U.S. DOLLARS FROM THE WORLD BANK, WHICH HAS URGED BANGLADESH TO TAKE EFFECTIVE STEPS TO MOBILIZE DOMESTIC RESOURCES FOR ITS ECONOMIC DEVELOPMENT.

#90164h0137 06/13/1990 ~Chinese News Agency

NEW DELHI (JUNE 13) XINHUA - INDIA AND AFGHANISTAN HAVE AGREED TO EXPAND THEIR BILATERAL COOPERATION, ACCORDING TO OFFICIAL SOURCES HERE TODAY.

THE AGREEMENT WAS CONTAINED IN A PROTOCOL ON ECONOMIC, TECHNICAL AND TRADE COOPERATION SIGNED BY INDIAN EXTERNAL AFFAIRS MINISTER I.K. GUJRAL AND THE FOREIGN MINISTER OF AFGHANISTAN (KABUL REGIME), ABDUL WAKIL, AT THE END OF THE TWO-DAY MEETING OF THE NINTH SESSION OF THE INDO-AFGHAN JOINT COMMISSION.

INDIA WILL SHORTLY DEPUTE 35 TECHNICAL EXPERTS TO AFGHANISTAN TO CREATE ADEQUATE TRAINED MANPOWER RESOURCES IN THAT COUNTRY, THE SOURCES SAID.

AN INDIAN DELEGATION COMPRISING BOTH PUBLIC AND PRIVATE SECTORS REPRESENTATIVES WILL ALSO VISIT KABUL SHORTLY TO IDENTIFY JOINT VENTURES.

INDIA HAS EXPRESSED THE HOPE THAT AFGHANISTAN WOULD BECOME A MEMBER OF THE SOUTH ASIAN ASSOCIATION FOR REGIONAL COOPERATION AND CONTRIBUTE TOWARDS REGIONAL DEVELOPMENT AND PROGRESS, THE SOURCES ADDED.

THE JOINT COMMISSION, SET UP IN 1969, HELD ITS LAST SESSION IN KABUL IN 1987.

WAKIL LEADING A DELEGATION ARRIVED HERE ON MONDAY ON A FIVE-DAY VISIT.

#90164h0144 06/13/1990 ~Chinese News Agency

LUANDA (JUNE 13) XINHUA -- SAO TOME AND PRINCIPE WILL GET LOANS OF 24 MILLION U.S. DOLLARS THAT WOULD HELP IT CARRY OUT ITS STRUCTURAL ADJUSTMENT PROGRAM.

ACCORDING TO TODAY'S "ANGOLAN DAILY", THE WORLD BANK WILL PROVIDE THE COUNTRY WITH 9.5 MILLION DOLLARS WHILE THE INTER- NATIONAL MONETARY FUND (IMF) WILL PROVIDE 2.5 MILLION DOLLARS. THE AFRICAN DEVELOPMENT BANK IS TO ADVANCE THE REMAINING 12 MILLION DOLLARS.

SAO TOME AND PRINCIPE IS EXPECTED TO REPAY THE LOANS WITHIN 40 YEARS BEGINNING FROM THE YEAR 2,000. BUT THE TERM OF THE REPAYMENT WILL BE REVIEWED IF THE COUNTRY'S PER CAPITA GNP EXCEEDS 790 U.S. DOLLARS FOR FIVE CONSECUTIVE YEARS.

TO MEET THE CONDITIONS ATTACHED TO THE LOANS, THE SAO TOME AND PRINCIPE

GOVERNMENT HAS TO ADJUST THE EXCHANGE RATE OF NATIONAL CURRENCY, RAISE THE PRICES OF FOOD, ENERGY, WATER, TRANSPORTATION AND TELECOMMUNICATIONS AND ALLOW PRIVATE BUSINESSMEN TO IMPORT FOOD.

-30- 1090

#90164h0145 06/13/1990 ~Chinese News Agency

LUANDA (JUNE 13) XINHUA - ANGOLA HAS CALLED ON THE INTER- NATIONAL COMMUNITY TO PROVIDE EMERGENCY RELIEF FOOD FOR 2.6 MILLION DROUGHT-STRICKEN PEOPLE IN CENTRAL AND SOUTHERN ANGOLA.

IN A NOTE CIRCULATED HERE, THE ANGOLAN FOREIGN MINISTRY SAID THAT AS A RESULT OF THE PERSISTENT DROUGHT, THE COUNTRY'S AGRICULTURAL PRODUCTION HAS DECLINED BY MORE THAN 60 PERCENT.

MEANWHILE, ABOUT 600 PEOPLE, INCLUDING 200 CHILDREN, HAVE DIED OF HUNGER WHILE 62,000 HEAD OF LIVESTOCK DIED OF THIRST, ADDED THE NOTE.

THE U.N. FOOD AND AGRICULTURAL ORGANIZATION (FAO) PREDICTED THAT THE DROUGHT-STRICKEN PEOPLE IN ANGOLA NEED 300,000 TONS OF FOOD TO SURVIVE THE FAMINE. BUT SO FAR, THE SOUTHERN AFRICAN COUNTRY HAS RECEIVED ONLY 29,000 TONS OF FOOD.

#90164h0146 06/13/1990 ~Chinese News Agency

OTTAWA (JUNE 13) XINHUA - CANADIAN CENTRAL BANK CHIEF JOHN CROW SAYS THAT THE COUNTRY'S INTEREST RATES WILL REMAIN HIGH UNTIL INFLATION IS UNDER CONTROL, DESPITE A RECENT VICTORY IN RESOLVING A CONSTITUTIONAL IMPASSE.

THE BANK OF CANADA GOVERNOR, HOWEVER, DOES CONCEDE AN END TO THE CONSTITUTIONAL IMPASSE OVER THE STATUS OF THE FRENCH-SPEAKING PROVINCE OF QUEBEC WOULD BE "HELPFUL" IN CONDUCTING MONETARY POLICY, CANADA'S NATIONAL BUSINESS DAILY FINANCIAL POST REPORTED TODAY.

THE CONSTITUTIONAL IMPASSE RESULTED FROM A CONTROVERSIAL BASIC LAW AMENDMENT, KNOWN AS "MEECH LAKE ACCORD", WHICH GRANTS QUEBEC SPECIAL STATUS WITHIN CANADA BY RECOGNIZING IT AS A "DISTINCT SOCIETY" AND GIVING IT UNPRECEDENTED POLITICAL POWERS.

BITTER CONTROVERSIES BETWEEN OPPONENTS AND SUPPORTERS OF THE ACCORD HAD RUN INTO A DEADLOCK AND SCARED AWAY FOREIGN INVESTMENT BEFORE CANADA'S TOP POLITICIANS REACHED A CONSENSUS LAST WEEKEND TO RESOLVE THE IMPASSE.

THE CONSTITUTIONAL IMPASSE PUSHED THE CENTRAL BANK'S TREND-SETTING RATE TO AN EIGHT-YEAR HIGH OF 14.05 PERCENT LATE LAST MONTH WHEN THE CANADIAN DOLLAR BECAME SHAKY AND DROPPED CONSIDERABLY IN ITS VALUE AGAINST THE U.S. DOLLAR.

THE BANK RATE EASED TO 13.72 PERCENT LAST WEEK WHEN THE CANADIAN DOLLAR APPRECIATED TO OVER 0.85 U.S. CENTS AT THE NEWS THAT THE CONSTITUTIONAL IMPASSE WAS BEING RESOLVED.

BUT CROW TOLD A BUSINESS AUDIENCE OF 325 IN LONDON TUESDAY THAT "WE ARE NOT GOING TO GET INTEREST RATES DOWN UNTIL INFLATION IS UNDER CONTROL." THE BANK CHIEF WAS ATTENDING A MEETING OF THE CANADA-U.K. CHAMBER OF COMMERCE.

HE SAID HIGH WAGE DEMANDS WOULD INTENSIFY INFLATIONARY PRESSURES AND COULD PROLONG THE PERIOD OF HIGH INTEREST RATES. CANADA'S INFLATION RATE, WHICH IS CALCULATED IN THE CONSUMER PRICE INDEX, IS ABOUT FIVE PERCENT ANNUALLY.

CROW'S SPEECH, HOWEVER, IS IN CONTRAST WITH RECENT SUGGESTIONS BY CANADIAN FINANCE DEPARTMENT OFFICIALS THAT SETTLEMENT OF THE CONSTITUTIONAL IMPASSE WOULD REDUCE PRESSURE ON BOND YIELDS AND THE CANADIAN DOLLAR, PAVING THE WAY FOR A DROP IN RATES.

ANKARA (JUNE 13) XINHUA - THOUSANDS OF TURKS TOOK TO THE STREETS TODAY IN PROTEST AGAINST THE GOVERNMENT'S CANCELLATION OF PILGRIMAGE BY BUS THIS YEAR AFTER TURKEY HAS FAILED TO GET ENOUGH HAJJ VISAS FROM SAUDI ARABIA.

IN KONYA, A LARGE GROUP OF PROTESTORS MARCHED TO THE GOVERNOR'S OFFICE AND TO THE RULING MOTHERLAND PARTY (ANAP) PROVINCIAL HEADQUARTERS AND CALLED FOR THE RESIGNATION OF THE GOVERNMENT WHICH THEY SAID WAS RESPONSIBLE FOR FAILING TO GET AN INCREASED, QUOTA FOR TURKISH MOSLEMS.

IN ERZURUM, PROTESTERS ACCUSED THE GOVERNMENT OF "INCAPABILITY." IN IZMIR,

A GROUP OF PROTESTORS MARCHED TO THE OFFICE OF THE MUFTI AND CHANTED "ALLAH-U AKBAR" (GOD IS GREAT) AND ANTI-GOVERNMENT SLOGANS.

IN ANKARA, SEPARATE DEMONSTRATIONS WERE STAGED IN FRONT OF MOSQUES. IN ISTANBUL, A LARGE GROUP OF PROTESTORS, CHANTING "ALLAH-UAKBAR", MARCHED TO THE OFFICE OF THE GOVERNOR, PROTESTING AGAINST "DISCRIMINATING" ATTITUDE OF THE RELIGIOUS AFFAIRS DIRECTORATE.

"WHY HAVE THEY CANCELLED PILGRIMAGES BY BUS WHILE ALLOWING PILGRIMAGES BY AIRPLANES? THIS IS DISCRIMINATION," ONE PROTESTOR CHARGED.

#90164k0003 06/13/1990 ~Japanese News Agency

LONDON (JUNE 13) KYODO - JAPANESE BANKS WERE EXCELLENT PERFORMERS IN A RANKING OF THE CAPITAL SCALE OF 500 INTERNATIONAL BANKS IN FISCAL 1989, WITH FUJI BANK TOPPING THE LIST, A BRITISH FINANCIAL MAGAZINE SAID WEDNESDAY.

EUROMONEY MAGAZINE REPORTED THAT JAPANESE BANKS OCCUPIED SIX SLOTS AMONG THE TOP 10, WITH FUJI BANK, WITH 11,041 MILLION DOLLARS IN CAPITAL, SURGING TO THE TOP FROM THE FIFTH PLACE THE PREVIOUS YEAR.

THE MAGAZINE SAID THE GOOD SHOWING OF JAPANESE INSTITUTIONS IS LARGELY DUE TO THEIR STEPPED-UP EFFORTS TO BOOST CAPITAL TO MEET THE CAPITAL ADEQUACY RATIO SET BY THE BANK FOR INTERNATIONAL SETTLEMENTS (BIS).

DAI-ICHI KANGYO BANK TOOK SECOND PLACE, WITH 10,962 MILLION DOLLARS IN CAPITAL, FOLLOWED BY CAISSE NATIONAL DE CREDIT AGRICOLE OF FRANCE, WITH 10,901 MILLION DOLLARS.

THE OTHER FOUR JAPANESE BANKS WHICH RANKED IN THE TOP 10 ARE SUMITOMO BANK MITSUBISHI BANK, SANWA BANK AND INDUSTRIAL BANK OF JAPAN.

NATIONAL WESTMINSTER BANK OF BRITAIN, THE TOP CAPITAL HOLDER IN FISCAL 1988, TUMBLED TO THE EIGHTH SLOT. CITIBANK OF THE UNITED STATES RANKED SEVENTH.

THE MAGAZINE ATTRIBUTED THE SLUMP OF U.S. AND EUROPEAN BANKS TO THEIR LARGE WRITE-OFFS OF BAD DEBTS OWED BY LATIN AMERICAN AND OTHER AILING ECONOMIES.

#90164k0055 06/13/1990 ~Japanese News Agency

NAGOYA (JUNE 13) KYODO - TOYOTA MOTOR CORP. IS EXPECTED TO REPORT A RECORD UNCONSOLIDATED PRETAX PROFIT OF MORE THAN 700 BILLION YEN FOR THE FISCAL YEAR ENDING ON JUNE 30, 1990, ANALYSTS PREDICTED THURSDAY.

THE PREDICTION WOULD HAVE THE TOP JAPANESE AUTOMAKER KEEP ITS POSITION AS THE NATION'S TOP CORPORATE PROFIT EARNER FOR THE THIRD STRAIGHT YEAR, ENABLING IT TO RENEW THE PRESENT RECORD OF 648 BILLION YEN IN FISCAL 1985.

THEY BASED THE UPBEAT FORECAST ON A BOOMING LUXURY PASSENGER CAR MARKET AT HOME AMID SUSTAINED ECONOMIC GROWTH FUELED BY BRISK DOMESTIC DEMAND, WHICH THEY SAID HAS BEEN BOOSTING SALES AT A FASTER THAN EXPECTED TEMPO.

ANOTHER FACTOR BEHIND THE PREDICTED ROBUST PROFIT IS THE WEAKER YEN, WHICH ANALYSTS SAID SHOULD SIGNIFICANTLY RAISE TOYOTA'S EARNINGS FROM EXPORTS IN YEN TERMS.

GIVEN THE CURRENT EXCHANGE RATE, THE AVERAGE YEN-DOLLAR RATE IS EXPECTED TO STAY AT AROUND 147 YEN FOR THE FISCAL YEAR, COMPARED WITH 131 YEN IN THE PREVIOUS YEAR.

ANALYSTS ESTIMATE A FOREIGN EXCHANGE GAIN OF MORE THAN 100 BILLION YEN FOR TOYOTA.

TOYOTA, KNOWN FOR ITS FINANCIAL INVESTMENTS USING AMPLE LIQUIDITY AT HAND, IS ALSO FORECAST TO GAIN MASSIVE RETURNS ON ITS INVESTMENT IN BONDS AND OTHER FINANCIAL INSTRUMENTS THANKS TO RISING INTEREST RATES.

FOR THE NEXT FISCAL YEAR STARTING ON JULY 1, STRONG PERFORMANCE AT TOYOTA IS LIKELY TO CONTINUE ON THE STRENGTH OF BUOYANT CONSUMER SPENDING IN DEFIANCE OF INCREASED LABOR COSTS DUE TO WAGE HIKES DURING THIS YEAR'S SPRING LABOR OFFENSIVE, ANALYSTS SAID.

#90164k0062 06/13/1990 ~Japanese News Agency

OSAKA (JUNE 13) KYODO - MATSUSHITA ELECTRIC INDUSTRIAL CO. SAID WEDNESDAY IT HAS LAUNCHED A JOINT VENTURE WITH PHILIPS OF THE NETHERLANDS TO PROMOTE THE DOMESTIC DIGITAL BUS -- A DATA COMMUNICATION AND CONTROL SYSTEM FOR AUDIO, VISUAL AND OTHER CONSUMER PRODUCTS.

THE COMPANY SAID THE SYSTEM, CALLED D2B, WILL ENABLE PRODUCTS OF DIFFERENT BRANDS BOUGHT AT DIFFERENT TIMES TO FUNCTION AS AN INTEGRATED SYSTEM, MAKING THEM COMPATIBLE.

THE NEW FIRM, D2B SYSTEMS CO., WILL BE ESTABLISHED IN REDHILL, BRITAIN, WITH AUTHORIZED CAPITAL OF 3 MILLION POUND STERLING.

THE COMPANY WILL BE 75 PERCENT OWNED BY PHILIPS AND 25 PERCENT BY MATSUSHITA.

THE D2B WAS RECOGNIZED BY THE INTERNATIONAL ELECTROTECHNICAL COMMISSION AS

AN INTERNATIONAL STANDARD FOR COMPATIBILITY AMONG AUDIO-VISUAL EQUIPMENT MANUFACTURED BY DIFFERENT COMPANIES.

THE NEW FIRM WILL STANDARDIZE DETAILS OF THE SYSTEM AND PROVIDE SOFTWARE LICENSES TO HOME APPLIANCE MANUFACTURERS.

MATSUSHITA SAID THOMSON CONSUMER ELECTRONICS OF FRANCE AND SONY CORP. OF JAPAN HAVE DECIDED TO SUPPORT THE SYSTEM.

-30- 1258

#90164k0070 06/13/1990 ~Japanese News Agency

TOKYO (JUNE 13) KYODO - NINE MAJOR ELECTRIC POWER COMPANIES DECIDED WEDNESDAY TO INTRODUCE A NEW SYSTEM FOR CHARGING ELECTRICITY CONSUMED BY HOUSEHOLDS.

UNDER THE FORMULA, THE COMPANIES WILL RAISE DAYTIME CHARGES AND LOWER NIGHTTIME RATES TO ENCOURAGE THE NIGHTTIME USE OF ELECTRICITY SO AS TO AVOID CONCENTRATION OF CONSUMPTION.

HOUSEHOLDS WILL BE ALLOWED TO CHOOSE WHETHER TO SUBSCRIBE TO THE NEW SYSTEM.

THE COMPANIES, HOWEVER, DROPPED A SEASONAL RATE ADJUSTMENT SYSTEM ON GROUNDS THAT IT WOULD BE HARD TO OBTAIN APPROVAL FROM CONSUMERS.

THE DECISION WAS MADE AT A REGULAR MEETING OF THE PRESIDENTS OF THE NINE ELECTRIC POWER COMPANIES WEDNESDAY.

THE COMPANIES HAVE INTRODUCED AN OPTION SYSTEM FOR THE INDUSTRIAL USE OF ELECTRICITY SINCE 1988, ALLOWING USERS TO CHOOSE BETWEEN SEASONAL AND TIME-ZONE CHARGES.

THEY ALSO INTRODUCED THREE-LAYER CHARGES FOR HOUSEHOLD USE 15 YEARS AGO, UNDER WHICH RATES ARE RAISED ACCORDING TO THE VOLUME OF CONSUMPTION.

THE COMPANIES WILL STUDY DETAILS OF THE NEW SYSTEM SUCH AS DEFINITION OF DAY TIME AND NIGHT TIME AND THE DIFFERENTIAL OF CHARGES.

THE COMPANIES SAID THEY WILL APPLY TO THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY BY THE END OF THIS YEAR FOR APPROVAL OF THE NEW SYSTEM.

-30- 1418

#90164k0072 06/13/1990 ~Japanese News Agency

TOKYO (JUNE 13) KYODO - YIELDING TO UNITED STATES PRESSURE, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) SAID WEDNESDAY IT PLANS TO PERMIT BANK-AFFILIATED CREDIT CARD FIRMS TO PROVIDE REVOLVING CREDIT

POSSIBLY IN 1992.

MITI OFFICIALS SAID THE GOVERNMENT WILL PRESENT THE NEW MEASURE TO THE UNITED STATES IN A FINAL REPORT ON THE STRUCTURAL IMPEDIMENTS INITIATIVE, BILATERAL TALKS AIMED AT ELIMINATING STRUCTURAL BARRIERS TO TRADE AND INVESTMENT.

JAPANESE AND U.S. OFFICIALS WILL MEET IN TOKYO ON JUNE 25-26 TO HAMMER OUT THE FINAL REPORT. WASHINGTON HAS BEEN URGING TOKYO TO LIFT A BAN ON REVOLVING CREDIT SERVICES FOR CARD COMPANIES OWNED BY BANKS TO HELP SPUR CONSUMER SPENDING AND LOWER JAPAN'S HIGH SAVINGS RATE.

REVOLVING CREDIT ALLOWS CONSUMERS TO PURCHASE GOODS AND SERVICES WITH MONTHLY PAYMENTS OF LESS THAN THE FULL AMOUNT DUE WITHIN AN UNSPECIFIED PERIOD OF TIME. BUT THE AMOUNT ITSELF IS PRESET.

BUT THE OFFICIALS SAID THEY WILL CONTINUE TO KEEP SUCH CREDIT FIRMS FROM OFFERING INSTALLEMENT-PAYMENT CREDIT, WHICH UNLIKE REVOLVING CREDIT REQUIRES A SPECIFIED PERIOD OF TIME TO PAY IN INSTALLMENTS FOR PURCHASES OF GOODS AND SERVICES.

-30- 1345

#90164k0077 06/13/1990 ~Japanese News Agency

TOKYO (JUNE 13) KYODO - MAJOR JAPANESE STEELMAKERS WILL BEGIN NEGOTIATIONS WITH CHINA IN TOKYO ON THURSDAY OVER THE PRICE AND QUANTITY OF ORDINARY STEEL PRODUCTS FOR SHIPMENT TO THE COMMUNIST NATION IN THE SECOND HALF OF THIS FISCAL YEAR, STEEL INDUSTRY SOURCES SAID WEDNESDAY.

THE TALKS BETWEEN THE INTEGRATED MILLS, INCLUDING NIPPON STEEL CORP., AND CHINA NATIONAL METALS AND MINERALS IMPORT AND EXPORT CORP. WILL CENTER ON PRICING, THE SOURCES SAID.

THE JAPANESE MILLS ARE HOPING TO RAISE THEIR OFFER PRICE, CITING HIGHER PRICES OF RAW MATERIALS, BUT THE CHINESE COMPANY IS LIKELY TO ASK FOR A SIZABLE PRICE CUT ON GROUNDS OF SOFTENING PRICES IN THE INTERNANATIONAL STEEL MARKET.

JAPANESE STEEL SHIPMENTS TO CHINA IN THE FIRST HALF OF THE CURRENT FISCAL YEAR, WHICH BEGAN ON APRIL 1, ARE EXPECTED TO AVERAGE 100,000 TONS A MONTH WELL BELOW THOSE OF THE SAME PERIOD OF THE PRECEDING YEAR.

THE DECLINE HAS RESULTED FROM ECONOMIC ADJUSTMENTS IN CHINA, THE SOURCES SAID.

FOR THE SECOND HALF OF THE CURRENT FISCAL YEAR, HOWEVER, THE MONTHLY SHIPMENT WILL RECOVER TO AN AVERAGE 120,000-150,000 TONS, SOME INDUSTRY EXECUTIVES SAID, POINTING TO INCREASING SUPPLIES FROM JAPAN TO CHINA IN

RECENT MONTHS.

#90164m0001 06/13/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (JUNE 13) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The COMMERCE DEPARTMENT reports that retail sales for May fell a surprising 0.7%. It is the first time since 1981 that retail sales have fallen for three consecutive months. Economists were expecting the sales figures to rise 0.1% while remaining "mired in the doldrums" as "The Wall Street Journal" put it.

The FEDERAL DEPOSIT INSURANCE CORP. reports that commercial bank profits were down $1.1 billion in the first-quarter compared to the first-quarter of 1989. ... The COMMERCE DEPARTMENT says that seven states have filed suit against a MOBILE CORP. subsidiary over claims its Hefty trash bag is

degradable in sunlight. ... AMERICAN EXPRESS plans to raise $825 million by issuing an additional 27 million common shares.

WHAT'S AHEAD:

White House and Congressional budget negotiators continue talks this morning. ... COMMERCE SECRETARY ROBERT MOSBACHER and businessman T. BOONE PICKENS are scheduled to speak before the House Republican Research Committee Task Force on U.S. competitiveness. ... GIANCARLO PARRETTI says he may sell part of MGM/UA COMMUNICATIONS after he completes his purchase of the firm. ... CHRYSLER CORP. may be trying to acquire DOLLAR RENT-A-CAR one of the few big independent car rental firms left.

FROM THE BULLS:

"The Dow could be in a position for a straight-line run past 3000 this week," says BEAR, STEARNS analyst JACK SOLOMON. PETER KEEFE of JOHNSON, LEMON & CO. agrees and says, "There's an old saying in this business that says 'never short a dull market,' and from a volume standpoint the market sure has been dull. We think the market looks higher. An assault on the 3000 level is possible and I think we're going to get just that." He adds "If the economic numbers come in decent, there's nothing between us and 3000" [on the Dow]. "And the market could blow through that number and go up another 200 points." ("USA Today", 6/13 and CNBC "Business View", 6/12)

"It's gangbusters! The market continues to defy the forces of gravity," says CNN's DAN DORFMAN. "Every piece of bad news is just swallowed up as the Dow just balloons higher and higher. The key word is momentum--the market has got it and it just won't quit." Dorfman predicts the Dow will reach 3100 in July. (CNN "Moneyline", 6/12)

STOCK MARKET:

"It's a wild and crazy market. I basically have been a long-term bull since I have been in the business," says STEPHEN TODD of the "Todd Market Timer." But last Thursday he told his clients to get out of equities because he felt the market was ready for a consolidation down to the 2800 level. He says now that he was wrong and needs to reevaluate the situation following Tuesday's rise in the Dow. He calls the rise a "blow-off" and believes the market needs to correct more and have improved breadth in order to stay healthy. However, he believes the amount of cash on the sidelines is a strong plus for the market that may cause any surprise to be to the upside. He also notes that blow-offs of the type can go on for weeks. "I think that if we are going to start down in this market, if this is indeed a top today [Tuesday], I think it is going to have to start tomorrow [Wednesday]. If it is up another 20 or 30 points tomorrow, I think it is going well into approaching 3500 before it is over." (FNN "Marketwrap", 6/12)

The pullback in the Dow is over, says ANDREW ADDISON of the "Addison Report." Addison is encouraged by the Dow utilities and transportation indices. "The utilities very dramatic snap back through 215 and the strength in the transports coming after the Dow Theory buy signal indicate [any future] pull backs will be minor. We've had it and we're very close to going to new highs right here." (FNN "World Business Update", 6/13)

"It was really all programs" that caused the 40 point run-up on light trading late Tuesday, says LARRY GREENWALD, a trader at SANFORD C. BERNSTEIN & CO. "There was some institutional interest, but it was really the programs trading in a vacuum. The light volume made it easy to run the market up." Greenwald says that fears of the volatility that often accompanies expirations and the upcoming economic reports kept many players out of the action. (UPI, 6/12)

"There was nothing in the fundamentals behind Tuesday's late rise," says PRUDENTIAL-BACHE analyst LARRY WACHTEL. "Investors may have been looking ahead to the [producer and consumer price] numbers later in the week." He adds there may also have been some action related to the triple witching expiration of certain futures contracts, futures options and stock options on Friday. "We may get some profit-taking on the opening [today]," he says, "but what happens later, in the afternoon?" (Reuters, 6/13)

Overall, Tuesday's market was featureless until the computerized program trading hit, says technician EDWARD NICOSKI of PIPER, JAFFRAY & HOPWOOD. "The technology stocks and energy stocks were firm, as on Monday, but there wasn't too much else to attract attention." ("The Washington Post", 6/13)

"The profit-taking is over. The buyers are coming back into the [OTC] market," says DAVID MEMMOTT, a senior trader at DILLON READ & CO. (WSJ, 6/13)

PETER GRENNAN of SHEARSON LEHMAN HUTTON says that the market was caught off guard by yesterday's rally. "The feeling is that certainly people would have waited for the [upcoming economic] numbers first. But there is a realization that inflation will be modest, certainly less than the first quarter." (NYT, 6/13)

"I think the big gain yesterday was due to a sellers strike," says MICHAEL METZ of OPPENHEIMER & CO. Metz believes the market is tracing out a trading range with Dow 2950 on the upside and the low 2800s on the downside. "My guess is we're in a bull market and [that] many who are positioned in the market aren't selling while those who are late-comers and want to get in were trying to pick up stock." He adds, "Those who are expecting a retreat are getting a little bit uneasy here, and they're afraid the market's going to run away from them again" ("Investor's

Daily" and WSJ, 6/13)

STOCK TIPS:

GRUNTAL & CO. recommends stock in INTERNATIONAL RECOVERY CORP., a Florida-based waste management company that recycles oil and repairs underground storage tanks. The brokerage says earnings are expected to grow 25% annually and notes that management owns 40% of the stock. ("USA Today", 6/13)

PETER KEEFE of JOHNSTON, LEMON & CO. believes the market still has plenty of steam left, so it's not too late to profit from this rally. He prefers small cap stocks, but says there are still some deals to be found in the big cap stocks, including IBM, DEC and APPLE. He recommends a portfolio mix of 55% stocks, 25% bonds and 20% cash. (CNBC "Business View", 6/12)

CNN's DAN DORFMAN says the best action can be found in big cap stocks. His favorites include: MERCK, PROCTER & GAMBLE, ELI LILLY, WARNER LAMBERT, GENERAL MOTORS, TRIPLE M, COMPAQ, MOTOROLA, IBM, GENERAL ELECTRIC, BRISTOL-MYERS and JOHNSON & JOHNSON. (CNN "Moneyline", 6/12)

"Regulators have telescoped a lot of pain into the first half of the year by making banks take heavy loan-loss provisions," says JAMES McDERMOTT, bank analyst for KEEFE, BRUYETTE & WOODS. "They should get some relief in the second half." ("USA Today", 6/13)

The shorts' positions in RAYMOND JAMES, a profitable regional brokerage firm, have grown to the equivalent of thirty days trading volume. "This is very bullish when you have a stock which is advancing ... it adds further fuel to the upside," says ANDREW ADDISON of the "Addison Report." MERCK is the premier seller of prescription drugs worldwide, boasting 20 "blockbuster" drugs each selling more then $100 million annually. Addison likes the stock in the low 80s for a move to the 100 area. (FNN "World Business Update", 6/13)

CSX CORP. is featured in the "Company Spotlight" in "USA Today" this morning. "The good thing is they've been moving very aggressively to cut costs and streamline their rail operations," says railroad analyst GRAEME LIDGERWOOD of FIRST BOSTON CORP. "They've got very good operating assets and never seemed to come through with what I'll call their promises," says MERRILL LYNCH analyst DON POWELL. "But there's huge potential." He rates the stock a "weak buy." ("USA Today", 6/13)

Even though they have been lagging the blue chips, small cap stocks could be getting ready to take off, says DICK CARNEY, portfolio manager at GIT SPECIAL GROWTH FUND. "Whether it happens next month, this quarter [I don't know] - I do think it happens in 1990." Carney says 1990-1995 will be a period when small stocks outperform large ones. While many other

money managers are talking about small caps, "they are not doing anything about it yet." (CNBC "World Business", 6/13)

#90164m0002 06/13/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 13) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

This morning in London the sterling was firmer against the mark and the U.S. dollar in early morning trading. "Fundamentally and technically the [British] pound has broken above resistance levels Mechanism of the European Monetary System] membership," says HARRY MUNDT, vice president at SECURITY PACIFIC NATIONAL BANK in Frankfurt. (Reuters, 6/13)

"The Financial Times" reported yesterday that Treasury officials expect Britain's underlying annual inflation rate to be low enough toward the end of the year to include the pound in the monetary system. "It seems like the speculation is that it's going to be sooner rather than later, and as that anticipation persists, sterling will be pretty much in favor against most currencies," says RONALD HOLZER, a vice president at the HARRIS TRUST & COMPANY in Chicago. (NYT, 6/13)

For the first time in 20 years, the three basic measures of U.S. money supply are expected to show a decline when May data are released tomorrow. "The across-the board weakness in monetary expansion last month is obviously a notable development," says WILLIAM SULLIVAN, director of money market research at DEAN WITTER REYNOLDS INC.

"In addition, the downturn in aggregates always has the chance of signaling problems for the economy." Sullivan added, however, that "at present, we do not regard the softer pattern of aggregate expansion as having major economic significance." ("Investor's Daily", 6/13)

"The Fed has already told us that they aren't going to ease policy," says a government bond trader who believes that unless the PPI and CPI are exceptionally poor the bond market will have little reaction. "As a result a lot of people have given up the hope that good inflation numbers would change that view." (NYT, 6/13)

"Near-term developments [for the bond market] will be contingent upon the inflation numbers to be reported for May," says ELLIOTT PLATT, of DONALDSON, LUFKIN & JENRETTE SECURITIES CORP.

"Those figures will have an extremely important bearing on the [monetary

and credit] policy decision to be made by the Federal Reserve's Open Market committee at its July 2-3 meeting, and on overall market expectations.

"We think that interest rates will continue to decline over the balance of the year. Within a few months, 30-year Treasury obligations should drop in yield to 8% and probably will be significantly below 8% at year-end. Rates at the short end of the yield curve are likely to decline by 0.75-1.00 percentage point between now and the end of the year." ("Investor's Daily" 6/13)

THE ECONOMY:

The COMMERCE DEPARTMENT reported yesterday that the nation's trade deficit as measured by merchandise and services and investment income, shrank to $22.9 billion in the first quarter, the smallest since the first-quarter of 1984. "It's a great improvement, much more than we expected," says LAWRENCE KROHN, a senior economist at SHEARSON LEHMAN HUTTON. "The trade picture this year is going to be a bright one." (WSJ, 6/13)

"We've seen a lot of evidence of slowing down" in the economy, says ERICH HEINEMANN of LADENBURG THALMANN & COMPANY. He believes this means that the fears of recession are not over.

"The way we read it, Fed policy is getting tighter." The lack of money supply and Fed draining reserves indicate that the Fed is not concerned about a possible downturn which could lead to recession. He thinks that bonds "are very attractive at these levels" and says that the stocks that he owns at this point "are all very, very defensive." (FNN "Marketwrap", 6/12)

ROBERT BARRO of HARVARD UNIVERSITY and XAVIER SALA i MARTIN of YALE UNIVERSITY present an unusual view of interest rates. They say that high interest rates are not bad for the economy. The two economists also say that the size of the Federal deficit doesn't matter.

This certainly goes against the conventional wisdom. As the two scholars see things, the chain of logic runs as follows: good business conditions lead to higher stock market prices as investors looking for profit opportunities eagerly bid up stocks.

And those higher prices suck in money from the rest of the economy. Interest rates go up as the demand for funds increases. And the process goes on beyond national borders. Opportunities in one country influence rates in the next.

"Rising stock markets abroad mean rising interest rates in the United States," Professor Barro says. "We were quite excited when we found this out." The two economists forecast an average interest rate of 5.5%,

adjusted for inflation, in most of the industrialized world for this year, falling to 4.7% as growth slows by the middle of the decade.

Their model has been criticized because it is still only a preliminary effort and because it "overstates how much economists really know about what moves interest rates," says ROBERT LUCAS JR., a professor of economics at the UNIVERSITY OF CHICAGO. (NYT, 6/13)

"For the remainder of the year, the outlook for commercial banking performance is mixed," says the FEDERAL DEPOSIT INSURANCE CORP. in its quarterly report.

"Small banks should continue to show improvement, especially in the Midwest and Southwest regions, while many medium-to-large institutions in the eastern United States are likely to experience further difficulties with real estate loans." ("The Washington Post", 6/13)

IN WASHINGTON:

A federal appeals court yesterday overturned the SECURITIES AND EXCHANGE COMMISSION's "one-share, one-vote" rule that was intended to prevent corporations from diluting the voting rights of their shareholders as a tactic to fend off corporate raiders. ("The Washington Post", 6/13)

#90164p5640 06/13/1990 ~PR Newswire

LOS ANGELES (JUNE 13) PR NEWSWIRE - Hanna-Barbera Home Video is scheduled to release six classic episodes of "The Jetsons" on videocassette June 28, it was announced today by Wendy Moss, senior vice president and general manager.

The vintage 30-minute videos, which follow the space-age adventures of George Jetson, his wife Jane, daughter Judy, son Elroy and family dog Astro, will be available in stores with a suggested retail price of $9.95 per episode. Following the release of Hanna- Barbera Home Video's Jetsons package, "Jetsons: The Movie," the new full-length animated feature film from Universal Pictures and Hanna- Barbera Productions, opens in movie theaters nationwide on July 6.

"'The Jetsons' is one of the most popular animated series in TV history," said Moss. "These videos represent some of the many entertaining and memorable episodes from the classic early years."

In "No Space for Sprockets," George is caught in the middle of a property line dispute between archrivals Spacely Sprockets and Cogswell Cosmic Cogs. When Elroy and Astro run away from home, the two mistakenly link-up with a band of gangsters in "Elroy's Mob." George and Jane's second

honeymoon in "Las Venus" is cut short when Mr. Spacely calls with urgent business. Elroy's troop of Space Cubs coax George into chaperoning a camping trip in "Good Little Scouts." In "Astro's Top Secret," industrial warfare turns into canine comedy when a Cogswell spy reports that George's new invention has Astro flying. Mr. Spacely becomes a "Microchimp Chump" when he hires a pushy new robot as office supervisor who records what the employees really think of their workplace.

The family of the future, the Jetsons used many devices in the home and workplace which were considered "out of this world" then. Today, microwaves, moving sidewalks, big screen television sets, video phones and personal computers are conveniences available to everyone.

All of the new home videos contain special Hanna-Barbera cartoon trivia fun and games. The June package adds six new titles to the selection of Jetsons cassettes already available to consumers including "The Jetsons First Episodes," "Rockin' with Judy Jetson" and "Jetsons Millions."

Hanna-Barbera Home Video Inc., and its affiliates, including Hanna-Barbera Productions Inc., are wholly owned subsidiaries of Great American Broadcasting Company (GABC) (NASDAQ: GACC). GABC's other operations include five network-affiliated television stations, 12 FM radio stations and six AM radio stations in the nation's top 50 markets. GABC is a wholly owned subsidiary of the Great American Communications Company, which trades on the NASDAQ under the symbol GACC.

SALEM, NH (JUNE 13) PR NEWSWIRE - Hadco Corporation (NASDAQ: HDCO) today announced that it has acquired 300,000 shares of common stock from Horace H. Irvine II, chairman of the board of directors of Hadco and its largest stockholder, for a purchase price of $4-7/8 per share, and that it has acquired 100,000 shares of common stock from certain trusts created in the past by Irvine, also for a purchase price of $4-7/8 per share. After these purchases, Irvine and these trusts and certain other trusts created by him hold a total of 3,884,216 shares of common stock of Hadco, representing approximately 37 percent of Hadco's total outstanding shares of common stock. Irvine and all these trusts have agreed for a period of nine months to refrain from engaging in over-the-counter (S.E.C. Rule 144) sales of their 2,104,216 shares not currently pledged to banks.

Hadco Corporation also announced that its board of directors has authorized the purchase of up to as much as an additional $2 million of

its shares of common stock on the open market in periodic purchases in calendar 1990 (unless the program is sooner terminated by the board) when and if market prices are at levels deemed appropriate by the board. Hadco's directors and officers have agreed for the balance of calendar 1990 and until Jan. 10, 1991 to refrain from engaging in over-the-counter (S.E.C. Rule 144) sales of their shares.

Hadco is a leading independent manufacturer of dense double-sided and multilayer printed circuits, serving customers in the computer, telecommunications and industrial automation industries. The company also manufacturers backplanes for electronic interconnect systems. It operates six facilities in the United States.

SAN BRUNO, CA (JUNE 13) PR NEWSWIRE - The board of directors of North Lily Mining Co. (NASDAQ: NLMC) is pleased to announce the results of a trenching program completed on the recently acquired Nine Mile Property located in Western Montana.

The trenching program was designed to verify previous results, identify drill targets along the east-west trending fault system, and determine the potential magnitude of the gold resource.

Trenches excavated at intervals along the 4,400-foot strike length all encountered significant gold mineralization. One trench across the western portion of the vein returned an average of 0.307 ounces of gold per ton. Across the eastern extension of the vein, a 250-foot trench was excavated from which channel samples averaged 0.108 ounces of gold per ton.

The outstanding results obtained have prompted North Lily to immediately commence a diamond drilling program on the Nine Mile Property to delineate reserves.

CONTACT: Thomas L. Crom of North Lily Mining Co., 415-742-0133.

NEW YORK (JUNE 13) PR NEWSWIRE - Quotron Systems, Inc. and Merrin Financial, Inc. today introduced E-Trade, a new electronic transaction service that provides a communications link between institutional investors and their brokers. When connected to a front-end trading system such as the Merrin Financial Trading System, E-Trade becomes a

comprehensive order-management and communications facility for securities traders.

A high-performance data link, E-Trade transmits orders, execution notices, allocations and administrative messages electronically from institutional traders to brokers. Because orders are entered and routed electronically E-Trade eliminates the need to re-key information at each step of the transaction process, reducing clerical tasks required to enter orders and process trades and eliminating errors due to illegible handwriting, misunderstood phone instructions or faulty calculations. All order activity is consolidated on a single screen and can be checked at a glance simplifying order management and speeding communications.

Quotron's open systems architecture allows customers' proprietary trading systems to be fully integrated with E-Trade using a standard applications program interface. E-Trade's "electronic order tickets" can be sent directly to proprietary trading systems, order-routing networks or automated transaction systems -- without rekeying information. E-Trade can also be linked to accounting or portfolio management systems, allowing real-time access to inventory or customer positions.

Merrin Financial, Inc., a leader in the software-development field specializing in the securities industry, designs efficient information systems for operations, trading and research.

Quotron Systems, Inc. delivers real-time prices for more than 120,000 investment instruments from 67 exchanges through an international network of more than 100,000 terminals in 23 countries. Quotron also provides sophisticated trading and decision-support systems, analytical software, integrated services for brokerage operations, access to third-party databases and highly reliable communications network services to its customers worldwide.

BROOMALL, PA (JUNE 13) PR NEWSWIRE - Scangraphics Inc. (NASDAQ: SCNG) announced today the signing of a Value Added Remarketer (VAR) Agreement with Auto-trol Technology Inc. (NASDAQ: ATTC) of Denver.

Under the contract, Auto-trol will remarket Scangraphics' CF series large format scanners. The CF Scanners will be integrated into Auto- trol's standard product offerings which include computer-aided design, engineering, and manufacturing systems, as well as technical illustration, electronic publishing, information management, and mapping systems. Specific terms of the agreement have not been disclosed.

Auto-trol has placed its first order with Scangraphics for a CF 1000 Scanner. The CF 1000 will be part of a technical documentation system which Auto-trol will install at Boeing Computer Services in Wichita, Kan. The CF 1000 is a high resolution scanning device with selectable resolutions from 200 to 1000 dots per inch (dpi). It will be used at Boeing to scan technical illustrations. The scan files will be input to an Auto-trol Electronic Publishing System.

"The contract between Scangraphics and Auto-trol gives the two companies an opportunity to work together to provide a full range of large format scanning products to Auto-trol's customers," stated Andrew E. Trolio, president of Scangraphics. "We are excited and looking forward to working with Auto-trol, a leader in the industry."

Auto-trol, founded in 1962, is a $78 million company with an installed base in 56 countries. It provides comprehensive integrated solutions for CAD/CAM, CAE, electronic publishing, technical information management, and mapping applications.

Scangraphics is a major supplier of document and aperture card scanners and software to value added remarketers and systems integrators in the image management industry. In addition to the CF 1000, Scangraphics offers Models CF 500 and CF 300 for applications requiring lower resolutions.

#90164p5659 06/13/1990 ~PR Newswire
JACKSON, MI (JUNE 13) PR NEWSWIRE - For the third consecutive year, Consumers Power Company has earned the National Safety Council's First Place Award as the nation's safest major gas and electric utility. The company's 9,300 employees in 1989 achieved the safest work performance among large combination utilities in the nation.

In the past nine years, Consumers Power has received the National Safety Council's First Place Award six times: 1981, 1984-85 and 1987-89.

"Consumers Power's employees have earned their reputation of operating one of the nation's safest utilities by paying attention to safe practices in their work every day," said T.C. Gilchrest, president of the National Safety Council. "For Consumers Power to maintain its high level of safety performance so consistently, over such a long period of time, is a truly remarkable accomplishment," Gilchrest added.

Consumers Power's employees in 1989 recorded a lost workday incident rate of 0.09, the best in the nation for a gas and electric utility with more than 5,000 employees. The average lost workday incident rate in the utility industry last year was 0.89.

"Repeating as one of the best utility safety performances in the nation for the third straight year is a difficult task, for which Consumers Power employees should feel proud," said Frederick W. Buckman, president and chief operating officer.

Also in 1989, Consumers Power employees surpassed their own record for the longest uninterrupted safe work period in the utility industry by working 7.8 million hours safely, from Dec. 5, 1988 to May 2, 1989.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90164p5662 06/13/1990 ~PR Newswire
SAN DIEGO (JUNE 13) PR NEWSWIRE - Mycogen Corp. (NASDAQ: MYCO) and Monsanto Co. (NYSE: MTC) announced today they signed an agreement to collaborate on the development of plants genetically improved to resist certain plant parasitic nematodes.

Plant parasitic nematodes are soil-borne, microscopic roundworms that feed

on the roots of plants, reducing yields of many important crops, including soybeans, tomatoes and potatoes. Annual worldwide crop damage because of these pests is estimated in the billions of dollars.

Under the terms of the agreement, Mycogen will isolate genes from the bacterium Bacillus thuringiensis (B.t.) responsible for the production of proteins active on plant parasitic nematodes. Monsanto Agricultural Company will transfer and express these genes in crop plants.

"We believe that genetically modified plants are the most practical delivery system for fighting nematodes with B.t.," said Leo Kim, Ph.D., Mycogen's executive vice president, research and chief technical officer. "Our agreement with Monsanto, a leader in the development of genetically improved plants, should provide an opportunity to evaluate this technology and to realize its potential for plant protection."

"Monsanto has demonstrated, over a period of several years, marked success in developing genetically improved plants for pest resistance," said David Fischhoff, Monsanto plant sciences group leader. "Mycogen's nematode-active B.t. proteins represent a unique opportunity to address a major source of crop loss."

The primary control measures for plant parasitic nematodes are chemical fumigants and traditional plant breeding. However, recent restrictions on chemical nematicides due to environmental and safety concerns have limited their availability. Nematodes have also developed resistance to some chemical nematicides.

Traditional plant breeding is a lengthy process which can limit its utility. The genetic procedures developed by Monsanto will speed up this process.

"Plants that produce the nematode-active B.t. protein in their roots would give growers the best of both worlds -- combining the advantages of traditional plant breeding methods while offering an effective, more environmentally compatible alternative," Kim said.

Nematodes feeding on the roots of these plants would ingest the B.t. protein and die. While highly specific for the targeted species, B.t. has been shown to not be harmful to humans, wildlife or beneficial species such as honeybees.

Mycogen first announced the discovery of B.t. strains that produce these plant nematicidal proteins in September 1989. Monsanto plant biotechnologists have demonstrated the feasibility of gene transfer and expression of B.t. proteins active on insect pests in tomatoes, cotton and potatoes.

Mycogen will receive funding from Monsanto to support research efforts and will also receive additional benchmark payments and royalties on plants commercialized under agreement terms.

Monsanto Co. is a broad-based chemicals, agricultural products, pharmaceutical, food ingredients and flow controls company headquartered in St. Louis.

San Diego-based Mycogen Corp. develops, manufactures and markets biopesticides for the control of a variety of insects, weeds and other pests. Mycogen's biopesticide products are based on natural agents such as microorganisms and fatty acid compounds which biodegrade rapidly in the environment.

CONTACT: James R. Glynn, Executive VP and CFO of Mycogen Corp., 619-453-8030, or Lisa M.K. Drake of Monsanto Co., 314-694-3540.

DAYTON, OH (JUNE 13) PR NEWSWIRE - Shopsmith, Inc. (NASDAQ: SHOP) today reported that while sales grew by 15.6 percent from $44.2 million (after reclassification of fee income) in fiscal 1989 to $51.0 million in the current year, net profit declined to $321,000, or $.14 per share, for this year from $1,470,000, or $.67 per share (after restatement for the September 1989 50 percent stock dividend), for last year.

Shopsmith's chairman and chief executive officer, John R. Folkerth, said, "While the sales increase is certainly welcome, our greatest priority is the resumption of our profit growth. We invested significant funds in the company's future in fiscal 1990 for projects such as an improved manufacturing system, 12 new stores, a new Shopsmith operation in Great Britain and a number of new products. These efforts should aid our profit growth in the future.

"Good potential exists for improvements in other areas such as productivity and product cost," Folkerth continued. "As a part of this effort, we will be deferring the opening of new retail stores for much of fiscal 1991. This time will be used to enhance the profitability of

existing stores and other efforts."

Folkerth indicated, "Sales have been slower than normal early in fiscal 1991. Our objective is to control first-half operating losses so that we are better positioned for the stronger final two quarters of the year."

Shopsmith plans to introduce a number of new products early in the new fiscal year including a device to increase the speed of the Mark V for routing and shaping operations, a version of their popular biscuit joiner which has been modified to operate on any standard drill press and a device incorporating the use of a hand-held router that facilitates the production of highly sophisticated jointery.

Shopsmith is the leader in the production and marketing of quality multipurpose woodworking tools. The company markets more than 1,200 products through mail order and through 43 company-owned stores in the U.S. and Canada.

Results for the Years ended March 31,

	1990	1989(A)
Net sales	$51,047,000	$44,127,000
Gross profit	25,099,000	23,216,000
Income before income taxes	485,000	1,943,000

PITTSBURGH (JUNE 13) PR NEWSWIRE - Security Bureau Inc. (SBI) announced today that it has acquired the security guard contracts of Constructive Communication Corp., a subsidiary of ADT Security Systems West Inc., of Long Beach, Calif., and Central Security Guards Inc., a subsidiary of ADT Security Systems Southwest Inc. of Phoenix, Ariz.

The contract acquisitions are expected to generate annual revenues of $3.6 million.

ADT Security Services has branch operations in San Diego, Palm Springs and Anaheim, Calif., and Phoenix, Ariz.

"These contract acquisitions are excellent for SBI because ADT has established an outstanding record of quality service to its customers," said Gordon M. Ellis, SBI's president and chief operating officer.

"In the rapidly expanding security business, SBI is making well-planned acquisitions which complement the company. We are proceeding within the strategy and business plan developed by Chambers toward an optimum mix of the security and solid waste businesses.

"Also, the new contracts will continue to enhance our position as a leader in security programs across the country and help differentiate SBI services to meet the ever-increasing client demands for high quality security programs," Ellis said.

SBI, a wholly owned subsidiary of Chambers Development Company Inc. (AMEX: CDVB) of Pittsburgh, provides uniformed guard services, crisis management, security surveys, loss prevention and investigative services.

Chambers is a leading environmental firm, offering services in collection, hauling, disposal, recycling and landfill development.

DENVER (JUNE 13) PR NEWSWIRE - TSL Inc. (NASDAQ: TSLI) announced today that it and Regent Enterprises Inc. have agreed that the proposed acquisition by TSL of Regent should occur on or before Aug. 31, 1990. In this regard, both companies have further agreed to extend the existing letter of intent.

"All parties are very pleased with the way in which this agreement is coming together," said Yoram Curiel, chief executive officer of TSL. "It is an acquisition which will merge TSL's packaging technology and extensive pharmaceutical industry contacts with an innovative, experienced and growing manufacturer of food packaging having a very solid management team."

"Regent Enterprises is excited about the prospect of combining its quality packaging lines with a firm having the leading-edge technology in the tamper-evident packaging field," said Bob Hadraba, chairman and chief executive officer of Regent Enterprises. "I predict the new packaging products produced by this combination and the opportunities to manufacturers will have a major impact on the packaging industry.

Regent Enterprises, based in Carol Stream, Ill., is a leading manufacturer of flexible packaging, with a broadly diversified product line. It manufactures and markets through its flagship division, Sealcraft, which currently employs 140 people.

Based in Denver, TSL specializes in anti-tampering technologies for the pharmaceutical, food, cosmetic, security and packaging industries. The company holds patents on some of the most unique tamper-evident systems in the world.

ANAHEIM, CALIF. (JUNE 13) PR NEWSWIRE - Carl Karcher Enterprises Inc. (NASDAQ: CARL) today reported increased revenues for the first quarter of fiscal 1991, although, as anticipated, earnings for the period were slightly below those of the previous year's quarter.

For the 16 weeks ended May 21, 1990, net income was $5.3 million, equal to $.29 per fully diluted share, compared with $5.7 million, or $.30 per fully diluted share, in the first quarter of last year. Revenues advanced to $157.1 million from $148.9 million last year.

"Our decision to restructure our Arizona operations and concentrate our

efforts in California is producing encouraging results," said Donald F. Karcher, president and chief operating officer. "We achieved essentially the same operating earnings as we did a year ago, despite a general softening of sales throughout the quick-service restaurant industry.

"Over the coming months, we are confident that we will resume earnings growth through well-targeted, revenue-enhancing promotions and through continued implementation of cost-cutting measures throughout the company including certain staff reductions," Karcher added.

Carl Karcher Enterprises Inc. is the parent company for Carl's Jr., a regional fast-food restaurant chain distinguished by it varied menu and healthful, premium quality products. Founded in 1941, the company, its franchisees and licensees operate 537 restaurants in California, Nevada, Oregon, Arizona and Japan.

CONTACT: Loren Pannier, CFO of Carl Karcher Enterprises Inc., 714-778-7109; or Roger S. Pondel or Susan Klein of Rifkind Pondel & Parsons, 213-207-9300, for Carl Karcher Enterprises Inc.

#90164p5681 06/13/1990 ~PR Newswire

GLEN COVE, NY (JUNE 13) PR NEWSWIRE - North Hills Electronics, Inc. (NASDAQ: NOHL) today reported revenues and earnings for the first quarter ended April 30, 1990.

For the first quarter ended April 30, 1990, the company reported a 22 percent increase in revenues, to $3.49 million compared to revenues of $2.85 million for the quarter ended April 30, 1989. Operating income in the quarter was $251,000, up 79 percent from the prior year. Net income for the first quarter was $77,886, or 3 cents per share, compared to net income of $20,408, or 1 cent per share for the same period a year ago. Gross margins remained at 41 percent.

The revenue increase was driven by significantly higher shipments of Local Area Network (LAN) products and Mil Std 1553 Data Bus Couplers. The LAN product line, with recent new product introductions, has gained strong domestic and international market acceptance. Sales of LAN products increased 31 percent in the quarter relative to a year earlier. In addition, the company's Data Bus Coupler sales increased 34 percent on a comparable basis, and market share continues to grow through an expanding customer base.

Howard G. Anders, president of North Hills, said, "The company continues to make strong progress toward becoming a market leader in our core businesses. Bolstered by numerous new product introductions, the LAN line has posted significant gains in orders and shipments. With additional products set to be introduced throughout the remainder of the year, this trend should continue. Our line of data bus couplers booked several important new orders in the quarter that have multi-year add-on potential. As with the LAN products, shipments and orders of coupler products were up significantly over the same quarter a year ago. These developments bode well for North Hills, both in the near term, and the next several years."

North Hills Electronics, Inc. is a manufacturer of high-quality electronic equipment. The company's products are used for electronic signal components, sophisticated data transmissions, and electrical impulse systems.

TAMPA, Fla. (JUNE 13) PR NEWSWIRE - One out of every six patients who visits a family practice physician or internist suffers from depression, said the chairman of the University of South Florida's Department of Psychiatry and Behavioral Medicine.

Dr. Anthony Reading, professor and psychiatrist-in-chief at the USF Psychiatry Center, said depression is difficult to diagnose because patients often deny their feelings and the symptoms of depression may mimic those of other illnesses such as Epstein-Barr virus, endocrine disorders, and chronic infections.

Depressed patients often come to the physician's office complaining of pain or fatigue, he said. "But, the fatigue that goes along with depression is different from fatigue experienced after exertion. It is inertia -- difficulty in getting going."

Hopelessness is a more reliable indicator of depression and potential suicide than sadness, he said. "Depression is literally a loss of hope rather than just an onset of sadness."

Depressed persons have trouble adapting to their losses and often have no expectations or plans for the future, he said.

Although six percent of the population suffers from depression, less than 50 percent receive any type of treatment, Dr. Reading said. Complications of untreated major depression include suicide, substance abuse, accidents, job loss, divorce and chronic disabilities.

Once diagnosed, he said, 80 to 90 percent of depression cases can be effectively treated, usually with a combination of medication and psychotherapy.

TROY, MI (JUNE 13) PR NEWSWIRE - Gail Ray, president of Simtec Computer Rentals, a wholly owned subsidiary of Inacomp Computer Centers Inc. (NASDAQ: INAC), recently announced the appointment of Franklin Van Splunteren to vice president. Van Splunteren joined Simtec in August 1989 as director of operations.

"Franklin's contributions have been a tremendous asset to the growth and positioning of Simtec in the marketplace," noted Ray. "With his experience in the computer rental industry, I am confident his new role as vice president will strengthen Simtec and its management team, especially as we increase our franchise base." Currently, Simtec has five company-owned locations and recently launched an aggressive nationwide franchising campaign.

Van Splunteren will add to his duties of directing the company-owned centers and franchise operations the task of solidifying relationships with Simtec franchises and Inacomp regions and retail centers. "It is important for us to cultivate our ties with Inacomp," he stated. "We have a lot to offer them. Simtec can add significantly to their total solution package."

Previously, Van Splunteren was director of operations at Personal Computer Rentals Corp., a 47-unit publicly held computer rentals franchise based in Miami.

In addition, he was president of his own computer solutions firm, V.S.C., in Caracas, Venezuela.

Van Splunteren was educated in Europe and South America. He completed his graduate degree in nuclear physics from the University of Lowell in Massachusetts with extensive use of computers. He passed qualifying exams for a doctor of philosophy degree in solar physics at Boston College in Massachusetts. He is fluent in Dutch and Spanish. He resides with his wife and 4-year-old daughter in Bloomfield Hills, Mich.

PARSIPPANY, N.J. (JUNE 12) PR NEWSWIRE - Standley H. Hoch, chairman, president and chief executive officer of General Public Utilities (NYSE: GPU) announced today that Carl X. Brooks, of Franklin Township, N.J., will be elected vice president of materials and services for GPU Service Corp.

Brooks will assume his new duties on July 1, 1990. He has been a division director at GPU's subsidiary, Jersey Central Power & Light.

In his new post, Brooks will be responsible for the corporate role in the areas of materials management and corporate services.

Hoch said, "Carl Brooks brings to this post a strong background in materials and procurement and solid operating management experience."

A native of Philadelphia, Brooks joined JCP&L in 1977 as a manager of contracts before being promoted to assistant director of JCP&L's former Coast Division. In 1987, he was appointed director of the Coast Division. He was named director of JCP&L's Shore Division last year, when the company realigned its operating divisions.

He was selected to take part in Leadership New Jersey, a program that confronts major issues facing New Jersey and includes people who have combined successful careers with extensive community participation.

Before joining the GPU System, Brooks was a senior contract administrator at Burroughs Corporation. Prior to that, he was assistant contracts administrator at Boeing Vertrol Co. He received an M.B.A. degree from Southern Illinois University and a bachelor's degree from Hampton Institute, Philadelphia.

Brooks succeeds Fred Glickman, who retired. An electric utility holding company, GPU's three operating subsidiaries, Jersey Central Power & Light, Pennsylvania Electric and Metropolitan Edison, provide about 39 billion kilowatt-hours of electricity to more than 1.8 million customers in a service territory encompassing about half the land area of Pennsylvania and New Jersey. GPU has two service subsidiaries, GPU Service, which provides integrated system plans and services, and GPU Nuclear, which operates the subsidiaries' nuclear plants.

#90164p5688 06/13/1990 ~PR Newswire

NEW YORK (JUNE 13) PR NEWSWIRE - Woolworth Corporation (NYSE: Z) announced an upward revision in its planned cash capital spending for the current year to a record $365 million, an increase from $325 million in cash capital outlays initially budgeted and previously announced for the year ending Jan. 26, 1991.

The expenditures will be used principally for the opening of some 825 new stores planned for this year, up from 735 new stores announced earlier, according to Harold E. Sells, chairman and chief executive officer. Over 90 percent of the new stores will be specialty units, and of these most will be concentrated in five of the most prominent of Woolworth's more than 40 formats, he stated.

The new higher spending level is 15 percent greater than the cash capital outlays of $315 million in 1989. As in recent years, the cash capital expenditures for 1990 will come entirely from internal sources, Sells said.

Woolworth Corporation currently operates over 8,200 stores and related

support operations in 16 countries on four continents -- North America, Europe, Australia and Asia -- constituting the most extensive retail network of any United States-based retail company. Of these stores, over 1,650 offer general merchandise and more than 6,600 are specialty units, comprising the world's largest specialty store operation.

The five specialty formats slated to benefit most from the 825 planned additional stores this year are Foot Locker, Woolworth's fast growing, brand-name athletic footwear and apparel stores; Lady Foot Locker, featuring women's athletic footwear and apparel; Kids Mart, offering promotionally priced, brand-name infants' and children's apparel and accessories; Champs Sports, specializing in sporting goods and athletic footwear and apparel; and Afterthoughts/Carimar, featuring popularly priced costume jewelry, handbags and accessories for younger women.

Woolworth last year posted record net income of $329 million, up 14 percent over the $288 million in net income earned the year before. Revenues in 1989 totaled $8.8 billion, up 9.1 percent from the prior year's revenues of $8.1 billion.

#90164p5690 06/13/1990 ~PR Newswire

CHAPEL HILL, NC (JUNE 13) PR NEWSWIRE - An experimental very-high-speed telecommunications system to be used for research on advanced networking will be built between Chapel Hill and Durham County, N.C., by GTE, BellSouth, MCNC (a university, industry and State of North Carolina research consortium) and the University of North Carolina at Chapel Hill (UNC-CH).

Initial application will use computer graphics to provide sophisticated medical imaging for the study of cancer treatment.

Using transmission speeds that may ultimately reach 2.48 billion bits-per-second, the network will allow UNC-CH cancer researchers to access an MCNC-operated CRAY supercomputer in Research Triangle Park, some 18 miles away. The fiber-optic network will use very-high-speed, broadband digital switches provided by GTE Laboratories and BellSouth Services.

VISTAnet is one of five gigabit testbeds being organized by the Corporation for National Research Initiatives (CNRI) to explore the architecture and application of very-high-speed networks, with funding from the National Science Foundation and the Defense Advanced Research Projects Agency. Substantial additional funding for VISTAnet will be provided by GTE and BellSouth. MCNC and UNC will provide further support in the form of in-kind services.

The VISTAnet effort is seen as part of the research needed to develop the National Research and Education Network.

Using VISTAnet, clinical oncologists at the UNC-CH Medical Center will transmit CAT-scan images of cancer patients to the CRAY supercomputer which, in conjunction with a UNC-designed, state-of-the- art graphics computer (Pixel Planes 5) at UNC-CH's Department of Computer Science, will produce high-definition, 3-dimensional graphics of the images.

GTE Laboratories is the central research facility for GTE. Located in Waltham, Mass., the Laboratories conducts a broad program of research in telecommunications, lighting and precision materials in support of GTE's three core businesses.

GTE Telephone Operations serves more than 14.9 million access lines through its domestic and international telephone companies in 31 states, Canada and the Dominican Republic. In North Carolina, its subsidiary operating area -- GTE South -- provides telecommunications services to many communities, including the Research Triangle Park.

GTE is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing products and services worldwide.

#90164p5692 06/13/1990 ~PR Newswire

WASHINGTON (JUNE 13) PR NEWSWIRE - renowned criminal defense attorney Thomas C. Green has been named a partner in the law firm of Sidley and Austin.

Green is based in the firm's Washington office where he specializes in civil and white collar crime and federal enforcement cases. Green comes to Sidley and Austin from the Washington law firm of Sharp, Green and Lankford.

Green is a former Assistant U.S. Attorney for the District of Columbia and has practiced law in Washington for more than 20 years. Throughout his career, he has taught civil and criminal trial practice at clinical programs sponsored by law schools, bar associations and the National Institute of Trial Advocacy.

"The increase in federal legislation in virtually every regulatory area has created potential criminal liability for a large variety of corporate

activity. Tom's superb reputation in the area of white collar criminal law and his tough, no-nonsense style make him a leader in this practice," said Robert McLean, managing partner of Sidley and Austin's Washington office.

Green principally represents major corporations, as well as national, public figures in connection with federal and Congressional investigations. He has represented clients in many of the most significant criminal cases in recent time, including the Watergate case, the prosecution of former Maryland Governor Marvin Mandel, the "Studio 54" investigation during the Carter Administration and the Iran-Contra Affair. Green currently represents Sen. Donald W. Riegle, Jr. (D-Mich.) in connection with the Senate Ethics Committee's current inquiry.

Born in Minneapolis, Green is a 1962 graduate of Dartmouth College and received his law degree from Yale University in 1965. A member of the District of Columbia Bar, he belongs to the District of Columbia and American Bar Associations as well as the National Association of Criminal Defense Lawyers.

Sidley and Austin is one of the largest law firms in the United States. The firm was established in 1866 and has grown to include more than 700 attorneys in Chicago, New York, Los Angeles, Washington, London, Tokyo and Singapore.

#90164p5694 06/13/1990 ~PR Newswire

HOUSTON (JUNE 13) PR NEWSWIRE - The Public Utility Commission of Texas (PUC) has confirmed in permanent rates for Houston Lighting & Power Company (HL&P) a base rate increase of $227 million originally implemented under bond in June 1989. The PUC allowed HL&P a 12.92 percent return on equity.

In a related ruling regarding the prudence of expenditures associated with the construction of the South Texas Project (STP), the PUC disallowed $375.5 million of HL&P's $2.8 billion investment. STP is a two-unit nuclear generating station located near Bay City, Texas, in which HL&P owns a 30.8 percent interest in STP and serves as project manager.

The action on STP is expected to be the PUC's final decision regarding the prudence of expenditures associated with the planning and construction of STP.

The PUC disallowance results in a permanent rate base reduction of $366 million after considering deferred taxes and the previous cost deferrals

associated with STP. However, for financial reporting purposes, HL&P's preliminary estimate is that the disallowance will require an after-tax charge to its 1990 earnings of about $23 million. Offsets to the STP disallowance result primarily from a successful litigation recovery from the original architect/engineer and constructor of STP. Other amounts will be charged against equity deferrals allowed but not permitted by accounting standards to be included in financial statements.

The rate case order -- HL&P's first permanent rate increase since December 1986 -- concludes the first phase of a three-phase rate moderation plan. In the first phase, HL&P will begin recovering a portion of its investment in STP Unit 1 and the balance of its Limestone Electric Generating Station investment. In phases two and three, HL&P will request rates for the balance of the STP investment found to be prudent in today's PUC ruling.

The PUC also ruled that HL&P should receive deferred accounting treatment for its investment in STP Unit 2. Under that treatment, HL&P will be permitted to capitalize operation and maintenance costs, depreciation and taxes associated with STP Unit 2 until that unit is reflected in electric rates, at which time HL&P will seek to recover the deferred costs. A similar deferred accounting treatment previously was granted for STP Unit 1.

HL&P is a subsidiary of Houston Industries Incorporated (NYSE: HOU).

NORTH BILLERICA, MASS. (JUNE 13) PR NEWSWIRE - Synernetics Inc. today announced that AT&T Microelectronics and 3Com Corporation have joined the SMT Development Forum. Through their memberships, both companies reaffirmed their continuing support of interoperable management for Fiber Distributed Data Interface (FDDI) Local Area Networks (LANs).

The SMT Development Forum is an organization of leading system developers, component vendors, and end-users dedicated to developing and promoting interoperable FDDI LAN management. Established by Synernetics in 1989, the Forum played a vital role in propelling the FDDI Station Management (SMT) standard to completion. Forum members also jointly developed a design specification for an interoperable SMT implementation that ensures full FDDI standard compatibility.

As Forum members, both AT&T, of Berkeley Heights, N.J., and 3Com, headquartered in Santa Clara, Calif., will gain access to the latest developments in FDDI LAN management technology. Currently, the Forum is helping define a Management Information Base (MIB) so end-users can effectively manage their FDDI LANs using standard management interfaces such as Simple Network Management Protocol (SNMP).

This year, the Forum will also work on SMT for the emerging FDDI-II standard. Additionally, the Forum will monitor FDDI interoperability and conformance testing, GOSIP (Government Open Systems Interconnection Profile) specification, and FDDI-to-SONET (Synchronous Optical Network) mapping.

Previously announced Forum members include: Advanced Micro Devices, Inc.; Apple Computer, Inc.; CERN--European Laboratory for Particle Physics; GE Aerospace; IBM Corp.; Interphase Corp.; Lawrence Berkeley Laboratory; National Semiconductor Corp.; SBE, Inc.; Sumitomo Electric; and Synernetics Inc. Any company, organization, government agency, or university interested in Forum membership is invited to apply.

Synernetics is a leading developer and marketer of high-speed LAN system products. Using FDDI as their central technology, Synernetics' products and services enable computer users to get the full benefit from high-performance LAN systems based on industry standards. Headquartered in North Billerica, Mass., Synernetics is a privately held company.

THOMASVILLE, N.C. (JUNE 13) PR NEWSWIRE - Thomasville Furniture Industries, Inc., and LADD Furniture, Inc., (NASDAQ: LADF) announced today they have signed a letter of intent for Thomasville to purchase from LADD a 205,000-square-foot manufacturing plant at High Point, N.C., for an undisclosed amount. The announcement was made jointly by Frederick B. Starr, president of Thomasville Furniture, and Richard R. Allen, vice-chairman of LADD.

The proposed purchase, which is expected to be completed by the end of July, is subject to approval by the Boards of Directors of both Thomasville and its parent company, Armstrong World Industries, Inc. (NYSE: ACK). Included in the purchase will be furniture manufacturing equipment as well as the building and approximately 22 acres of land on which the plant stands.

The single-story manufacturing facility, situated on North Scientific Drive in High Point, was formerly operated by Charter Furniture, Inc., a company that LADD acquired in July 1989.

"The acquisition of this additional plant site, already equipped for furniture manufacturing, will provide us additional capacity to keep up with demand," said Starr. "This will enable us to provide our customers with continuous improvement in quality, value, and delivery."

He said that, after certain alterations are made to the plant and some equipment is added, Thomasville expects to begin furniture production there some time in 1991. He said no estimate is available as yet on eventual employment at the site.

Thomasville Furniture's headquarters are at Thomasville, N.C. The company and its affiliates operate a number of plants in North Carolina, Virginia, Mississippi and Tennessee.

SOUTH WINDSOR, CT (JUNE 13) PR NEWSWIRE - Cardinal Industries, Inc. (NASDAQ: CDNI) announced that it received shareholder approval of all of management's proposals at the annual meeting held yesterday at The Quality Inn in Vernon, Conn. Shareholders approved the board of directors consisting of Robert C. DuBeau, Richard A. Bearse and Earl Smith. In a vote requiring fifty-one percent of outstanding shares for approval, sixty-one percent of the shareholders approved of the creation of a class of preferred shares and the increase of authorized common shares from five

million to ten million shares.

Also approved, at the meeting was an employee stock option plan whereby 1,000,000 shares are to be set aside for purchase by key employees.

Lastly, shareholders approved the appointment of Price Waterhouse as the company's independent public accountants.

President Robert C. DuBeau stated, "We are pleased with the support that our shareholders have given us at this annual meeting. With the approval of these proposals we shall be able to consummate the agreements reached with our subordinate debt holder, Principal Mutual Life Insurance Company ("Principal") wherein Principal shall exchange five million dollars of subordinated debt for 100,000 non-voting redeemable preferred shares. These shares will pay a dividend of 8 percent of par payable in cash or additional shares. A significant aspect of this new agreement is the deferral and capitalization in excess of $1,000,000 of interest which will appreciably enhance our balance sheet, thereby substantially reducing our cash needs throughout the year while we continue to consolidate our operations."

Cardinal Industries, Inc. is a wholesale distributor servicing the Northeast. Through its building supply segment comprised of Seaboard Plywood & Lumber Company of South Windsor, Conn. and CDF Building Products of White River Junction, Vt., Cardinal distributes quality building materials and millwork to independent and multi-store merchandisers. Cardinal's industrial supply segment, which includes outlets in Providence R.I., Bridgeport and Hartford, Conn., Milford, Mass., Syracuse and Schenectady, N.Y., distributes industrial supplies and fluid power supplies to industrial users. The company's Crawford Garden Supplies distributes and imports lawn and garden products to independent and mass merchandisers.

PHILADELPHIA (JUNE 13) PR NEWSWIRE - William Austin Meehan will join the Philadelphia office of the law firm of Reed Smith Shaw & McClay on July 16 David C. Auten, managing partner, announced yesterday.

For the last 38 years, Meehan has practiced law in the firm of Meehan and Stoelker, a general civil and trial practice which included eminent domain probate, estate planning, business corporation and family law. Meehan's partner, Charles Stoelker, passed away last December.

Meehan is general counsel to the Philadelphia Republican City Committee

and has for decades been influential in local, state and national politics. The Republican City Committee is perhaps the only effective big city Republican organization in the United States and regularly plays an important role in statewide Republican primaries and general elections.

Meehan is also a prominent figure in Philadelphia's business community. He is the president of the Philadelphia City Board of Trusts, president of the board of Wills Eye Hospital and was the commissioner of the Pennsylvania Turnpike Commission from 1967-1974.

Meehan received both his B.A. and LL.B. degrees from the University of Notre Dame in 1948. He is a member of the Philadelphia, Pennsylvania and American bar associations.

Reed Smith Shaw & McClay is a firm of approximately 400 lawyers, with offices in Philadelphia, Pittsburgh, Harrisburg, Pa., Washington and McLean, Va. The Philadelphia office has grown from 18 lawyers in 1983 to more than 60 in 1990 and will continue to grow to meet the future needs of its clients.

WASHINGTON (JUNE 13) PR NEWSWIRE - Federal National Mortgage Association (Fannie Mae)(NYSE: FNM) today announced four changes in its senior management group.

Dale P. Riordan was named executive vice president -- operations and systems, with responsibility for the application of Fannie Mae's information technology to the company's business, financial, and public policy needs. Riordan has been with the company since 1981, most recently as executive vice president -- marketing. He also has served in senior positions in the areas of administration, policy and public affairs, and corporate planning.

Robert J. Levin will assume Riordan's former responsibilities and be nominated executive vice president -- marketing at the company's June 19 meeting of the board of directors. Levin has been with Fannie Mae since 1981, most recently as senior vice president -- marketing and Mortgage-Backed Securities. He has held various positions within the company, including financial analyst, assistant to the chairman, and senior vice president -- corporate finance.

Larry H. Dale will succeed Levin. Dale has been with the company since 1987, most recently as senior vice president -- multifamily finance and

housing initiatives. In his new position, he will be responsible for the marketing of Fannie Mae's products and services to mortgage lenders and Mortgage-Backed Securities investors. Dale will continue to oversee Fannie Mae's multifamily activities and housing initiatives until a successor is selected.

Samuel A. Alward was named special assistant to the president for information technology. He will serve as a technical advisor to the president on implementation strategies for systems development.

Alward has been Fannie Mae's executive vice president -- operations and systems since 1987.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned company and the nation's largest investor in American home mortgages.

CAROL STREAM, IL (JUNE 13) PR NEWSWIRE - Ben Franklin CEO Dale M. Ward is optimistic about the future of the company, as its recently announced "for sale" status means even more opportunities for expansion and continued success for the craft and variety franchisor and retailer.

Ward responded to news that National Intergroup Inc., Ben Franklin's parent company, plans to divest itself of Ben Franklin Stores along with most of its other holdings.

NII bought Ben Franklin Stores in 1986 when it also acquired FoxMeyer Corp. The last two years have seen Ben Franklin increase profitability through financial and structural reorganization, including the development of a new firm, Ben Franklin Crafts Inc., dedicated to franchising as well as building its own craft stores.

The combined wholesale and franchise operation -- Ben Franklin Stores, Inc., Ben Franklin Insurance Co. and Ben Franklin Crafts, Inc. -- was recently lauded as the best franchise investment in its category by Entrepreneur magazine. Estimated retail sales by Ben Franklin franchisees are $800 million annually.

"This is an exciting time for us," says Ward, the 40-year-old CEO credited with much of the financial turnaround of the company.

Ben Franklin just opened a state of the art company-owned craft store in Fort Wayne, Ind., and is planning to open five more similar units this

fiscal year.

"The Fort Wayne store opening was phenomenal! It was exciting to see such positive reaction to our new craft store program," said Dave Johnston, vice president, operations, Ben Franklin Crafts, Inc.

The success of Ben Franklin's new stores is especially timely with regard to the announced sale of Ben Franklin. The sale is being coordinated by Booz Allen Acquisition Services so that Ben Franklin management can focus on day-to-day operation.

"The Ben Franklin chain has a proud name and history. The recent turnaround and repositioning should make this company an interesting strategic buy for a number of major merchandisers," said Bob Tyre, vice president, Booz Allen Acquisition Services in New York.

"We view the expected sale as the perfect opportunity for a related merchandising group, investor or franchise operator," said Ben Franklin's Ward.

Ben Franklin Stores, Inc. and Ben Franklin Crafts, Inc. serve the nation's largest chain of franchised retail variety and craft stores.

#90164p5706 06/13/1990 ~PR Newswire

WILMINGTON, DE (JUNE 13) PR NEWSWIRE - Scientists at Duke University and Du Pont (NYSE: DD) have transferred genes directly into liver and skin cells of live laboratory mice, causing a genetic transformation that is an important research step in the prevention and treatment of genetic and other diseases.

Results of the experiments were reported today at the annual meeting of the Tissue Culture Association in Houston.

The researchers said direct delivery of DNA into selected tissues of several hundred mice stimulated the animals' cellular biosynthetic systems to produce a protein called luciferase. Because luciferase does not naturally occur in mice, its production signalled that DNA was transforming the animals' genetic makeup.

Traditionally, researchers harvest cells from live animals, transfer genetic material such as DNA into the cells, culture the cells, and reintroduce them into the animals.

The Duke team, headed by Dr. Stephen Johnston, employed technology used in Du Pont's "Biolistic" particle delivery system that delivers thousands of microcarriers coated with genetic materials directly into selected intact animal or plant tissue. The genetic materials were inserted into the ears thighs or, via surgery, the livers of live mice.

"The next step is to insert a therapeutically useful gene into animal liver cells where genetic enzyme deficiencies are often found," Dr. Johnston said. "Eventually, we hope to transform stem cells -- which reproduce -- and thus would result in cures or disease modification. We see gene therapy as a potentially significant advancement for the medical sciences."

Du Pont introduced its first "Biolistic" particle delivery system in 1989. The Duke scientists used a modified version that is compact and operates without the original vacuum chamber, thereby allowing more flexibility when working with live animals.

"Other areas of potential application for 'Biolistic' systems include creation of transgenic animals, gene regulation and expression in whole organs or tissue in situ, and genetic vaccines," said Dr. Sandra McElligott, a Du Pont scientist who worked with the Duke investigators.

Du Pont develops, manufactures and markets biotechnology systems for research and pharmaceuticals and diagnostics products for the healthcare industry.

BOULDER, CO (JUNE 13) PR NEWSWIRE - Cell Technology, Inc. (NASDAQ: CELL), the Colorado-based biopharmaceutical firm specializing in the development of biologic response modifier (BRM) technology, today reported the allowance of the company's first United States patent which includes comprehensive composition claims made in connection with its BRM technology as well as its anti-cancer application, ImuVert(R).

The claims also include the manufacturing process involving commercialization of the company's BRM technology.

In 1988, the U.S. Food and Drug Administration designated ImuVert as an orphan drug for primary adult brain cancer. ImuVert is comprised of a mixture of ribosomes and membrane vesicles. The combination is being evaluated as a treatment for astrocytoma and glioblastoma adult brain tumors in Phase II human clinical trials.

Throughout 1989, the company has noted issuance of related BRM patents protecting the company's technological inventions in jurisdictions throughout the world. The company has filed additional patents regarding other aspects of its BRM technology since the filing of its base patent application in the U.S. in 1986.

Commenting upon the importance of this announcement, Frederick C. Pearson, Ph.D., vice president of scientific operations of the company, noted that, "The approval of this patent is of utmost importance to the company. This patent indicates that recognition that our proprietary BRM technology is indeed novel and useful."

Cell Technology, Inc. is a biotechnology company specializing in the field of immunotherapy. The company's innovative BRM products are being developed to activate the body's own immune response to fight cancer, viral infections, and to act as a general immunomodulating agent.

CONTACT: W. Terrance Schreier, chairman, president and CEO; Frederick C. Pearson, vice president-scientific operations; or William H. Critchfield, vice president-finance and CFO, all of Cell Technology, 303-443-8155.

#90164p5724 06/13/1990 ~PR Newswire

KANSAS CITY, MO. (JUNE 13) PR NEWSWIRE - Kansas City Southern Industries Inc. (NYSE: KSU) and DST Systems Inc. (NASDAQ: DSTS) announced today that attorneys representing DST stockholders have agreed in principle to a proposed settlement of two DST stockholder class action lawsuits. The lawsuits were filed, one in Missouri state court and one in Pennsylvania federal court, on behalf of all DST stockholders in connection with the pending cash tender offer to purchase any and all shares of DST common stock. KCSI, DST and the directors of DST are named as defendants in one or both lawsuits.

The proposed settlement, which is subject to the parties entering into a definitive settlement agreement by June 29, 1990, recognizes that a benefit was conferred on DST stockholders when the tender offer price was increased from $14 to $15.85 per share on June 6, 1990. The settlement agreement will expressly provide that none of the defendants is admitting any violation of law or breach of duty. The defendants will be permitted to terminate the settlement agreement if holders of more than 2 percent of the DST common stock opt out of the settlement. The settlement agreement will be subject to certain conditions, including obtaining approval by the Missouri and federal courts, after notice to DST stockholders and a hearing, and dismissal of both lawsuits with prejudice.

In the event the settlement agreement is approved by the courts,

plaintiffs' attorneys are expected to seek attorneys' fees of $250,000 and expenses of up to $25,000. Any fees and expenses awarded by the courts within these limits will be paid by KCSI.

Under the pending cash tender offer, a subsidiary of KCSI has offered to purchase any and all of the approximately 2.5 million (12.9 percent) shares of DST common stock not already owned by KCSI for $15.85 per share. Following the scheduled expiration of the tender offer on July 6, 1990, KCSI expects to acquire any remaining DST shares in a second-step merger. The tender offer and merger are governed by an agreement and plan of merger approved by both the KCSI and DST boards of directors. DST's board of directors has recommended that DST stockholders tender their shares to KCSI.

Information about the tender offer and the merger, as well as the recommendation by DST's board of directors, has already been mailed to DST stockholders, who should tender their shares only after receiving and reviewing such information.

AUSTIN, TX (JUNE 13) PR NEWSWIRE - A slim, notebook-sized computer with the power of a conventional desktop PC was announced today by the CompuAdd Corporation.

By far the company's smallest personal computer, the new CompuAdd Companion has been engineered into an 8.5-inch by 11-inch by 1.4-inch package, weighs less than five pounds and can be carried easily in a briefcase.

Priced from $2,895, the CompuAdd Companion's standard features include an 80C286 processor running at 12MHz, 1MB of RAM expandable to 3MB, 20MB hard drive, 8-inch by 6-inch high-resolution VGA display, 79- key keyboard, rechargeable and replaceable internal battery pack, and an AC adapter.

For users who require optional peripherals, the AT-compatible Companion was designed for expandability via the built-in serial port, parallel port and modular expansion port.

CompuAdd also said the new system will come with MS-DOS 4.01 and Lap-Link software already installed in ROM. With Lap-Link and a serial cable included with the system, Companion users can exchange software and data with desktop systems.

The Companion will be available next month through CompuAdd's mail- order, retail and direct sales channels.

JACKSON, MI (JUNE 13) PR NEWSWIRE - Consumers Power Company has awarded scholarships to eight students from throughout Michigan to attend Michigan State University's 1990 High School Engineering Institute.

In a continuation of the utility's effort to stimulate student interest in the field of engineering, the company awarded scholarships to the one-week program based on student interest, grade point average and degree of need for financial assistance.

This year's institute will mark the 28th year that Michigan State University's Engineering Department has offered students the opportunity to explore their interest in the engineering profession. Approximately 120 high school students will live on campus June 17 through June 22, exploring various facets of the world of engineering in preparation for a possible career as an engineer.

Students receiving Consumers Power scholarships are Stacia Bowling, Hart High School; Heather Burke, Grand Blanc High School; Nina Das, Troy High School; Eric Hill, Houghton Lake High School; Dana McClellan, Alba High School; Kellie Ralph, Lumen Christi High School in Jackson; Jackie Stewart Kalamazoo Central High School; and Douglas Whitener, Whitehall High School.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

NEW YORK (JUNE 13) PR NEWSWIRE - Reuters (NASDAQ: RTRSY) today announced the opening of a news bureau in Calgary, Alberta. This is the fifth Reuter bureau in Canada, augmenting a reporting network already in place in Toronto, Ottawa, Montreal and Vancouver, British Columbia.

It brings to 37 the total number of Reuter bureaus in Reuters America, including 15 in the United States and 17 in Central and South America.

There are 116 Reuter bureaus worldwide.

The Calgary correspondent is Chris Reese, a journalism graduate of the University of Regina, Saskatchewan, and a former reporter for Nickle's Daily Oil Bulletin.

His primary responsibility will be to cover Western Canada's rapidly growing oil and natural gas industry. He will contribute daily reports to the Reuter Oil & Gas Service. His beat will also include economic, agricultural and general news from the Canadian Prairies.

The Calgary bureau is located at 250 Sixth Ave. SW, Bow Valley Square 4, Suite 550, Calgary, Alberta (phone: 403-265-7730).

Reuters supplies a wide range of services to both business subscribers and to the news media. It obtains its information from around 160 exchanges and over-the-counter markets, from data contributed directly by more than 3,715 subscribers in 82 countries and from a network of more than 1,270 journalists, photographers and cameramen. Reuters distributes information via around 199,700 video terminals and teleprinters. This includes information directly transmitted to clients' computers.

#90164p5735 06/13/1990 ~PR Newswire

HOUSTON (JUNE 13) PR NEWSWIRE - Synercom(R) Technology, Inc. (NASDAQ-NMS: SYNR) today announced that it has received an award from Digital Equipment Corporation (NYSE: DEC) to provide Synercom software as part of an integrated spatial systems solution for the Cincinnati Area Geographic Information System (CAGIS). CAGIS is a multiparticipant, public and private consortium that will share a spatial database to support applications for use by the individual organizations in managing information related to services, assets, and facilities.

According to Robert W. Forsyth, president and chief executive officer of Synercom, "The CAGIS consortium has been added to the roll-call of local governmental and private entities meeting the challenge of infrastructure management and growth through a multiparticipant spatial systems solution. CAGIS represents the commitment being made today by metropolitan communities to maintaining their future viability and quality of life."

CAGIS participants include Cincinnati Gas & Electric Company, Cincinnati Bell Telephone Company, and numerous agencies under the jurisdiction of the City of Cincinnati and Hamilton County. The organizations in the consortium are responsible for the delivery of services to an aggregate 873,900 citizens in Hamilton County. The facilities managed by these

organizations are dispersed over 414 square miles.

As currently contemplated, full implementation of the CAGIS plan calls for the installation of up to 150 workstations and multiple processing units over the next few years and the implementation of Synercom spatial systems software across the network. Actual purchases will be make by purchase orders under the agreement; however, the agreement provides for no minimum levels of software licensing. The CAGIS participants selected the spatial systems solution provided by Digital and Synercom because it offers a flexible system architecture that (A) allows system reconfiguration as participants are added and as participants needs change, (B) permits nonredundant distribution of the spatial database to multiple locations via a distributed database structure, and (C) supplies developmental tools that permit the creation of unique applications for each organization. In addition, participants will be able to integrate the CAGIS system with existing information systems based on IBM and UNISYS platforms.

Initially, the CAGIS system will be distributed across a communications network involving seven Digital VAXstation 3100 workstations. By using a distributed database structure, each CAGIS participant will be able to maintain proprietary data while transparently sharing common data across the communication network. In the next phase, an additional host will be installed along with six workstations to further distribute the database environment.

Forsyth points out that "the sharing of spatial data ensures return on the significant investment required to create a spatial database. Payback is directly proportional to usage. As usage increases and applications are developed, return on investment increases and costs are reduced on a per-access, per-usage basis." The initial study conducted by Utility Graphics Consultants of Denver, Colorado, revealed that the CAGIS participants will save $11 million over 15 years. This figure is based upon reducing the estimated $9 million per year that would be spent collectively by CAGIS participants using stand-alone, manual systems.

Already using a Synercom system, the Metropolitan Sewer District of the City of Cincinnati has identified 35 applications to be developed in conjunction with the CAGIS project. Sample applications across the organizations include facilities management, forecasting, inventory management, work-order processing, service-vehicle routing, disaster planning, tax mapping, and maintenance of road and road-related records.

Synercom provides integrated spatial systems solutions for major commercial and governmental organizations worldwide. Synercom offices and distributors of Synercom products are located worldwide.

FORT LEE, NJ (JUNE 13) PR NEWSWIRE - On-Line Software International, Inc. (NYSE: OSI) and Pansophic Systems, Inc. (NYSE: PNS) have completed a purchase agreement in a strategic move by both companies to capitalize on each other's marketing and technical strengths.

On-Line Software acquired and will integrate Pansophic's XPF(TM)/COBOL technology into its release of InterTest(R)/Batch, enabling users to debug and test batch COBOL and IMS programs. Pansophic acquired On-Line Software's IntelaGen(R) source code generator. Pansophic is the industry leader in COBOL code generators, and On-Line Software is the industry leader in testing and debugging tools.

"Pansophic's impressive technology allows us to be responsive to our customers," said William Pollack, vice president at On-Line Software. "The superiority of their batch software combined with our debugging strength will enable us to provide the most powerful tool set in the industry for CICS, batch and IMS debugging. Additionally, because Pansophic's TELON(R) product owns such a large share of the code generation market, they are the perfect company to meet the future needs of our IntelaGen customers."

Anthony Paoni, marketing vice president at Pansophic stated, "We wanted to do business with the best in the industry and we are pleased to be working with On-Line Software. We are confident that On-Line Software will continue to enhance the product and create a tight interface with InterTest.

We specifically looked for a company with dominance in the testing and debugging area, and we found it in On-Line Software. As for Pansophic," Paoni continued, "we see the IntelaGen acquisition as a means of offering new technology, TELON, to customers at a considerable savings. This should be well received by our new customers as they prepare for AD/Cycle(TM).

Pansophic Systems, Incorporated is headquartered in Lisle, Ill., with over 20 years of experience in the software industry. Pansophic has broadened its initial expertise in mainframe library management to include solutions for information retrieval, application development and control,

distribution and financial applications, and manufacturing. Pansophic is one of the world's largest packaged software companies with more than 75,000 installations of products at 18,000 mainframe, midrange, and micro computer sites.

On-Line Software International is headquartered in Fort Lee, N.J. The 20 year-old firm combines consulting and educational services with CICS, DB2(R) productivity software development systems products that enhance the productivity of IBM(R) computer systems users. As a Charter Vendor Member of the International DB2 User Group and a Founding Member of R/AD, the International Users Group for Repository and AD/Cycle, On- Line Software supports the IBM user community. With 16 domestic and international offices, On-Line Software's distribution network services more than 25 countries.

The company is an IBM Business Partner that has products and professional services utilized in more than 90 of the Fortune 100 corporations.

NEW YORK (JUNE 13) PR NEWSWIRE - Pan American World Airways will resume service at Newark Airport this fall, offering three daily flights to the carrier's hub in Miami.

Effective Oct. 28, Pan Am will offer a choice of morning, afternoon and evening 727-200 departures in both directions.

"We are pleased to be able to now offer our passengers a choice of all three major New York area airports for their travel to Florida and Latin America," said John Ruzich, managing director of sales for Pan Am's U.S. division. "The new service will bring to 12 the number of nonstop flights between the New York metropolitan area and Miami in peak season," he added.

The southbound flights from Newark will be timed to connect with Pan Am's operations between Miami and South and Central America and the Caribbean. In addition, passengers will be able to connect with Pan Am Express' intra-Florida service.

Pan Am and Pan Am Express will operate more than 100 daily flights into Miami during this year's peak winter months compared with just 43 in the winter of 1988. The increase in service is a continuation of Pan Am's expansion of its Miami operation which began over a year ago. Included in the new services from Miami are Montego Bay, Kingston, Aruba, Curacao, Managua in Nicaragua and Santiago, Chile.

In addition to Miami, Pan Am and Pan Am Express offer service to eight other cities in Florida.

Pan Am last offered service from Newark in 1984.

#90164p5753 06/13/1990 ~PR Newswire

LONDON (JUNE 13) PR NEWSWIRE - Racal Telecom Plc (NYSE: RTG) today announced that sales for the fiscal year ended Mar. 31, 1990 amounted to 406 million pounds sterling, an increase of 69 percent over the previous year. Pre-tax profits were 164.8 million pounds, an increase of 95 percent.

Taxation amounted to 46.3 million pounds, equivalent to a rate of 28 percent on pre-tax profits. Earnings per share were 11.85 pence per ordinary share, an increase of 91 percent over fiscal 1989.

The company has recommended payment of a fiscal year-end dividend of 1 pence (34 percent) per ordinary share net of tax, making a total of 2.4475 pence (49 percent) per share net of tax for the year. This represents an increase of 92 percent on the notional net dividend of 1.275 pence per share for the year ended Mar. 31, 1989.

Warrants for the final dividend will be posted on Aug. 14, 1990 to shareholders on the register of members on July 19, 1990.

The Vodafone cellular network continues to progress at a satisfactory rate despite the current slowdown in the U.K. economy. Based on growth experience so far this year, net new subscribers are joining the network at an annualized rate of over 200,000. The quality of Vodafone service has been improved, and it is intended to maintain this trend in addition to meeting the increase in demand. Vodafone capital expenditure amounted to 155 million pounds and represents an increase of 70 percent over the

previous year.

Orbitel, previously a fifty-fifty joint venture with Plessey, was taken into 100 percent ownership after the acquisition of Plessey by GEC/Siemens. Other businesses are progressing in line with expectations and the results for fiscal 1991 should be good.

RACAL TELECOM PLC
Appendix -- U.S. Dollar Summary
(In thousands of dollars)

	1990	1989	Percent Increase
Revenue	669,534	396,221	69
Trading profit	267,675	147,784	81
Interest receivable/ payable(A)	4,209	(8,309)	--
Profit before tax(B)	271,884	139,475	95
Tax	76,393	37,049	--
Profit after tax	195,490	102,425	91
Minority interests	71	--	--
Net profit attributable to shareholders	195,561	102,425	--
Earnings per share(C)	19.55 cents	10.25 cents	91

(A) -- Interest Receivable (Payable). The interest payable in 1989 includes the cost of funding the company prior to flotation in October 1988. The loans to which the interest relates were repaid from the proceeds of the flotation.

(B) -- Profit Before Tax. The elimination of borrowings after Oct. 26, 1988 also affected the direct comparability of the profits before tax.

(C) -- Earnings Per Share. Earnings per share are based upon the 1 billion ordinary shares now in issue and have been calculated as if such number had been outstanding throughout the relevant periods. (Each American Depositary Share represents 10 ordinary shares.)

Notional Dividend, Fiscal 1989. The notional dividend is as stated in the prospectus issued for the flotation in 1988, and represents the total dividends the company would have expected to recommend for the year ended Mar. 31, 1989 is the reorganization and offer had taken place at the beginning of that fiscal year.

Racal Telecom Plc is a leading provider of mobile telecommunications services and equipment. Its principal business is the operation of the Vodafone cellular telephone network in the United Kingdom. American Depositary Shares are listed on the New York Stock Exchange. Each American Depositary Share represents 10 ordinary shares of the company.

The Racal Corporation provides financial and management services for the North American operations of Racal Electronics Plc.

TORONTO (JUNE 13) PR NEWSWIRE - Varity Corporation (NYSE: VAT) is asking its shareholders to approve articles of amendment confirming the company's authority to make proposals to pay inducements in cash or common shares, or both, to holders of its preferred shares who agree to convert their holdings into common shares.

Varity's shareholders will vote at annual and special meetings here July 30 on a special resolution authorizing the amendments, described in a proxy circular issued today as part of the company's program to enhance values for shareholders. The resolution must be approved by two-thirds of the votes cast by holders of common shares, Class I preferred shares, and Class II preferred shares, each voting separately as a class or series.

The company said that the amendments would expressly enable the board of directors to make proposals "to reduce the number of outstanding convertible preferred shares," and to thereby reduce the company's annual cumulative cash dividend obligations to holders of preferred shares. In fiscal 1989, Varity paid U.S.$15.4 million in dividends to holders of Class I preferred shares and Cdn.$3.25 million to holders of Class II preferred shares.

Varity cautioned, however, that its directors had not made any decision as to whether or when a proposal might be made or as to the form it would take.

The company has stated publicly on several occasions that it regards the Class I preferred shares, which are listed on the Toronto, Montreal and New York stock exchanges, as a major impediment to further improvement in the trading value of its common shares.

Varity's proxy circular also describes two new programs, adopted under the company's existing Executive Stock Option Plan, that encourage management to purchase the company's common shares with interest-free demand loans secured by the acquired shares. Recent share purchase options that were exercisable for 90 days resulted in the purchase of 1,429,800 shares by management. Under the other program, management exercised 914,350 options and received a similar number of "reload" options exercisable after May 1993. As a result, Varity's management now owns over 2.3 million additional common shares.

DETROIT (JUNE 13) PR NEWSWIRE - Ward's Auto Dealer magazine identified Monroeville, Pa.-based No. 1 Cochran Inc. as the nation's third largest automobile retailer, which also repeated as the world's largest General Motors dealer, all in the trade publication's just-released Top 500 listing.

Only a California Toyota dealer and an Ohio Ford dealer were list ahead of No. 1 Cochran in the annual survey.

The rankings were based on reported 1989 sales volume and also rated dealers with combined retail and fleet sales. Figures for No. 1 Cochran included all of its Monroeville operations, where it retails Pontiac, Oldsmobile, Cadillac, GMC Truck, Suzuki and Isuzu vehicles, but includes neither its Route 8 North location, where it sells Lincoln-Mercury, Nissan Mazda and Mercedes-Benz, nor its new Robinson Township location, where it retails Pontiac and GMC Truck, and where it expects to relocate the just-acquired Fulton Buick business. No. 1 Cochran did not launch its Infiniti line at Monroeville until early this year.

No. 1 Cochran Executive Vice President R.E. Cochran commented that he and the entire No. 1 Cochran organization were gratified at the recognition afforded by Ward's Auto Dealer, and saw it as a validation of the firm's corporate philosophy.

"We are committed to offer levels of service to our customers, both in terms of personalized attention as well as innovative technologies, not previously associated with auto dealers. National recognition of this sort tells us that we are on the right track but we feel that we can do more. We believe that our strategy of customer service will propel us to more of such honors in the future and to even higher sales levels. In this respect we feel that retail selling achievements are the best measure of dealer performance, since those numbers can only be built one satisfied customer at a time."

Overall, including the fleet rankings, No. 1 Cochran was 21st on the list.

Other local dealers identified by Ward's Auto Dealer in the 1990 Top 500 include Don Allen Chevrolet (89th overall), Bob Smith Ford (196th overall) Day Chevrolet (301st overall) and Kenny Ross & Sons Chevrolet (363rd overall).

BOSTON (JUNE 13) PR NEWSWIRE - ITT Sheraton Corporation announced it is funding the Meeting Planners International (MPI) Resource Center that opens today in Dallas.

The Resource Center, part of MPI's Educational Research Foundation, is a multi-media research library that serves as a data bank for both meeting professionals and the general public and houses the world's largest collection of information on the meetings industry. It is considered the meetings industry's most comprehensive research facility.

According to John Fuller, vice president, director of marketing, western region, for ITT Sheraton and a board member of the Educational Research Foundation, "The dedication of this all-important facility is a demonstration of ITT Sheraton's staunch commitment to the meetings industry -- and our contribution to the Resource Center firmly expresses the company's endorsement of education and research.

"The meetings business is a prime component in ITT Sheraton's overall success and raising the level of professionalism in the meetings industry is one of the corporation's important goals."

ITT Sheraton Corporation has made an initial contribution of $100,000 to the Educational Research Foundation and has pledged a total of a quarter of a million dollars to the facility over a five-year period.

The fully staffed facility offers a broad range of services including referrals, manual research and information retrieval, including printed and on-line sources.

The mission of the Education Research Foundation is to identify, investigate and develop ways to increase the success of the meeting planning process, function and management.

"The philosophy of the Resource Center is that of service orientation. We believe the center will fill a significant need for quality information about the meetings industry and are grateful for ITT Sheraton's generous support of the project," said Sondra Weaver, executive director, Meeting Planners International.

Meeting Planners International is a professional education society whose 10,000 members are involved in meeting management or in providing services to the industry at large.

The Boston-based ITT Sheraton Corporation is a global network of nearly 500 properties, including business hotels, convention hotels, luxury

hotels, inns, resorts and all-suites operated in 64 countries.

ITT Sheraton is a subsidiary of ITT Corporation (NYSE: ITT), a diversified multinational enterprise engaged principally in nine product and service businesses: automotive; electronic components; fluid technology; defense technology; pulp and timber; insurance; finance; information services, and Hotels. ITT also has a 37 percent interest in Alcatel N.V., the world's largest telecommunications equipment manufacturing company. Based in New York, ITT maintains operations on all continents.

PHILADELPHIA (JUNE 13) PR NEWSWIRE - Consolidated Rail Corp. (Conrail) (NYSE: CRR) is investing almost $2.4 million to upgrade sections of its lines in southern New Jersey.

The work, which began in April and is scheduled to be completed this summer, includes the installation of more than 22,000 crossties and the surfacing (raising and smoothing) of more than 65 miles of supporting railbed.

The project, part of Conrail's capital program for 1990, covers sections of the following lines:

-- The Bordentown Running Track, between Camden and Delair. -- The Beesley's Point Secondary, between Camden and Beesley's Point on the New Jersey shore.

-- The Vineland Secondary, between Camden and Woodbury. -- The Camden Running Track, which links the Bordentown Secondary with the Vineland Secondary.

-- The Penns Grove Secondary, between Woodbury and Penns Grove. Conrail's southern New Jersey lines provide vital rail freight transportation service for shippers and receivers of food and food products, sand, coal, chemicals, and a wide variety of other products and commodities.

"Conrail's capital program enables us to provide safe, reliable, customer-responsive service," said James A. Hagen, Conrail's chairman, president and chief executive officer. "Projects such as this will enhance Conrail's ability to compete in the transportation marketplace."

EDISON, NJ (JUNE 13) PR NEWSWIRE - WCI Home Comfort Division announced today it is donating two room air conditioners to the Edgar Child Care Center in Metuchen, N.J.

The Edgar Child Care Center, co-sponsored by the Reformed Church of Metuchen and the Metuchen-Edison YMCA, opened Jan. 2, 1990.

The objective of the center is to provide quality child care without regard to ability to pay. Of the 40 children in the center now, over 1/4 of them receive some sort of financial aid.

The center is the result of a total community effort and continues to benefit from the help of many volunteers.

WCI Home Comfort Division, the world's largest single plant manufacturer of room air conditioners, with 2,200 employees in the Edison plant, is a subsidiary of AB Electrolux, Stockholm, Sweden.

AB Electrolux is a global appliance manufacturer with plants in over 40 countries.

LOS ANGELES (JUNE 13) PR NEWSWIRE - Barry Collier, president, Prism Entertainment Corporation (AMEX: PRZ), today announced increases of 19 percent in sales and 32 percent in income from continuing operations for the company's first quarter ended Apr. 30, 1990.

For the three-month period net sales were $3,908,000 and income from continuing operations was $346,000 compared with net sales of $3,283,000 and income from continuing operations of $262,000 for the first quarter last year.

Net income was $346,000 for the three months ended Apr. 30, 1990, as compared to net income of $383,000 for the three months ended Apr. 30, 1989. Earnings were $0.16 per share for this year's first quarter as compared to $0.17 per share for last year. Last year's net income included income of $121,000, or $.05 per share, from discontinued operations of the company's television syndication and foreign sales subsidiary, Fox/Lorber Associates, Inc., 90 percent of which was sold during this year's first quarter.

Net income from continuing operations was $0.16 per share this year compared to $0.12 per share last year. Per-share earnings were based on the weighted average number of common shares outstanding of 2,145,000 for the quarter ended Apr. 30, 1990, compared to 2,208,000 outstanding at Apr. 30, 1989.

Prism Entertainment Corporation is a home video company which markets videocassettes of theatrical and television films, children's programming, concert performances of music and comedy artists and other programming in the United States and Canada.

DETROIT (JUNE 13) PR NEWSWIRE - Lear Siegler Seating Corp., the largest independent producer of passenger car seats in the world, today announced it would change its corporate name to Lear Seating Corporation, effective immediately.

Kenneth L. Way, chairman and chief executive officer of Lear, made the announcement at a luncheon at the Detroit Athletic Club in connection with the annual Grand Prix racing event in downtown Detroit.

Way also said Lear will achieve record sales in excess of $1 billion again for the fiscal year ending June 30, 1990. "This is the ninth consecutive year in which we have shown improved sales and operating income. It also is the second consecutive year of increased sales and operating income in a declining automotive market," Way said. "We are also achieving $280 million in sales annually from our joint ventures with other seating manufacturers."

Lear has begun production of seats, and related components, at a new plant in Louisville, Ky., for an all-new sport utility vehicle.

Way said Lear will build another "JIT" seat plant in the Midwest later in the year at a still undisclosed location. Future business will necessitate at least two additional facilities, he added.

Lear also has purchased a controlling interest in its CISA subsidiary in Mexico, according to Way. CISA has over $100 million (US) in sales in five plants providing seating and related parts for the domestic auto producers in Mexico.

In addition to Lear's expansion in Mexico, Way said Lear is completing a state-of-the-art technical center in Reitberg, Germany, and a new "JIT" headquarters and marketing facility in Kroneberg.

Way disclosed that Lear Seating has 32 facilities in six countries with employment totaling 9,500. Lear has built nearly 15 million seats since the company went private in 1988.

"With the new business already on our books," Way said, "we look for a continuation of our strong growth performance. More and more vehicles are using Lear seats. Our market share is increasing steadily. We are investing heavily in new technology to maintain our world leadership. Our business outlook is positive for the months ahead."

In addition to its 15 millionth seat, Lear also unveiled its latest state-of-the-art seating, including specialty seating for high-performance cars. Lear has provided seating products for the last five Motor Trend "Car of the Year" award winners.

MARBELLA, SPAIN (JUNE 13) PR NEWSWIRE - Warning of the pitfalls of a dramatic worldwide expansion of stainless steel capacity, unprecedented changes and globalization underway in the industry, and potential future international trade problems, Robert E. Heaton today urged specialty steel leaders to seek cooperation to ensure continued healthy growth of the industry in the 1990s.

Heaton, who is chairman of the Specialty Steel Industry of the United States, spoke before more than 200 industry representatives from around the world attending the Fourth International Stainless Steel Conference.

While predicting the consumption of stainless steel will continue to grow at least as strongly as in the past, Heaton expressed concern about an estimated 2.25 million metric ton addition to worldwide capacity expected in the 1989-1992 periods, an amount exceeding total U.S. consumption of 1.65 million metric tons in 1989. The annual growth of world stainless steel consumption averaged 5.74 percent in the period of 1976-88 (W. Europe -- 5.9 percent; USA -- 3.8 percent; Japan -- 7 percent; and other nations -- 8.2 percent). Heaton noted a wide array of expansion projects in both industrialized and developing nations.

Heaton pointed out that the new capacity coming on stream before the Voluntary Restraint Arrangements (VRAs) expire March 31, 1992, depending on global demand at the time, could create a capacity overhang with adverse consequences for producers everywhere. "The world speciality steel industry, whose capacity continues to grow rapidly, has been consistently troubled by excess capacity and falling prices during periods of weak demand, leading to major export pushes by our subsidized foreign competition to utilize their excess capacity. Such conditions could occur again where the VRAs expire," he said.

Heaton said the U.S. industry response to such events is its continuing commitment to technology and in maintaining its international competitiveness. "The U.S. industry, however, cannot respond to developments in isolation. As in the past, we look to our government to encourage a fair competitive international environment in which there is adherence to the'rules of the game.' The U.S. government must ensure

continued effective operation of U.S. trade laws. In a world market that will perhaps be characterized by overcapacity and government ownership, unfair trade practices will persist and therefore, the U.S. industry may again look to the U.S. trade laws as a means to counter these practices."

Heaton reported: "Efforts have been undertaken by certain foreign governments in the context of the GATT Uruguay Round to weaken U.S. trade laws. It is imperative that the U.S. government resist such misguided efforts. Otherwise the framework, upon which we have relied to keep our markets open and fair, will be undermined."

Also, Heaton said: "Our government must broaden and make permanent the consensus structure negotiated during 1989 to ensure that our foreign competitors continue to play by the rules of the marketplace. Too often, they have been willing recipients of financial support from their home government; financial support so generous that they are capable of incurring massive financial losses year after year. The consensus agreements were a timely initiative that temporarily committed a limited number of foreign governments to refrain from conferring new subsidies and dismantling the infrastructure of government support that created the distortion in the marketplace."

The specialty steel leader welcomed the commitments embodied in the consensus structure "as recognition by our competitors that in a global industry like ours, there are more benefits to be gained from cooperation than from conflicts." He cautioned that the true test will be what will happen when U.S. markets experience the downside of the demand cycle. "The historic tendency of our foreign trading partners has been to go after the U.S. market by pricing below cost or home market prices. If losses follow, the foreign governments might again be there for the bailout, in which case the spirit of global cooperation embodied in the consensus structure will have been lost," Heaton stated. He urged a "permanent basis" for the consensus structure.

"With all candor, but with goodwill also -- I must say to those in this audience who work within economic systems which do not recognize the 'profit imperative,' or accept the consensus principles, you may expect continuing disputes when your exports to the United States are inconsistent with the concepts of profitability and capital formation. The American industry will use whatever legal/political tools are available if the consensus structure fails, and the termination of the VRA results in a renewed assault on our markets -- an assault that is bolstered by unfair trade practices."

LONDON (JUNE 13) PR NEWSWIRE - The directors of Cable and Wireless Plc report the following audited results for the year ended 31 March, 1990.

-- Turnover has increased by 51 percent to 2,316 million pounds sterling.

-- Trading profit has increased by 54 percent to 564 million pounds, an increase of 197 million pounds.

-- Profit before tax has increased by 25 percent to 527 million pounds an increase of 107 million pounds.

-- Earnings per share has increased by 12 percent to 31.3p. -- Recommended full year dividend increase by 25 percent to 10.00p. -- The profit attributable to ordinary shareholders increased by 97 percent to 815 million pounds after taking account of extraordinary items of 487 million pounds (1989: 129 million pounds)

AUDITED RESULTS -- PROFIT AND LOSS ACCOUNT
(In millions of pounds)

Year ended March 31:	1990	1989	Pct. change
Turnover	2,316	1,534	51
Profit on ordinary activities before taxation	527	420	25
Taxation	94	75	25
Profit on ordinary activities after taxation	433	345	26
Minority interests	105	60	-
Profit before extraordinary items	328	285	15
Extraordinary items	487	129	-
Profit attributable to shareholders	815	414	97
Earnings per share	31.3p	27.9p	12

Turnover at 2,312 million pounds was 51 percent higher than the previous year reflecting growth in all major sections of the business. In addition the inclusion of Telephone Rentals for a full year, the acquisition of a controlling interest in Telecommunications of Jamaica and favorable movements in exchange rates have contributed to this growth.

Trading profit at 564 million pounds was 54 percent higher than the previous year. The ratio of trading profit to turnover improved from 23.9 percent in 1989 to 24.4 percent in 1990 as a large proportion of operating costs are not volume related. Mercury trading profits improved by 172 percent from 18 million pounds to 49 million pounds.

DALLAS (JUNE 13) PR NEWSWIRE - Rexene Corporation (NYSE: RXN) today announced that its wholly owned operating subsidiary, Rexene Products Company, has signed a definitive agreement to purchase Poly-Pac, Inc., from Rex-Rosenlew International, Inc.

Poly-Pac produces specialty blown films at its manufacturing facility in Dalton, Ga., which has an annual production capacity of 45 million pounds. In 1989, Poly-Pac had net sales of $29.5 million and an operating loss of $1.6 million. Although the exact purchase price will not be determined until actual closing, it is expected to approximate $15 million.

Poly-Pac principally services the medical, food and textile packaging as well as the converter, industrial and agricultural film markets. Poly-Pac will be managed through Rexene's Consolidated Thermoplastics Company (CTC)

film division. CTC is a manufacturer of specialty blown and cast film products with an annual production capacity of 160 million pounds. CTC has manufacturing facilities in California, Wisconsin and Delaware.

The acquisition of Poly-Pac by Rexene strengthens CTC's strategic position in the specialty film manufacturing business from both a product line and geographic perspective.

Rexene Corporation, through its principal operating subsidiary Rexene Products Company, manufactures thermoplastic resins and petrochemical products including polyethylene and polypropylene resins, styrene and plastic film. Rexene is headquartered in Dallas.

EL SEGUNDO, CALIF. (JUNE 13) PR NEWSWIRE - R. Van Ness Holland Jr., 36, has been promoted to senior vice president of Wyle Laboratories (NYSE: WYL), announced Stanley A. Wainer, chairman of the board.

Holland also will continue as corporate controller and maintain his responsibilities for all accounting and financial affairs of the company, as well as corporate communications, reporting directly to Theodore M. Freedman, executive vice president-finance and treasurer.

Wainer commented: "This well-deserved promotion reflects the continuing fine performance of Mr. Holland since his promotion to vice president three years ago. I am pleased that the board has recognized his many important contributions to the company's success."

Holland joined Wyle in 1979 as director of Financial Controls and was named assistant corporate controller in 1980. He was elected corporate controller in June 1985 and two years later was promoted to vice president.

Prior to joining Wyle, Holland, a Certified Public Accountant, was associated with Arthur Anderson & Co. for four years. He received bachelor of science degree, with honors, in business administration from Arizona State University. ROCHESTER, NY (JUNE 3) PR NEWSWIRE - Genesee Corporation (NASDAQ: GENBB) today announced consolidated sales and earnings for the fiscal year ended April 30, 1990.

Sales for the fiscal year were $157,697,000 compared to $157,297,000 for the previous year. Net earnings for fiscal year 1990 were $4,760,000 compared to $2,716,000 for the previous year.

Company officials attributed the increased earnings to a number of factors including decreases in the cost of agricultural ingredients, a more favorable package mix for malt beverage products, improved volume and margins by the foods division, and the continued effort to contain costs in brewing operations and the foods division.

Management noted that intense competition was expected to continue for the foreseeable future in the malt beverage industry. John L. Wehle, Jr., president and chief executive officer, stated, "We are pleased with the results we have achieved and we must continue to work hard at exploring new products and markets, containing costs and improving efficiencies to maintain this favorable trend."

COMPARATIVE STATEMENT OF EARNINGS

($ in thousands except for per share data)

BOISE, ID (JUNE 13) PR NEWSWIRE - AT&T (NYSE: T) today announced that it had been awarded a five-year, $28 million contract by Boise Cascade Corp. (NYSE: BCC) to provide a nationwide custom communications network.

The AT&T network will provide voice and data communications linking Boise Cascade headquarters with all company field locations in 35 states and the District of Columbia.

Ray Roark, Boise Cascade manager of information systems and telecommunications, said the custom network will provide "improved service at a reduced cost. At Boise Cascade, we pride ourselves on being a low-cost, quality supplier," he said, "and this custom network will save us more than $10 million over five years.

"In addition, this network positions us to integrate our communications further with Integrated Services Digital Network (ISDN), improving our productivity and strengthening our customer service," Roark said.

ISDN allows companies to transmit voice and data communications at once over the same network, simplifying wiring and increasing the speed and flexibility of communications.

"We are pleased that Boise Cascade chose AT&T as a partner," said Robert Cirillo, AT&T national account manager. "Once again, AT&T's ability to create efficient, cost-effective solutions has won against tough competition."

Boise Cascade is an integrated forest products company with 19,600 employees and annual sales of $4.6 billion.

#90164p5802 06/13/1990 ~PR Newswire

CHICAGO (JUNE 13) PR NEWSWIRE - Annual gold production at Santa Fe Pacific Minerals Corporation's Rabbit Creek Gold Mine near Winnemucca, Nev., is expected to double the original projection and reach 200,000 ounces annually by the end of 1992.

Construction of the first phase of the new mine is 86 percent complete, and first gold production is anticipated in the third quarter of this

year. The Santa Fe Pacific Corporation (NYSE: SFX) unit had announced earlier that it expected to produce about 25,000 ounces of gold from the Rabbit Creek Mine in 1990, increasing to an average of more than 100,000 ounces in subsequent years. Continuing engineering work and a new mining plan based on a previously announced increase in reserves has led to the expanded forecast. The company said it planned to invest approximately $70 million in mine development and additional mining equipment to achieve the increased production, all of which will come from the oxide ore body. The direct cost of production for the expanded plan is expected to be approximately $190 a ounce.

In December of 1989, the company announced that proven and probable in-place gold reserves at the Rabbit Creek Mine had increased from 2.23 million ounces to 3.6 million ounces.

The company expects at least 3 million ounces of recoverable gold from the project, of which 2 million ounces will come from the oxide ores and approximately 1 million from the underlying refractory ores. Engineering work is continuing, looking toward development of the refractory ores.

With the increased production from Rabbit Creek, the recently announced Lone Tree Gold Project, and its 30 percent interest in the Marigold Project, the company anticipates total gold production at an annual rate in excess of 300,000 ounces by late 1992. The company has identified several additional gold-bearing deposits in the Northern Nevada gold belt, and is conducting further geologic tests to determine their economic feasibility.

PHILADELPHIA (JUNE 13) PR NEWSWIRE - The formation of Trinity Capital Partners Inc., an investment banking firm, was announced today by Michael T. Kennedy, former chief financial officer of Airgas Inc. (NYSE: ARG).

Trinity will focus primarily on advising clients regarding acquisitions and divestitures, structuring and financing acquisitions and capital formation, primarily with respect to equity and subordinated debt placements.

In addition, Kennedy plans to organize Trinity Capital Partners L.P. for the purpose of making equity investments in and acquiring middle market businesses having annual revenues between $10 and $100 million. Trinity Capital Partners L.P. will seek investments in, and acquisitions of, profitable, well-managed, mature companies with growth potential and management willing to retain a significant ownership interest. Trinity's

focus will be primarily on privately held industrial, manufacturing and distribution businesses. Kennedy will act as the managing partner of Trinity Capital Partners L.P.

Kennedy has extensive experience in mergers and acquisitions, divestitures capital formation and restructurings and raising capital in both the private and public markets. Since 1984, he has completed more than 90 leveraged acquisitions and divestitures. In connection with the acquisitions, he has participated in raising in excess of $275 million in capital and has remained directly involved with the management of the acquired companies.

Kennedy began his career with Westinghouse Electric Corp. after graduation from Villanova University in 1976. From 1979 to 1985, he served as manager of corporate finance for Solid State Scientific Inc., a rapidly growing, publicly held electronics company. From March 1983 to March 1985 he served as the assistant treasurer of Sprague Solid State Inc. (the successor to Solid State Scientific after its acquisition by Penn Central Corp.). He has served as the vice president, treasurer and chief financial officer of Airgas Inc. since its organization in 1986. Kennedy is also an attorney and a member of the Pennsylvania and Federal bars.

After graduating from Villanova University with a B.S. in accounting, he received his M.B.A. in finance from St. Joseph's University and his Juris Doctris from Widener University School of Law. Kennedy, his wife and four children, live in Newtown Square, Pa.

ENGLEWOOD, CO (JUNE 13) PR NEWSWIRE - Resources Trust Company, a specialist in the custody and administration of self-directed retirement plans, announced today that it has signed an agreement with California Federal Bank to acquire approximately 32,000 self-directed retirement plants, representing $600 million in assets.

This transaction represents one of the largest acquisitions of its kind by an institution specializing in the retirement plan marketplace. As a result, Resources Trust Company will be one of the nation's largest trust companies focusing exclusively on self-directed retirement plan business.

The acquisition will bring Resources Trust Company's total plan assets to $3.3 billion and increase its number of retirement accounts by nearly 25 percent. Further, the acquisition represents a critical step toward its goal of becoming the leading low-cost provider of high-quality self-directed retirement plan services.

Self-directed retirement plans (IRAs and qualified plans) allow the account owners, in conjunction with their financial planners, to select from a broad array of investment vehicles. Since tax reform in 1986 substantially curtailed the growth of new retirement plans, a number of firms who provided these services have made the decision to sell these businesses.

"It's an unsettled time for the retirement plan industry and many companies are abandoning their retirement plan servicing divisions," said Matthew Autterson, president of Resources Trust Company.

"These companies are turning to us because of our solid reputation in the industry. We are one of the few firms which achieved critical mass prior to tax reform and have maintained ongoing profitability. As a result, we have the staying power to wait out legislative changes that will re-stimulate retirement savings throughout the country.

"We believe the acquisition of Cal Fed's retirement plan business is the first of many opportunities that will surfaced in the 90s, as other companies look to divest unprofitable peripheral operations. In an industry where capital is scarce and new business more cautious, the real leaders will be those companies which have financial muscle and have found a unique 'niche' in the marketplace," Autterson said.

"Strategically we have committed substantial resources to improve the automated efficiency of our business, while other organizations have eliminated development-related expenses to control costs," Autterson

continued. "We are positioning ourselves to be ready to accommodate substantial increases in our business without the lag time other firms will encounter trying to rebuild their back offices."

NEW YORK (JUNE 13) PR NEWSWIRE - The American Stock Exchange announced that Summa Medical Corporation of Albuquerque, N.M., began trading its common shares today. Summa Medical is a diversified product and services company that operates in the voice compression, high- definition television (HDTV), computer systems analysis and enhancement, pharmaceutical drugs and test kits, and high-energy ignition systems areas. The company previously traded in the NASDAQ National Market System under the symbol SUMA.

Trading under ticker symbol SU, the common stock opened on 100 shares at 3-3/8.

Summa Medical is currently operating in five product and service areas: voice compression technology to allow telephone-quality speech to be transmitted at a faster rate than the current standard; and video technology such as HDTV technology that is compatible with conventional television broadcast signals; computer projection display to allow for higher resolution, adjustable display size and reduced radiation emissions; and active matrix flat panel display.

Summa Medical's computer systems enhancement will upgrade supercomputers and peripherals; and pharmaceutical drugs and test kits include Summaclot, an injectable radiopharmaceutical to detect blood clots; and Cotakit, a clinical laboratory and physician's office test kit for early colorectal cancer detection.

The company owns the exclusive worldwide manufacturing and marketing rights to the Shock Wave Amplification through Simultaneous Energy Release (SWASER) ignition systems for two-cycle engines.

PHOENIX, ARIZ. (JUNE 13) PR NEWSWIRE - Phelps Dodge Corp. (NYSE: PD) today announced that approximately 900 union represented employees at its Chino Mines Company unit near Silver City, New Mexico had ratified recently negotiated three-year labor agreements. The new three-year

agreements commence July 1, 1990 and include an average $2.00 per hour increase in wages the first year, an average $0.25 per hour increase in the second year, and a $400 lump sum payment to each represented employee in the third year. The agreements also provide for improvements to benefits and minor changes to contract language.

"We are fortunate our employees recognize the importance of remaining internationally competitive," stated Leonard R. Judd, President and Chief Operating Officer of Phelps Dodge Corporation. "The settlements are fair and address issues that are important both to our employees and to the company. Long-term job security in the copper industry means remaining competitive in a global economy."

FORT LEE, NJ (JUNE 13) PR NEWSWIRE - Alfa-Laval announced today that it has signed a contract with the Soviet Union for a baby food production plant worth approximately $15 million. The new facility will be built in Kiev, in the Ukraine, with delivery scheduled to begin in 1991.

As designed, the plant will produce eight types of baby food products using 40,000 kg of milk a day. Alfa-Laval's food engineering operations will handle the turn-key delivery and installation, as well as training of local plant personnel.

According to Dave Nichols, president of Alfa-Laval, Inc., the order is the latest in a series of contracts signed with the Soviet Union, with whom Alfa-Laval has a longstanding history as a supplier.

"Last week, in fact, Alfa-Laval hosted a delegation from the food industry in the Ukraine to discuss further projects," said Nichols.

Alfa-Laval is an international group with U.S. headquarters in Fort Lee. Food engineering operations are based in Pleasant Prairie, Wis., under President Tom Hincz.

Worldwide, Alfa-Laval's sales total nearly $2.5 billion, with 20,000 employees. The United States and Canada account for more than 20 percent of group volume.

Alfa-Laval's shares are traded on the stock exchanges in Stockholm, London Geneva and Amsterdam. In the United States, its American Depositary Receipts (ADRs) are traded through NASDAQ's pink sheets.

YONKERS, NY (JUNE 13) PR NEWSWIRE - National HMO Corp. (NASDAQ-NMS: NHMO) announced today that net income for the three months ended April 30, 1990, was approximately $475,000, or 10 cents a share, as compared to a net income of $245,000, or 5 cents a share, for the three months ended April 30, 1989.

Revenues for the quarter ended April 30, 1990, were approximately $3,617,000 as compared to $3,161,000 for the corresponding three-month period of 1989.

The increase in revenues was primarily attributable to an increase in patient-fee income from Allen Health Care Services, Inc., the subsidiary providing home health care services.

DURHAM, NC (JUNE 13) PR NEWSWIRE - Security Financial Holding Company (NASDAQ-NMS: SECF), a holding company formed by Security Federal Savings Bank, has closed its conversion stock offering, having received orders for a total of $12,090,000 in common stock. Ninety-nine percent of the proceeds from the holding company stock sale will be added to the capital

of Security Federal. Depositors purchased approximately 50 percent of the offering with the remainder sold to the public. J.C. Bradford & Co. and Trident Securities, Inc. assisted Security Federal in marketing the stock.

"We are gratified by the support our depositors and the investment community have shown for the conversion. The conversion will result in an even stronger bank that will be better able to serve the public," Larry D. Brock, President of Security Federal, said. "In connection with the conversion, we have also established a holding company which will allow the Bank to expand its services in the future," he added.

The stock of Security Federal's holding company, Security Financial Holding Company, has been approved for listing on the NASDAQ National Market System under the symbol "SECF." Stock certificates will be sent to purchasers in about a week.

Security Federal has served the Triangle since 1927. It currently has 8 branches and $260 million is assets. Security Federal changed from a savings and loan association to a savings bank in 1989 in order to emphasize the broader array of financial services it is authorized to offer. The Bank will continue to meet all applicable federal capital requirements after the conversion.

LOS ANGELES (JUNE 13) PR NEWSWIRE - Logicon's (NYSE: LGN) R&D Associates subsidiary is developing key portions of a bilingual U.S./Korean military command and control system under a $4.18 million subcontract from TRW Federal Systems Group, the company said today.

TRW is the prime contractor to the U.S. Army for design, development, and installation of the Theater Automated Command and Control Information Management System (TACCIMS) in the Republic of Korea. The system will support the Combined Forces Command there.

R&D Associates (RDA) designed and maintained an existing command and control system, and is transferring essential elements to TACCIMS. RDA also is developing a sophisticated bilingual data base management system, a bilingual map graphics system, and a system to provide bilingual briefing support.

In addition, the RDA team is designing and implementing an overall TACCIMS training program and is providing engineering design and installation

support for a fiberoptic local area network linking sites throughout the Republic of Korea. Work is being performed at RDA's facility in Tacoma, Wash.; at TRW facilities in Fairfax, Va., and in the Republic of Korea.

Work on the program began under a letter contract in 1988, pending completion of a detailed contract signed in late 1989. TACCIMS is expected to be operational in the summer of 1990.

Logicon is a leader in providing advanced technology systems and services to support national security, civil and industrial needs.

#90164p5840 06/13/1990 ~PR Newswire

LONDON (JUNE 13) PR NEWSWIRE - Racal Electronics Plc today announced that sales for the fiscal year ended March 31, 1990 amounted to 1.97 billion pounds sterling, an increase of 24 percent over the previous year. Operating profit increased by 34 percent to 238 million pounds after charging 13 million pounds in start-up losses incurred in the development of Network Services, compared with 5 million pounds for the previous year.

Telecommunications had another magnificent year with operating profit of 162 million pounds, an increase of 81 percent over last year. Other results are generally in line with expectations, with the exception of Data Communications where, although gross margins were only slightly down, profit contribution was considerably lower because of:

(a) A shortfall in revenue in the last quarter
(b) The losses from the Network Communications Group, acquired from DCA in January 1990, being greater than expected because of lower revenue and delay in achieving savings from rationalization. However, action has already been taken to reduce still further the cost base of this activity.

Exceptional items represented a charge of nearly 16 million pounds, almost wholly in respect of redundancy, severance and reorganizational costs. In the previous year, exceptional items represented an income of nearly 15 million pounds.

As a consequence, and after charging interest payable of approaching 21 million pounds, pre-tax profit amounted to 201 million pounds, an increase of 13 percent, and earnings per ordinary share were marginally lower at 9.10 pence.

Pre-tax profits and earnings per share are expected to increase substantially in fiscal 1991.

The company is recommending payment of a fiscal year-end dividend of 10.626 percent net of tax (2.6565 pence per ordinary share) making a total of 14.436 percent (3.609 pence) for the year, an increase of 20 percent over fiscal 1989. Shareholders will be offered, where local regulations permit, the option of taking shares instead of cash in respect of the final dividend. Warrants for the final dividend and/or the new share certificates will be posted on August 21, 1990 to shareholders of record as of July 5, 1990.

ST. LOUIS (JUNE 13) PR NEWSWIRE - Anheuser-Busch Companies, Inc. (NYSE: BUD) has awarded to AT&T (NYSE: T) a $14 million contract to design and provide a nationwide custom voice and data communications network.

More than 500 company locations, including sales and distribution offices, will be linked by the custom network.

The four-year contract includes inbound and outbound switched long distance services for all corporate locations, domestic and overseas. It also incorporates a private line data network linking major locations to the St. Louis headquarters offices.

"The custom network provides several strategic advantages for the

corporation," said Ray Payne, vice president, management systems group, Anheuser-Busch. "In addition to substantial savings, the network brings with it centralized information, which will allow the telecommunications staff to monitor the communications cost and performance at each Anheuser-Busch location."

"This contract to provide a custom network builds upon our long-term relationship with Anheuser-Busch," said Jeff Akers, AT&T branch manager for national accounts. "The agreement cements our commitment to provide an aggressive and innovative company with the communications technology it needs to maintain its industry leadership, both today and into the future."

Anheuser-Busch is a St. Louis-based diversified corporation whose subsidiaries include the world's largest brewing organization and the country's second-largest producer of fresh-baked goods. It also has interests in container manufacturing and recycling, snack foods, real estate development, major league baseball, creative services, railcar repair and transportation services. Sales in 1989 were $10.28 billion, including an industry record 80.7 million barrels of beer.

Anheuser-Busch selected AT&T in a competitive bidding process.

NEW YORK (JUNE 13) PR NEWSWIRE - Arthur H. Burton, Jr., has joined Prudential-Bache Securities Inc. as vice chairman, it was announced by the firm today.

Burton returns to where in 1988 he reported to George L. Ball, chairman and chief executive officer of Prudential-Bache. Burton was formerly a regional home office president and most recently a senior vice president and head of human resources at the Prudential Insurance Company of America.

It was also announced by Prudential-Bache that W. James Tozer, Jr., president, has resigned to seek a management challenge as a chief executive, probably in a financial service industry turn-around situation.

Burton will join Ball and James T. Gahan, president of Prudential- Bache Capital Funding -- the global investment banking, institutional and capital markets areas of the firm -- as members of the office of the chairman of Prudential-Bache Securities.

Burton will also be a member of the firm's executive committee and a member of the board of directors.

In making the announcement, Ball said, "I am delighted that Art Burton has accepted by request to return to Pru-Bache. He is one of the finest talents in the financial services industry."

In his new role, Burton will be responsible for mutual funds, risk arbitrage and administration. Ball also added, "Jim Tozer has been a valuable and hard-working manager, and we appreciate his contributions to the firm. We wish him well in the future."

In addition, the firm also announced the International Group, headed by William L. Custard, will now report to Leland B. Paton, president of the Capital Markets Group of Prudential-Bache Capital Funding.

Burton, 56, joined The Prudential in 1955 as a trainee in the group service area of the corporate office in Newark. He was named regional group manager in The Prudential's eastern home office in 1965. He held several executive positions in the group insurance area before becoming president of central Atlantic operations in Fort Washington, Pa., in 1981. Burton was transferred to Minneapolis in 1983, where he was president of north central operations, the position he held until he joined Prudential-Bache in 1988.

Burton holds a A.B. degree from Princeton University. Prudential-Bache Securities is a worldwide investment firm. Headquartered a One Seaport Plaza, New York City, the firm has over 360 offices in the United States and in 19 other countries. Prudential- Bache Securities is a subsidiary of The Prudential Insurance Company of America.

IRVINE, Calif. (JUNE 13) PR NEWSWIRE - UTI Chemicals Inc. of Irvine has announced that it has signed a research and development agreement to do

ski-boots with Nordica by using UTI's liquid phase technology. This marks the first time any ski-boot company has dared to venture outside the normal injection molding technology.

Vincent F. Pananroni, president of UTI Chemicals Inc., stated that the advantages of using UTI's patented centrifugal casting techniques are that it will greatly decrease material waste in production, triple production capabilities and provide equipment at one-tenth the present cost.

Prototype boots will be built by early fall and they will be tested this coming ski season. Upon successful completion of the program Nordica has contracted to purchase equipment and chemicals from UTI Chemicals Inc.

Nordica is the largest manufacturer of ski-boots and presently controls 28 percent of the market. If the new liquid phase program is successful, UTI's chemical division could realize sales of approximately $25 million annually.

Nordica is 100 percent owned by Edizione Holding of Italy. Benetton, a clothing manufacturer, which has many clothing outlets in the United States is also owned by Edizione Holding. Nordica is presently marketing a ski clothing line.

UTI Chemicals Inc. is presently trading "Over-The-Counter" in the pink sheets, and has filed for a NASDAQ listing.

PRINCETON, NJ (JUNE 13) PR NEWSWIRE - Westwood One Inc. (NASDAQ: WONE) and GE American Communications, Inc. (GE Americom) have signed an agreement for satellite transmission services of Westwood One's network radio programming into the year 2001.

Under terms of the agreement, GE American will continue providing the Digital Audio Transmission Service (DATS) via its SATCOM F-1R satellite to Westwood One and its network divisions -- the NBC Radio Networks, acquired from General Electric in 1987, the Mutual Broadcasting System, and the Westwood One Radio Networks. The service will make the transition in mid-year 1991 to GE's SATCOM C-5, a C-Band satellite currently under construction and scheduled to be launched in May 1991. This multimillion-dollar agreement with Westwood One calls for fully protected satellite transponder capacity.

For the past six years, Westwood One has been transmitting its radio programming to affiliates via SATCOM F-1R, employing the highly reliable,

exceptional-quality DATS technology. As part of the agreement, GE Americom will be working with Westwood One to reconfigure the interconnections between the various network studios located in Culver City, Calif., Manhattan and Washington.

Westwood One Inc., headquartered in Culver City, Calif., is the nation's largest producer and distributor of radio programming and the second largest network radio organization. Westwood One's award-winning news, sports, talk and entertainment programming is heard on more than 6,000 radio stations around the world.

GE Americom, located in Princeton, N.J., operates the SATCOM satellite fleet -- 5 C-Band and 2 Ku-Band satellites that provide service to cable television, broadcast radio and television, as well as business information and government markets. GE Americom is a subsidiary of General Electric Company (NYSE: GE).

PITTSBURGH (JUNE 13) PR NEWSWIRE - H.H. Robertson Co. (NYSE: RHH), headquartered in Pittsburgh, and Ceco Industries Inc., headquartered in Oakbrook Terrace, Ill., jointly announced today that they have satisfied certain conditions set forth in the agreement of merger entered into by the two companies on May 21.

On June 5, Robertson received a written commitment from Wells Fargo Bank, N.A., for $150 million of financing. The commitment is subject to execution of a definitive financing agreement.

In addition, Robertson and Ceco entered into a definitive stock purchase agreement with Frontera, S.A., on June 8. Pursuant to the stock purchase agreement, Frontera has agreed to invest $40 million in the corporation surviving the merger in exchange for between 3.33 million and 4 million shares of common stock, depending on the market value of Robertson stock at the time of the merger. On June 8, Robertson also entered into a separate stockholders' agreement with the principal stockholders of Ceco, who agreed to vote for the merger.

"I couldn't be more pleased with the progress of the transaction at this date," said Jack Hatcher, chairman and chief executive officer of H.H. Robertson. "The proposed combination of two fine firms will result in an extremely impressive, ongoing company. We are confident we can convene a special shareholders' meeting and obtain the approval of the merger during the third quarter."

Robertson also entered into a stockholder agreement, dated June 8, by and among: First City Financial Corp. Ltd. and certain of its subsidiaries; Frontera, S.A.; and the principal shareholders of Ceco. The agreement contains certain undertakings including the commitment by First City to vote its shares in favor of the merger. Through a spokesperson, First City said, "We are pleased with the proposed transaction and it has our full, enthusiastic support."

Ceco manufactures commercial and residential overhead and side-hinged doors as well as pre-engineered metal buildings and roof systems, and it is the country's largest provider of concrete forming services. H.H. Robertson manufactures building components for commercial, institutional and industrial building markets, with contract responsibility for completed-in-place walls, roofs and floors.

#90164p5863 06/13/1990 ~PR Newswire

CHARLOTTE, NC (JUNE 13) PR NEWSWIRE - First Union Corporation (NYSE: FTU) said today it has reviewed the loan portfolio of its North Carolina, South Carolina and Georgia subsidiary banks in the course of a recent Office of the Comptroller of the Currency (OCC) examination. The OCC exam was a targeted review of commercial real estate loans of First Union's subsidiary banks in these states.

Although First Union has not yet received the final results of the OCC examination, the company said today that no special provision will be required by the OCC for loan losses or reserves for the second quarter. The company said it had no significant disagreements with the agency's review.

First Union expects its nonperforming assets will increase to approximately $600 million in the second quarter of 1990 from the $502 million reported as of March 31, 1990. Approximately $15 million of the increase in nonperforming loans is related to the second quarter OCC commercial real estate exam. The balance of the increase in nonperforming loans is related to management's regular monitoring of the rest of the corporation's portfolio.

The company expects second quarter earnings to be approximately 70 cents per common share. That compares with earnings of 69 cents per share at the end of the second quarter 1989 and 67 cents per share for the first quarter of 1990.

Earnings for the quarter will include expenses associated with the consolidation of Florida National Banks of Florida into First Union National Bank of Florida.

First Union's 1990 second quarter earnings are expected to include approximately $11 million, or 6 cents per share from a nonrecurring gain from the sale of 13 branches in Florida. These branches, all in the Jacksonville, Florida area, are being divested in accordance with an order issued by the Federal Reserve Board in conjunction with the merger with Florida National Banks of Florida, Inc., on January 29, 1990. Management plans to offset the gain from the sale of branches with a discretionary addition to the loan loss reserve of an equal amount.

The second quarter provision for loan losses is expected to be $37 million

compared with net charge-offs of $25 million, excluding $12 million of Florida National loans. First Union continues to draw against reserves that had been established by Florida National Banks of Florida, Inc., prior to the closing of the acquisition by First Union.

Reserves in the second quarter are expected to be approximately $410 million, or about .85 percent of nonaccrual and restructured loans of $485 million, compared with $411 million, or 106 percent of nonaccrual and restructured loans of $389 million at the end of the first quarter 1990.

The OCC completed an examination of the commercial real estate loans of First Union's Florida banking operation during the first quarter of 1990. This examination also resulted in no special provision and no directed increase in nonperforming assets related to commercial real estate loans.

WELLESLEY, MA (JUNE 13) PR NEWSWIRE - EG&G, Inc. (NYSE: EGG) reported that its Electronic Components Division, based in Salem, Mass., was awarded a multi-million dollar contract for advanced design and development of the timing and positioning equipment used in the Global Positioning Satellites program. EG&G will receive approximately $2.0 million for the design phase, with options valued at $10 million - $20 million for 40 production units and associated spares. The production options may be exercised in November 1990, with delivery requirements spread over a period of years. This satellite-based navigation system provides positioning information to military and civil users worldwide.

The performance of this system depends directly on the two EG&G rubidium frequency standard clocks on board each satellite. The unprecedented stability of these "atomic clocks" allows satellite time to be known within 50 billionths of a second over a two-week period without external intervention.

EG&G teamed with ITT Defense Communications Division, and General Electric Division, East Windsor, N.J., in a successful bid for the positioning satellite program. The ITT Aerospace/Communications Division is responsible for the navigation payload.

The Global Positioning System provides 24-hour, worldwide radio navigation to an unlimited number of users. The operational space segment will comprise 21 satellites and three on-orbit spares, which transmit microwave signals unaffected by weather. Navigation is accomplished by triangulating on the signals from several of the six to 10 satellites simultaneously in view. Latitude, longitude, altitude, velocity, and time are provided by the user's receiver, which can be as small as a pocket calculator. Applications other than navigation include surveying vehicle location, and precise time synchronization of communication networks.

EG&G is a diversified, technology-oriented products and services company employing more than 30,000 people. Aided by effective planning and control systems that emphasize the development of strategic advantages, EG&G provides a variety of advanced technical products and services to government and commercial customers throughout the world.

PITTSBURGH (JUNE 13) PRNEWSWIRE - With the longest list of confirmed projects in its 36-year history, QED Communications announced today it is about to launch its 1990-91 fiscal year (effective July 1) with a balanced budget in excess of $37 million as approved by its board of directors.

At the same time, the parent firm of WQED/13, WQEX/16, WQED-FM, Pittsburgh Magazine and QED Enterprises, announced it would end the present fiscal year on June 30 in the black as it has done for more than 15 consecutive years.

Seventy percent of the firm's income is derived from a variety of production activities, including public broadcasting sources, while the remaining 30 percent is generated through local contributions and other fund-raising approaches. During the past fiscal year, several of the income producers within the station, including QED Enterprises, Pittsburgh Magazine, the National Media Outreach Center, and promotion and design activities exceeded their established goals for the year, QED President Lloyd Kaiser announced today.

Among the projects to be produced by QED for national public television viewing in 1991 and 1992 are:

-- "Space Age," which will celebrate the International Space Year in 1992. This multi-part project goes into production this summer with $5.3 million in funding. In addition, NASA has announced that, for the first time, it intends to certify two new WQED high definition television cameras to be carried on a future space shuttle one year from now. The cameras will bring back, for the very first time, high definition video pictures for QED's new international project produced in association with the National Academy of Sciences, the Japanese Public Television Network, NHK; TV Ontario and Swedish Television.

-- "Infinite Voyage," now beginning its fourth season and which has a commitment from underwriter Digital Equipment Corp. for the next couple of years.

-- "Seasons of Life," a new five-part, prime-time television series and life span psychology college course, which is hosted by actor David

Hartman and premieres on PBS this fall.

-- "National Geographic Specials," the four new programs to be broadcast in this final year to feature the topics of Spain, cats, precious stones and gems, and the Great Lakes.

-- "Wonderworks," to begin its seventh season and scheduled to undergo a format change to the PBS family "movie of the month."

In addition, the following projects will move forward with funding and/or co-production arrangements near completion:

-- The first of four specials under the series title "Images of Japan." -- An Outreach special for PBS based on a yearlong focus on the American family.

-- "Earth Game," developed in association with the Smithsonian Institution the BBC and the U.S. Naval War College to apply the principles of military war gaming to a potential environmental crisis.

-- A series on biodiversity, in association with the World Wildlife Fund. The series has $850,000 initial funding from the MacArthur Foundation.

-- Co-production with NHK Japan of a new series called "The Universe Within" and a new special, "Planet of Flowers."

And in development at WQED, a number of projects, including: -- "What's So Funny," a look at American humor produced in association with Linda Ellerbee's Lucky Duck Productions.

-- "The Wall Street Journal Television Specials," four prime-time business specials to be produced in association with the newspaper.

The newly adopted budget consists of three major income-producing areas and provides a diversified and healthy balance for the new fiscal year, Kaiser said. These areas are:

-- Local fundraising $7,320,000 -- Special grants 3,505,600 -- Special projects 26,878,890 Local fundraising includes pledges, auction and special events and promotion. Special grants are those from federal and state governmental bodies through the Pennsylvania Public Television Network and the Corporation for Public Broadcasting.

DALLAS (JUNE 13) PR NEWSWIRE - R. Howard Stanworth, chairman and chief executive officer of Pearle, Inc. of Dallas, announced today that Pearle has entered into an agreement to sell its Texas State Optical (TSO) subsidiary to a corporation formed by a group of investors led by Merrill Lynch Interfunding, Inc. and Lord Capital Corp., both of New York. Terms of the agreement are not being disclosed. Subject to regulatory approval and other customary conditions, the parties anticipate closing the transaction by late July or early August.

Texas State Optical, purchased by Pearle in 1979, operates and licenses 243 retail optical stores primarily in Texas. It also operates an opthalmic laboratory and distribution center in Beaumont, Texas.

Pearle, Inc. will continue to operate 985 locations in the U.S. under the Pearle Vision Center and Pearle Express brand names. In addition, the company now operates more than 100 locations internationally, and most recently has entered the West German market with its Pearle Express one hour superstore concept. According to Stanworth, "The sale of TSO will pave the way for the company to concentrate fully on its strategy to globalize the Pearle brand name. In the U.S., we will continue to grow our leadership position through the expansion of both company owned and franchised stores."

Pearle is a wholly owned subsidiary of Grand Metropllitan, PLC, of London, an international leader in the drinks, foods and retailing/prope rty industries. Grand Met's other U.S. interests include Pillsbury, Burger King, Heublein, Haagen-Daz and Alpo.

NEW YORK (JUNE 13) PR NEWSWIRE - Bristol-Myers Products and Clairol, operating divisions of Bristol-Myers Squibb Company, (NYSE: BMY) today announced that they will be official sponsors of the 1990 Goodwill Games.

The Goodwill Games, which will be telecast by Turner Broadcasting System, Inc., will be held July 20 - August 5, 1990, in Seattle. The first Games were held in 1986 to bring international goodwill through world-class competition. This year's events will unite 2,500 of the world's top amateur athletes competing in 21 sports.

"We're proud to support amateur sports through the Goodwill Games," said Marvin H. Koslow, president of Bristol-Myers Squibb Consumer Products Group, North America. "The Games promote good sportsmanship. As a company, we value both the spirit of competition, and the health and fitness benefits athletics provide."

Bristol-Myers Products' over-the-counter ibuprofen analgesic, NUPRIN, has been named the official pain reliever of the Games. Clairol, a leading manufacturer and marketer of haircoloring, hair care and skin care products has been named the Games' official hair care products sponsor.

Bristol-Myers Squibb Company is a diversified pharmaceutical company whose principal businesses are pharmaceuticals, medical devices, nutritional products, and consumer products.

#90164p5904 06/13/1990 ~PR Newswire

WASHINGTON (JUNE 13) PR NEWSWIRE - The original group of customer service representatives of Phoenix, Ariz.-based America West, who were eligible to vote during a February 1989 election, held to determine if they were to be represented by Association of Flight Attendants (AFA), will again be

eligible to cast their ballots in an upcoming election.

The National Mediation Board (NMB), the federal agency which oversees labor-management relations in the airline industry, released this information today. No date has yet been set by the NMB for the election.

On Jan. 16, 1990, the NMB released a decision that agreed with AFA that America West's conduct in the February 1989 election interfered in the election process, which influenced many CSRs not to cast a ballot for AFA. The NMB then ordered a new election and assigned an investigator to America West to gather information before designating those eligible to vote in a new election.

The organizing drive was unique in that America West cross-utilizes its work force. AFA had to ask for a determination from the NMB that employees who performed primarily in-flight duties did indeed fall into the flight attendant class and craft before they could officially call for a representation election. The NMB made its decision bases on how much of these employees' time was spent performing flight attendant duties.

The AFA/America West Organizing Committee in Phoenix has recently developed a plan to enable all CSRs to eventually vote in a representation election.

"AFA will be watchful of the America West management as we approach a new election and hopeful that the airline will this time adhere to the government rules for a fair election," said Susan Bianchi-Sand, AFA national president. "These CSRs work for a growing major airline, and have the right to choose the agent that will represent their rights and concerns in the workplace."

The Association of Flight Attendants, AFL-CIO, represents 30,000 flight attendants on 19 airlines, and is the largest flight attendant union in the world.

#90164p5911 06/13/1990 ~PR Newswire

LOS ANGELES (JUNE 13) PR NEWSWIRE - Home may be where the heart is, but is also where a lot of water use is. For this reason, the Los Angeles Department of Water and Power introduced a new program today that will provide free home water surveys for residents beginning June 25.

James F. Wickser, DWP assistant general manager for water, was joined by Major Tom Bradley at a customer's home to demonstrate the new home survey program.

Wickser said that the home water survey program will be offered on an appointment basis, Monday through Friday from 9 a.m. until 6 p.m. and Saturday from 9 a.m. until 1 p.m. Customers can schedule an appointment by calling, 213-481-5800.

"The home water survey program allows the DWP to take the conservation message one step further than advertising or direct mail allows us to go," Wickser said. "The DWP representatives will provide helpful information to residents on how to save in excess of 10 percent of their water use."

Mayor Bradley emphasized the importance of the personal touch of this new program.

"At times we get lost in the statistics of conservation," he said. "The purpose of the home survey program is to provide a personalized, on-site approach to conservation."

The home survey program is by appointment only. Wickser reminded customers not to grant entry to people offering home surveys if they have not scheduled an appointment.

"Customers can verify employment of a home water survey team member with the DWP by calling, 213-481-7492," he said.

Typically a home water survey will last 45 minutes to one hour. Wickser said that during the survey staff members examine interior and exterior water use. They check toilets and areas outside the home for leaks, explain the use of a lawn watering guide, install toilet displacement bags shower heads and other water-saving devices on request and make other relevant conservation recommendations.

CONTACT: Ed Freudenburg, Dorothy Jensen, or Mindy Berman of DWP, 213-481-4523, or (after 4:45 p.m., or on weekends and holidays), 213-481-4040

#90164p5913 06/13/1990 ~PR Newswire

PITTSBURGH (JUNE 13) PRNEWSWIRE - Fidelity Savings Association (NASDAQ-NMS: FSVA) announced today that it is not subject to the provisions of Pennsylvania's new anti-takeover law (Act 36) which was enacted on April 27, 1990.

Act 36 affects all corporations which are subject to the Pennsylvania Business Corporation Law of 1988 (BCL) by strengthening their ability to repel hostile takeovers. Because Fidelity is chartered under Pennsylvania banking law, it is not subject to the BCL, and therefore not affected by

the act.

William L. Windisch, president and chief executive officer of Fidelity, stated that he believes that not being subject to Act 36 is a benefit to the association's shareholders.

Fidelity Savings Association is a Pennsylvania-chartered, FDIC-insured savings institution conducting business through six offices in Allegheny and Butler counties.

#90164p5924 06/13/1990 ~PR Newswire

FRANKLIN, MA (JUNE 13) PR NEWSWIRE - Stuarts Department Stores, Inc. (NASDAQ: STUS) today reported a small loss for the first quarter of the fiscal year.

For the 13 weeks ended May 5, 1990 total store sales were $33,957,000 compared with $29,073,000 in the first quarter last year. The net loss was $133,000 or 3 cents per share, in this year's first quarter, compared to a net loss of $30,000 or 1 cent per share, last year.

Same-store total sales during the first quarter increased 6.6 percent over last year. Store sales at the beginning of the calendar year are typically lower than in subsequent periods. For this year, the 13 weeks ended May 5, 1990 commenced and ended one week later than the comparable 13 week period last year. Thus, in this year's first quarter, the week ended May 5, 1990 replaces the week ended Feb. 4, 1989 in last year's first quarter. If the sales for the first week (ended February 4) were excluded for last year, and the sales for the week ended May 6, 1989 were included, on a pro forma basis, this year's first quarter same-store total sales would have increased only 2.5 percent.

Sales were below plan for the quarter. This reflected a continuation of the highly promotional selling environment which prevailed during the Christmas season. Accordingly, markdowns were higher than plan for the quarter and gross margins were negatively impacted. This trend appears to be continuing into the second quarter. On the positive side, the company's selling and administrative expenses as a percentage of sales decreased during the 13 weeks ended May 5, 1990 compared to the first quarter last year.

Stuarts Department Stores, Inc. operates a chain of 23 self-service discount department stores located in Massachusetts, New Hampshire, Rhode Island, Vermont, Connecticut and Maine, 22 under the name "Stuarts" and one under the name "Harry's." The company's stores sell a wide variety of general merchandise selected to satisfy the clothing, home, recreational and convenience needs of the blue-collar and middle-income family.

FORT WORTH, TX (JUNE 13) PR NEWSWIRE - William H. Michero has announced his intention to retire as chairman of the board of Tandycrafts, Inc. (NYSE TAC), effective June 30, 1990. He will continue as a member of the board.

Michero, 65, joined Tandycrafts, Inc. as vice president, secretary-treasurer at the time of its creation and spin-off by Tandy Corporation in 1975. He was named a director in 1979, senior vice president and secretary in 1981, and chairman of the board in 1983. Prior to joining Tandycrafts, Inc., he had held a succession of posts with Tandy Corporation and its predecessors since 1948, and as a corporate officer since 1959. He is the last of the founders of the Tandy Companies in 1950 still active with them.

The board has named Kenneth L. Gregson, 60, president and chief executive officer, to the additional position of chairman of the board, effective July 1, 1990. Gregson joined Tandycrafts, Inc. in 1979 as president of its Tandy Leather Company division. He was named a director, president and chief operating officer of the company in 1981, and chief executive officer in 1983. Prior to joining Tandycrafts, Inc. he was an executive of the Radio Shack division of Tandy corporation from 1964, lastly as senior vice president and managing director of its operations in continental Europe. He joined the Tandy Organization in 1952.

During Michero's seven-year tenure as chairman, several new marketing projects were undertaken, sales grew from $61,000,000 to $108,800,000, net income grew by 29 percent, an unsolicited takeover bid was rejected, and an employee stock ownership plan was implemented which controls 38 percent of the outstanding stock, and has 89 percent of eligible employees participating. Stockholders' equity, after giving effect to the implementation of the employee stock ownership plan, increased 20 percent to $44,246,000, while operating income from continuing operations, before interest and taxes, grew by 135 percent from $2,824,000 to $6,642,000 during that time.

HIGHLAND PARK, MI (JUNE 13) PR NEWSWIRE - Chrysler Corporation (NYSE: C) announced today it will make $17.7 million in improvements, beginning early July, at assembly plants in Newark, Del., and Sterling Heights, Mich.

Investments for Newark will total $9.4 million while $8.3 million is earmarked for improvements at Sterling Heights.

The plant updates are designed to significantly improve customer satisfaction and quality for the 1991 Dodge Spirit and Plymouth Acclaim, made in Newark, and the 1991 Dodge Shadow and Plymouth Sundance, made in Sterling Heights.

New equipment investments at both plants will continue to support the improvement in welding reliability and paint application.

Another improvement, known as the "hot car concept," will supply electrical power to a vehicle as it moves through the assembly process, allowing operators to verify performance of electrical components and circuitry at the time of installation.

In addition, Chrysler's patented performance feedback system will include the ability to monitor and record the torque of screws and bolts as they are applied, reducing squeaks and rattles and providing a safety check.

Chairman Lee A. Iacocca, speaking to plant employees at a Town Hall

meeting in Sterling Heights, said these plant improvements, in combination with continued teamwork at the plants, will help Chrysler reach its quality targets the next two years.

"I've just come off the 'Chrysler in the '90s Tour,'" Iacocca said. "I've been talking up our product advantages to anyone who will listen -- how we have big advantages, but nobody knows it. By 1992, with plant improvements like these and your cooperation, I'm convinced we'll be building about as perfect a car as you can find. Now that's a big advantage and I, for one, won't let it go unnoticed."

#90164p5937 06/13/1990 ~PR Newswire

PARAMUS, NJ (JUNE 13) PR NEWSWIRE - MEDphone Corporation (NASDAQ: MPHO) announced today that The Medical Center of Delaware continues to expand its MDphone(TM) System service to corporate clients, with the recent signing of an agreement with Stine-Haskell Research Center, Newark, Del., a division of DuPont, according to S. Eric Wachtel, president of MEDphone Corp.

The MDphone System, developed by MEDphone Corp., Paramus, allows a trained medical clinician in the hospitals Emergency Department to diagnose and treat patients at the scene of a medical emergency, while awaiting the arrival of conventional emergency medical services (EMS) personnel.

"We're very positive about having direct communication with our local ER via MDphone," explains Robert B. Agnor, security-emergency coordinator at DuPont's Stine-Haskell. "Our people aren't used to dealing with emergencies."

Agnor of Stine-Haskell continues, "Last year we had a cardiac arrest on site and it took EMS personnel 11 minutes to respond. The person survived but it forced us to look at ways of improving our means of handling emergencies. The MDphone System provides a great deal of comfort for our people in dealing with worksite emergencies."

This brief-case sized device, when opened, automatically dials and telephonically links with the MDphone hospital base-station in the Medical Center's ER, for any medical emergency situation. A trained clinician, responding to the call, assesses the patient's condition by verbally communicating with those at the emergency site. The MDphone System also allows the doctor or nurse to monitor the patient's electrocardiogram (ECG), heartbeat and pattern, and to implement the most appropriate action within a matter of minutes.

In the event the patient is suffering a heart attack, the MDphone portable unit enables the attending medical clinician to remotely defibrillate (electrically shock) the victim, to establish a normal rhythm and heartbeat.

MEDphone Corp., Paramus, manufactures and distributes the MDphone System nationwide. The system provides a unique service that is the only interactive, medical emergency response system, offering immediate pre-hospital care and direct intervention by trained, medical personnel. Contact MEDphone Corp., Paramus, N.J., The Atrium, Suite 210, East 80 Rout 4, Paramus N.J. 07652-2647. Phone: 201-843-6644, or Fax: 201-843- 0327.

PITTSBURGH (JUNE 13) PR NEWSWIRE - Thomas H. O'Brien, chairman, president and chief executive officer, today announced that Thomas E. Paisley, III will become senior vice president for credit policy for PNC Financial Corp (NYSE: PNC).

He will assume the credit policy responsibilities previously directed by Bruce E. Robbins, who has been elected president of PNC's Central Bancorporation.

O'Brien said, "All of PNC's affiliate banks will benefit from Ted's experience of more than 18 years as a proven lender and credit manager. He has been an integral member of Pittsburgh National Bank's management team, and we are looking forward to Ted taking an active role throughout PNC."

Paisley, currently senior vice president for credit policy at Pittsburgh National, joined the bank in 1972 as a management trainee. Following various assignments, he was promoted to vice president in the Commercial Banking Division in 1978.

He was transferred to New York in 1980 to open the New York City Loan Production Office, where he also was vice president and general manager of the New York City branch office of PNC International Bank.

PNC, headquartered in Pittsburgh, is the nation's 14th-largest bank holding company with assets of $46.6 billion. PNC was formed in 1983 with the consolidation of Pittsburgh National Corp., Pittsburgh, and Provident National Corp., Philadelphia. Its principal banking affiliates include: Bank of Delaware Corp., Wilmington, Del.; The Central Bancorporation, Inc., Cincinnati, Ohio (includes banks in Ohio and Kentucky); Citizens Fidelity Corp., Louisville, Ky. (includes banks in Kentucky and Indiana); The First Bank and Trust Co., Mechanicsburg, Pa.; The Hershey Bank, Hershey, Pa.; Marine Bank, Erie, Pa.; Northeastern Bank of Pennsylvania, Scranton, Pa.; Pittsburgh National Bank, Pittsburgh; Provident National Bank, Philadelphia; PNC National Bank, Wilmington, Del.; and PNC National Bank of New Jersey, Cherry Hill, N.J. PNC currently operates 529 community banking offices in Pennsylvania, Kentucky Indiana, Ohio, Delaware and New Jersey. It also conducts business through additional offices in 15 states and seven foreign countries.

NEW YORK (JUNE 13) PR NEWSWIRE - American business leaders from Washington, Chicago, Pittsburgh and New York recently launched the Northern Ireland Partnership - USA at a meeting in the nation's capital.

The Partnership - USA is a national trade association that supports the Industrial Development Board (IDB) for Northern Ireland in its mandate of economic development and the fostering of trade and investment initiatives

between Northern Ireland and the United States.

The IDB is a Belfast-based government agency that works to further the economic and industrial interests of Northern Ireland by encouraging domestic and international investment and trade, and building stable employment in the province.

The newly established American organization assists the IDB in promoting Northern Ireland as an American trading partner and a strategically sound and competitive business location for the manufacture and distribution of goods and services into Europe.

In praising the formation of the Partnership - USA, Sean O'Dywer, deputy chairman, Desmond and Sons Limited, and the partnership's new international coordinator, said, "We are very proud to expand the IDB's global business network with the invaluable help of our American corporate friends. The partnership's corporate volunteers and IDB's professionals are working together to build a strong Northern Ireland- United States alliance to enhance access to business leaders and the sharing of economic development resources. Our goal is increased economic investment, trade and new jobs for Northern Ireland."

Founding Members Serve as Officers The first chairman of the Partnership - USA is Londonderry-born Tony Culley-Foster, president of Culley-Foster & Company, a Washington-based international business consultancy that represents European multi- national companies with investment in the United States.

The IDB - North America is headquartered in Chicago, with regional offices in Los Angeles and New York.

EAST HARTFORD, CONN. (JUNE 13) PR NEWSWIRE - International Lease Finance Corporation (NASDAQ: ILFC) (ILFC) has placed firm orders for 48 Pratt & Whitney PW2000 and PW4000 engines. The $312 million order is for engines to be delivered beginning in 1994.

The Beverly Hills, Calif.-based leasing company will take delivery of 28 advanced technology PW2000 engines for use on its growing fleet of Boeing 757 aircraft.

In addition, Pratt & Whitney will deliver 20 high-thrust PW4000 engines for use on ILFC's expanding fleet of wide-body aircraft.

"Leasing companies are major players in commercial aviation and ILFC is one of the biggest," said Gordon L. Smith, vice president- North America Marketing for Pratt & Whitney's Commercial Engine Business. "This is the third significant order from ILFC in the past 24 months. The reliability and overall performance of both products is contributing to the increased customer base we're achieving," Smith added.

Echoing Smith's comments was ILFC's president Steven F. Udvar-Hazy. "The marketplace for the PW2000 and PW4000 is getting bigger and bigger each year. You need reliable, fuel-efficient and low maintenance products to achieve such growth. We're buying what the market tells us it wants."

Both engines share common advanced technologies such as controlled diffusion airfoils, patented single-crystal airfoils, patented active clearance control and the industry's only proven full-authority electronic engine control (FADEC). The FADEC is built by United Technologies' Hamilton Standard unit.

"We're very proud of the fact that the PW2000 and PW4000 are the only engines in service operating with FADEC that have been certified by the FAA for 120-minute ETOPS (extended twin operations). Demonstrated reliability means a lot in this business," Smith said.

Pratt & Whitney is a unit of United Technologies Corporation (NYSE: UTX), based in Hartford, Conn.

#90164p5970 06/13/1990 ~PR Newswire
WINSTON-SALEM, NC (JUNE 13) PR NEWSWIRE - Integon Corporation announced today that it has initiated planning for two construction projects in

downtown Winston-Salem. The first will be a five-level public parking complex to be located at the corner of Fourth and Poplar Streets that will also include commercial office and retail sales space. The other will be a child-care facility on Holly Avenue that is anticipated to provide employees of companies with offices in the downtown area convenient access to child-care for their pre-school aged children.

Both projects have been under study by Integon officials for over two years, however, Integon's president and chief executive officer, James R. Ridley said that planning had been delayed, pending completion of negotiations for the sale of the company. Private investors, Jupiter Industries of Chicago and Head Insurance Investors, L.P. of New York, have agreed to purchase the company's assets in a transaction that is expected to be completed later this summer.

The 260,000 square-foot parking deck complex, envisioned as a joint venture invloving Integon and the City of Winston-Salem, will provide easy public access to approximately 700 parking spaces on the west side of the city's business district, which must now rely on surface parking lots and street parking. Most of the spaces will be available on a monthly lease basis, however, street-level metered parking is also envisioned.

The complex will also include two or three floors of space for commercial and retail development. Tenant requirements will determine the number of commercial offices and retail stores that can be housed in the approximately 28,500 square-foot planned for that purpose.

Plans call for the project's estimated $6.5 million in construction costs to be financed through bonds issued by a non-profit corporation established by the City of Winston-Salem to develop center-city parking facilities. Integon, which is providing backing for the bonds, will manage the complex under a lease agreement with the non-profit corporaiton. Financing and management arrangements are subject to the approval of the Winston-Salem Board of Alderman.

Construction of the parking deck complex is expected to begin in February, 1991 and should be completed by July, 1992.

Integon Corporation markets a diversified line of life insurance, annuity and property and causalty insurance products in 47 states and the District of Columbia. The company employs approximately 1,300 people in its corporate offices at the Integon Towers Building. Eight other firms, accounting for approximately 100 employees, also lease space in the building.

#90164p5972 06/13/1990 ~PR Newswire

OAKLAND, CA (JUNE 13) PR NEWSWIRE - ICF Kaiser Engineers announced today that it has been selected by the Massachusetts Water Resources Authority (MWRA) to continue providing construction management services for the massive $6 billion Boston Harbor cleanup project.

The five-and-a-half-year contract is worth $119.4 million.

The Boston Harbor cleanup project involves the design and construction of a new primary and secondary wastewater treatment plant and related facilities that will minimize the flow of inadequately treated wastewater into Boston Harbor.

The project is one of the largest wastewater treatment projects in the nation, and the biggest public works project ever undertaken in New England.

ICF Kaiser Engineers is a subsidiary of American Capital and Research Corporation (NASDAQ: ACRCA), an environmental and professional services firm based in Fairfax, Va. With this contract, American Capital and Research has a backlog of contract work exceeding $1 billion.

According to William C. Stitt, chairman and chief executive officer of ICF Kaiser Engineers, this contract represents an opportunity for the firm to use its recognized talents in construction management and environmental services to tackle what is arguably the largest and most visible environmental cleanup project underway in the country. "The cleanup of Boston Harbor demands the absolute best in environmental know-how and construction management skills. I believe that no other firm is more qualified to bring to the MWRA and the citizens of Massachusetts every measure of superior performance this project demands," said Stitt.

"ICF Kaiser Engineers submitted an impressive proposal. The firm will provide the talent and experience needed to manage day-to-day activities on a highly technical, difficult construction project," said Richard D. Fox, who directs MWRA's Harbor Construction Program.

ICF Kaiser Engineers' Continuing Involvement with MWRA The new contract follows a $20 million, two-year construction management services effort which was managed by ICF Kaiser Engineers for MWRA. As part of that effort, which began in April 1988, ICF Kaiser Engineers was responsible for a number of program management and technical support assignments. That work was managed by Ken Willis, a vice president and director of ICF Kaiser Engineers.

Willis will continue as project director for the new construction management contract. He will be joined by Chuck Lindberg and several

other senior managers of ICF Kaiser Engineers.

Overview of the Boston Harbor Cleanup Project The Boston Harbor cleanup project was initiated and is being carried out under a federal court order issued in may 1985 as a result of findings that wastewater discharges to the harbor were in violation of the Clean Water Act of 1972. The court ordered the construction of new primary and secondary treatment facilities and set a timetable for cleanup of the harbor. The MWRA was put in charge of the cleanup of the harbor.

Forty-three cities and towns in metropolitan Boston currently send their wastewater to the MWRA's two outdated primary sewage treatment plants, which together discharge nearly 500 million gallons of inadequately treated wastewater into the harbor each day. In addition, 500,000 gallons of sludge are discharged into the harbor daily on the outgoing tide. These discharges, plus the untreated wastewater that flows into the harbor from combined sewer overflows, have contributed to Boston Harbor's reputation as one of the most polluted bodies of water in the nation.

Major construction tasks on the Boston Harbor project will be completed throughout the decade. The entire project will be finished in 1999, bringing the harbor into compliance with the Clean Water Act and making it more suitable for swimming, fishing, and other recreational and commercial uses.

"In the future, similar harbor cleanup projects may be initiated at cities around the world, including San Diego, Hong Kong, and Sydney," added Stitt.

The New Contract Team Supporting the efforts of ICF Kaiser Engineers on the new contract is a strong, integrated team of subcontractors, including Stone & Webster, an engineering and construction firm headquartered in Boston; CH2M Hill, engineering consultants with experience in large municipal wastewater treatment systems and environmental engineering; and Professional Services Group, Inc., a firm that specializes in operating wastewater systems.

SAN DIEGO (JUNE 13) PR NEWSWIRE - Volkswagen of America today unveiled two new alternative fuel vehicles -- the Volkswagen Multi-Fuel Jetta and Audi Duo -- at the Responsive Energy Technologies Symposium and International Exhibition (RETSIE) '90.

Winfried Bernhardt, director of engine and transmission research division of Volkswagen AG, explained the benefits of these vehicles and the Volkswagen Groups' broad range of alternative field capabilities to a crowd of reporters.

The Volkswagen Jetta and Audi Duo both utilize new engine systems that rely on alternative fuels and/or electricity to reduce emissions and noise. "Vehicles possessing these alternative fuel power plants are the first step toward meeting the environmentally considerate global transportation needs of the next century," said Bernhardt.

Volkswagen and Audi are among only five automakers represented at RETSIE, which has as this year's theme "Energy Solutions 1990." The corporation's involvement in the symposium represents Volkswagen's commitment to advancing alternative fuel technology.

The Audi Duo first appeared at the Geneva Auto Show last March. Today marks the first public display of the multi-fuel Volkswagen Jetta and Audi Duo in the United States. Government agencies in California may be the first to take advantage of this technology through fleet purchases of the Volkswagen Jetta.

Volkswagen of America, Inc., headquartered in Troy, Mich., is a wholly owned subsidiary of West German automaker Volkswagen AG.

GRAND RAPIDS, MI (JUNE 13) PR NEWSWIRE - Guardsman Products, Inc., (NYSE: GPI) announced today that it has completed the purchase of the Scrunge(R) line of abrasive cleaning sponge products from the Church & Dwight Co., Inc., of Princeton, N.J.

The product line offers three varieties of the scratchless cleaning sponges for use with cookware, kitchen and for general household purposes.

The two-sided Scrunges have a scrubber side for removing heavier build-ups of dirt and grime and a sponge side for wiping surfaces clean.

Scrunge(R) sponges are currently distributed nationally through grocery channels. Sales for fiscal 1989 were approximately $3 million.

Chuck Bennett, president and chief operating officer of Guardsman, stated that the Scrunge(R) products will add substantially to the growing line of Guardsman consumer products that are distributed to food stores. Adding strong national brands such as Scrunge(R) will also help expand the distribution of some of our regional products.

The purchase of the Scrunge(R) product line continues the Guardsman commitment to grow its Consumer Products Group by acquisition and expansion of complementary products marketed nationally through established distribution networks.

Guardsman Products, Inc. is a diversified producer of consumer industrial coatings, consumer products and packaging services.

TORONTO (JUNE 13) PR NEWSWIRE - Royal Trustco Limited today announced that it intends to file a preliminary prospectus relating to a proposed issue of C$125 million unsecured subordinated debentures due July 9, 2010, to be issued at par with interest at the rate of 11.80 percent per annum payable semi-annually. This issue is subject to approval by the board of directors of Royal Trustco Limited and the issue is expected to close on July 9, 1990.

Underwriting the issue is Gordon Capital Corporation as lead manager with Burns Fry Limited, RBC Dominion Securities Inc., ScotiaMcLeod Limited, Toronto Dominion Securities Inc., Trilon Securities Corporation and Wood Gundy Inc. as co-managers. Proceeds of the debenture issue will be used to fund Royal Trustco's asset growth.

Royal Trust commenced operations in 1899. It provides a broad range of financial, investment, private and merchant banking and trust and advisory services throughout Canada and internationally and in the Northwestern United States through its subsidiary, Pacific First Financial Corporation. Royal Trust also operates in key financial centers in Europe, the United Kingdom and the Pacific Rim.

In 1989, Royal Trust had revenues of C$3.8 billion and net income of C$265 million. Net income for the three months ended March 31, 1990, was C$72

million compared with C$60 million for the same period in 1989. At March 31, 1990, Royal Trust had total balance sheet assets of C$40 billion and assets under administration of C$134 billion.

TAMPA, FL (JUNE 14) PR NEWSWIRE - Kimmins Environmental Service Corp. (NYSE: KVN) announced today that it filed a registration statement with the Securities and Exchange Commission in connection with a proposed offering of 800,000 shares of its common stock to be sold on behalf of the company.

The registration statement also covers up to 200,000 shares of the company's common stock plus up to 150,000 additional shares subject to the underwriter's over-allotment option, which will be sold for the account of the company's president. The offering will be managed by Whale Securities Co. The company intends to use the proceeds of the 800,000 shares to reduce indebtedness under certain outstanding revolving credit lines with its principal lending institutions.

Copies of the preliminary prospectus may be obtained from Whale Securities Co. at 650 Fifth Ave., New York, NY 10019.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold, nor may offers to buy be accepted prior to the time the registration statement becomes effective. This announcement shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of those securities in any state in which such offer, solicitation, or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

Kimmins Environmental Service Corp. and its subsidiaries provide solid waste management services including transportation, recycling and disposal; environmental contracting services including hazardous waste remediation and incineration, demolition and dismantling of industrial facilities, asbestos abatement and containment services, and environmental surety bonds.

Kimmins Environmental Service Corp. is headquartered in Tampa, Fla., and has regional offices in Niagara Falls, N.Y., and Houston.

Kimmins Environmental Service Corp.'s common stock is traded on the New

York Stock Exchange under the symbol "KVN."

#90164p5995 06/13/1990 ~PR Newswire

BLOOMFIELD HILLS, MI (JUNE 13) PR NEWSWIRE - Core Industries Inc. (NYSE: CRI) today announced its operating results for the quarter ended May 31, 1990. Net earnings amounted to $1,168,000 (12 cents a share) as compared with $2,125,000 (22 cents a share) last year. Net sales were $61,592,000 as compared with $64,734,000 last year.

The company's reduced earnings levels continue to be directly attributable to the disappointing performance of the Electronics Group. The disk drive test equipment market remains generally weak and the company's earnings have been adversely impacted by the bankruptcy of two major customers earlier in the fiscal year. The markets served by the company's machine tool electronics products remained soft during the current quarter. Negotiations are continuing with the customer who failed to perform its purchase obligations under an agreement involving the GSE/Tech-Motive product line. That non-performance continues to severely impact the company's operating results.

The Electronics Group is expected to perform substantially better next year due to new product introductions and intensified marketing efforts.

The Fluid Control and Construction Products Group and the Farm Equipment Group continue their strong performance and achieved increased earnings during the quarter. These product groups should continue to perform well next year.

Core Industries is a manufacturer of specialty products for four basic industries -- electronics, farm equipment, fluid controls and construction products, and industrial products.

CORE INDUSTRIES INC.

JERICHO, NY (JUNE 13) PR NEWSWIRE - Getty Petroleum Corp. (NYSE: GTY) today reported revenues and earnings for the first quarter ended April 30, 1990.

Total revenues for the first quarter ended April 30, 1990, were $251.0 million as compared with $273.4 million for the comparable period last year.

Income before provision for income taxes was $.3 million for the first quarter ended April 30, 1990, as compared with $12.7 million for the comparable period last year.

Leo Liebowitz, Getty's president and chief executive officer, reported, "The reduction in income is principally due to extreme volatility affecting our cost of product, a very competitive reselling market as well as $1.1 million of additional expenditures attributable to environmental compliance, partially offset by the reversal of a LIFO inventory reserve of $2.1 million."

Net income for the first quarter ended April 30, 1990, was $.2 million or $.02 per share as compared with $7.7 million or $.58 per share for the comparable period last year.

The Slattery Group Inc. self tender was completed at the end of April. The Slattery Group earnings included in net income were $.7 million for this quarter as compared to $.6 million for the comparable period last year.

Getty Petroleum Corp., one of the nation's largest independent marketers of gasoline and petroleum products, markets in a 13-state area, Maine through Virginia. The company is also a major marketer of heating oil and is a wholesale distributor of a variety of petroleum products through its east coast petroleum storage of distribution network.

CINCINNATI (JUNE 13) PR NEWSWIRE - The Procter & Gamble Company (NYSE:

PG) and American Cyanamid (NYSE: ACY) announced today that they have reached agreement on the sale of the toiletries and fragrances portion of Cyanamid's Shulton Group, excluding the Pierre Cardin fragrance line.

Under the agreement, P&G will purchase Shulton's Old Spice and Sante Fe men's toiletries and fragrances, and several other products in the U.S. and internationally. American Cyanamid will pursue the sale of Shulton's line of Breck hair care products and Lady's Choice personal care products to other parties. The total value of these combined transactions to American Cyanamid will be $370 million. The final cost to P&G will be somewhat in excess of $300 million, depending on the revenues to Cyanamid from the sale of the Breck and Lady's Choice product lines.

Under the agreement, P&G will acquire manufacturing facilities in Memphis, Tennessee and three international locations.

The agreement is subject to the normal Hart-Scott-Rodino review by the Federal government.

"This gives us a strong foothold in the male toiletries business worldwide " said Procter & Gamble Chairman and Chief Executive Edwin L. Artzt. "The male toiletries and fragrances markets have great growth potential, and Shulton's Old Spice represents an outstanding first entry for us. It has the quality and reputation to become a major world brand."

Procter & Gamble had sales of $23.3 billion for the twelve months ending March 31, 1990. The company manufactures and markets a wide range of laundry and cleaning products, personal care products including pharmaceuticals, food and beverage products, and a variety of products for business and industry.

CONTACT: Teri O. Glover, 513-983-1351, or William F. Dobson, 513-983-9546 both of The Procter & Gamble Company.

#90164p6008 06/13/1990 ~PR Newswire

ANN ARBOR, MI (JUNE 13) PR NEWSWIRE - Daedalus Enterprises, Inc. (OTC: DDEI) today announced earnings of $249,000, 38 cents per share, on revenues of $1,567,000, for the third quarter of the fiscal year ended July 31, 1990.

This is compared to earnings of $163,000, or 28 cents per share, on revenues of $950,000 for the comparable period of the preceding fiscal year.

Earnings for the nine months ended April 30, 1990, were $551,000, or 85 cents per share, on revenues of $4,155,000, compared with $808,000, or

$1.38 per share, on revenues of $3,694,000 for the comparable period of the preceding fiscal year.

The reduction in net earnings is primarily attributable to increases in research and development and the exhaustion of all tax-loss and credit carryforwards which contributed approximately $36,000 and $226,000, respectively, to the net earnings of the third quarter and first nine months of last fiscal year.

Backlog as of April 30, 1990, was $1.9 million, compared with $3.1 million as of July 31, 1989, due to the capture of more than $2.9 million of new contracts during the nine months ended April 30, 1990, offset by sales against backlog. The majority of the current backlog is expected to be recognized as sales in the current fiscal year. Backlog additions will continue to be made as items currently under negotiation are finalized.

As was disclosed previously by the company, the record earnings of fiscal 1989 are not likely to be sustainable. Among the factors contributing to this are: the consumption of all tax-benefit carryforwards in fiscal 1989, increased expenditures on internal research and development, and increased emphasis on marketing in order to facilitate company business growth. The company is in the process of introducing new products which it believes will broaden its market in environmental remote sensing technology.

Daedalus Enterprises, Inc. is a leading developer and manufacturer of remote sensing instruments used for environmental measurements and monitoring.

The company's stock is traded in the over-the-counter market under the symbol DDEI.

PROVIDENCE, RI (JUNE 13) PR NEWSWIRE - James P. Murphy, executive vice president and director of public policy and external relations for Fleet/Norstar Financial Group (NYSE: FNG), Tuesday (June 12) called for cooperation between the banking industry and federal regulators regarding Community Reinvestment Act (CRA) examinations scheduled for later this year. Murphy also serves as Fleet/Norstar's corporate CRA officer.

Addressing bankers and regulators at a community banking issues meeting hosted by the Federal Reserve Bank of New York, Murphy said banks are concerned because they do not know what criteria examiners will use when they review loans made by banks in an effort to comply with the provisions of CRA.

Pointing out that "banks in the northeast are undergoing stringent examinations by the Office of the Comptroller of the Currency, in which many loans that bankers believed to be sound are judged by the examiners to be nonperforming," Murphy said banks could find themselves in a dilemma.

"One arm of federal regulatory control, the Community Reinvestment Act, encourages banks to engage in credit extensions which, by their very nature, are risky. A Comptroller of the Currency publication on community development finance, dated March 1989, encourages lenders to have flexible loan underwriting policies, consider non-traditional sources of income, adopt flexible approaches to inner-city property values, use flexibility in applying loan-to-value ratios and to consider sweat equity contributions.

"At the same time, however, the regulators have been conducting intense examinations of asset quality and communicating loan review standards that look askance at the flexible loan underwriting criteria I just mentioned."

Murphy indicated that banks want to make safe and sound CRA loans, but first "our industry and the federal examiners must reach some understanding... before the CRA examinations begin this summer. My owm feeling is that the examining agencies should develop a unique category, with special review criteria, for CRA credits. The federal government has taken this kind of approach in the past to address social reforms, and I believe it's fully justified with regard to credit extensions made in good faith by banks as they strive to comply with the provisions of the Community Reinvestment Act."

SAN JUAN (JUNE 13) P RNEWSWIRE - The Office of the Commissioner of Financial Institutions today gave its final approval to the proposed merger of Banco Popular (NASDAQ: BPOP) and Banco de Ponce (NASDAQ: BDEP) by issuing an amended resolution which modifies the conditional approval

granted on May 31, 1990.

The office issued the amended resolution after studying a Motion for Reconsideration filed jointly by Banco Popular and Banco de Ponce on June 1 in response to the commissioner's conditional approval.

Spokesmen for Banco Popular, BanPonce Corporation and Banco de Ponce said today that they were satisfied that this important phase of the merger approval has now concluded.

Richard L. Carrion, president and chief executive officer of Banco Popular and Alberto M. Paracchini, chairman of BanPonce Corporation and president and chief executive officer of Banco de Ponce, issued the following statement: "We feel the conditions established by the commissioner related to the Banco Popular/Banco de Ponce merger provide the resulting institution the necessary flexibility to compete in the banking market and protect consumer needs. We are pleased that all of the commissioner's concerns about maintaining a competitive banking market in Puerto Rico have now been resolved."

Messrs. Carrion and Paracchini added, "The conditions to the approval imposed by the Office of the Commissioner allow us to proceed with this historic transaction, which will benefit all of Puerto Rico."

They commended the Office of the Commissioner for its work in analyzing the merger and its potential benefits for all parties involved: the institutions that will merge, the consumers and the people of Puerto Rico.

"We are confident that all other pending approvals for this merger will be granted in the near future," they said.

Banco Popular and BanPonce Corporation shortly will submit to the Federal Reserve System their final application to merge.

PHILADELPHIA (JUNE 13) PR NEWSWIRE - Reading Co. (NASDAQ: RDGCA) today announced that it had been awarded approximately $5.2 million plus accrued interest by an arbitrator.

The award arose out of a 1986 agreement between the company and Trailer Train Co., pursuant to which Reading sold its Trailer Train stock back to Trailer Train, but retained rights for a five-year period to receive distributions as if it had continued to be a shareholder.

In 1987, Trailer Train and its shareholders entered into a stock acquisition agreement whereby Trailer Train and several large shareholders acquired shares of Trailer Train's outstanding common stock. The arbitrator held that the Trailer Train shareholders' agreement was a plan covered by Reading's agreement, having the effect of a dividend, and that Reading was entitled to the additional consideration. Reading said it expects to receive payment of the award and reflect the associated gain in the quarter ending June 30, 1990.

#90164p6060 06/13/1990 ~PR Newswire

SAN FRANCISCO (JUNE 13) PR NEWSWIRE - Levi Strauss & Co. announced today it has closed on the purchase of the historical Icehouse at 151 Union Street from the Bank of America for $37.5 million.

The company bought the 200,000 square foot office complex, adjacent to Levi's Plaza, to provide for immediate and projected growth of its home office departments. The company currently employs 1,500 people at Levi's Plaza on Battery Street. It plans to utilize as much as 50 percent of the Icehouse by the latter part of 1991.

"New priorities are shaping the workplace of the future," said George B. James, Levi Strauss & Co.'s senior vice president and chief financial officer. "The Icehouse will allow us to design a work environment that not only incorporates changing technologies, but one which is flexible, actively considers ergonomic concerns and fosters a collaborative environment among colleagues."

James explained that the Icehouse will allow the company to satisfy its need for additional office space while keeping its home office operations centrally located in the North Waterfront area of the city.

A historical landmark, the Icehouse consists of two interconnected buildings that were constructed in 1914 by the National Ice & Cold Storage Co. Until the early 1960s, the buildings were used for ice storage and delivery. In 1967, the buildings were converted to designer showrooms and later to office space in 1985. James said the complex has been seismically upgraded and meets all existing code requirements.

Levi Strauss & Co. dedicated the 8.2-acre Levi's Plaza in 1982. It includes the five office and retail buildings including the Levi Strauss, Haas, Koshland and Saddlemen Buildings, as well as the renovated Stern Building. In addition, the Plaza comprises a 3.2-acre grassy park.

Levis Strauss & Co. is the world's largest brand-name apparel manufacturer with 1989 sales in excess of $3.6 billion. The company designs, manufactures and markets jeans and casual apparel for men, women and children, including slacks, shirts, jackets and skirts. It employs more than 31,000 people worldwide.

DENVER (JUNE 13) PR NEWSWIRE - Generation 5 Technology (NASDAQ: GFIV) today announced the signing of a joint marketing and development agreement with Oracle Corp. (NASDAQ: ORCL).

The agreement focuses on providing computer solutions to the growing market for Geographic Information Systems (GIS). Used by federal agencies, state and local governments, utilities, and large industrial facilities, GIS systems link electronic maps with a wide variety of database information.

Generation 5 Technology's Geo/SQL software has gained industry attention by being the first sophisticated GIS system to integrate the AutoCAD graphics environment with industry-standard SQL databases such as ORACLE. The software allows low-cost desktop 386 PCs, PS/2s, and UNIX workstations to be linked with large corporate databases running on networks, minicomputers and mainframes.

"Many large customers are interested in making geographic information a central component of their overall database architecture," said Craig Conway, Oracle's vice president of direct sales for the Western Region. "Geo/SQL, in combination with ORACLE provides a way of distributing key geographic information throughout hundreds of computers, from PCs to mainframes -- linking them into a single, integrated information management system. We're excited about working together with Generation 5 Technology to provide complete solutions to the growing GIS market."

"We see this as a significant agreement for us," said Mark Wilding, president of Generation 5 Technology. "Oracle is the leading supplier of database software and services in the world, and building strategic ties both technically and in our corporate marketing makes perfect sense.

"With their system integration and focused state and federal government groups, Oracle has the resources to provide not only sales support for large customers, but complete RDBMS application solutions."

Generation 5 Technology, is a pacesetter in the emerging fields of Automated Mapping (AM/FM), Geographic Information Systems (GIS), and Facilities Management (FM) software systems. The company offers its products in the U.S. and Canada (through Generation 5 Technology Ltd. Canada), and in approximately 30 countries throughout the world.

Oracle, headquartered in Redwood Shores, Calif., is the largest supplier of DBMS software and third largest software and services company in the world.

DALLAS (JUNE 13) PR NEWSWIRE - Recognition Equipment Inc. (NYSE: REC)

announced today it has completed the planned sale of its POSTALogic Division to Bell & Howell Co. POSTALogic is responsible for development and sale of mail reading and sorting components and systems.

The purchase price was $4.25 million plus certain royalties for the next five years. The company's third quarter results are expected to include a non-operating gain of approximately $3.3 million from the sale.

The sale of the business unit is part of Recognition's planned divestiture of several operations, which the company announced in October 1989. Selling these operations will allow Recognition to focus on the market for document imaging products.

"The 18 people associated with POSTALogic are on the leading edge of high-speed mail processing technology," said Robert Vanourek, co-chief executive officer of Recognition, in making the announcement. "We believe both the technology and the people will flourish in a corporation with a corporate commitment to the postal and mail sorting markets."

Recognition, headquartered in Dallas, and its wholly owned subsidiary, Plexus Software Inc., manufacture, sell and service image and data capture hardware and software systems for customers throughout the world.

EDEN PRAIRIE, MINN (JUNE 13) PR NEWSWIRE - CPT Corp. (NASDAQ: CPTC) announced today a number of strategic moves designed to focus the company's resources on maximum productivity. These moves include the following:

First, the formation of separate business units that will concentrate all marketing, engineering, and customer support efforts into cohesive teams. Each unit is headed by a business manager with full responsibility for focusing product development and direction. The units are as follows:

-- Government Systems and Tempest Products -- Imaging Systems, most notably, the CPT Image File(TM) System -- CPT Office Dialog System(TM) (ODS)(R) and Bridgeboard products -- PC Workstations, Printers, and CPT Office software. Vice President for Business Groups Wayne Whitman said, "This structure will give us focused product development efforts and greater customer responsiveness as well."

Whitman added that the company is especially pleased with new product and application developments for its Image File System (IFS), an

optical-disk-based document storage and retrieval system available in both single-user and multi-user configurations.

Second, the company announced plans to coordinate sales efforts more closely with the business units. To achieve this goal, CPT's Vice President of Sales, Jerry Cox, has also assumed responsibility for manufacturing and distribution in addition to both domestic and international sales organizations. Said Cox, "We're going to make sure that our sales and distribution efforts are very well coordinated, and that we're getting our customers what they need."

Third, CPT announced that it had received commitments from its employees on a number of cost-cutting initiatives. These include a freeze on wage increases, a freeze on use of any outside consultants or contractors, and a pledge by salaried employees to work longer hours.

Finally, the company announced that it had reached agreement with two new independent distributors in Scandinavia. This announcement is especially significant given CPT's continued strong international sales focus. Currently, international sales account for 60 percent of the company's total sales.

Capture Technology, based in Stockholm, Sweden, is a company focused on optical solutions to office and banking systems. With sales offices in Stockholm, Norway, and Finland, Capture Technology personnel will be selling CPT's Image File System (IFS).

Business Data Systems, based in Helsinki, Finland, has also been appointed as a distributor. This company is selling CPT's new PC workstation products as well as CPT's UNIX-based office system.

CPT Corp. is a leader in the development, manufacture, and worldwide marketing of related products and services designed to make office workers more productive.

DOMINGUEZ, CALIF (JUNE 13) PR NEWSWIRE - Pic 'N' Save Corp. (NASDQ: PICN) announced today that its sales for the four weeks ended May 27, 1990 were up 16.0 percent to $37,000,000, from $31,899,000 in the prior year. Sales for the 17 weeks ended May 27, 1990, were 18.5 percent to $159,970,000, from $131,646,000 in the prior year. Sales in comparable stores for the month of May and for the year to date increased over the prior year by 5.4 percent and 5.7 percent, respectively.

During the month of May, Pic 'N' Save Corp. closed one store in Monterey Park, CA, bringing the total number of stores in operation at the end of the month to 189.

"Pic 'N' Save sales continue to show good increases over prior year comparisons, even though the Easter season negatively impacted Mother's Day business this year," said Lewis B. Merrifield, III, Chairman and Chief Executive Officer.

"Our newer stores in the Southeast region continue to lead the way with significant increases in comparable store sales results. Sales increases in all stores resulted from both an increase in customer traffic as well as an increase in average transaction size," Merrifield said.

Merrifield further stated that several merchandise categories contributed to the solid sales performance during May, including ladies apparel, health and beauty aids, summer-related merchandise, and household domestic products. "We believe that our current inventory levels and merchandise presentation have been effective in attracting new customers."

The company, through its California subsidiary, PNS Stores, Inc., operates a chain of 189 retail stores in the United States, in the Far West, the South, and the New York Metropolitan area under several business names depending upon the market served. These stores all specialize in new, first-quality, variety general merchandise which is sold at substantial reductions from original retail prices.

MARKHAM, ONTARIO (JUNE 13) PR NEWSWIRE - Magna International Inc. (NASDAQ: MAGAF, TSE: MG.A, MG.B) today announced results for the third quarter of fiscal 1990. Sales increased by 19.9 percent to $517.6 million as compared to the second quarter. Pre-tax operating results improved to a loss of $2.1 million compared to a pre-tax operating loss of $35.2 million for the second quarter. Lower production volumes caused by the overall slowdown in the automotive industry have resulted in sales being 4.4 percent lower than the comparable quarter of the previous year. All results are reported in Canadian dollars.

MAGNA INTERNATIONAL INC.
Financial Highlights

(Unaudited)
(000's except per share figures)
Three Months Ended

	April 30 1990	January 31 1990
Sales	$517,607	$431,621
Pretax loss from operations before provision for write)offs and other gains	$ (2,138)	$ (35,242)
Net Loss	$ (6,408)	$(186,636)
Loss per share	$ (0.23)	$(6.71)
Cash flow from operations	137,969	14,559

As previously disclosed, operating losses and the provisions for write)down of assets during the second quarter resulted in the company not meeting certain financial tests under its lending agreements. The company is negotiating with its lenders to complete a debt restructuring and reduction plan. During this period, the company continues to receive co-operation from its major customers and suppliers and is in the process of finalizing a standstill agreement with its lenders.

Improvements in working capital in the third quarter, including the reduction of inventory levels, have generated $112 million in cash. In addition, cash flow from operations has improved from $1 million in the second quarter to $25.6 million in the third quarter as a result of higher production levels and streamlining of operations. The company is expected to be able to carry on its business in an orderly fashion and meet its obligations during the coming months. The company has stringent disciplines in place to curtail spending and control overheads and these programs have improved results and the cash position of the company. Management remains committed to curtailing growth and to continuing its program of reducing debt through divesting of its non-profitable operations as well as selling non-strategic assets and real estate and selectively joint venturing certain operations.

The company still sees a weak market during the fourth quarter of fiscal 1990, which together with ongoing restructuring costs will continue to have a negative effect on results. The company has a number of unprofitable automotive contracts which are phasing out and the programs which remain in place are expected to allow the company to improve its performance in fiscal 1991.

The Sept. 1, 1990, dividend on the company's Class A and Class B shares has been suspended.

#90164p6089 06/13/1990 ~PR Newswire

WELLINGTON, NEW ZEALAND (JUNE 14) PR NEWSWIRE - Ameritech (NYSE: AIT) and Bell Atlantic (NYSE: BEL) today announced that they and two New Zealand companies, Fay, Richwhite Holdings Ltd and Freightways Holdings Ltd, will purchase New Zealand's state-owned telephone company for NZ$4.25 billion (approximately U.S. $2.4 billion). The Telecom Corporation of New Zealand is that country's principal supplier of domestic and international telecommunications services, including cellular mobile and directory services. It is being sold as part of the New Zealand Government's ongoing privatization of state-owned enterprises.

At the completion of the transaction, Ameritech and Bell Atlantic will own 100 percent of the company. To meet New Zealand Government requirements, they will reduce their combined ownership position in the company to 49.9 percent. The companies each will own 24.95 percent. The consortium's two New Zealand partners, Fay, Richwhite and Freightways, will each purchase 5 percent of the shares from Ameritech and Bell Atlantic. The remaining shares, representing 40.1 percent of the company, will be offered on the New Zealand Stock Exchange and in international equity markets including the U.S. The public offerings will be aimed at maximizing New Zealand investor participation in the ownership of the company.

Fay, Richwhite and Freightways also plan to form a new company to handle all of Telecom's international calls that terminate in the contiguous U.S. Alaska, Hawaii, Puerto Rico and the U.S. Virgin Islands. This would be done to comply with the terms of the Modification of Final Judgment that prohibit Ameritech and Bell Atlantic from entering the long distance business in the U.S. Ameritech and Bell Atlantic plan to file immediately for MFJ relief on an expedited basis.

Other conditions of the sale require the company to adopt certain policies designed to ensure reasonable standard service rates throughout New Zealand.

New Zealand Telecom operates four regional local exchange carriers serving 1.4 million access lines with a network that makes extensive use of fiber optic and digital technology. By the end of 1990, nearly 90 percent of all telephone lines will be served by electronic switching systems.

The company also provides national and international trunk and data transmission services; cellular mobile telephone service to a population base of 3.3 million; directory services; telephone equipment and repair, and value-added services.

For the year ended March 31, 1990, the company had net income of approximately US$148 million on revenues of approximately U.S. $1.31 billion. The year's earnings reflected expenses associated with prior year tax liabilities of approximately U.S. $13 million and ongoing restructuring charges of approximately U.S. $17 million.

Ameritech is the Chicago-based parent of Bell companies serving 12 million customers in Illinois, Indiana, Michigan, Ohio and Wisconsin. Other Ameritech companies provide cellular communications, directory publishing, voice messaging and audiotex services. Ameritech's total assets are U.S. $19.8 billion.

Bell Atlantic Corporation is the Philadelphia-based parent of telephone companies serving more than 17 million customers in the mid-Atlantic region of the U.S., and companies that provide cellular communications, computer maintenance and financial and leasing services in U.S. and international markets. The company had 1989 assets of U.S. $26.2 billion.

Fay, Richwhite is an independent, privately-owned merchant bank based in New Zealand, involved in capital markets, corporate finance and securities trading.

Freightways is one of New Zealand's largest private companies with major interests in service industries, including couriers, security, transport, computers and telecommunications.

CONTACT: Steve Ford of Ameritech, 312-750-5205; or Jack Baird of Bell Atlantic, 703-974-5450 or 703-974-5547

#90164u0196 06/13/1990 ~United Press International

(JUNE 13) UPI - Five states... South Carolina, Arkansas, Maine, Virginia and North Dakota... held primaries Tuesday. For the first time since Reconstruction in South Carolina, a black candidate has been nominated by a major party for statewide office. State Senator Theo Mitchell, a Democrat, will face Republican Governor Carroll Campbell in the fall. Campbell was unopposed for the G-O-P nomination.

In Arkansas, black real estate agent Kenneth ''Muskie'' Harris claimed victory over Ku Klux Klan sympathizer Ralph Forbes in the primary for the Republican Arkansas lieutenant governor's nomination. He'll face the Democratic nominee, former Representative Jim Guy Tucker of Little Rock, this November.

Algeria's interior minister says early returns show the fundamentalist Islamic Salvation Front leading the ruling National Liberation Front in

Tuesday's local and provincial elections. The results are a surprise. Observers had expected the ruling party to finish first. The balloting was Algeria's first multi-party elections since independence from France in 1962.

U-S Embassy officials in Singapore are questioning the nationality of the skeletons of 30 men that Malaysian officials believe may those of American soldiers killed during the Vietnam War. The bones... which included so-called ''dog tags''... were found in seven barrels aboard a boat carrying Vietnamese refugees. The boat landed in Malaysia after springing a leak.

The China Daily newspaper says two students were killed and 24 injured when a student brought an old artillery shell to class and it exploded in the crowded schoolroom. The incident took place in a rural village, about 300 miles northwest of Shanghai. It happened recently, but the date was NOT disclosed.

#90164u0208 06/13/1990 ~United Press International
(JUNE 13) UPI - The Senate handed President Bush a birthday present Tuesday. It failed by three votes to override his veto of a three-year, two-BILLION-dollar authorization for Amtrak... the country's passenger rail network. The failure to override preserves Bush's UNblemished record of winning veto fights with the Congress.

Later, at a G-O-P fund-raiser that raised nearly seven-Million dollars for 1990 congressional hopefuls, more than four-thousand Republicans sang happy birthday to Bush. Earlier, the president had a birthday lunch at the White House with American hero and former test pilot Chuck Yeager. He also made a telephone call to congratulate Texas Ranger's pitcher Nolan Ryan, who tossed a record sixth career NO-hitter Monday night.

#90164u0304 06/13/1990 ~United Press International

(JUNE 13) UPI - The major races in Maine's primary elections Tuesday were for nominations to the House seat being vacated by Representative Joseph Brennan, a Democrat trying to regain his job as governor. On the Republican side, former Congressman David Emery easily defeated state Representative John McCormick Junior to get the G-O-P nomination. In the Democratic race, Attorney General James Tierney and state Senator Thomas Andrews are running neck-and-neck at the top of a five-candidate field.

The Dominican Republic's Central Electoral Board Tuesday declared President Joaquin Balaguer the official winner of elections held nearly one month ago. But his two major rivals say they'll challenge the results... which were delayed while officials reviewed the vote count following charges of electoral fraud.

The fire that's been burning since Saturday aboard the Norwegian tanker Mega Borg off the Texas Gulf Coast has been brought under control. Coast Guard officials say the hull might cool enough Wednesday so firefighters can use flame-smothering foam on any remaining hotspots. In Galveston, Norway's consul general will open an inquiry into the accident Wednesday.

Senator David Durenberger will defend himself when the Senate Ethics Committee resumes its public investigation of the Minnesota Republican Wednesday. Durenberger is accused of using a book publishing deal to bypass limits on the amount of outside income senators can earn. On Tuesday, a special counsel for the ethics panel recommended Durenberger be denounced. That's the harshest penalty the Senate can mete out short of expulsion.

(JUNE 13) UPI - Maryland state police Tuesday arrested a Pennsylvania air

traffic controller at Baltimore-Washington International Airport for allegedly threatening to hijack a commuter plane to Cuba. The incident led the U-S-Air flight to abort its takeoff and return to the terminal, where 33-year-old Robert Fletcher was arrested. NO one was hurt. Authorities say they're NOT sure of a motive.

New York City police say Georgette Mosbacher, wife of Secretary of Commerce Robert Mosbacher, was robbed Tuesday by a well-heeled man with a submachine gun as she got off an elevator at Manhattan's luxury Barbizon Plaza hotel. Mrs. Mosbacher was UNhurt in the incident. The thief got away with Mosbacher's jewelry, 400 dollars in cash, her passport and some papers.
